HELP UNCLE SAM GET 5 MILLIONS FROM 50,000 COUNTER GAMES

It has been estimated by leaders in this industry that there are approximately 50,000 counter games in the \$100. per year tax category thruout the country gathering dust instead of revenue. For many issues now we have been urging someone to find a solution to this problem. With equipment becoming more and more scarce, every possible type of machine (as we stated in our last issue) should be put to work. Not only will this somewhat relieve the price condition of the present market, but will also bring income to the trade as well as revenue to retailers and especially to our Uncle Sam. So far not one man has stepped forth with a plan to tell us how to switch those counter games from the \$100. into the \$10.00 tax bracket.

Therefore, because we feel there are times when an industry can afford to be philanthropic, we urge that these 50,000 or so counter games that are known to be idle thruout the country be immediately placed on locations as a patriotic gesture on the part of the members of this industry without any thought for profit. It will mean putting to work equipment that can raise revenue. It will be, in essence, a campaign to help bring about a more speedy victory. Surely, the average coinman is good enough salesman to sell this idea to his locations. Surely, he can most convincingly explain to his locations that this is strictly and solely a method to help increase the revenue that Uncle Sam so sorely needs to insure victory. By such action he can most certainly get the location owner to agree not to take any commission whatsoever until the \$100. is first taken out of the machine to pay for the tax. We have a feeling that these counter games will bring back the \$100. during the course of the year (on this method of operation) and perhaps even bring enough in addition to pay for whatever servicing overhead will accumulate and even show the storekeepers a few pennies, too.

Therefore, rather than allow these 50,000 counter games to gather dust, let us, all of us, make a patriotic campaign to help Uncle Sam. These counter games at the \$100. license rate will bring the U.S. Treasury \$5,000,000.00. This is one effort which we believe that every coinman will be happy to join. We also believe, that a great many coinmen, putting this new method of operation to work with their locations for the first time, wherein they give no commission until the license is first completely paid for and getting the retailers to agree to this type of operation, may be very pleasantly surprised to find that not only counter games, but other types of machines, can be profitable. We hope that this new angle will open a path to many new ideas of like nature for the general welfare of all concerned.

6 WEEK ARCADES

At the last meeting of the A.O.A. (Arcade Owners Assn.) in New York City we had the pleasure of meeting with many new faces who had come to this meet for the first time. These men instantly joined in the discussions and voting and proved enthusiastic over the work to bring about a more equitable method of taxation for the arcades that the A.O.A. is planning. While there we met with an owner of one of the outstanding arcades at the New Jersey shore. His place is considered a model for the sea-shore type of arcades. He came to this meet to discuss with other arcade owner members of the A.O.A. what they were prepared to do about the "6 week arcades". He meant the arcades that enjoyed only 6 money-making weeks thruout the year. (And that's praying that it doesn't rain during those 6 short weeks.) He pointed out that if he were forced to pay the full tax for the entire year (as required at this time) that the complete and gross take of all the machines he had in his place wouldn't be enough to cover the license cost. This is but one of the problems that the A.O.A. are working on and will have ready for government officials to review at the proper time. Overtures are already being made in Washington with the proper authorities. The next meeting of the Senate Finance Committee will be eagerly awaited. Already members of the IRD (Internal Revenue Dept.) recognize that their present method of taxing arcades works hardship on the resort places and are willing to help cure this fact. It will take money, time, effort and intelligence to get all these tax matters properly cleared up. But, nothing can be done in Washington without large group representation and that is the big reason behind the organization of the A.O.A.

