"The Coin Machines Merry-Go-Round"

By Bill Gersh

CREDIT BUREAU GAINS MORE SUPPORT

A few weeks ago we again introduced our idea for a Coin Machines Credit Bureau. We proposed that it become a distinct division of the National Board of Trade of the Coin Machines Industry, which we had also formerly urged for the trade. It was presented because it was sure to gain the proper recognition for all the varied members of this industry, to continue on a more profitable basis from now until the war is over, and especially during the post-war era. The idea for a Credit Bureau has won wide support. More and more letters

arrive recommending that such an agency be put into instant operation before the war is over so that it will act as a guide for the post-war era when it will most certainly prove most important.

In our past week's issue we reported some of the letters written us. These foresaw that such an agency could also give recognition to everyone of the members of this business and thereby clarify much of the muddle which has existed in this industry in regard to who's who and what. Many of these letters were from outstanding leaders in this industry. Some of them reported that the idea for a Credit Bureau in conjunction with a National Board of Trade was the most outstanding need of this business.

This past week's issue also reported a letter from one of our subscribers enclosing a circular which had been mailed to radio retailers and which offered for sale to these men thruout the country the bankrupt stock of one phono manufacturer. In the letter this subscriber wrote us he claimed that here alone was a most urgent reason for a National Board of Trade to prevent such things. A National Board of Trade could instantly have followed up this mailing to all radio retailers and also have advertised in their trade papers advising these men what they were buying. At the same time all music associations would be notified to be on the lookout. In general, an instantaneous follow-up would have occurred to nip this thing right in the bud.

We have been in receipt of letters explaining the work that the A.O.L.A.C. of Los Angeles are doing for a revision of present Federal taxation. The A.O.A. (Arcade Owners Ass'n.) are also working on this same problem. Here is an organization in Los Angeles and another in New York, 3,000 miles apart, working for the same conclusion. Were there in existence at this time a National Board of Trade these problems could be efficiently and intelligently handled without the need for either organization giving so much of their time and finances to accomplish something to benefit all the nation's coin machine trade. A National Board of Trade could place this problem before all the men engaged in those divisions of the field and ask for them to come to the help of these two organizations for their benefit, and not just for these associations.

A long distance phone call came in from Cleveland, this past week, advising that a firm there had rushed a \$100.00 deposit to someone in the East and now couldn't obtain their money nor even an answer to their letters and wanted to know something about this firm and whether to take the matter to the courts, etc. Were there a Credit Bureau in existence this would never have happened. The regular reports of such a Bureau would have prevented it. At the same time the parties to this deal would have much better respected each other because of the fact that a Credit Bureau was in the picture. They would not want to have their reputations injured on a national basis. And there is no doubt that a Credit Bureau would act to keep firms more in line on a more businesslike basis.

Once again we urge our subscribers to think over the necessity for a National Board of Trade and the need for a Credit Bureau. Events are continuing just as speedily now as they ever did and therefore while this industry is smaller and a more highly concentrated unit a National Board of Trade and a Coin Machines Credit Bureau are much more easily possible.

TAXATION

From California comes word that Samuel "Curley" Robinson, managing director for AOLAC (Associated Operators of Los Angeles County, Inc.) and the organization's attorney, Arthur Mohr, have arranged to be present when the Miscellaneous Tax Sections in the New Revenue Bill are to be considered in Washington. These men seem to agree that certain types of coin operated equipment are being unfairly taxed as regards coin

"The Coin Machines Merry-Go-Round"

machines taxation generally. Both probably have fine arguments prepared to present to the Committee which will meet on General Revenue Revision. It is our hope, as well as that of most others thruout the country, that they will be successful.

At the same time the A.O.A. (Arcade Owners Ass'n.) will also have some men present at these hearings to present their arguments as to why the tax in their case is unfair. They will especially present the problem of the "seasonal arcade" and will show that an arcade which is only open during the summer months, actually enjoying about 6 profitable weeks, should not be taxed on the same basis as are arcades that are open all year around.

