CONT

COVER STORY

TERMINATOR SPECIAL!

Not one, not two but THREE full reviews of SNES, NES and PC versions of the game that features everyone's favourite robot assassin...

SPECIALS

26 CVG CELEBRITY CHALLENGE

Paul Rand climbs into the ring against Super Middleweight World Champion Nigel Benn. Follow his progress as the poor lad's kicked stupid in just four rounds.

30 QUESTIONNAIRE

Tell us exactly what you think of the new CVG and you could win £500 worth of games!

65 FREE DOUBLE-SIDED POSTER

It's huge, it's colourful and more arty than a one-eared, Russian theatre critic! Star Wars and Flashback for your bedroom...

107 FIRST FLIGHT

CVG corners the man responsible for Nintendo's astounding Starwing and the SFX super chip.

COMPETITION

WIN A TRIP TO THE USA!

You and a friend get three days in the States as guests of Lucasarts. Yee-haaa!

SUPER NES

TERMINATOR 40

The machines continue to war against man...

WING

COMMANDER 42

At last! Finally, you can take to the skies with this hit conversion of the original PC classic!

BATMAN RETURNS 44

He's big, he's black and he's back! Short on the big screen but huge on the SNES, Batman swoops in.

BRAWL BROS 54

The crispest looking beat 'em up we've seen for ages. Bruisingly brilliant

JAKI CRUSH 61

The first pinball sim for the Super Nintendo - will it ring your bell?

SUPER SWIV 82

It's just had to come and it's here! Vertically scrolling blasting with finger blistering action!

BATTLE TECH 85

3D mech combat for big bruising robots that mean business.

SONIC BLAST MAN 86

More punching action with a robo-suited superhero!

MEGADRIVE

FLASHBACK 34

The best rotoscoped animation we've ever seen! Hotter than a steelworker's jockstrap!

BATTLETOADS 47

Turtle bashers with warts on! Stuff your pizza - get a load of this!

FATAL FURY 62

So, it's a Streetfighter rip-off. Who cares? This is brutally good!

CAPTAIN AMERICA 72

Yes it's him, complete with his super-buddies, the Avengers!

CYBORG JUSTICE 88

Robotic bust-ups come to the Megadrive with Sega's latest sci-fi challenge. Don't forget your spanners - this one's rocks!

MEGA CD

ROAD AVENGER 52

High-speed driving action with huge CD quality graphics.

NIGHT TRAP 70

An interactive movie starring a bevy of Hollywood girls - hurrah!

TENTENTS

ISSUE 138 MAY 1993

AMIGA

BODY BLOWS 48

Is it a rip-off of Fatal Fury? Who cares - your Amiga was made for whack 'n smack action like this.

DESERT STRIKE 74

Electronic Arts' biggest-selling Megadrive game is an explosive hit on Commodore!

LEMMINGS 2 81

Rats! They're back on the Amiga and they still need your help.

PC

TERMINATOR 2029 38

Cyber-suited action and adventure in the 21st Century.

X-WING 76

This isn't just good - it's the best combat flight sim we've seen for a long, long time!

PC ENGINE CD

RIOT CITY 50

Yet another Final Fight-like beat 'em up but with CD-quality sound!

VIDEO GAMES

Centre Pull-out!

It's the world's ONLY mag for hand-helds! It's stuffed to the brim with the toppest titles on the titchies! And it's free each and every month with CVG!

Even a well-known space carpet like Chewbacca likes to get to grips with GO!

WORD UP

WITH GARTH

Bloody, flippin' eck. They said that we wouldn't dare. They said it couldn't be done. We said, "STUFF YOU LOT! We're going to make CVG bigger, bolder and brighter than it's ever been before!" So here it is! The new-look CVG with more top reviews, more scandalous news on all the latest games and a layout that's so smart its got a PHD from Oxford University! To celebrate we're going completely gaga and having a giveaway extravaganza bonanza! Exclusively within this issue you'll be able to lay your grasping hands on an incredible 100-page tips book, stuffed to the gills with the latest cheats, hints and codes on the best games; a double-sided poster; amazing cut-out Streetfighter 2 models, awesome drop-dead Starwing stickers, and, wedged within the bumper 164 pages, the greatest freebie anyone could offer — the world's best Handheld magazine, GO! CVG has NEVER looked so good!

This month has seen the launch of the Mega CD, and of course, CVG was the magazine to bring you the first MegaCD reviews just last month, along with the definitive review of Starfox. In fact, the review was so hot that Nintendo hadn't even decided on the name of the game and have since changed it to Starwing specially for us Brits! Confused? You won't be! Just keep reading CVG! We just get better and better!