WMC

The announcement by WMC (War Manpower Commission) chief, McNutt, that all 3A men would either have to do war work or fight, sort of stunned just about everyone for a day or so. Yet, as the expression goes, there's always a silver lining, somewhere. And we do believe that by adding so many more men to the already monstrous payrolls of the war production factories that just so much more play will result for coin games. The need for relaxation will grow greater. The morale uplifting influence of the coin phones will be even more in demand. Ciggy machines and vendors of all types will be wanted

"The Coin Machines Merry-Go-Round"

for the factories themselves. Every type of coin operated machine will prove even more necessary. In short, the more men working-the merrier - for the coin machines industry. The new War Service Act, which has just been proposed and is backed by the American Legion looks like it will get a speedy passage, regardless of the opposition. But, this too, will be a case of more men being put to more beneficial use. At present the plans are to recruit workers only where there are labor shortages.

RECAP TIRES BY MARCH 1st

After March 1st you will be able to get your tires recapped without any restrictions, according to OPA. An order to this effect is being prepared and its primary result will be that lack of tires will not cause the stoppage of any of the country's 27,000,000 passenger cars. Under the new procedure any driver, whether he has an "A", "B" or "C" gas card may get a recap job done without any inspection, certificate from his rationing board or any other fuss. Since so many coinmen use passenger cars for service and collections - this order has been met with glee on the part of those men who have been worried about tires and recapping. Tires will continue hard to obtain, but recaps have proven themselves worthy as long as the driver maintains the war speed limit.