It should be remembered that coinmen were among the very first to gladly accept Federal taxation because of the fact that they realized such taxation was necessary to the successful conduct of the war. But, the peculiar fact remains that very few outsiders understand the problems of this industry and whereas other industries are subject to occupational taxes this one is subjected to individual equipment taxation. In short, where a retail druggist will pay for a license for doing business as a druggist, a coinman pays taxes for each and every machine he has. This is understood to be due to the fact that each machine is considered a sort of retail establishment in itself and therefore the lawmakers believed that each machine should be individually taxed. Gradually, tho, all this is being revised as lawmakers everywhere more clearly understand the unique problems of this industry. The trouble is that so many coinmen are pushed into dire hardship until revisions are made.

There is no one in this industry that isn't willing and even eager to pay his taxes at this time for he realizes that not only does such taxation grant him a license that is respected in most instances, but, that it also helps to conduct successful administrations in his own community, and in the case of the Federal government, is most necessary for a successful conclusion of the war.

It is our hope that these men who will appear before the Committee on General Revenue Revision will not knock one machine against another but that they will clearly and completely point out the reasons why the Federal government would gain greater revenue by a more judicial taxation program and would at the same time eliminate undue hardship to the men in this industry. It is not the purpose of taxing bodies to tax firms out of business.

THE BLUE BOOK

We've been asked by subscribers for sometime now whether we couldn't help with the problem to eliminate open publication of prices wherein these are seen by the public, press and various officials and politicians thruout the country.

It would be directly to the advantage of everyone engaged in this industry to eliminate the open publication of prices on equipment. Especially such equipment as arouses speculation among various politicians who foresee a possibility for greater taxation and the opportunity to grab some front page publicity.

It would therefore be to each and every coinman's welfare to eliminate the sort of publicity which has been instrumental in bringing about taxation in various communities. We have just filed a letter from one coinman advising what work he was forced to do to squelch a discriminatory tax law because of the fact that one politico got up on his hind legs and read a clipping wherein it was stated that music machine operators were now enjoying a 20% increase in collections and that all this community wanted was, "but 10% of that increase".

A lot of good has been done thru proper publicity. But, a lot of harm has also been done by those who seek to greedily gain what they themselves are at the same time destroying by such publicity. Open price publication and intensified publicity destroys more than it builds and when it is eliminated, and only then, will this industry rightfully take its place with other industries.

The Cash Box has in its files a "Blue Book" which will solve this problem and which will be presented at the appropriate time. This "Blue Book" is the result of many years of study of this industry and will eliminate once and for all time the need for price publication that is seen by storekeepers, politicians, and other outsiders as well as the general public, just as it has been carefully eliminated by every other industry in this country.

FREIGHT RATES DROP

The ICC (Interstate Commerce Commission) revoked its year old authorization of an average 6% increase in freight rates (and a 10% increase in commutation fares) to go into effect on May 15, 1943 to the same level the railroads obtained in 1941. This is naturally good news to all the industry. It saves thousands of dollars in shipping charges. The decision was based on a hearing at which the OPA (Office of Price Administration) and other government agencies contended that the increases were unjustified in the light of increased revenues of the railroads and were also out of line with the stabilization program.

HONORABLE MENTION

Our Honorable Mention Award this week goes to Albert Wertheimer of Davis Sales Company, Syracuse, New York, who is serving on the U.S. Treasury War Savings Staff. The work that Al is doing in this regard not only reflects with honor upon all the industry but is the sort of work The Cash Box hopes will be done by more and still more men engaged in this business, gaining respect and honor from their communities, along

The first part of the document discusses the general principles of the proposed system, which is designed to be both efficient and equitable. It outlines the various components and the way they will be implemented. The second part provides a detailed description of the specific measures that will be taken to achieve the desired objectives. This includes a list of the key areas of focus and the steps that will be taken to address each one. The third part of the document discusses the expected benefits of the system and the ways in which it will be evaluated. It also includes a section on the timeline for implementation and the resources that will be required. Finally, the document concludes with a statement of the author's confidence in the success of the proposed system and a call to action for the relevant stakeholders.