See yah
GARTH

P.S. Don't forget, you could win a massive bundle of software worth £500 by completing the questionnaire on pages 20+21. Let us know just what you think of our brand new look!

CVG CREW NEWS...

NIGEL BENN BEATS UP CVG BOY!

It's not been a good month for our Mr. Rand. Life has not been dealing him the usual top hand! This month, as described on pages 26-27 in the CVG Celebrity Challenge, Paul was completely stuffed at Mohammed Ali Boxing by none other than the current WBC Super Middle Weight World Champion, Nigel Benn. Although Paul put himself up for the fight ahead of Steve Keen because "He's only got a black belt in Judo and I'm a hard Northern git who knows the game inside out", Rand still managed to lose because he chose the crappiest player to "Give the World Champion a bit of a chance!". After his defeat, CVG's Deputy Editor was over the sportsman and told Nigel, "You wait until I tell my mate Chris Eubank".

mini compo

TURNING JAPANESE (AND AMERICAN)

Jive Consoles (0599 211335) supply a 16-bit converter so that you can play imported games from Japan and the US.

Win one of 10 K4, 16-bit converters from Jive Consoles. Send the strangest or most embarrassing picture of yourself or a member of your family to GARTH'S LITTLE BIT AT THE FRONT, CVG TOWERS, 30-32 FARRINGDON LANE, PRICKY COURT, LONDON EC1R 3AU. Don't forget to include your name and address. The ten best pictures will all be published in this humorous part of the mag in the July issue...

ANGLIN IS GETTING THERE

Paul Anglin was an arresting sight this month when he forgot his monthly travelcard. Mr. Dozy, whose early morning commuting ritual does not at any point include waking up, managed to get all of the thirty miles into work before he was rudely awakened to the fact that he'd forgotten his monthly £189 ticket! Undaunted, Captain Honesty went back to find the Station Manager to explain his predicament. The Fat Controller listened, nodded dutifully and smiled as Paul's sad tale of woe unfolded and then reassuringly laid a hand on his shoulder – the miserable git then slipped a heaving £10 fine on him!

Paul Anglin faces up to his heinous crime.

STEVE KEEN IN LIBERTY SHOCK!

Steve Keen and his 'friend' had a bit of a run-in at a local French restaurant last week when they were refused their late night nosh-up because they were "improperly dressed". Steve was mortified as he'd worn his least grungy 'heavy metal bikers from hell' t-shirt and he decided that it must've been his rock babe partner's leggings that caused offense. Unfortunately the dressed-to-slaughter-duo had to resolve themselves to going back to Steve's flat to practice some late-night kicking and punching – at Streetfighter 2! Steve Keen is 24, unmarried and has no children (unsurprisingly enough!) but he did beat her using E. Honda and came first at Mario Kart!

Steve Keen shows that he's got his finger on the pulse!

BEWARE OF THE HAIR!

Never one to take advice from strangers, Garth was approached by a travelling salesman at Leather Lane Market, who claimed to have an instant cure for the bedaggedededers' split ends! For those of you who don't know, split ends are the scourge of anyone who wants to grow dreamy long girly hair, so the old hippy jumped at the chance, buying five bottles on the spot! Rushing home to his Nunhead based babe lair, Garth dampened down his mop and smothered half a bottle of the stinky goo straight onto his bonce! He should have been more cautious. The label clearly states 'Use in moderation!'. Apparently a single drop of the liquid can re-hair every single Harry Krishna that's ever lived and still have enough left over to re-carpet the Yul Brinner Fan Club! You can check out what happened to Garth in this picture! So be warned; don't mess with your mop or you could end up a fop!

MEET THE CVG CREW:

GARTH

This month's seen poor Garth working until the wee hours on the new look CVG. He hasn't even had time to shave and looks a little like Grizzly Adams; but he'll be back to normal next issue (although he's threatening to turn his beard into a quiff).

GAMES OF THE MONTH:
X WING (PC)
FLASHBACK (MD)

PAUL

Mr. Rand has cheered up considerably in the last few weeks. He's currently being nice to everyone (even Paul Anglin), spending less time in the pub (gasp!), and has even asked Steve Keen if he can borrow some of his rock mused. We think he's found a girlfriend, but Anglin reckons that's impossible!