RATES ARE UP

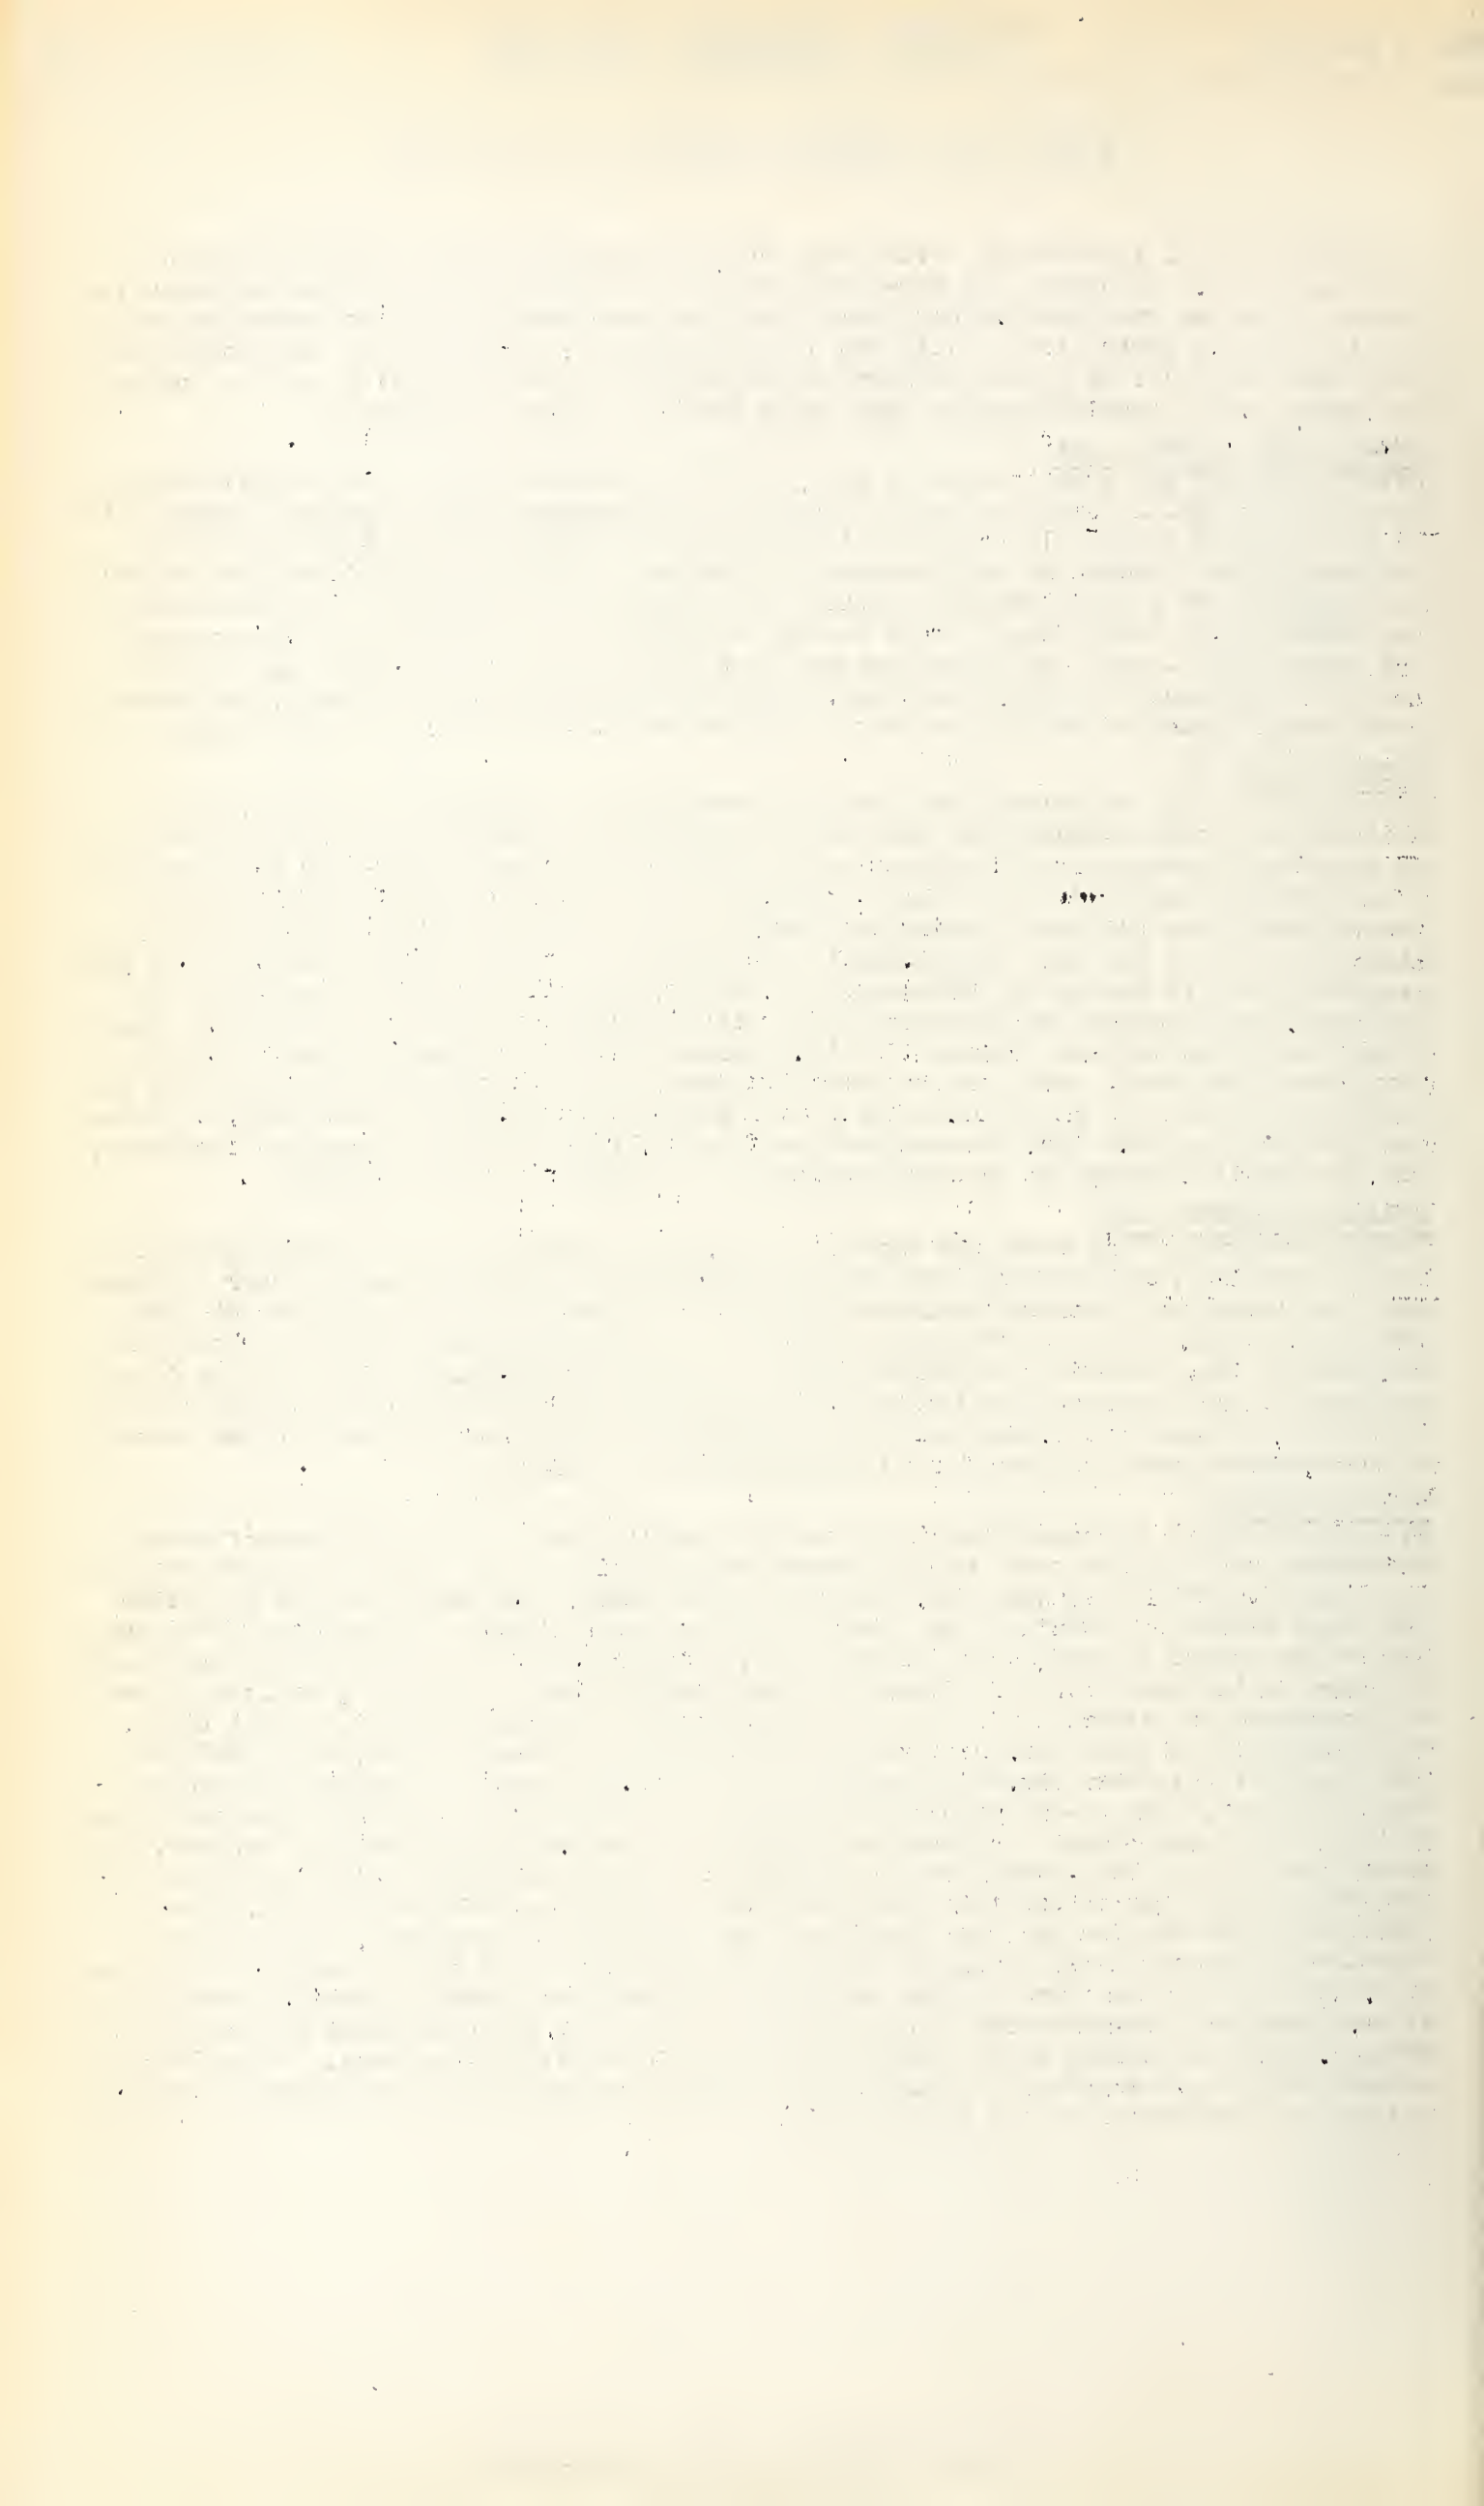

An issue or so ago we advised that due to tremendously increased circulation, with which we have been favored these past months, and also due (because of this very fact) to increased production and mailing costs we have been forced to slightly increase our subscription rates as follows: \$15.00 for the Quarter Year (13 weeks issues); \$26.00 for the Half Year (26 weeks issues) and \$48.00 for the Full Year (52 weeks issues) no discounts. There has also been a small increase in the cost of extra space ads, as you probably noted in our new Ad Layout Sheet. But the Free Space remains the same. We feel sure that everyone of our subscribers will rejoice with us in the fact that these slight increases did come about. It simply means that our circulation has reached a very impressive peak. And, you can take it from us, circulation continues to climb up and up each week. If you do not have a full year's subscription at this time, to protect yourself against this increase and the possibility of further necessary increases, you have until February 28 to avail yourself of a full year's subscription.

BUSINESS FAILURES OFF

