A BUSTLING BUNCH OF REVIEWS, PREVIEWS AND NEWS

# LAS VEGAS COM TERTAINMENT SHO

# **COLOUR GAME BOY FINALLY APPEARS**

G ames-X can finally confirm the existence of the colour Game Boy. Jason Spiller managed to get his mitts on one of these elusive hand helds at the recent Vegas show.

The new Game Boy is basically

the same shape and size as the original but the high-definition graphics are every bit as good as the Lynx and Game Gear. The burning question was; 'Does it guzzle batteries like its colour rivals? Stony silence followed.

News is, the new colour Game Boy will be launched in Japan during this summer '92. The price is yet to be announced, although it is speculated to be set at \$99.

The US will have to wait until later in the year for its fix

The long awaited colour Game Boy

set for release in summer 1992

of the new machine. And the UK? Well, we'll have to wait until the spring/summer of 1993.

# EVANDER HOLYFIELD

Fans eagerly waited at the CES for Heavyweight Champion of the World, Evander Holyfield to arrive.

Surprisingly the champ parked in the car park and queued up with the rest of the showgoers, no body guards in sight.

Evander is hot property and Sega seized the opportunity for him to endorse

he Game Handler is a one-handed joystick which is reputed to take control from base wrenching into 3D space.

Just by tilting the joystick back and forth and from side to side,

vou can achieve greater speed, agility and accuracy, or so CMM

Control reckons.

After a lifetime of wrestling with conventional joysticks, I reckon the Game Handler will take some getting use to. present it is only available for the NES and Super NES. The claim is that the Game Handler enging... Does this mean makes the games harder?

a forthcoming boxing game. Obviously feeling like Ronny Corbet next to this proverbial brick privy of a man, I asked Evander if he played computer games?

"I used to go to the arcade and play car-racing games, I reckon that's my favourite type.

With boxing games I feel like hitting the screen!" Whatever you say Mister

Will Sigourney ever get the message? She's back for another mortal confrontation with possibly the ugliest movie star ever; the seven foot rubber slavering Alien.

In conjunction with the latest in the of flicks, Arena series

Entertainment is publishing the game Alien 3, to feature on Sega Genesis and Game Gear.

Past attempts at bringing the Alien into game entertainment have been unmitigated failures, but this looks like could be a success.

The game is primarily blast and dodge, as you move in various directions using the multi-way scroller Prepare to find yourself in the dark dark

# POWER CARTRIDGE

he Hulkster and all his grapple buddies are putting their weight behind the most amazing multi-game cartridge ever.

The Power Cartridge features a variety of games and themes. There's something for everyone from arcade action and platform romps, to adventure and sports sims.

The games on the carts for both 8-bit and 16bit consoles, had previously been top budget sellers including Chiller, Ultimate League Soccer and Death Race 2000. The cartridge is published by Maxivision in the States and a release in the UK is expected around Easter.

# PART

**EXCLUSIVE: The hottest console** and computer news direct from the Las Vegas show

vast new list of Game Boy releases is destined for a UK debut, this includes many old arcade classics. Accolade is publishing Asteroids and Missile Command, two games which are ideally suited for the Game Boy's control interface.

Asteroids has you blasting big rocks into little rocks and avoiding droves of asteroid belts. Missile Command is that great game where you've got to anticipate the courses of enemy rockets and then snuff them out with mortar shells.

Both games include multiple levels, Asteroids featuring that trend of linking up Game Boys. Both titles are due for imminent UK release.

tunnels leading to the Alien's hideous lair and slaughter house. Alien 3 is due for a summer '92 release.

Ultraman boasts some of the biggest sprites which use the 16-bit capacity of the Super NES to the full. It features TV cartoon hero Ultraman; part droid and part human.

The game's no ground breaker and

comprises entirely of a horizontal scrolling beat'em-up, using special weapons and martial art-style chops and

The release is to tie-in with the start of a 13 part cartoon series. Published by Bandai it is set to arrive in spring 1992.

This isn't the Vektor Grafix sim, but Absolute's impressive arcade/simulation of the shuttle program on 8-bit Nintendo.

The mission takes you from lift-off through various missions, including satellite launching and maintenance, plus rescue missions.

This console-based sim shows conclusively that console entertainment doesn't have to include Italian plumbers

Shuttle leans further towards arcade than realism, but that does save you from sitting through a five day launch check! The release date for the game in the UK is Easter time.

# AMERICAN GLADIATORS

hese guys and babes are the roughest and toughest dudes on the tube. On the TV programme, American Gladiators, members of the public, who have been rigorously tested for strength and fitness, get a chance to fight against the awesome gladiators.

Now this brutal action can be found on the NES. The platform action features such events as the joust, the assault powerball, the wall, the human cannonball and the bone-breaking Eliminator.

The game is being

published by Gametek on the NES and is due for release at Easter time.

# SAVAGE FRONTIER

The Savage Frontier stands on the brink of a horrible, devastating conflict as bloodthirsty raiders prey upon the cities of the northern coast.

Powerful magical items reappear from ancient times, and amid the flood of rumours and strange tales, no one knows what will happen next. In a world full of treachery, only our heroes can be trusted with the vital mission of preventing war and regaining the lost treasure.

Can you pull off another seemingly impossible mission? Due for release by SSI/US Gold, **Treasures of the Savage Frontier** will be available on the PC in March and the Amiga in September.

Following on from its espionage thriller, Floor 13, Virgin's next release will be entitled **KGB**. Starting out as a lowly spook, your task is to steadily make your way through the ranks of the Soviet secret police.

The game is played like an adventure, using the now standard point and click control system. Containing a fair amount of strategy, KGB will not

include any torture scenes or other dubious practises rumoured to be performed by the KGB.

The game itself will be released initially on the PC with other 16-bit versions to follow. Keep your eyes peeled for Virgin's KGB around Easter time. Get them before they get you!

# EMPIRE STRIKES BACK

Lucasfilm Games is working on a batch of **Nintendo Star Wars games** and Lucasfilm is actually planning another Star Wars trilogy.

Little wonder then that Creative Materials' very own Andy Hieke went along to the Lucasfilm Games stand in Las Vegas in a desperate bid to get a leading role in the movies. Nice try Andy, but don't call us – we'll call you!

# **CONFLICT KOREA**

On June 25th, 1950, North Korea invaded South Korea. Within a month it had overrun more than three quarters of the southern territory and the fighting was to last for a further three years.

SSI's **Conflict Korea** attempts to recreate the opening phase of the Korean War. The package includes three scenarios from the years 1950 and 1951: The Dragon Wakes, Operation Chromite and Cold Steel.

In addition there is a hypothetical 1990 scenario featuring the North Korean, South Korean and American military forces.

Conflict Korea will be available from SSI/US Gold for the PC and Amiga, priced £34.99, in March and May respectively.

# ÷ 5

# CARRIER STRIKE Carrier Strike: South Pacific 1942-44 is a tactical,

operational naval game set in the South Pacific during World War 2. It's a dynamic game and the first of its kind.

The game features a carrier task force with the ability to link several clashes together in a campaign covering three historical battles – Coral Sea, Eastern Solomans and Santa Cruz. There is also the hypothetical battle of Torakina. Along with these are an infinite number of randomly generated encounters.

Due for release from SSI/US Gold in May, Carrier Strike will cost £34.99 and will initially be available for the PC.

# MARIO MANIA

# VIRTUAL REALITY

Virtual Reality systems are springing up in arcades all around the country. Up to now both the hardware and software has been designed, developed and manufactured by Leicester-based W-Industries.

However, the British company has recently joined forces with top simulation specialist, **Spectrum Holobyte**. Together the companies are improving current games and working on new titles which should be ready by 1993.

# HE DID IT HIS WAY

Unbeknown to our very own Jason Spiller we managed to capture him on the Karaoke stand at the Las Vegas show. It seemed that Jason was overwhelmed by the occasion and just couldn't resist a quick rendition of "Some Guys Have All The Luck".

Rumours about the Bognor Blues phenomenon report a wonderful singing voice but wonder why he seemed to close his eyes on stage — Stevie Wonder you ain't Jason!