The following table provides a summary of the key components of the proposed system. It is intended to provide a clear and concise overview of the various elements that will be involved in the implementation of the system. The table is organized into columns that represent the different components and rows that represent the specific details of each one. This will allow the reader to quickly identify the key areas of focus and the steps that will be taken to address each one.

Component	Description	Timeline	Resources
Component 1
Component 2
Component 3
Component 4
Component 5

The table above provides a clear and concise overview of the various elements that will be involved in the implementation of the system. It is intended to provide a clear and concise overview of the various elements that will be involved in the implementation of the system. The table is organized into columns that represent the different components and rows that represent the specific details of each one. This will allow the reader to quickly identify the key areas of focus and the steps that will be taken to address each one.

In conclusion, the proposed system is a comprehensive and well-thought-out solution to the problem at hand. It is designed to be both efficient and equitable, and it is expected to yield significant benefits for all stakeholders involved. The implementation of the system will be a complex process, but it is one that is well within our capabilities. We are confident that the system will be successful and that it will make a significant contribution to the overall well-being of the community.

"The Coin Machines Merry-Go-Round"

the lines of our article on the Second War Loan Drive which appeared in our last issue.

JUVENILE DELINQUENCY

In this issue we feature an entire page on "Juvenile Delinquency" that follows up our first article of March 23, 1943. This problem has grown so great that it has attracted the attention of all leading juvenile agencies as well as many public spirited citizens. The trade was urged by The Cash Box to be most cautious and careful so that no minors would be found playing equipment - so that no politicians would be able to cast any stigma on this industry. We feel that the enclosed article showing the stickers, posters and cards that are already in use by one of the most outstanding and progressive operators' associations in the country should be featured on the bulletin board of every subscriber so that all their friends will have the opportunity of reading the article and helping the work that is being done in this direction by coinmen thruout the country.

LABOR LOSS BRINGS EQUIPMENT TO MARKET

Continued loss of labor is starting to bring equipment to the market. Demand continues great. Even with supply diminishing, business has continued at a brisk pace. Now with the loss of mechanics, helpers, service and repairmen and collectors, equipment is starting to come to market as routes are being cut to the bone.

This has proved to be a busy Spring season. The trade picked up right after the long Winter months and continued to buy and sell at a more rapid pace than ever before. For some weeks equipment actually seemed to disappear in all categories. The slot and console fields especially were barren. The phono field continued but supplies and parts are now at sky high rates. Pinball has slackened once again because the better equipment is pretty well out of sight and when any does appear it is rapidly gobbled up. Merchandisers and service machines are still to be had tho not in such great quantity. Arcade equipment gets scarcer every day and prices continue upwards.

All this tended to worry a few of the men who looked forward to a very tough Spring and Summer because of equipment shortage. It seems now that WMC has answered the problems of these men to some extent by pulling still more men into war production work. With help rapidly disappearing coinmen instantly started cutting down on their routes to a point of greater convenience and efficiency.

Large music routes especially have been curtailed as have routes of all other types of equipment. Usually the poorest locations are sacrificed first. The equipment that is pulled is rapidly traded into the field and the market is growing lively again. Bringing machines to market because of labor loss means that others thruout the country will have the necessary replacements and also be better able to continue in business on a profitable basis.

REVAMPING

For sometime it has been noted by the readers of The Cash Box that we have given credit where credit is due and a lot of credit is today due the revampers in this industry for taking out old equipment and having revamped it to a point where it has restimulated play action and thereby produced profits.

This work becomes more important as the weeks go by. Now more and more firms are entering into this division of the industry aside from those already prominently engaged in it in the Chicago area. From Baltimore come revamped 1-Balls. From Brooklyn a revamped gun. From Ohio a revamped one shot game. From Philadelphia more pin revamps. From Syracuse revamped old guns. And, almost daily, from other parts of the country comes news of someone else contemplating entering the revamping field.

Revamping will continue important immediately after the war, too. When raw materials are once more released to all industry the favored few whose products are so necessary to the health and well-being of the nation will be given first "grab". Gradually the luxury items will get their necessary materials and last of all, in all probabilities, such items as are manufactured by this industry.

Therefore the revampers will be continuing to work after the war is over until the day is reached wherein materials are once again purchasable on the open market by all industries. So until then, it is the belief of The Cash Box, the present revampers should be given full credit and support for the work they are doing.