GAMES OF THE MONTH:
X WING (PC)
FLASHBACK (MD)

JON

Jon's well pleased this month. A big car magazine is about to relocate next to his house. This means they'll be parking Ferraris and the like outside his door, making all the girls that go by forget that he actually owns a sad VW and believe that, in fact, he's quite a good catch after all!

GAME OF THE MONTH:
X WING (PC)

GARY

The new kid on the block is formerly The One Deputy Editor and a veritable expert on Amiga games. He's kept a very small profile at most computer games shows, unless you saw him sideways on, waddling around the GamesMaster Live show in Birmingham?

GAMES OF THE MONTH:
FLASHBACK (MD)
BRAWL BROTHERS (SNES)

JENNY

Jenny's another down in the dumpster crew member. She's recently been tipped off by one of those unscrupulous body cops, who phoned her up and said she'd won a cruise. She lost a ton of cash and the company would give it back until our big-hearted, former 19 stone, Managing Editor wrote them a letter and they got to shuffling! Wouldn't you?

GAME OF THE MONTH:
CYBORG JUSTICE (MD)

STEVE

Steve's as well known as Princess Diana at a photographers' convention for his leary, tam of phrase. His copy's got more twists and turns than a cow's digestive system. What comes out the other end however, is high pressure, heavily processed and newsworthy! He's got a big dog though.

GAMES OF THE MONTH:
FLASHBACK (MD)
NIGHT TRAP (Mega CD)

ANGLIN

Paul's a Canvey Island lad. He springs out the door at six o'clock to catch the last boat home. However, one night he missed the last ferry. After nearly two hours on the shore in pitch darkness, his old granny appeared through the darkness in a canoe to pick him up! Thanks to her the marooned monkey still made it home in time for Canary and Lacey!

GAME OF THE MONTH:
AIR ZONK (PC Engine GT)

STEVE

Our Managing Editor's a bit of a culture vulture, but that's not to say he doesn't enjoy a bit of back on the side. All month he's been going on about his forthcoming culture trip to Spain for sun, sand, sea, opies, Sangria and poetry! So where's he off to? 'Beridom, of course!', he unashamedly replies. 'There's more English culture there than in my shirt any day!'

GAME OF THE MONTH:
ROAD AVENGER (MCD)

NEWS

MEGA CD LAUNCHES!

● SEGA ● 071 727 8070 ●

If all's gone well, Sega's super-hyped Mega CD system should finally be officially available in the shops — along with a lorryload of games to ensure that new owners just can't get bored in a hurry.

70,000 Mega CDs were shipped into stores around Britain on April 2nd, which makes the UK the first country in Europe to get the system. The Mega CD, which bolts onto the bottom of any Megadrive, costs £269.99 and comes packaged with three discs. The first double-disc pack includes the shoot-'em-ups *Sol-Face* and *Cobra Command*, while the third CD is a compilation of five existing Megadrive favourites — *Columns*, *Super Monaco GP*, *Streets of Rage*, *Golden Axe* and *Revenge of Shinobi*.

Now it's official!
Mega CD on sale... STARFOX dumped - but don't put your fingers in the light socket yet... Nipponese console costs lotsa wonga... Street Fighter comic and Lemmings record!

Well, here it is - the Mega CD in all its in-a-box-and-now-completely-official glory. Sorry about the dark piccy, though, Sega took it, not us.

QUICK NOTES

● **HOT NEWS** on *Street Fighter 3!* Yes, it's definitely happening, but only two of SFI's characters, Ryu and Sagat, will survive into the third instalment. That means there'll be no less than 14 all-new characters, including Chun-Li's younger sister and a new overall baddy called Shadow-Lu, who was Bison's teacher, apparently. Characters will all have FIVE special moves each, and look out for Sagat's new Helicopter Kick, which he's been practising on. More info soon...

● **MORE GAMES** are being lined up for the launch of the super-wonderful 3DO system later this year - the latest news to reach us is that Inteplay will be producing a version of its ever-popular *Battle Chess* for the revolutionary multimedia machine. It's being written as we speak right here in the UK by Krisalis, one of the only British companies to have a 3DO development kit...

● **SKY TV** is cock-a-hoop about the instant success of its new daily *Games World* show. Apparently the show, within two weeks of its launch, has already achieved Sky One's highest ever weekday ratings - mind you, if all it has to contend with is the likes of *Family Ties* and *TI Hooker*, we're not surprised. Only Sunday's flagship *The Simpsons* pulls in more viewers, and we can see why...