In New York City where there are more than 250,000 unemployed as yet (from former figures of over 500,000) because this largest American metropolis has no war work - commercial and industrial business failures in the week ending Feb. 4th dropped to 82 from 138 the preceding week and compared to 241 for the corresponding week a year ago, Dun & Bradstreet, Inc. reported. We believe that New York City, because of the fact it lacks war work, is a good barometer for business conditions thruout the country. We also believe that coinmen will greet this news jubilantly for it helps end the vicious gossip of businessfailures that have been frightening some of the men.

PINS IN PENNSY

Pins are up again in Pennsylvania, as you all joyfully know. Tho there hasn't been a concerted rush to place pins in the larger centers this is only due to the fact that it is so hard to obtain any quantities of the better games. Many months ago we published the story behind the story of the opening barrage in this case. Since then we had our ear to the ground listening for the decision, regardless of the fact that we, and those who were in the midst of it, believed it would be favorable. In short, we like to see it pronounced so officially. It was a fine decision. We believe that it will stick. We do not believe that Pennsy's coinmen will in any way abuse it. But, we do believe that now that this very important state is up once again, that the coinmen should plan far in advance. The 50-50 commission basis should come in for immediate consideration. We hope that Pennsylvania's coinmen will follow the suggestion we made (in our Feb. 16 issue) regarding a 30% commission arrangement. Remember that every city and county and the state itself may decide that with the Federal government getting its \$10.00 or \$100.00 license on pins per year (whatever the case may be) that they, too, in these times, when revenue is so sorely needed by all government, may decide to slap on license fees. At the same time the cost of games and parts and general operating overhead is much greater - regardless of the fact that the take may prove somewhat greater, too. There is most definitely a 20% increase in cost of operating these days. Pennsylvania's coinmen should get together at this time to solve this problem far in advance by arranging for 30% commission to the location NOW.