"SCARCER THAN DIAMONDS"

The other day we received a letter from one of the outstanding leaders in this industry telling us about equipment that was "scarcer than diamonds". The equipment he had reference to has been given a great many names by the press of this nation, but, in the terms of this industry has always been casually known as "the slot".

This subscriber advised that to find slots at reasonable prices, that is, a really good slot, was something that had disappeared with the war. He admits that there are plenty of slots left but that some of these have been used so much that the mechanism is actually worn out. "And", he also reports, "when you come upon a good piece the price is floating away up somewhere in the stratosphere."

Many, many moons ago, The Cash Box predicted that the slot was coming back stronger than ever and that during Fall and Winter of '42-'43 would reach a high price peak which wouldn't compare, tho, with what it would eventually come to in the Spring and Summer of '43.

We urge all of you, who work with this "scarcer than diamonds" equipment to enjoy this good thing while you have it. But, don't fail to take good advantage of it, too. Make the slot accumulate a real reserve for you - in War Bonds. For we believe that you're sure going to need lots of that foldin' green stuff when you see what comes to market after the war is over, aside from the keen competition that is on its way into this industry.

JUVENILE DELINQUENCY

By Bill Gersh

IN the March 23, 1943 issue of The Cash Box an article appeared, captioned: "Beware Juvenile Delinquency". This article touched off a blaze of good comment from coast to coast. It warned the industry that the problem of juvenile delinquency was becoming ever more serious and that the coin machines trade, because it lacked proper national organization, was therefore subject to the possible abuse of publicity seeking politics who might point to this industry as an

aider and abettor of juvenile delinquency to gain themselves front page glory.

It is to the advantage of this industry that juvenile delinquency has been proven to be on the rise in such cities as New York where no coin operated amusement machines are allowed by law. Therefore, in such cosmopolitan centers, there can be no blame cast upon the coin operated machine as one of the aids to juvenile delinquency.

In that article The Cash Box asked everyone to offer suggestions which they felt might be of good value to the rest of the industry to help prevent minors from coming near equipment, which would prove to city officials and other authorities as well as to the public at large that the men in this business, fathers themselves in most cases, were as eager to wipe out juvenile delinquency as was any other good citizen.

The foremost response we received came from Samuel "Curley" Robinson of the Associated Operators of Los Angeles County, Inc., Los Angeles, Calif., who sent us a wealth of material regarding the work that this most noted operators' organization was doing to help prevent juvenile delinquency being connected in any fashion whatsoever with coin machines within its jurisdiction.

The work of the A.O.L.A.C. should receive the complete plaudits of all connected with this industry for it is definitely the most outstanding and thoro job ever done in regard to the problem of minors who are the basic juvenile delinquency factor. We are showing here exact replicas of some of the posters, stickers, circulars and other printed matter which were sent to us by "Curley" Robinson. We should like to see them adopted nationally by every association, by all operators, whether they are associated members or not. This would help every operator prove to his neighbors, his city administration and to the public at large, that he, too, is just as anxious and just as eager to help stamp out the problem of juvenile delinquency. And that his share in this huge national effort be recognized for its merit.

Only by immediate action on the part of the operator can the city wherein he is located realize that it is his purpose to help eliminate juvenile delinquency and win the respect and support of the leaders in his community, as well as the general public, who are, after all, the crux to all coin machines aspiration. In short, an ounce of prevention is still worth a pound of cure and those operators who will take up the same sort of work which they will note on this page, will win for themselves the support they need to continue on a profitable and respected basis in their communities.

