### "DO MORE IN '44"

It is the hope of The Cash Box that the members of this industry will adopt the slogan, "Do More in '44". And will make this slogan their paramount effort during this year. All industry now feels the growing nearness of the post-war era. Cut-backs and roll-backs of war materials production are being reported daily. Demands from certain large raw materials suppliers and producers that they now be allowed to sell to manufacturers for domestic materials production, has created a sudden realization among a great many business leaders that they had better now plan hard and fast for the post-war era.

Business will have to reconvert back to former products in an attempt to keep up the present speedy business tempo and, if possible, to even increase it.

A great many of the men in this industry have tried to plan ahead. But like all other business men, they find themselves stymied for further planning because of the fact that they do not know just where and how they will fit into the future picture. The average man in this business believes that he will probably do just what he is now doing when the time arrives for him to start with the new equipment. Distributors believe that they will once again become distributors for the leading coin machines manufacturers. Jobbers who are somewhat ambitious are in the hopes of taking over distributorships. Many operators who have developed fine organizations during this war period are also preparing to enter into the distribution field. The majority of these latter also intend to maintain their operating organizations at the same time. All in all, as regards the problem of post-war planning, it finds most of the coinmen uncertain of their next moves.

This bodes little good for the industry as a whole. As stated above, with everyone beginning to feel the nearness of the post-war era, this is the time for post-war plans to be presented for the good and welfare of all concerned. This is the time for industry leaders to step forward to help those who need help. An era of closer cooperation is approaching. This year should see the fruition of the first such close cooperation plans.

It is the sincere hope of The Cash Box that this industry will prepare itself for the coming post-war era by the creation of committees to open the path to better business practices. This is most necessary for assured and continued success. It should also now be apparent to all the members of this business that some sort of recognition bureau is necessary for this industry which will arrange for all the trade to know just who its manufacturers, distributors, jobbers, operators and suppliers and other associates are and how they rate. Such a recognition bureau will prove absolutely indispensable.

A certain standard should be set up for each and every division of the trade. These standards should be made to work. They can be made to work. They will prove invaluable to the industry. There will be many outsiders entering into this business when the war is over. Among these will be some very powerful, financially responsible persons and organizations. They will want some idea of the extent and development of this industry. They will want to know the prospective market. They will want to know what their chances are for success on the investment of a certain amount of monies. All this should be at the fingertips of some recognized bureau in this industry as it is on the fingertips of noted bureaus in all other industries. There never has been and there isn't today any organization that can present any national statistics which can be based on fact. Or that can give a complete picture of the extent or the power or the influence of this industry. The coming post-war era should dispel all this. There should be created organizations within the industry capable of instantly presenting definite facts and figures to help gain this industry greater recognition.

The Cash Box made the one and only survey in '43 that this business has had in a great many years. This survey produced some surprising and interesting facts and figures to the trade. It proved that music was the most popular of all divisions of this industry. It also showed that pinball was still the most dominant in the amusement machines division. This was made possible as an individual effort only because of the highly concentrated condition of this industry at this time. When this industry

starts jumping to new and greater size than it has ever before enjoyed, no statistics of any sort will be available for presentation when the time arrives unless there is some one certain organization created for this very purpose in this industry. "Do more in '44". Get these necessary industry units started now to help gain greater recognition for all.

### NUCLEUS

The nucleus of this industry is now rather well known. Those men who have done some traveling in the past year realize how highly concentrated this industry has become. When they enter into a city where formerly there were hundreds of operators, as well as a score or so of jobbers and distributors, and now find but one or two distributors and probably no more than this number of jobbers and much less operators, they are somewhat shocked by the fact that we have become so much smaller as an industry. Yet everyone seems to be in a better financial position than when this business was at its supposedly most booming height during the pre-war years.