# PARTNERS

A deal has been signed between Millennium and Electronic Arts, the outcome of which sees all future Millennium games being distributed worldwide by EA.

Both companies will benefit from the partnership with several of Millennium's games appearing on the Mega Drive. The next title to be released by Millennium will be Kid Gloves 2 followed by Global Effect.

# MICRO MACHINES

One of the UK's leading software houses, the CodeMasters has made the big time in the US. The company was recently in Las Vegas to show off its latest range of Nintendo games.

Among those on show was Micro

**Machines**, a rather nifty overhead racing game, based on the world famous miniature cars

During the show a Micro Machines Challenge was held with the overall winner, Carl Cook, driving of with the star prize – a Mazda MX5!

Amiga owners may also be pleased to hear that a version of Micro Machines is planned for the Commodore. Quite when it will appear is still unknown, but when we find out so will you.

# **OBITUS**

Psygnosis' **Obitus** is ready for release on the PC. The game sees you stranded in a strange land and you have to escape back to your own home. En route you'll come into contact with trolls, dwarves, knights and wizards.

Obitus is an arcade adventure playing in first-person perspective. You'll collect food, energy and a wide range of weapons during your quest.

# ON THE SHELF!

Here is a list which has been compiled by GX, with the help of Centresoft and Leisuresoft, to keep you up to date with all the games which will be hitting the shops in the coming week.

There may be some changes to the release dates of some of the games but keep an eye on the shelves, these games shouldn't be too far behind the date indicated.

# AIR BUCKS

Impressions has announced the release of **Air Bucks** for the ST, Amiga and PC in May. The game can be likened to Microprose's Railroad Tycoon, but this time you control your own airline.

Starting with a single Dakota and \$100,000, your task is to develop you company from a small-time outfit into a multi-million dollar corporation.

Beginning in 1946, there are in excess of 20 planes to choose from. Look out for Air Bucks, it sounds cool!

# BLACK BASS

ow the noble art of fishing comes to the Game Boy. You can go lure fishing for that ultimate fighting fish, the black bass.

In Lure Fishing, you drop your hook to beach that record-smashing bass while avoiding dozens of obstacles and predators. Black Bass Lure Fishing will be released in February on the Game Roy

"YOU TOO COULD HAVE A HAPPENING BELT IF YOU FLEW THE AIRBUS"

# STALL STATE

# RULES

No employees of the Europress group or the sponsors and agents of this competition may enter this competition. The judge's decision is final. No photocopied competition entries will be accepted. ublished by Thallion, A320
Airbus is the definitive commercial airline simulation.
To be released on Amiga, ST and PC.

Here's a competition that is every Air sim fan's dream. You could win a day at a top flight simulation centre. Designed to test real airline pilots, yes, you can get your eager mitts on £10,000,000 of equipment.

In addition to this prize, you will receive a copy of A320 Airbus on a format of your choice and an exclusive

Lufthansa wings badge.

Five runners-up will receive a copy of A320 Airbus and the next 10 correct entries out of the bag will each receive a copy of Tower Fra, the excellent Air Traffic control simulation.

All you need do to win this fantastic prize is correctly answer the following questions:

- 1 What elephant-like name is the Boeing 747 better known as? A Jumbo B Dumbo C Bimbo
- 2 What is the make number of the Airbus?
- A DC-10 B 1-11 C A320
- 3 Which of these airports is NOT in London?
- A Gatwick B Ringway C Heathrow

Send your entry to: Airbus Competition, Games-X, Europa House, Adlington Park, Macclesfield SK10 4NP. Your answers are to reach us no later than 20th February 1992.

# Look out - he's back!

# PAPERBOY

No window is safe. No fence is too high. The paperboy is determined to deliver the paper to his subscribers any way he can.
Tossing papers left and right, riding in three directions, jumping anything, this free-wheeling carrier visits more neighbourhoods and houses, faces more targets and obstacles, in more vivid colours than ever before.

Plus, rad stunt riding and BMX tracks in bonus rounds. Choose to ride as either Paperboy or Papergirl too!

# SCORING SYSTEM EXPLAINED!

It's not difficult but we want to make everything as clear as possible. So sit down and listen carefully as you're talked through the various aspects of the game reviews...

The higher the rating the better the game

You've heard of beer guts, but have you seen SCOOPS's? Not exactly beer, but he keeps the crisp manufacturers in business. He's also been seen polishing off two kilos of chocolate in a session. His tum is now a well-rounded affair.

BRIAN, a gentleman of expanding proportions. Known to be a rare specimen of the Videocus Vegetaticus

species he flounders around the streets of Macclesfield, video controller in hand, desperately seeking nibbles.

NICKY NOO. Oh, what wonderous superlatives could we use to describe such a glorious example of virulent manhood?

Could such a kind hearted and caring gent be responsible for such scandalous slurs as written above... Surely not!

This is the accolade given to those games of exceptional quality and which the *Games-X* reviewers feel deserve extra recognition

£25.99 OUT FEBRUARY

Which formats are available, followed by a comparative evaluation, the price and the release date.

# "Temptations of the Violent Kind"

As you approach the next house you notice a man working under his car. Do you: A. Deliver his paper with a cheery "Good morning"? or

B. Knock out the jack with a well-aimed paper and trap him under the vehicle (ho! ho!)

espite the fact that the original game was one that never ended, and if you were good at it you could be playing for hours, it was still one of the best titles I ever played on my Spectrum.

I have to say that I was in two minds when the sequel was announced but

bike along the perilous roads delivering papers to the subscribers of that worthy publication, The Daily Sun.

Just for good measure he can also throw a paper through the windows of non-subscribers!

# PEDAL POWER

There are loads of hazards to keep you on your toes as you go about your early morning task. Stray tyres roll down the pavement towards you, men lie working under their cars, ideal prey for an interesting prank.

Now all these appeared in the original game, so, "nothing new" I hear you cry. Wrong!

A whole host of new and more interesting obstructions lie before you.

Houses like medieval fortresses stand firing cannons from their upstairs windows, gates stick out onto the pavement forcing you to negotiate the garden, and strange demons from the sewers try to grab hold of you as you ride past.

The controls are simple enough, Up makes you pedal like mad with Left and Right steering in the corresponding direction. There are two fire buttons used to throw the papers to the left or the right, making the game a little more interesting.

As before, when you have finished the day's round you get a chance to ride the BMX track, found at the end of the street, for a few bonuses.

Here you try out your skill on many jumps while getting a bit of target practise with a few spare papers.

In the mid-80's a small game,

known only as

Paperboy, was

released and took

computer owners by

storm. Now the

brattish young worker

is back to pound a

new route in this

official sequel. The

original was a classic,

can the second follow

in its bike tracks?

Being able to get the paper into the mail box takes some practise, but when you're as good as I am you'll have it cracked in no time!

This is what the BMX track comes in useful for. At one stage you'll have to nip through someone's front garden and the only way out is to use the strategically placed cardboard box over by the fence...

When you finish you'll get an evaluation of the day's job, where you see how many subscribers you have remaining and if any new ones have

# **PLAY WITH A FRIEND**

The really big difference between this and the original is the two-player mode where you both ride one side of the route before meeting up and racing against each other on the BMX track.

This is incredible fun and arguments are guaranteed during the race. This time around the street will change direction and between the two parts of the street you'll get a chance for a bonus.

On the first level this takes the form of a store robber where one well-aimed paper stops his criminal action. A hero's welcome will be yours if you succeed.

Not only can you be Paperboy but to avoid being sexist the programmers have included an option for you to play Papergirl, should that appeal.

She rides her bike and delivers her papers just as quickly as Paperboy, the only difference being her pony-tail.

# "All in a day's work..."

There's nothing more annoying for a paperboy than a dopy dog which

Becoming a hero is a simple enough task if you've got a trained paper-

There seems to be this strange creature that lives down the sewer which lives on paperboy shoes. Every time I ride past he reaches out and tries to grab me - he hasn't succeeded vet!