"Curley" Robinson, Managing Director, Associated Operators of Los Angeles County, Inc., writes:

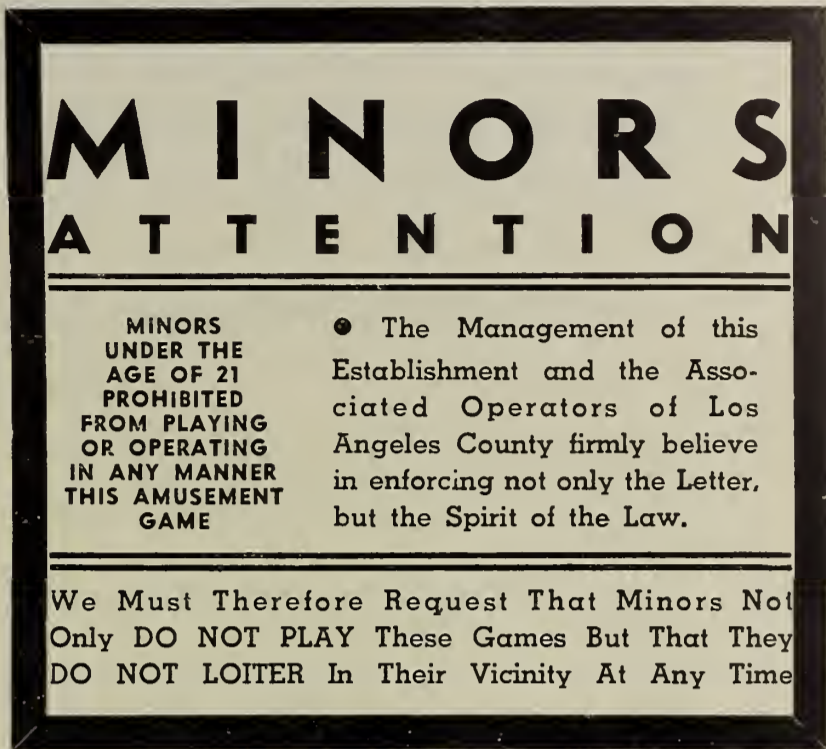

My Dear Bill:

Regarding your article on juvenile delinquency, we here have always realized that the two elements that beset this business at all times are Juveniles and Politics. The only weapon that we have with which to combat these two elements are Goodwill and Tolerance and a sincere effort to show that we are most interested in the juvenile and are not a political body.

We here have gone to the extreme on this and have interested ourselves in juvenile projects of all kinds and descriptions in a sincere effort and endeavor to show our attitude toward the juvenile. We have backed numerous juvenile coordinating societies, juvenile boards and associations, and have interested ourselves in Legion and civic activities regarding the rehabilitation of the juvenile. We have been cited numerous times for efforts put forth in this field.

The increase in juvenile delinquency, which is mounting like a "snow ball going down hill" cannot by any stretch of the imagination be attributed to coin machines. The start of juvenile delinquency had its inception in the days of Adam and Eve, and sex particularly is the dominating factor here.

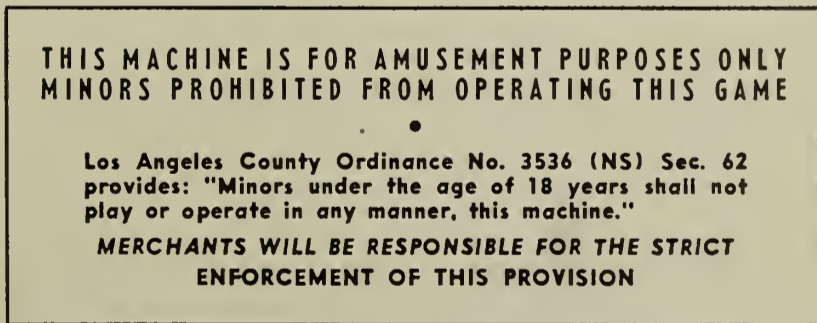

I am enclosing frames that we use on all of our machines and also other data pertaining to juveniles that have emanated from our office from time to time.

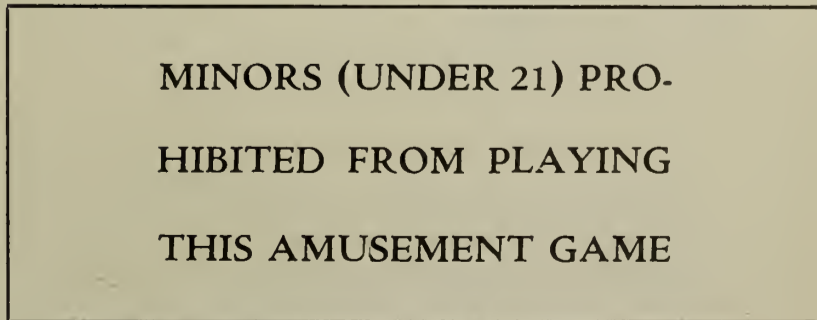

The above is one of two framed signs 5½" x 5½" featured by members of A.O.L.A.C. near all their machines where they can be easily seen.