IN SENATE

REPORT

OF THE
COMMISSIONERS OF THE LAND OFFICE
IN RESPONSE TO A RESOLUTION
PASSED BY THE SENATE
MAY 11, 1909

ALBANY:

WHELAN & COMPANY, PRINTERS,
1911

1911

The Commission on the Land Office was organized on July 1, 1909, in accordance with the provisions of Chapter 100 of the Laws of 1909. Its primary duty is to study the land resources of the State and to report thereon to the Legislature. The Commission has the honor to acknowledge the assistance and cooperation of the various departments of the State Government, particularly the Department of Agriculture, the Department of Education, the Department of Health, the Department of Labor, the Department of Marine and Fisheries, the Department of Mineral Lands, the Department of Public Safety, the Department of Social Services, the Department of Taxation and Finance, the Department of Transportation, and the Department of the State.

The Commission has held numerous public hearings and has received many suggestions from the public. It has also conducted extensive research into the various problems connected with the management of the State's land resources. The results of this research are set forth in the following report.

The Commission believes that the most important problem facing the State is the need for a comprehensive system of land management. This system should be based on the principles of conservation and should be designed to protect the State's land resources for the benefit of the people of the State.

The Commission recommends that the following steps be taken:

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry must be supported by a valid receipt or invoice. This ensures transparency and accountability in the financial process.

2. The second section outlines the procedures for handling discrepancies. If there is a difference between the recorded amount and the actual amount received or paid, it is crucial to investigate the cause immediately. This may involve reviewing the original documents and contacting the relevant parties for clarification.

3. The third part of the document addresses the issue of timely reporting. It is essential to submit financial reports on a regular basis to the management. This allows them to stay informed about the company's financial health and make necessary adjustments to the budget or strategy.

4. The final section discusses the role of the finance department in providing strategic advice. Beyond just recording transactions, the finance team should analyze the data to identify trends and opportunities for cost savings or revenue growth. This proactive approach is key to the long-term success of the organization.

5. In conclusion, the finance department plays a vital role in the overall success of the company. By ensuring accurate record-keeping, handling discrepancies promptly, reporting regularly, and providing strategic advice, the finance team can help the organization achieve its financial goals and maintain a strong position in the market.

The following table provides a summary of the key financial metrics for the first quarter of the year. It shows a steady increase in revenue and a decrease in expenses, resulting in a significant profit margin. This performance is a testament to the hard work and dedication of the entire team.

Overall, the financial performance of the company has been excellent. The revenue has exceeded expectations, and the expenses have been kept under control. This has allowed us to maintain a healthy profit margin and invest in our future growth. We are confident that this positive trend will continue throughout the rest of the year.

Looking ahead, we have several key initiatives planned for the second quarter. These include launching a new product line, expanding our market reach, and implementing a new marketing strategy. We believe these initiatives will further drive our revenue growth and solidify our position as a market leader.

We are grateful for the support and collaboration of all our stakeholders, including our customers, employees, and partners. Your continued commitment to our success is what makes us able to achieve our goals. We look forward to a successful and productive second quarter.

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be clearly documented and verified. The second section details the various methods used to collect and analyze data, highlighting the need for consistency and precision. The third part of the report focuses on the results of the experiments, showing a clear trend in the data that supports the initial hypothesis. Finally, the conclusion summarizes the findings and suggests areas for further research.

The data collected over the course of the study shows a significant increase in the rate of change over time. This is particularly evident in the later stages of the experiment, where the rate of change appears to be accelerating. The results are consistent with the theoretical model proposed at the beginning of the study.

In conclusion, the study has demonstrated that the proposed method is effective for measuring the rate of change in this system. The results provide strong evidence for the validity of the model and suggest that it can be used to predict future behavior. Further work is needed to explore the underlying mechanisms of the observed phenomena.