These men who are left in this business today, are the nucleus for this industry's growth for tomorrow. These are the men who had the gumption to stick it out. They are now realizing the profits and progress of this effort. Whatever the future will hold isn't as yet clearly predictable, but these men hope to lead their communities when the growth of new blood starts. We hope that they will be given preference by the manufacturers for it was their resolve and their wills that gave this industry the backbone it needs for the post-war era. We do hope, with these men, to believe that such preference will be the case.

Those men who today form the nucleus for the future growth and development of this business, are the men upon whom this industry has to plan for its future. Therefore these men, if they will handle their futures as intelligently as they have handled themselves up to this present time will be assured of the true fruits of their work and the financial positions which they desire to attain. It is most necessary for these few men to come together now so as to assure themselves this future, better welfare. Only by close and complete cooperation with each other can they be certain of their future success.

### HONORABLE MENTION

This week we take great pleasure in giving our Honorable Mention Award to the following men: Lloyd C. Bristol, Up State Amusement Co., Watertown, N.Y., for the fine work that he has done for the local U.S.O. centers in his community. Not only is he continuing to service the machines he donated but is also continuing to give even more equipment to help maintain morale.

To Edwin C. Heath of Norwood Music Company, Norwood, Ga., for his donations of machines to the armed services and for his efforts in behalf of the men now fighting for victory.

To L. M. Kidd of L. M. Kidd Automatic Amusement Co., Richmond, Va., for his donations to the fighting forces. Kidd is trying to make the hours go by much more pleasantly for the service men and is eager to help at all times.

To Larry Frankel of Frankel Specialty Company, Rock Island, Ill. for his donations to the fighting services and his work in their behalf.

### LOCATION COMMISSIONS

The other day we received a letter from a noted coinman about our suggested commission basis to the average location. He referred to our articles in past issues of The Cash Box wherein we have been urging the trade to a 30% - 70% commission basis for the "average location". (Once again we wish to remind our readers that there are those exceptional locations, usually amusement machine sports, where the earning power is so great that the 50%-50% commission basis can remain in being and yet bring sufficient returns to make such an arrangement profitable to the operator.)

The average location does not warrant any such advantage from the operator. The 50%-50% commission arrangement was the result of the boom that developed during the last depression when sales of pin games ran to such a tremendous volume that to obtain locations percentages were raised. In some cases percentages went to 85%-15%, the 15% for the operator. But these were unusual instances and soon passed out of being, for no operator can exist on 15% regardless of how good the location is. Other cases wherein operators received a specified cash amount each week instead of commission are also well known to all. This war period has killed all these illogical percentage methods and the result is that the majority (the great, great majority, probably 98% of the cases of location commissions in this country) are today on a 50-50% basis.

When we first urged reduction to a 30%-70% basis we explained that this was due to the fact that increased overhead (as for example the rise in wages, the high cost of

The first part of the document discusses the general principles of the proposed system. It outlines the objectives and the scope of the project, emphasizing the need for a comprehensive and integrated approach to the problem at hand. The text highlights the importance of collaboration and communication among all stakeholders involved in the process.

The second part of the document provides a detailed description of the system's architecture and components. It explains how the various elements of the system are interconnected and how they work together to achieve the desired outcomes. This section includes a thorough analysis of the system's strengths and potential limitations, as well as a discussion of the implementation and maintenance requirements.

### CONCLUSION

In conclusion, the proposed system represents a significant advancement in the field of [specific field]. It offers a robust and scalable solution to the challenges currently facing the industry. The system's design is based on sound principles and has been thoroughly tested and validated. It is expected that the implementation of this system will lead to improved efficiency, productivity, and overall performance. The authors express their confidence in the system's ability to meet the needs of the users and their commitment to ongoing support and development.

### REFERENCES

The following references provide additional information and context for the research and development of the proposed system. These sources are cited throughout the document to support the authors' claims and to provide a foundation for further study. The references include academic papers, technical reports, and industry publications, all of which have been carefully reviewed and selected for their relevance and quality. The authors encourage readers to explore these references to gain a deeper understanding of the system and the underlying concepts.