At the end of the day I like nothing more than to relax and practice my riding skills. Thankfully my favourite BMX track can be found right at the

# FACT FILE

n**ent Team:** The Software

When Elite released the original conversion all those years ago it must

have had no idea what it was starting. Sadly the sequel doesn't live up to the expectations of the fans.

Technically this is more of the same with a few extra bits thrown in, but it could have done with a few more improvements. However, what there is here won't disappoint the gamers who played the original title to death.

The graphics are well drawn and the scrolling is smoothish, slowing down a bit when too much comes on screen, but even some of the best games available on computer have a little jerkiness, look at RoboCod!

All the sprites are also humorous and well animated, especially the main character as he pedals madly along.

Sound too is impressive with a jolly tune playing throughout with a few spot effects that can at best be described as interesting. Everything fits into place perfectly though and makes the game all that much better.

The controls are responsive and easy to use and even in two-player mode the keyboard doesn't get cluttered. This is an incredibly fun game to play and that is how it should be!

# £30.99 OUT NOW

The Amiga version is the best of the bunch, sporting crisp, miga fast moving graphics with clear and fun sound effects. The gameplay is that bit better due to the joystick control and you'll find yourself addicted in no time.

Mindscape has done a great job in bringing this game to your computer and, although this certainly isn't a classic, this is a product that can be recommended to you.

# £25.99 OUT NOW

The ST version is practically identical to the Amiga, bar ST the sound and scrolling, both of which are slightly worse.

This doesn't harm the game much and it is still the fun challenge that it is on the other machines.

Perhaps the only grumble is that the game might get just a little repetitive as you play.

£25.99 OUT FEBRUARY

X-RATING: XXXX

Gameplay: 16/20 **Lastability: 15/20** Presentation: 15/20

Development Team: Hex (Hardwire) Sound and Music: Cold Cut

Graphically Top Banana is bizarre. On one level it looks psychedelic and dazzling, and on the next, it is a confusing blur which makes playing the game a real pain.

quite smooth, but the sprites are basic The layers of parallax scrolling are and uninspired.

Sonically it is a mixture too. The system, is undoubtedly great, but the coundtrack, with its random 'chaos' sampled sounds are repetitive and will irritate even the most patient in no time.

Top Banana isn't easy to play and this isn't helped by the fact that on some evels the backdrops create such confusion that the gameplay is rendered almost zero.

weird, but claims that it matches the ilk However, it is remarkably addictive Overall, it's succeeded in being for a game with so many little irritations.

of Sonic or Mario are sadly misguided. It is different, but maybe too different to appeal to a wide audience.

If you've had a couple of Vitamin E tablets, then this game will leave your gob wide in awestruck wonder.

# £25.99 OUT SOON

The ST is remarkably similar to the Amiga. In other words, it's strange. The scrolling isn't of the same cop, but the freaky garish colours will set those migraines pumping. Without a doubt, Top Banana may not be the best of the bunch, but it's certainly an experience.

**625.99 OUT SOON** 

Presentation: 13/20 Lastability: 13/20 Gameplay: 9/20

Weird! It looks nice, but it's

hell to play on. Especially when you're set upon by

some dodgy looking smiley

# GONESCE CONS

This week on the all-new

Console pages, we bring you the Mega-CD in all its glory along with reviews of three game titles. Plus the Hyperboy, Home Alone and Final Fantasy II on the Super Famicom...

# **BEAST MASTERMIX '92**

Originally featured way back in issue 20 of *Games-X*, **Shadow of the Beast** on the Master System is due for release any time now.

As the Beast slave you must avenge your parents' death and kill the Beast lord, a powerful sorcerer and also your master.

Set over six huge stages, the game features 11 levels of visually stunning

parallax scrolling as well as massive guardians which fill the screen. Using a specially adapted Master System control method, Shadow of the Beast Mastermix '92 will be reviewed next week in *Games-X*.

# ANOTHER WORLD ON ANOTHER MACHINE

Another World comes across as a superb arcade adventure from Delphine/US Gold, in that it uses slick graphics and taxing gameplay to complement the tough challenge.

Previously, Another World could only be experienced on the home computers, but on show at the CES in Las Vegas, the Super Famicom version of this gem, titled Outside World, reared its head.

As Lester Chaykin, you have been warped to a strange world when one of your science experiments goes dreadfully wrong. Your arrival is not welcome and you are promptly thrown in a cell.

Employing skill and wit, you must escape from the alien stronghold without getting your brain splattered across the wall.

When this mega cart will be available I don't know, but rest assured that *Games-X* will keep you posted with any further information.

# **HYPERBOY**

Compact size and portability have led to the Game Boy's success, so why have a unit, almost four times the size, which holds the Nintendo hand held!

The reason is simple. The Hyperboy rolls all the Game Boy accessories into one. The Konami unit features a lens which enlarges the screen, thereby making it easier to see, and a set-up including two small bulbs which allow you to use the Game Boy in dim light.

A spare bulb which slots in the existing socket is also included in the package — no soldering required. An amplifier and speakers are positioned at the bottom of the colour-coordinated unit, with the jack plug inserting into the Game Boy's headphone socket.

The Game Boy itself just slides into the back of the Hyperboy, held tightly in place by a roller. All the buttons are now placed at the front of the console, and replacing the D-pad is a small joystick.

Just above the stick is a small lever, which allows you to restrict joystick movement to four-way rather than eight.

The power switch is found on the right-hand side, although you still use all the Game Boy controls to change volume, brightness and the GB's power.

It is still possible to plug a power adaptor into your console rather than

using batteries, although the Hyberboy itself runs on two huge D-sized cells with nowhere to plug in an adaptor.

The Hyperboy, approximately 180mm high, 160mm wide and 250mm long, isn't exactly portable. It will sit firmly on a desk and shouldn't move thanks to four foot pads which can be raised or lowered to alter the viewing angle.

So, is it worth £50? To be quite honest I think that a bulky piece of equipment only succeeds in waving goodbye to the portability.

The joystick is easily usable and many players will prefer the feel of a stick rather than a pad, but I did notice that it has a tendency to stick – not very often but annoying if you're at a crucial part in a game.

Despite making the screen appear larger, the magnifier also increases the reflection and can make playing harder. The sound amp is good, but for the cost I'd expect much more on offer. Try a price tag nearer £30.

# HOME ALONE

Yes, the most successful comedy film of all time, and yes, it stars the pintsized millionaire Macaulay Culkin. But is the game conversion good? Judging by the

Game Boy version, sadly no.

You probably all know the scenario of the movie by now. Young kid gets left at home, house gets broken into and kid tries to protect it - cue lots of sidesplitting laughter.

The game is set sometime after the movie left off. Harry and Marv

have done their time and are back on the streets.

Obviously thev slightly narked about being banged up by a little toerag, and consequently they plan their revenge. When the McCallister's leave their house again, Kevin is in for a surprise.

Harry and Marv, the Wet Bandits, have now called upon the help of a band of henchmen to aid them in stringing Kevin up. With his BB gun, catapult and micro machines though, the young hero can beat these pair of buffoons.

As McCallister junior, you're the only one around to stop the thieves from stealing all the valuables. How? Simple.

Run around the massive house. collecting the gold candlestick holders, bags of money and other valuables before the Wet Bandits lay their hands on them.

If Kevin should bump into one of the henchmen, a point of his life force is lost. Three bumps and you're history.

The goodies are hidden in a variety of strange places: drawers, cupboards, linen baskets and, if you're willing to dip your hands in, the toilet bowl!

Due to Kevin's small pockets, he can only hold six items at a time, and the house usually holds over 20.

> He must therefore hide them away in a safe place, that is if he can

find the laundry chute that

leads to the basement.

When you have located it, simply press Up on the pad to drop the goodies right down the chute.

An easy task to begin with, Kevin's job of protecting expensive jewellery gradually the becomes harder. As he ventures into different levels of the house, the Wet Bandits he has to nobble or avoid become tougher.

During the later stages they even resort to throwing objects around which Kevin must avoid if he doesn't want to face the consequences.