The above card is tacked onto the playing board.

The above sticker is another fine example of how the A.O.L.A.C. handles the problem of minors.

This poster appears beneath the glass of the machine.

Minors Please Note . .
Minors (under 21) are requested not to patronize this amusement device.

NOTICE
It is the request of the proprietor that Minors do not play this Amusement Machine.

MINORS ARE NOT PERMITTED TO PLAY THIS AMUSEMENT GAME

Three more small stickers (size as shown) that appear in prominent places beneath glass of machines.

THE HISTORY OF THE UNITED STATES

The history of the United States is a story of growth and expansion. From a small collection of colonies on the eastern seaboard, it grew into a vast nation spanning two continents. The early years were marked by struggle and the search for a common identity. The American Revolution was a pivotal moment, establishing the principles of self-governance and individual rights. The subsequent decades saw territorial acquisition and westward expansion, leading to the Civil War, a conflict that tested the nation's unity and the meaning of freedom. The Reconstruction era followed, a period of rebuilding and the struggle for equality. The late 19th and early 20th centuries were characterized by industrialization, urbanization, and the rise of new political movements. The United States emerged as a global power, playing a significant role in world events. The mid-20th century brought the challenges of the Cold War and the Vietnam War, while the latter half of the century saw a period of social and cultural change. Today, the United States continues to evolve, facing new challenges and opportunities in a globalized world.

1. The purpose of this document is to provide a comprehensive overview of the current status of the project and to identify the key areas that require attention.

2. The project has been initiated in accordance with the approved plan and is currently in the early stages of implementation.

3. The following table provides a summary of the project's progress to date:

Task	Start Date	End Date	Status
Task A	01/01/2024	03/31/2024	Completed
Task B	04/01/2024	06/30/2024	In Progress
Task C	07/01/2024	09/30/2024	Not Started

4. It is noted that there are several risks associated with the project, particularly in the area of resource allocation and budget constraints.

5. The project team is committed to maintaining open communication and providing regular updates on the project's progress.

6. The next steps are to finalize the project plan and to begin the implementation of the remaining tasks.

7. The project is expected to be completed by the end of the fiscal year.

8. The project manager will be responsible for ensuring that the project is completed on time and within budget.

9. The project team will be responsible for the day-to-day management of the project.

10. The project sponsor will be responsible for providing the necessary resources and support.

11. The project is a high priority and requires the full attention of the project team.

12. The project is a key component of the organization's strategic plan.

13. The project is a complex and challenging task that requires the expertise of the project team.

14. The project is a critical path item and any delays could have a significant impact on the organization's operations.

15. The project is a high-risk activity and requires careful monitoring and control.

16. The project is a high-visibility project and requires close oversight by senior management.

17. The project is a high-priority project and requires the immediate attention of the project team.

18. The project is a high-stakes project and requires the best possible performance from the project team.

19. The project is a high-impact project and requires the full commitment of the project team.

20. The project is a high-profile project and requires the highest level of professionalism and integrity.

21. The project is a high-quality project and requires the highest level of attention to detail.

22. The project is a high-performance project and requires the best possible results from the project team.

23. The project is a high-achieving project and requires the full effort of the project team.

24. The project is a high-achieving project and requires the full effort of the project team.

25. The project is a high-achieving project and requires the full effort of the project team.

26. The project is a high-achieving project and requires the full effort of the project team.

27. The project is a high-achieving project and requires the full effort of the project team.

28. The project is a high-achieving project and requires the full effort of the project team.

29. The project is a high-achieving project and requires the full effort of the project team.

30. The project is a high-achieving project and requires the full effort of the project team.

IMPORTANT

The Confidential Price Lists are to be read as follows: First price listed is lowest price for the week; Second price listed is highest price for the week; Where only one price appears this should be considered lowest price.