● **AFTER THE AMAZING** chart success of *Alien Breed: Special Edition 92*, Team 17 is to remik another of its Amiga classics for budget re-release. This time it's *Project-X* that gets the treatment - and we're told that it will be made easier for all those who complained about it being too tough, and should be out before Summer at a very reasonable £12.99...

● **CODEMASTERS** has picked up official approval from Sega for its Megadrive-publishing antics, which means that the first game, *Micro Machines* (already a big hit on NES) will be out for the MD soon...

Logo Time 02:10:04
Time 02:10:04:84
Core Design's Jaguar XJ220. How good will it be on Mega CD?

Fly down ravines and blow them up. One of the most terrific and cable-controlled 'em-ups since Cobra Command.

Strange robot beat-'em-up antics in *Black Hole Assault*.

Can the Mega CD's capabilities make *Prince of Persia* even better?

Wolfchild from Core - average on 16-bit computers, but promising more on Mega CD.

"Every month I'll be serving up a top-hole selection of trivial titbits from the totally bonkers world of computer and video gaming with which you can astound and confound your chums - unless they read CVG as well, (and let's face it they probably do, so that's that one up the spout). Never mind, let us press on."

FM TOWNS CONSOLE!

The incredible FM Towns will soon be available to anyone with £600 in their pocket! The new FM Towns Marty CD console from Fujitsu packs technology from the towering PC-lookalike into a box no bigger than a Megadrive! It takes CDs and floppies, has a 32-bit 386 processor (meaning it's excellent for both console and PC-style games) AND plugs into any normal TV!

On sale in Japan, it's bound to trickle through to the UK on grey import later this year, though it might never be officially released in this country. "It's spritetic," reckons a technical expert. "The only thing in the same league is the 3DO."

NO FOX PLEASE WE'RE BRITISH

● NINTENDO U.K. ENTERTAINMENT 0329 822 565 ●

Starfox is never to be released in Britain...

Don't run off to slash your wrists just yet. Yes, the brilliant Super FX chip shoot'em-up is coming out, it's just that Nintendo has decided to change the name to the less cutesy and slightly harder Starwing. So when you rush down to the software emporium to buy the 96%-rated classic, you know what to ask for. Okay? (Oh, and to find out more about the year's hottest SNES game, flick to page 107 for our top-notch feature).

STREET FIGHTER II THE COMIC

Street Fighter II has already topped the coin-op and console worlds, there's a live-action movie in production and now the official comic book has arrived! It's out next month in the USA and should be in UK comic shops before the summer.

BAFFLING! Ocean software once toyed with the idea of moving into the coin-op world, producing a prototype of a Hudson Hawk arcade machine! The project was scrapped when the film turned out to be a stinker - performing poorly at the box-office...

POP GOT THE LEMMINGS

● PSYGNOSIS ● 051 709 0825 ●

Lemmings - soon to be on your timetable.

Lemming-mania is set to continue when a single, based around the Lemmings 2 music, is released on May 10. The band responsible includes the producers of The KLF's chart-toppers! "This is not a crap record like that horrible Tetris thing or the putrid Super Mario record," Psynosis claims.

PHEW! In case you didn't know, that was us sounding totally amazed by the amount of old full-price games being re-released on budget every month. Unfortunately, we're far too busy reviewing new games to rate them all, and you probably remember them from the first time round anyway. So, we're content to simply let you know which titles will be returning to your local software shop at a more pocket-friendly price each month, and leave the rest up to you. Sounds fair enough, doesn't it?

NEW deal has brought games and pop music closer together than ever... THE MOST famous flight sim ever is coming to the Megadrive... PHONE up your friends and then kill them with Air Warrior... and THE AMIGA is about to turn into a console!

GAMES AND POP MUSIC ARE THE SAME-OFFICIAL

● VIRGIN ● 081 960 2255 ●

The gap between video games and pop music has narrowed — and it's all thanks to Virgin Games! A new tie-up between Virgin and record giant Polygram means that top-god-game Mega-lo-Mania will be appearing both as a Megadrive game AND a pop single and dance album! As well as Virgin's game, Polygram is publishing a single and album, both called

Mega-lo-Mania (Goin' All The Way) and use the same "striking" box artwork and should be out now. In addition, the single and album tracks include hidden Mega-lo-Mania playing hints, and the first person to spot them all wins a USA holiday. It looks like the trend's set to continue too, with rival pop firm Telstar sniffing around the games industry as we speak.

BAGS OF FUN

● SPECTRAVIDEO ● 081 902 2211 ●

Spectravideo has just released a new multi-purpose carrying case for £16.99. Multi-case can accommodate a Super NES, Megadrive, NES or Master System, along with all the cables and dongles and — yes! — even some games. You can even use it, just like a real bag. From shops that sell this kind of thing.