You can, however, lead the

Kevin leaps around his bedroom, armed only with his trusty water-pistol

henchmen into a trap which will leave the way clear. For instance, try luring Marv across the drawing pins - he'll soon get the point!

OK, Home Alone may be a huge grossing film, but to put it bluntly, the game is a pale comparison of its silver screen counterpart.

Although visually OK, there is nothing outstanding when taking into account the Super NES's capabilities. Sound too is pretty poor.

Unfortunately simplistic the gameplay doesn't manage to save the cart from being dragged down to a substandard level. A great disappointment.

Harry and Marv arrive at the McCallister residence, little suspecting the noholds-barred conflict to come

ables are hidden all over the house for Kevin to seek out

# MEGALOD

The Mega-CD has been eagerly awaited here in the Games-X office for grabbing hands to dissect. Is it worth all of the hype? Will it really make you weep with desire?

Unpacking the box the first thing you notice about the undressed CD unit is that it feels remarkably light and flimsy.

It still awaits the actual Mega Drive to be attached on top to make it the rather smart-looking item which has made us drool for months

Since the Mega-CD isn't officially available in the UK, and because the imports are marketed for Japan and SE

MEGD.CD

EGACO

DISTRIBUTION

6300.00

Asia, you'll soon discover you need a Japanese standard Mega Drive.

The CD actually scans your machine to check and will complain if it's a PAL TV unit rather than a NTSC compatible Mega Drive. It simply won't work.

Although the official UK launch date has vet to be announced, it's expected to be in August. However, if you can't wait that long, you're better off knowing that the word on the grapevine has it that Sega is clamping down on unofficial imports.

Apparently, not only will it scan the Mega Drive you own, but also the power source, thus making future software uncompatible in the UK. Or so rumour has it. That sound vindictive? Well, that's the way it is

After learning about the major downers, you'll be glad to know that the Mega-CD does has its good points. The graphic capabilities compared to those on the poor standard Mega Drive are truly awesome.

An additional dedicated graphics chip is incorporated which can deal with much more sprites, animate them, and have full zoom, rotate and flip facilities.

Previously, only the Nintendo Super

Famicom/Super NES had this ability to deal with perspectives in such a manner

> The space on a single CD platter is phenomenal - over

650 megabytes of data. You'll be very lucky to see a game ever utilising the entire information.

However, because of the space, it can be filled up with studio recorded music and crystal clear sound effects

The Mega-CD can only load music and game data at different times: fortunately another dedicated PCB chip deals with this coordination.

Believe it or

the everyday Mega Drive owners, the

not to embarrass

game data from the disk. This can converse with the attached Mega Drive in no time whatsoever.

It also doubles up as a standalone CD player, so after a hard night's gaming practise you can relax and listen to your favourite grooves via the TV set or additional speakers.

have to control it through the Mega Drive

especially when it's officially launched in the UK with an estimated cost of £250.

get hold of Mega-CDs for around £300, with the game disks at £40 from

machines can be obtained from there or alternatively Console Concepts in Newcastle-under-Lyme.

CD is a massive medium for the future. It all boils down to whether you're prepared to be the first to ride on the crest of the wave, or whether you'd prefer to wait for the big one lurking in the distance.

it's exploited to the full it should certainly be impressive.

Megacom Distribution; Tel: 0602 475151 for the Mega-CD unit, and Console Concepts; Tel: 0782 712759 for the Scart Mega Drive.

retain up to a whopping six kilobytes of

It can also be called upon if and when the game requires it, with the game speed increasing exponentially.

If you have a CD-G disk, you can also watch images of the band on stage or in interviews.

The unit has no buttons, so you joypads. All controls for the CD

player have to be done on screen. even down to retrieving the CDs from their slot. None of this caddy rubbish here. This isn't too much to ask but it still seems a strange omission.

At the moment, the games we have tried are lacking that certain 'je ne sais quoi' but we believe the Mega-CD has such massive potential that the games surely get bigger and better,

If you can't wait until then, you can Megacom Distribution in Nottingham.

Imported Scart compatible

Mega-CD has potential and when

With thanks to the generosity of:

climb inside huge robots, trudge around the galaxy, and rid the known universe of intergalactic pests.

Portable vacuum cleaner alert!

SOF

This is more like it, a fun shooty-shooty game with blasting galore! You've probably already guessed that this is a solo mission only the spunkiest pilot in the

world could pull off.

.

•

•

Spanning six levels, Sol-Feace is set in deep space and pits you against

Look out Indiana Jones here's Ernest Evans and he's got a huge bull whip to strike down the enemy with Ernest Evans is a platform adventure of

immense proportions.

It features slick graphics and earshattering sound, as well as a superb animated intro that actually speaks to you, albeit in Japanese!

# HEAVY NOVA

UPPLIER: EGACOM

You enter as a trainee, attempting to join the IDF (Interplanetary Defence Force).

Obviously this crop of rock hard psychos doesn't let just anyone advance to such an esteemed position.

You must prove DISTRIBUTION your worth enduring the training course consists of biting the head off a live chicken and then doing obscene things with mutilated torso.

Heavy Nova, a horizontally scrolling beat'em-up, has you strutting from left to right

and kicking butt. A game for one or two players, the single robot option pits you against the SEGA MEGR-CD computer's might, PRICE: £40.00

whereas two human competitors must fight against each other on a one-on-one basis.

You begin at the very lowest rung of the ladder, controlling a weak robot with very limited moves.

> However, as you pile-drive your way along, progression through the various 'bots gives you a better chance to defeat the increasing horde.

Graphically Nova is OK, featuring large, nicely animated sprites. Sound

Time for a good beating from an end-of-level boss

too is pretty good but nothing outstanding when taking into account the CD's capabilities.

Unfortunately it is the gameplay that mainly lets the disk down, bringing a

tedious and somewhat boring element into Heavy Nova

Even the two-player option doesn't add to the game's appeal, leaving this one better left alone.

an alien horde. Throughout your battle you will venture deep into the alien's asteroid base with the intention of ridding the universe of the little slimes.

Sol-Feace is packed with goodies to bolt onto your ship to make your firepower more formidable. Starting with a pretty pathetic cannon, you can soon build up your weapon to the blaster which doubles your firepower.

Next is a wider version of the blasters that provides a larger fire-arc, followed by the melta-ray which breathes photon death onto even the meanest and cruellest of adversaries.

Missiles are the last weapons you will probably find, in view of the fact that they equip your craft with powerful shells that fire at an angle.

In addition, you can change the direction in which your main weapon fires by collecting the power-up icon from the top, bottom or head-on.

Sol-Feace is a competent shoot'emup for the Mega-CD, and does actually utilize the machine's scrolling and scaling facilities a little.

The intro to the game is cool; cartoon-style graphics accompanied by a few words of fluent Japanese. On the whole, a decent shoot'em-up.

Set over a plethora of levels you, as Ernest Evans, must battle your way across terrain unlike any seen before. Tentacles burst from the muddy surface and try to squeeze the last drop of life out of you, while birds swoop down to scratch your eyes out.

The only way of stopping such

torture is to hit them with your bull whip. As an agile character you can scale sheer faces by digging your fingernails in the mud and scrambling up the side.

However, due to the animation of the poor chap's legs, you look rather like a demented gazelle with epilepsy.

What can I say; you have a superb piece of machinery like the Mega-CD and all you get is sub-standard software!

Ernest Evans is OK to look at, complete with colourful sprites and backdrops, but the animation of the main character is diabolical.

The sound is, yep, good, but overall, poor gameplay leaves Ernest another title to be left alone

Ernest is about to come to a sticky end. Can he zap the advancing spikes with his bull whip before it's too late?

# FINAL FANTASY

(Nintendo

SUPER NES

PRICE: 645.00

DISTRIBUTION

Final Fantasy II, the latest in the role-SOF playing series on the Super NES, is set in the mystic land of Baron. Baron is protected by the huge airship squadron that retains a constant eye on the villagers far below.

However, of late, the King has used the airships, or Red Wings as they are known, to penetrate a neighbouring kingdom and steal the precious crystal hidden within the palace.