Many times, wide differences appear in the high and low prices of certain equipment. Like any true reporter The Confidential Price Lists can only feature the market prices as they are quoted. The Confidential Price Lists act exactly the same as the market quotation board at the Stock Exchange—posting the prices exactly as they are quoted for each week, regardless of how much they may seem to be out of line. Some machine prices do not change for months. The Confidential Price Lists, rather than show no price for the week, retain the last known quotations for such equipment so that the subscriber at least has the last known quoted prices as a basis to work with. Prices continue to be very widely divergent these days. Someone on the West Coast may feel a certain machine worth \$150.00 whereas someone on the East Coast may think it worth but \$75.00. Of course, condition, serial, appearance, demand, territory, quantity, etc., must all be taken into consideration. The Confidential Price Lists report each quotation exactly as it is made and depend on the subscriber to make average price adjustment to fit the peculiarities of his own territory.

CODE

CHECK THIS CODE CAREFULLY. BECOME ACQUAINTED WITH EACH ONE OF THE CODE NUMBERS AND WHAT THEY SIGNIFY. THESE CODE NUMBERS APPEAR IN FRONT OF THE NAME OF EACH MACHINE.

- 1—Means price went up.
- 2—Means price went down.
- 3—Means this machine just added to list.
- 4—Means prices went up and down same week.
- 5—Means prices remained same as in past week's issue.
- 6—Means no prices quoted for this machine this week.
- 7—Means no prices quoted for this machine for past two weeks.
- 8—Means no prices quoted for this machine for past three weeks.
- 9—Means no prices quoted for this machine for past four weeks or longer.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. This is essential for ensuring the integrity of the financial system and for providing a clear audit trail. The records should be kept in a secure and accessible format, and should be updated regularly to reflect any changes in the data.

2. The second part of the document outlines the procedures for handling disputes and resolving conflicts. It is important to establish a clear process for identifying the cause of a dispute and for taking appropriate action to resolve it. This may involve mediation, arbitration, or litigation, depending on the nature and severity of the dispute.

3. The third part of the document discusses the role of the courts in resolving disputes. It is important to understand the jurisdiction of the courts and the types of cases that they can hear. This information is essential for determining the appropriate forum for resolving a dispute and for preparing the necessary legal documents.

4. The fourth part of the document discusses the importance of maintaining accurate records of all transactions. This is essential for ensuring the integrity of the financial system and for providing a clear audit trail. The records should be kept in a secure and accessible format, and should be updated regularly to reflect any changes in the data.

5. The fifth part of the document outlines the procedures for handling disputes and resolving conflicts. It is important to establish a clear process for identifying the cause of a dispute and for taking appropriate action to resolve it. This may involve mediation, arbitration, or litigation, depending on the nature and severity of the dispute.

6. The sixth part of the document discusses the role of the courts in resolving disputes. It is important to understand the jurisdiction of the courts and the types of cases that they can hear. This information is essential for determining the appropriate forum for resolving a dispute and for preparing the necessary legal documents.

7. The seventh part of the document discusses the importance of maintaining accurate records of all transactions. This is essential for ensuring the integrity of the financial system and for providing a clear audit trail. The records should be kept in a secure and accessible format, and should be updated regularly to reflect any changes in the data.

8. The eighth part of the document outlines the procedures for handling disputes and resolving conflicts. It is important to establish a clear process for identifying the cause of a dispute and for taking appropriate action to resolve it. This may involve mediation, arbitration, or litigation, depending on the nature and severity of the dispute.

9. The ninth part of the document discusses the role of the courts in resolving disputes. It is important to understand the jurisdiction of the courts and the types of cases that they can hear. This information is essential for determining the appropriate forum for resolving a dispute and for preparing the necessary legal documents.

10. The tenth part of the document discusses the importance of maintaining accurate records of all transactions. This is essential for ensuring the integrity of the financial system and for providing a clear audit trail. The records should be kept in a secure and accessible format, and should be updated regularly to reflect any changes in the data.