RING RING... YOU'RE DEAD!

● ON-LINE ● 081 558 6114 ●

Bored of playing games all on your own? Yes, it's an unsociable past-time, it's gamesplaying. It's like being in solitary confinement — but it needn't be! Provided you've got the kit to handle it (namely an SVGA PC and the right leads), the latest version of On-Line's Air Warrior is now available.

In short, Air Warrior is a multi-user combat flight simulation played over the phone like the old Micronet adventure games. Players with the right software can phone up the Air Warrior system and have live dogfights with other on-line players — up to 40 at a time! You have to pay to play, but judging by the system's growing popularity, it's well worth it.

Each night on the Air Warrior "net" is different — phone up on Tuesday, for example, for World War One night, while Friday's is Korean Jet night. The Air Warrior starter pack includes all the disks and documentation you'll need to play, and there's £30 worth of on-line playtime free — but be warned! You need a very rock-hard PC system to play, so check your machine has got the necessary muscle before splashing out.

Your chance to phone up your friends... and then kill them, with On-Line's Air Warrior.

'PROSE GETS MEGA

● MICROPROSE ● 0666 504326

Microprose is the latest in a long line of publishers to be deemed excellent enough to produce games for the Megadrive. Now that they have the official stamp of approval from Sega, the simulation experts will be knocking out a stream of products for the 16-bit wonder, starting this Summer with a conversion of that old favourite, F-15 Strike Eagle II.

It's being hyped as the first real flight simulation for the Megadrive and promises to include all the features from the floppy versions, including six warzones around the world, from the Persian Gulf to the Arctic Circle. In the meantime you can look forward to a full review of F-15 II. And look at this rather nice screenshot as well.

Dakka Dakka kaboom neeeow etc with F-15 II — soon to arrive on Megadrive.

MEGADRIVE CHART

1. PGA TOUR GOLF 2 (EA)
2. STREETS OF RAGE 2 (Sega)
3. ECCO THE DOLPHIN (Sega)
4. WORLD OF ILLUSION (Sega)

6. TAZMANIA (Sega)
7. SONIC 2 (Sega)
8. ROAD RASH 2 (EA)
9. CHAKAN (Sega)
10. STRIDER (US Gold)

AMIGA CONSOLE— THE (UN)OFFICIAL STORY!

It's (almost) official! A CD console based around the Amiga will be released by Commodore before this summer!

The unnamed machine will cost, we're told, no more than £199.99 and use the same stunning AGA technology found in the new A1200. A 68020 processor will make it as fast as a top-grade PC, and the CD format ensures it'll work with all new Amiga CD software.

Unfortunately, no-one we contacted had the spunk to make any kind of comment about the new machine because it's still extremely secret and doubtless, Commodore would have their testicles away if they said anything. But we know (because we're great) that at least ten development teams are currently beavering away like er... expectant beavers developing games for the new kit. Expect more details and perhaps even some pickles as soon as we can coax someone to tell all.

AMAZING! Lemmings, Psygnosis' most successful game ever, was turned down TWICE by the company before they finally agreed to publish it!

BxB EYES

PART ONE

Yakumo Fujii is the hero of this story. Abandoned as a young child, first by his mother and then his father, his misfortune continues when his father, a professor of ethnology, dies in Tibet. One day, he meets Pai on his way to work.

She carries a letter from his dead father...

Pai is the heroine. Said to be about 300 years old, she is a survivor of a legendary tribe who use magic to gain eternal life.

She has a third eye in her forehead and when it opens, her personality drastically alters. Pai yearns to be human but can't quite remember why...

Together they struggle against supernatural forces they barely comprehend but must conquer to survive.

NINTENDO owners used to have it all to themselves, but now US Gold is levelling the score by bringing Star Wars to Sega formats - but Megadrive owners face an agonising wait...

STAR WARS GOES SEGA!

Graphics that are almost as sexy as Han Solo's turbo nutter, race proven Millennium Falcon GTI, would certainly be possible on a Mega CD version of Star Wars...

The biggest news for Sega fans this month is that the Nintendo versions of Star Wars are coming to their machines — but if you're a Megadrive owner, you'll have to wait and see if you get to join in the fun.

US Gold is producing Star Wars for the Master System here in the UK, while LucasArts in the USA is converting Super Star Wars from the SNES for the Mega CD. But what about the Megadrive version? Well, there's a nasty rumour going round that there may not be one at all, but don't panic just yet, because so far, it's only a rumour.