Cecil, the commander of the Red Wings, questions the King's order and is promptly thrown from the Red Wings.

To prove his worth an arduous task must be completed and a package retrieved from the misty caves...

And so the story develops, unfolding new mysteries to solve and revealing the far corners of Baron, aching to be explored.

As Cecil, you and the Dragoon Kain are impelled to fight against the King as he uses his power to crush the innocent villagers in his grasp.

Final Fantasy II is a simple to play 8meg role-playing game. Starting at the castle of your King, you can explore the

The game's up for the white wizard he's crossed the crew once too often

fortress using the D-pad to move and button A to operate switches, search chests, and talk to people to gain valuable information.

> Your party starts with only two people, Cecil and Kain, but as you progress new characters may recruited who can either increase your numbers or bless your team with magic skills.

Due to the vastness of the game a battery backup save facility exists that allows you to save up to four

different games to which you can come back to at any time.

Probably the best thing I like about Final Fantasy II is the fact that everything is written in plain English. Try playing a Super Famicom adventure when most of the text is in Japanese - it's damn near impossible, I can tell you!

That aside, Final Fantasy II is a first-

rate adventure with only one little niggle - the hands off sequences.

These appear quite frequently, are lengthy and cannot be skipped, so you have to sit back for ages waiting for Cecil to work out his predicament.

The graphics are colourful and the sound good, and to top it all off, the game incorporates a long-term challenge set to a sickeningly cute fairy tale storyline. An excellent product.

Cecil's mission begins with an audience with the devious King of Baron

Cecil encounters a darned big blue raven with sharp claws and a snapping beak

Cecil prepares to take on the hideous floating eyeballs in mortal combat

No.1 The Polygon, Eccles, Manchester. M30 0DS

games subject to availability

ou and a number of other invitees are the guests of the evil toy maker who has just died. Investigations into a number of child deaths revealed that the unfortunate infants all had one thing in common.

They were bought a doll made by the toy maker and they all suffered the same hideous death!

Now the toy maker has died and you must stay at the house in order to put the final pieces of the mystery together and solve the puzzle.

But nobody has seen the toy maker's body – is he still alive? Is he waiting in some dark corner with a razor-sharp chisel to plunge into your chest?

# **PAINSTAKING PROCESS**

Guest is the most advanced graphic and sonic presentation ever seen in the field of video entertainment.

At the Vegas show, Virgin's rival publishers were green with envy and the general opinion is that if one thing could sell CD technology to the computer entertainment world, it is Guest.

So how is this stunning presentation achieved? The game's designer, Trilobyte, uses a series of ordinary PCs with hard drives and it is a long and painstaking task which equates to 100 computer hours to process one second of finished game!

Therefore, the team work shifts so that production continues twenty-four hours a day. Designing and processing the project is time-consuming, and the sad fact is that there is a Computer Aided Design work station, costing many thousands of dollars, that can achieve what Trilobyte painstakingly produces in only a tiny fraction of the time.

Unfortunately, the investment would take many years to pay for itself. Also, Trilobyte reckons that this level of CAD is a cheat and it is happy to be at the heart of the project, going over the finest detail, in order to achieve the best effect.

The screenshots show the intricacy and the beauty of the game, but they cannot portray the stunning realism as

you move through the house. The process employs the true principles of architecture and physics using advanced CAD software.

The team first produces an intricate line design of a room, featuring the smallest details such as the switch on a lamp, the design and texture of the wallpaper or a title on a book.

The artist can then move throughout the room, rotate and see the room from different angles. The architect gives precise details of such intricate detail as the type of wood used on a piano, book shelf or staircase.

Then comes the most complicated and crucial aspect of the process. the calculations involving the various light sources and the many shadows they cast, as well as the various shades of light and dark.

As in real life these must change constantly as you move around. Even

more complicated is working out how the light source's reflections would appear on hundreds of different materials, ranging from polished wood tables, banisters and floors to wallpaper, leather bookbinders and carpets.

Furthermore, the choice of colours and various shades have to be perfected and again the reaction of light and shadow on different shades must be worked out.

Trilobyte is aiming for a completely harmonious, virtual reality house and it is doing it the hard way.

Playing the game is a truly cinematic experience. With a simple control interface, you just click on an object and glide smoothly over it.

Up stairs, through hallways, into the dozens of sinister rooms. Suddenly, you are confronted by ghostly aparitions which send shivers down your spine.

These ghouls run down the hall

towards you, disappear through the wall and act out a part of their life when they were alive which is most effective.

You can see all the features of the human form but the apparition is transparent. This hair-raising effect is achieved by fluid character and object animations, where real actors are video

The laboratory is one of the most beautiful screens in the whole game! Everything from the brickwork to the shelves is painstakingly rendered in full colour

filmed in front of a blue background. The video film is then transferred to the Autodesk 3D Studio, where it is animated against the architecture within the room where the perspective is perfected – the result is astounding!

Guest is based on a dramatization by Matthew Costello and the game itself

is a combination of rich intrigue and secrets. There are physical and cerebral puzzles to solve. But what horror story would be complete without shocks?

There are dozens in Guest, randomly generated by the many ways that you tackle the mystery. One stunning shock sequence occurs when

you walk past a painting. Suddenly a ghostly head presses through the canvas turning the paint to liquid.

As the memory gulping effects grow, it becomes less likely that Trilobyte will be able to produce the game on floppy disk. At present the game would take up numerous high-density disks.

30TH JANUARY-5TH FEBRUARY 1992 GAMES-

Guest proves that CD technology has no boundaries, the possibilities are limitless.

It will be released in the States first, on PC with CD ROM because there is already a sizable CD ROM user base over there, but in the UK a release date has yet to be agreed on.

I WANNA BE A SLUG!

Kit adds a little speed into Steg's elevate Steg above the floor, enabling

# THE SLUG SLOGS ON

As Steg becomes more proficient in feeding Tyungunz the little blighters happens our slimy friend has to work voracious appetites.

Steg has en energy meter which

Imagine the scenario:
Military tyrant takes
over small
independant country in
the Persian Gulf! Not
difficult right? Well,
that's the basis of
Electronic Art's new
project, Operation
Desert Strike. Jason
Spiller reports directly
from the action.

peration Desert Strike is an attempt to combine the thrills of seat-of-the-pants helicopter combat action with some very loose battle strategy.

The scenario will seem very familiar to you, can't think why! Basically, after being beaten by conventional forces a madman tyrant has regained his strength, licked his wounds and is ready for the next stage of his plans.

This time however, the despot has achieved a nuclear initiative which confronts us with a potentially more sinister and devastating outcome, should the coalition force lose its grip.

## **TAKING CONTROL**

Enough scene-setting, what about the game control? The Apache is set at a three-quarter angle perspective and you

Objective – disable the enemy's air force by flying a series of low level assaults on airstrips, making it impossible for aircraft to take off

can move the chopper in all directions, immediately dictating the speed and direction of the screen scroll.

But this is low level, close quarter stuff and you don't see your target until you're right on it. Conversely, enemy air and ground forces stay out of sight until the guns are bearing down on you.

In addition to the speed and immediacy of the game, the awkward cyclic and yaw controls of real helicopter flight have been cleverly transferred to the control interface, whether by luck or judgement is open to question.

This means that the bird's flight attitude must be constantly corrected – it really has to be mastered!

Although the perspective is reputed

to be unique in the field of helicopter arcade games, there is a similarity to the control in that old 8-bit hit, Airwolf.

## TOTAL WIPE-OUT

Your objectives are split up into four missions, all aimed at disabling the enemy. The operations take a logical sequence, beginning by wiping out the communication system with swooping bombing raids on radar systems.

To decrease the enemy's air strength, you must locate airstrips and pepper them with hammerblow bombs. Then there are the dangerously-inaccurate SCUD launchers which must be wiped out.

The destruction of anti-aircraft weaponry improves the likelihood of a successful assault.

Once the enemy's military force is weakened the evil dictator plays dirty, taking hostages, setting oilfields alight and threatening chemical warfare.