## "The Coin Machines Merry-Go-Round"

scarce materials, the increased cost of maintaining equipment, inflated living expenses, etc., etc.) have of themselves created the necessity for lowering the percentage commission to the location owner so that the coinman will be protected. Not only protected for today, but for the future as well. Not only protected because of general overhead increases but also because of increased taxation and the many new taxes that are coming into being.

One complete territory in the state of Michigan followed our suggestion. Today this entire territory works on a 40%-60% basis and finds that it is actually showing profit from locations where it formerly just broke even, or, many times, lost money. This has aroused the desire on the part of these men to go down to 30% from now on. They realize that once down to 30% they can better control their finances when the war is over and when the purchasing of new equipment in quantity becomes paramount to maintaining their leadership.

Prior to the presentation of the pin game this industry paid from 15% to 25% commission on the bulk merchandising (pistachio) machines which it operated in great quantity at that time. It paid only 30% and sometimes 40% on scales until the boom scale year of '29 when the complete convention at the Hotel Winton in Cleveland was all scales and then because of the competition that developed some jumped to 50% to obtain locations. On slots this industry always did pay as high as 50%, but these are one of the truly "exceptional" machines. These machines, because of their great earning power where they are allowed to operate and where they have locations to operate in, can cover a 50%-50% commission basis and still show keen earning power, regardless of all other extraneous expenses which may be involved in such operation. But the average coinman (and approximately 84% of these are today in music) cannot continue on with a 50%-50% commission basis and believe that after the war as well can they continue to afford this percentage basis and earn money. It is a well known fact in this business that games paid the notes for music in the beginning of the boom music era because of the fact that this strange amusement game commission basis was being applied to such an instrument as a coin operated phono.

Now is the time to get down to a 30%-70% commission basis. This is the one and only basis that will assure the average coinman a decent profit and a chance to accumulate sufficient finances so as to secure himself for the post-war era. It will also be the means to arrange for better and easier payment of the equipment he will buy when the war is over. When the manufactories begin to again produce coin operated equipment on a mass volume basis. It will also mean better control of his locations. This can all be done now - today. Perhaps a few months from now, this opportunity will be lost. We are heading lickety-split into the beginning of the post-war era.

Furthermore there is only one way that this can be done and done soundly. That is to call in everyone of the men operating around you in your territory and present facts and figures to them which your bookkeepers and accountants will be more than happy to produce for you. Show these men the necessity for going down to a more certainly profitable basis for themselves. By such unity and logical action can an entire territory find itself earning better profits than ever before in its history. And can also assure its continuance as a profitable territory regardless of what happens in the post-war era.

If any coinman will pause just long enough to go over his expense figures he will find that his overhead has increased far, far more than the 20% that he is asking to have removed from his present location's commission basis. Once again we remind these coinmen that there are most definitely certain exceptional locations wherein the 50%-50% basis can still be maintained, but that the far greater majority are just average locations where the returns do not warrant this commission basis.

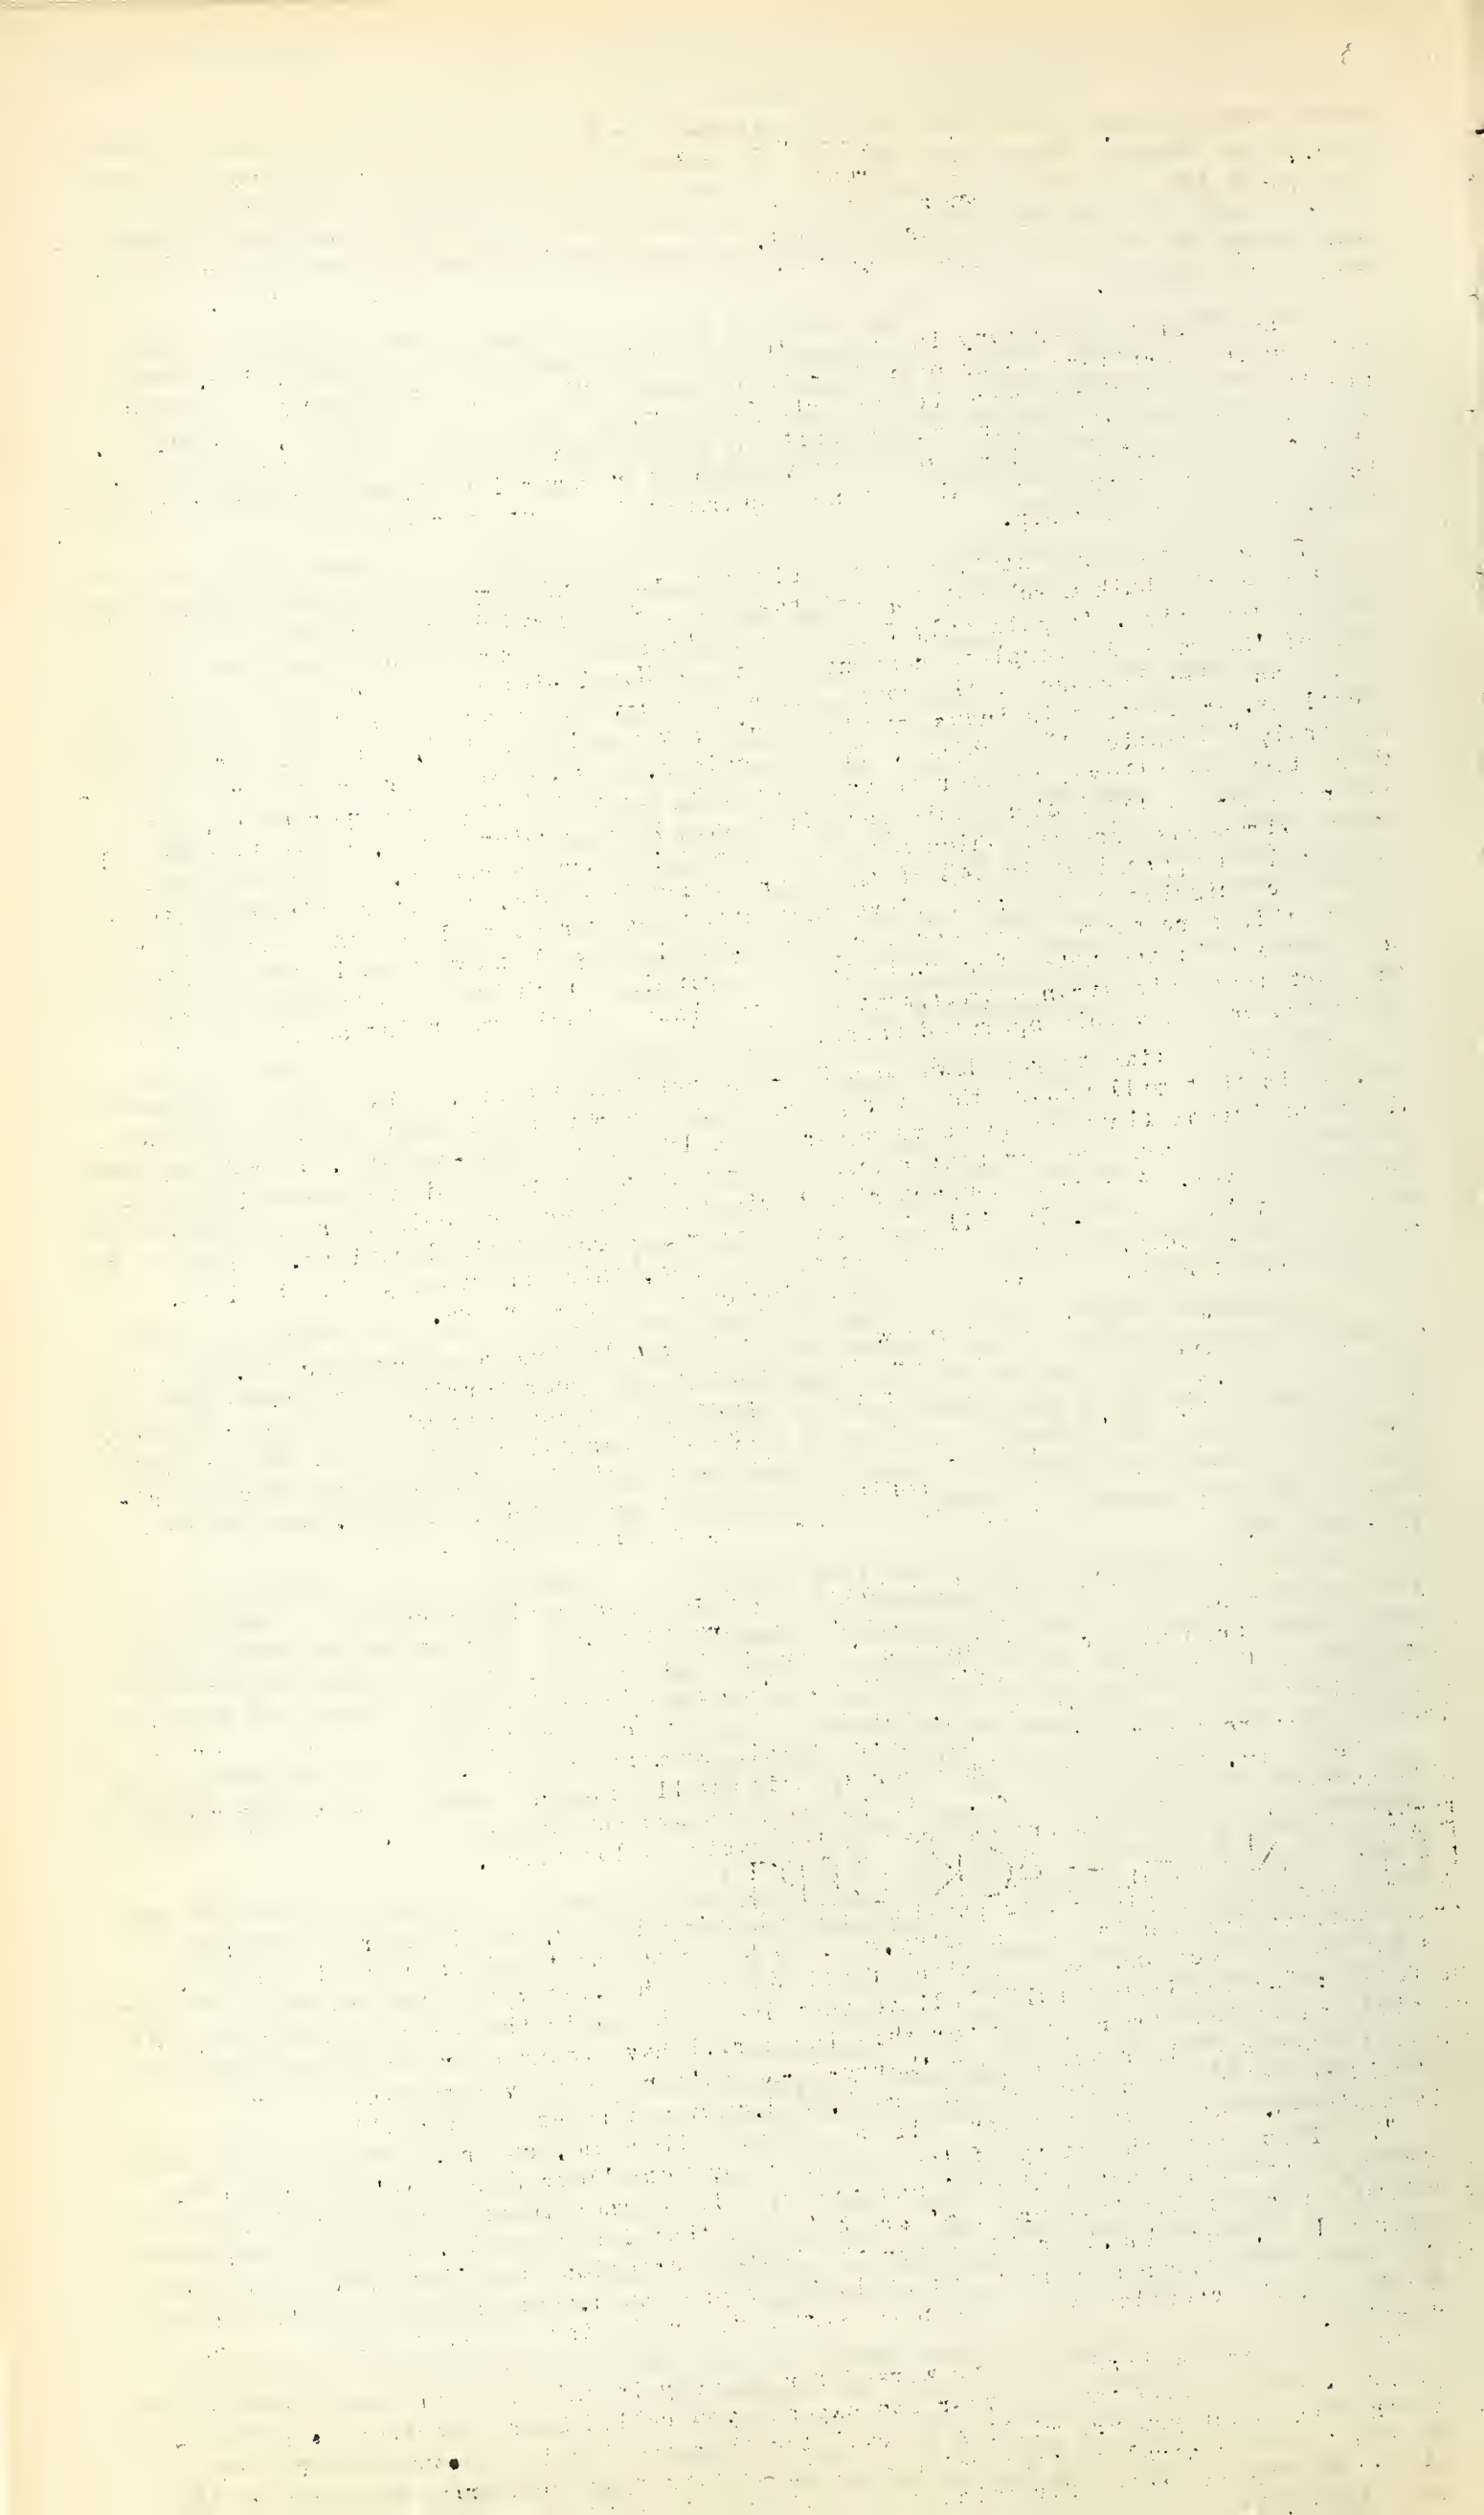

Therefore, to be sure of whatever taxation will come into being and whatever else will happen in the post-war era, this is the plan and now is the time, to completely re-arrange the industry's present commission basis to locations.