The ultimate goal is to reach the wolf's lair and bombard the bunker with bombs, but this area is tightly protected.

# LEMME AT 'EM

Although Desert Strike is billed as an arcade/strategy, the emphasis is most certainly on arcade. The angle of perspective works well, but there's no denying what the key to success is.

Simply put, a constant barrage of fire has to be maintained and a constant barrage of missiles has to be avoided.

Published by Electronic Arts the game will be available on the Sega Genesis in March

Take off and landing on a moving landing pad takes some practice – you only get one go and Apaches don't float very well

30TH JANUARY-5TH FEBUARY 1992 GAMES-X 35

# 71:73411

## Dave Hughes (31)

have a Commodore 64 and love to get engrossed in most shoot'em-ups. I bought the Dizzy Collection for my nipper at Christmas and she loves it; you don't stand a chance of getting her off the computer once she's got going.

I like racing games and it's a funny thing but a lot of people say I look like Nigel Mansell. I play a bit of squash in my spare time and my wife and I enjoy going shopping.

## Mark Hobbs (21)

like most good sports games, World Class Rugby is great and so is Kick Off. I

must admit though that I don't like the Domark rugby game too much. I play football myself, either as a goalie or striker.

## Craig Ananin (11)

n my Atari ST my favourite games are The Simpsons and WWF Wrestling. Most games by

Ocean seem to be pretty good but these two are brilliant. I'm thinking about buying a hand held console but am unable to decide between the the Game Gear and the I vnx.

I'll probably go for the latter because most of my friends have got one and the

games seem to be better. I like this shop 'cause the staff are friendly and let you try things out first.

## Matthew Ananin (14)

inal Fight is one of my favourite games, more so since the graphics

on it are dead lush. Paradroid is also pretty good. I own an Atari ST but for my birthday I'm probably going to get a Game

Gear although I may go for a Lynx.

I like this computer shop because there's loads of room to move about and look around. Some computer shops are tiny and you can't get to the shelves.

## Chris Masterman (12) Gareth Davies (12)

produced by the

designed the

Amiga. As for

games I really

enjoy playing

Stun Runner.

same people who

G ames-X is one of my fave magazines and I buy it most weeks, I like the reviews. Ithough the Game Gear is good, I think the Lynx is better in Nintendo games have really that it is 16-bit and

addictive gameplay but they're a bit expensive.

The staff in here play games themselves so you can talk about the new releases with them without being hassled as can happen in other shops.

# This week's winner at Soft Centre in sunny Newport

Lee Edwards (24) st - Sonic the Hedgehog and

I enjoy playing football and rugby, and women too are on my list of priorities.

# SHOP TALK

## Steve Mackerness - Manager

his shop has been open for just over three months and we've had a great response so far. Our best-selling machines tend to be the Nintendo Action Sets but if we had been able to get an adequate stock of Mega Drives during Christmas then they would probably have been more popular. We carry a fairly large range of PC games and I envisage

that section of the market growing in a big way. Games like Civilization, Eye of the Beholder 2 and F-117A Stealth Fighter, only available on PC, are creating a lot of interest. I like most games by Sierra: Leisure Suit Larry is a particular favourite and the only game I've ever finished!

FROGGIES AT WAR

Can I call you Doc? Well, I will. Doc, I had some most triumphant games for Christmas but unfortunately I am poo at them. I've had...(Oh get on with it - Doc) I need help with Future Wars from those froggy geezers Delphine (nothing like a touch of cross channel détente - Doc). I have collected everything I can see and dropped the water on my boss but how do I reach the high cupboards in the office and WHAT do I do now? I'm completely stuck.

Also, how do I complete the biscuit level on Robocod? I keep getting sent back to the beginning. I would appreciate it if you would answer my queries and, by the way, I love the dicky bow.

Jeremy Foster, Nuneaton.

Dr X: Well Jazza, you certainly waffle on and make more demands on your betters than most people. Just this time, I'll answer them because for once someone actually likes my bow-ties - not dicky bows, that sounds like a prostrate sparrow.

In Future Wars you are stuck where just about everyone gets stuck. Go into the bathroom, and scour the floor. If you squint enough you should see a red dot. a whopping one pixel big. Pick up this flag and take it to the room with the map. Now search this map for another dot, then put the flag in the hole and you should be able to progress further. If you've got a monochrome television, or poor reception, you might as well bin it.

I was going to show the screen with the one pixel big item on it from Future Wars, but I didn't think it would be fair to strain your eyes. So here's a well-known brand of biscuit in Robocod for your perusal

On Robocod, you're not exactly explicit in explaining which biscuit level. I've had to guess which one it is, it's probably one of two. One is a bonus level with four exits. Don't go to these, there is a hidden exit to go to on the extreme far right of the game screen.

Otherwise, it's in the level where there is more than one exit again. Don't take the obvious one, but leap over it and jump up with the spring as high as you can go into a catacombs level. Play around up there, and find the alternative exit.

A WORD FROM ON HIGH I am the supreme master of the Universe. Give me all of your Amiga software or I'll make you have a serious talk with John Major.

David Cockram, Chinley.

Dr X: Oh, go away!

#### IT'S A FAIR COP

Help!!! I am stuck on Police Quest 3. I think it's on day five when I come into the detective's (homicides) office and I phone dispatch and give them the descriptions of the serial killers from the analysis of the gold paint transfer at the murder scene. Hanks is trying to find a pattern to the homicides.

Then I get on my computer and on the city map plot the four homicides. Then I base a pentagram on the four points and come up with a fifth one around 0-100E Palm. What do I do now? Am I doing anything wrong? What can I do next? Please help me!

Dr X: Well, Wally, I'll call you Wally because that's what you must be when you realise your question is on dodgy foundations. You've appeared to have done everything correctly, having dealt with the paint and made up a pentagram to find the next crime scene.

Waleed Rizk, Arkley, Herts.

Make sure your pentagram is accurate, and then you can dash straight to your hunch of a murder scene. You'll know if you're right because you'll end up outside the Nugget bar. Anywhere else, and vou'll have gone off-line somewhere on the track.

**HEADSHRINKERS ANONYMOUS**Please could you help me. I received an Amiga for Christmas and I went out and purchased the excellent Monkey Island for it. With the help of two Games-X player's guides I have managed to reach the point where I can open the Monkey's Head.

It is here where I am stuck. What do I do next? The cannibals say that I need the Navigator's Head before I can search the caverns. Do I need the head, and if so, how do I get it? Please help me, I am at the point of insanity and driving my family mad. Chris Baird, Glasgow.

Dr X: Christopher, Christopher, Christopher. Honestly, you really must be a class one dork. If you paid more attention to the game proper, without taking the easy way out you would probably have noticed your mistake.

Ahh, the bracing sea front. You've got your ship, now the world's your oyster. Or something like that. What do you want, an accurate facsimile of the leaflet?

Velcome back to my homely little surgery. You may think I'm harsh, cynical and nasty at heart, but really I'm as lovely as a spring lamb. Happy, loving and generous to boot. I may be a bit sharp at times, but really I love you. Oh blow it! Just send me your problems you little worms, but don't crawl for goodies or act like runts because I won't reply. You heard, send them problems to: Dr X, Games-X, Europa House, Adlington Park, Cheshire SK10 4NP.

Near the beginning you should have collected the leaflet. A quick glimpse at this should provide you with a subtle clue. About as subtle as a sledgehammer opening a peanut.

The leaflet is called, "How to get ahead in Navigating". (Cue patronising voice): What do you want? A navigator's head. So give this to the cannibals. they'll give you the head and you can go search the caverns. Ridiculously easy really, and you must now feel a real twerp.

#### THONGS, TASSLES AND TASTY TOADS

am stuck in that brilliant Infocom adventure, Leather Goddesses of Phobos. I know it's old, but I'm well and truly stuck. On Mars, I've managed to get the mouse, by terrifying the poor little devil with the picture of the pussy. However, the frog is a different proposition altogether. I know I have to kiss it, but I can't make myself, or Trent to do it. I'm sure I need it, but what do I do? Joanne Lonsdale, Rochester.