### PAT-ON-THE-BACK DEPT.

We are tremendously pleased to publish the following letter, received from one of the truly outstanding men in our industry, who, tho he writes at too infrequent intervals, has won the respect and commendation of all who know him. Excerpts from his letter to us follow: "As you know I fully believe that The Cash Box is the one and only true, exclusive and logical trade paper for this industry. I have found a tremendous amount of pleasure each week in reading your 'Merry-Go-Round' for I have yet to find an article that did not please and did not make real, good, common horse-sense for all of us in this business. But, your past three issues were, believe me, superb.

"The issue with the story of the soldier boy from 'Your Home Town' and the following one entitled 'Just a Minute' and the last issue wherein you go into the most complete report of the 'tax problem' are 3 issues that I personally, am going to treasure for a long, long time. Your ideas for the instant creation of a 'National Tax Council' are so well founded on fact and so logically presented, that those who won't get into action on the creation of such a necessary body are losing one of the grandest opportunities.

"We all know how hard you have worked for so many in this industry to help them to progres. We all know that at your own expense you called 2 great conferences. I believe that the fact you are willing to call together the local tax councils from the 48 states into a central meeting which entails meeting space and arrangements for about 144 men is something for which you should be given 'Honorable Mention' by all this industry.

The *Magic* known as **music**

In many a U. S. Training Camp, Wurlitzer music stands guard against the loneliness of men long separated from their loved ones. Comes a close to the day's drilling, tired men tumble in for a tune. Voices lift in song. Memories span the miles between men and their homes. The spirit that is America flames in the heart-warming fire of fellowship touched off by the magic power of music!

OF FAMOUS *Bally*  
GAMES AND VENDERS**

Production at the "Bally" plant is one hundred per cent for Uncle Sam. Night and day, seven days a week, the "Bally" organization is building battle equipment for the Army and the Navy, proving that the skill developed in peace-time design and construction of coin-operated games and venders is a valuable asset to America in time of war.

Plans of the "Bally" organization call for quick production of new games and venders immediately after victory . . . and for exploitation of the marvelous new electronic principles developed by war-time technology. In the post-war era, as in the past, "you can bank on Bally" for the newest in money-making equipment.

Lion Manufacturing Corporation, manufacturers of "Bally" games and venders, distributed by Bally Manufacturing Company, 2640 Belmont Avenue, Chicago, 18, Illinois.

## NOTICE

MARCH, 1942, MARKET PRICES APPEARED IN THE SEPTEMBER 7, 1943 ISSUE.

PRICES LISTED ARE CURRENT WEEK'S MARKET PRICES.

## IMPORTANT

The Confidential Price Lists are to be read as follows: First price listed is lowest price for the week; Second price listed is highest price for the week; Where only one price appears this should be considered lowest price.

Many times, wide differences appear in the high and low prices of certain equipment. Like any true reporter The Confidential Price Lists can only feature the market prices as they are quoted. The Confidential Price Lists act exactly the same as the market quotation board at the Stock Exchange—posting the prices exactly as they are quoted for each week, regardless of how much they may seem to be out of line. Some machine prices do not change for months. The Confidential Price Lists, rather than show no price for the week, retain the last known quotations for such equipment so that the subscriber at least has the last known quoted prices as a basis to work with. Prices continue to be very widely divergent these days. Someone on the West Coast may feel a certain machine worth \$150.00 whereas someone on the East Coast may think it worth but \$75.00. Of course, condition, serial, appearance, demand, territory, quantity, etc., must all be taken into consideration. The Confidential Price Lists report each quotation exactly as it is made and depend on the subscriber to make average price adjustment to fit the peculiarities of his own territory.

## CODE

CHECK THIS CODE CAREFULLY. BECOME ACQUAINTED WITH EACH ONE OF THE CODE NUMBERS AND WHAT THEY SIGNIFY. THESE CODE NUMBERS APPEAR IN FRONT OF THE NAME OF EACH MACHINE.

6—Means no prices quoted for this machine for past two weeks.

7—Means no prices quoted for this machine for past three weeks.

8—Means no prices quoted for this machine for past four weeks or longer.