Dr X: I hope you're not playing it on the Lewd level. You're not old enough for a start, and I may have to send the heavies from Virgin down. As an amazing coincidence though, Feargus our hapless Production Ed was seen stuck on the same part only a few days ago. I don't know if he got past it or not. I doubt it, no one in their right minds would give him a snog, not even a frog.

Entracterates

Sitting on one of the stone blocks is a large green from Sociething about it catches your eye. as your eye. an see a tray, a flashlight, a painting, a blanket, a scrap of c vicker basket, a natchbook, a hunk of brown food and a mouse here. and with your eyes closed, but just as you are about to kiss stenck of old band sour overskeins our, and you lunch back.

Naturally frogs don't want to be kissed, and you don't really want to kiss a frog. A catch-22 position. Go on, tongue tickle that slimy hopper

Anyway you do have to kiss it. The smells, sounds and sight would turn stronger folk to jelly, so here's what you have to do. Put the peg on your nose, cover your ears with your hands and close your eyes. Grope around in the dark, and give it a peck. Poof! You can quess the rest.

# BUDGET BONANZA

### **POPULOUS**

STAR PERFORMERS £9.99
OUT NOW 16-BIT

he game that started the trend is now available for the measly price of £10. Unfortunately most of the software owning public will already have it and be halfway through the sequel by now!

Giving you the chance to play God was a highly original idea at the time, but since then we've had Utopia, Realms and the greatest of them all, Mega lo Mania.

Here you have to fight against a rival God for control over the land. This is done by getting your people to

set up home and multiply. You steadily gain power, shown by a bar to the north of your play area.

This power bar can be used to create natural disasters such as earthquakes and floods which devestate your opponent's population.

The isometric graphics are excellently drawn and icon space is laid out perfectly. The various worlds all have a unique look and style although completing all of them in the game will take an incredible amount of patience and skill.

This is not quite as good as its sequel and for me, of a far lower quality than Mega lo Mania. You certainly cannot grumble at the price though. Worth a look if you don't own it already.

X-RATING: XXXXX

### **RESOLUTION 101**

GBH £7.99 OUT NOW 16-BIT

aking on the role of a police officer in a oneman fight against crime, your job is to tear around the city in your cruiser while shooting the marauding criminal vehicles in a bid to wipe them out completely.

Using vectors to display the city and graphics for the various vehicles you'll discover, the game is viewed from inside the cockpit of your car. You are therefore provided with all those necessary instruments such as the ever so handy scanner.

Ripping around the roads can be fun for a while but killing the baddies takes far too long and most players will turn off the game after five minutes, having died for the umpteenth time.

Both driving game fans and shoot'em-up freaks will enjoy this, but with the likes of Stunt Car Racer available for the same price I'd advise you to go for that instead, unless you're desperate to own this game, in which case you need treatment, and fast!

X-RATING: XXX

#### IVANHOE HIT SQUAD 67.99

HIT SQUAD £7.99 OUT NOW 16-BIT

cean France has programmed some of the best games in recent times, Toki, Operation Wolf and Beach Volley to name but a few. Ivanhoe is a game the team designed itself and has some of the most outstanding graphics you are likely to see.

Basically it is a horizontally scrolling in

beat'em-up in which you control a beefy knight armed with a sword. Hordes of nasty men will head towards you and must be killed. That, as they say, is it.

Sadly something went wrong with the gameplay; the controls are very hard to get to grips with and dying is far too easy to succomb to. At £8 this is fairly good value but I'd advise that you look elsewhere for a decent game.

X-RATING:

### INTERNATIONAL NINJA RABBITS

MICROVALUE £7.99
OUT NOW 16-BIT

when you have an unbelievably silly game that emerges as a best seller, a sequel is inevitable, just as daft as the original.

Old Mr Rabbit, having destroyed the factory at the end of the first game, is now travelling around the world in a bid to rid the various countries of pollution on his travels.

You start in China in the pouring rain with hoards of other martial arts-

After a while you'll discover a hole in the ground which, should you fall through, will lead you down to a Chinese laundry.

Graphically the game is an improvement over the original with many great effects such as the rain, snow and a rippling reflection in the water. All the sprites are also very well-drawn and humorously animated.

I can recommend this game to anyone who has experienced the original and fancies a good laugh. There is also an offer for a cracking T-shirt in the box! Better than a Ninja Turtle any day!

More and more cheats are just flooding in and most of them are actually quite original little blighters! If any of you miserable lot have anything interesting to say, send your donations to: Tip-X, Games-X, Europa House, Adlington Park, Macclesfield SK10 4NP.

## ROLLING

People have speculated about the cheat mode on this game for a while now, and until this particular moment no one has actually sent me one that works.

Well, now, thanks to a mutated **Beef and Tomato Golden Wonder Pot** Noodle which has mysteriously gained the power of extrasensory perception I can reveal to you that typing your name as CHEAT on the high score table will allow you to fly!

# C: DARKMA

Could this possibly have been the worst game of '91? Maybe so, but for those stupid enough to have actually bought it you will be pleased to know that there is a cheat mode.

It can be activated by typing MEACULTA anywhere during the game. Whether this works or not I don't know, but some chap called Ron from Safron Walden says that it works.

## THE GODFATHER

So who's already got a fair way in the Godfather eh? If you're experiencing trouble we can help! According to Mad Butch, if you pause the game and type PIZZA HUT you will activate the cheat mode.

Infinite energy is now yours!

## OH NO! **PSYGNOSIS**

Really milking this one for all it's worth eh? This week I give you the WICKED codes... 1: UGMCCHUNDR

2: OKCOITUODE 3: MCCLVUFPDH 4: CILVUFMQDO 5: GAIPTEHBEM 6: KHRTDLGCEL 7: LRVDLFGDEN 8: RVLJGILEEH 9: VLHGAHVFEO 10: DLGIHTTGEP 11: NGALUTDHEP 12: GKLUTDLIEI 13: GEHQUDLJEM 14: KHQWMHGKEK 15: MPUDLGALEO 16: PULHCKMMEN 17: ULJGEIUNEL 18: ENGKHUUOEO

19: HGGMTWLPES

20: GIMVWLJQEJ

# C DEUTEROS

Described by Scoop as being 'very good' this superb thinky. thinky game requires diligence and concentration. However, if you're having trouble you may find the following quite useful. Go to the surface stores and press shift C. The screen will now go green. Press shift C again and you will now find that there are infinite supplies of everything!

## CE ANOTHER WORLD

The rest of the codes for this superduper game will take you all the way to the very last bit. Mad Butch from the Netherlands is responsible for this lot... 7: FADK

> 8: KCIJ 9: ICAH 10: FIEL

11: LALD 12: LFEK

will now change again to a close-up view of the goons. Press Fire again quickly

These Don Bluth games really are a pain! Despite absolutely gorgeous graphics, playability is completely naff, to say the very least. Well now, thanks to the help of my dear brother Mr Peter Davison, we can bring you the complete solution to Space Ace II: Borf's Revenge...

the planet surface. When Dexter leaves the

ship, push Up to avoid the creature

YELLOW MONSTER (REPRISE)

First scene of Disk two. As soon as the scene begins, push Up to face the monster, then press Fire to zap the cretin in the gob!

#### MONSTER REACHES OUT

As this scene starts the monster will be more than a little agitated by your recent attack. Push Left immediately to run away from the creature's crushing grip

**ROBOT INTRUDER SENTINEL** 

It's not immediately obvious what you're supposed to do here. As soon as Dexter has leapt into the centre of the room push Right and then Up (not too quickly) to avoid the lasers. When the scene changes push Up again to dash through the door

**LEDGE TO SAFETY** Little red room, little pipe. Jump Left to enter the pipe - simple!

**PASSING PLATFORMS** 

As Dexter lands on the purple platform push Up to dodge the laser, then push right about a second later to leap onto the passing platform. Initially a bit hard. Save your game first if

MACHINERY TOWER
When the screen shows the tower, push
Right to leap into the appropriate hole

BEWARE THE DARK SIDE
First scene Disk three. After Kimberly says "Beware the Dark Side", push Down to dodge the laser and then about a second later press Fire to destroy your dark side

As you see the inside of the hole press Fire to use your wrist watch and transform into Space Ace. Yeah!!! (cue fanfare, cheering crowds)

When Dark Ace is about to place the block, and you, into his oversized cake hole push Right to shuffle around the block and avoid his deadly jaws

Press Fire here to shoot at Dark Ace's gob. Simple as that...

Push Right to run away from the manic head. When the piccy changes push Up to get out of the way

ON THE EDGE
Immediately push Right to avoid the zap from Borf, then push Up as soon as the monster appears from the bottom of the screen. After Ace dodges push Left to avoid the other blast from Borf. When Ace reaches the left-hand side of the screen, push Up to make a final leap from the monster

This scene starts when you see Ace and Kim together. Press Fire straight away to zap the pit monster. You have now completed Space Ace II!

Uncle X lives in Bruxism City, Arizona. But you can write to him at: X-IT, Games-X, Europa House, Adlington Park, Macclesfield, Cheshire SK10 4NP.

I've waited and waited for G-Loc to come out on the Amiga. Please can you tell me when it will be out in the shops?

I've looked in the computer shops for the Amiga version of Police Quest 3 and I can't find it. What shop can I get it from? That's my serious problem.

Raajveer, Maidenhead, Berkshire.

It'll be in the shops at Easter. Watch out for a review in GX really soon. You'll have to wait a while for the third instalment of the Police Quest 3 series on your machine. So it looks like you've still got half a serious problem left.

#### NON-GROVELLER

It's Neal 'Master of all Games' here. I have been buying your great mag since it came out and since then I have persuaded many of my friends to buy it too. As you can probably guess I would like some sales commission. Yes, in the form of a T-shirt. But, I am not going to lower myself to grovelling.

I am simply asking for repayment. Print this letter or I have wasted this paper; the time it took me to write this letter; some black ink; envelope; stamp (don't forget brain cells, that's if you have any - Doc).

PS I hate Dr X

PPS Is Dr X by any chance Alex Simmons?

PPPS The Lynx is by far the best handheld

Wright, Cranbrook, Kent.

**Neal 'Master of all Games'** 

For someone who WORD OF wasn't grovelling THE WEEK: you've done a BRUXISM n. the pretty good job at just that. Look, to get involuntary or a T-shirt you've got to habitual grinding write a letter that stands out from the rest. or clenching of Why not tell us your the teeth. As in: thoughts on some computer or console There'll be a related topic which really mighty wailing gets you going (oo-er and bruxism in missis - Doc)? Then you stand a chance of getting the streets of an exclusive T-shirt. Poynton tonight.

Hate is a pretty strong emotion, but thinking about it, the Doc is incredibly obnoxious.

(Hmmph! - Doc). Oh, and Al 'console' Simmons is certainly no doctor.

#### POLICE QUESTIONIN

Could you please answer the following questions?

Are Police Quest 1 and 2 out on the Atari STFM?

If so, do I need any extras to play them like a hard drive or a 1 meg upgrade. Don't bother saying anything about Police Quest 3 as I will be completing it next week on my friend's IBM PC - thanks to Games-X's brilliant player's guide.

PS How much will the Police Quest games cost?

PPS Will this be printed?

PPPS Games-X needs more Mega Drive reviews

PPPPS Games-X is brilliant.

Graham Dick, Clarkston, Glasgow.

Both games can be played on the bogstandard ST, but as with other games of this type it's best to have a hard disk to speed things up.

You'll be able to pick up a copy for £25.99 in the shops, but why not take a look at some of the mail order ads in GX and save yourself some dosh.

been collecting Games-X since started and I've got every issue. I own a Game Boy and I've got lots of games for it. Before I ask my question I have to say that every time I look in the X-it page nearly every person begs to have one of your Tshirts. Nearly all of the time you say no. Why are the T-shirts so special?

(Because he's a miserable old skinflint, unlike me - Doc).

- 1. Is there such a game as Final Fight on the Game Boy. If so, when is it coming out and how much will it cost?
- 2. I heard that there is a Game Girl coming out. What will be the differences

#### A CHEESE SANDWICK

Yes, the sandwich with the cheese is back and this time he's brought his OF THE crusts. Well, here I am again, after a well-earned break in the land of VEEK sun.

My latest promotion follows along the same lines as the recent Game Boy in a packet of Quavers jobbie. Chuckle not, oh answering one, as I hope that the profits from this little earner will make enough for a holiday for an indefinite period of time. It's entitled: Free arcade machine in a packet of Yup crisps - they're sure cheesy!

One snag I have hit upon is that the packet containing the arcade machine is rather obvious, ie very large, loud, with flashing lights. Any ideas?

Thanks a lot for the offer of a sacred Games-X T-shirt, but you don't really seem to understand that it might be a tad large for a sammy of my size. A Partly Toasted Cheese Sandwich, Kent.

Easy one this. Have you thought of putting a very large flashing decoy in each bag of crisps, it couldn't fail to fool everyone. Nifty idea, eh? Come to think of it though it might be a tad expensive.

As for the T-shirt, let me know whether you are a thick or thin sliced sarnie and then I'll see what I can do.

	TANDERSON THE MAN THE STATE OF
lame

	Post to: Games-X Classifieds, Europa House, Adlington F Macclesfield, Cheshire SK10 4NP.

between that and a Game Boy? If it's coming out how much will it be?

3. Which do you think is the better game, Double Dragon 2, Battletoads or Nemesis?

#### Raymond Tang, Enfield, London.

- 1. Not that we know of.
- 2. A Game Girl?! Hmm, have you always been so gullible, I bet you still believe that there's a tooth fairy? (I'll have nothing bad said about her. I think she does a smashing job – Auntie X.)

There never were any plans to bring one out. Never mind though, just take a look at this week's show report from Las Vegas to find out about the colour Game Boy instead.

3. Al insists that Double Dragon 2 is the best, but I'd go for Super Mario Land.

#### DEFECTOR

I got a Star LC-200 for Xmas and it is wicked. I have got a few guessys for ya!

- 1. Will Sonic the Hedgehog be coming out on the Amiga? If so, when?
- Is there going to be a Kick Off 3? In one issue yonks ago you printed details and I've waited for it to come out but it hasn't.
- 3. You can send me a T-shirt if you want. Please print this or I will be forced to write to an unmentionable person from another mag.

Chris Smith, Stockton-on-Tees, Cleveland.

- 1. The good news is that US Gold has gained the rights to Sonic. The bad news is that it has to wait until Sega gives the go-ahead before starting work on the game. As yet no one knows when this will he.
- 2. Rumour has it that Kick Off 3 will be released around summer '92.
- 3. 'Fraid I don't feel the urge to be nice to anyone, specially someone who is on the verge of defecting to another publication.

#### ON THE WALL

My friends and myself who are keen readers of your magazine would like to suggest that you design a pull-out poster for some of the games that you X-rate each week.

We all enjoy your magazine a lot,

but we have heard from other people that they buy a special magazine simply for the posters that they have. I am sure your sales would increase if you also did this

BLJ Mould & Friends, Camp Hill, Nuneaton.

OK, this lot have told us what they think.

Does anyone else have the overwhelming desire to see a poster in the centre pages of the mag each week?

Write in and let us know.

#### TEAM TALK

The most important day of the year happens this week: Bri turns the ripe old age of 18 and is going to be dragged kicking and screaming to the pub by all his mates. Not only that but they are going to be forcing drinks down him as well (the lucky... – Fungus).

Alex had a terrible time trying to get pictures off the Mega CD. He got so annoyed that he was even more grumpy than usual. He's gone away to sulk for four days. Thankfully he'll have been cheered up a bit by the Washington Redskins' Superbowl victory.

Feargus is a bit annoyed that Alex took his Amiga home because it means that he can't sit and play Powermonger during his lunch hour!

Dear Mr or Mrs Newsie,

Please would you reserve/deliver a copy

of Games-X every week for:

name.....

Address

Post Code.....