US Gold has given the job of bringing Star Wars to the Master System to Tiertex (the team behind Strider), who

THE DAYS of stuck-together fingers and spilled paint are over, thanks to Revell's new CD-ROM modelling kits... SONIC gets his own comic, and KEVIN KEEGAN is the latest star to lend his name to a football game...

ELECTRONIC MODELLING

● REVELL ● 081 207 1213 ●

If you're a model-making fan, you'll be overjoyed to hear that getting your fingers stuck together and stinking of polystyrene glue are a thing of the past! Well, maybe not, but model giants Revell have got a new product that makes it easier.

Motor Stars is the first in a line of titles for Amiga and PC CD-ROM systems that gives modellers assembly tips using graphics and animation; it's like a cross between a Blue Peter "here's one we made earlier" demonstration and a driving game with four tracks! Choose between a Bugatti EB110, Porsche 911 Slant Nose, BMW Nazca M12 and the Lamborghini LP500S — and then modify the car for weather and road conditions. They've even included a live-action video sequence featuring a gorgeous, pouting and rather tasty looking bit of crumpet for the lucky race winner!

Motor Stars is out early this Autumn, and in the meantime Revell has plans for two more "games", one featuring American street cars and the other based around high-tech combat aircraft.

Phwoar, I would. (Would what? — Ed) This gorgeous dollybird hands out the trophies to the driver of the best little plastic car in Revell's Motor Stars.

SUPER NES CHART

2. ANOTHER WORLD (Interplay)
3. PRINCE OF PERSIA (Broderbund)
4. AXELAY (Konami)
5. SUPER GHOULS'N' GHOSTS (Capcom)
6. PILOTWINGS (Nintendo)
7. SPIDERMAN AND THE X-MEN (Acclaim)
8. DRAKKHEN (Infogrames)
9. ROAD RUNNER'S DEATH VALLEY RALLY (Sunsoft)
10. BART'S NIGHTMARE (Acclaim)

MORE COMICS

A new joint venture between Sega and Az200AD publisher Fleetway, means Sonic fans will have their own comic next month! The bi-monthly mag, Sonic, will run regular stories starring Sega game heroes — Shinobi,

Toejam & Earl and of course Sonic will all have their own strips, while someone like Alex Kidd (probably) will be on hand to do a regular Sega-dedicated tips section. Sonic's first issue is out next month.

are basically converting the platform action and shoot-'em-up frolics from the NES version lock, stock and barrel. From what we've seen so far, it promises to be a very faithful conversion, which is hardly surprising as the Master System can do just about anything the NES can. There's no news yet of a Game Gear version, but if the Master System is being done, it's a good bet the GG is too.

So what's all this about no Megadrive version, then? Have US Gold gone potty or what? Unfortunately we weren't able to tell if the company is in fact mad and should be committed to the loony bin, because the 16-bit

situation is all upside down and back to front at the moment. The rumour we're hearing, however, is that LucasArts, who HAVE been developing a Megadrive version which is now almost finished, may have decided to axe the project and transfer all the work done on it onto the Mega CD, which is better equipped to do the stunning graphic effects found in the SNES original. This is all totally unconfirmed at the moment, but we'll be bringing you more definite news next month. One thing's for sure — US Gold would have to be totally out of their trees and out dancing with the pixies and fairies to not publish a Megadrive version.

Choose your character — Luke, Han, Leia, Obi-Wan and C-3PO are all at your command.

You can expect to see Star Wars out on Master System before Summer, but the fate of the Megadrive version still hangs in the balance...

IT'S KONSOLE KEEGAN!

● ANCO ● 0322 292 513 ●

Kick Off publisher Anco has signed up the ex-England supremo and Newcastle United manager Kevin Keegan for their latest footballing game — the computer and console versions of the new Player Manager. Basically, Player Manager is like Kick Off with all the normal managerial bits included within it.

The original Player Manager is

definitely getting on a bit especially on Amiga where it seems as though it's been around for longer than Bobby Charlton, (it's actually knocking on for two years old now), but we're promised that the new version, which will be out on all the big formats, is promised to be infinitely better. That's despite Kevin Keegan's name being linked to it, we imagine.

this season's champions. Ho, what larks!

PLACE YOUR BETS! With both the Premier League and FA Cup tournaments drawing to a close (and, incidentally, at a time when there seem to be more football games on the market than ever before), we thought we'd find out how much the creators of the top soccer games know about the real thing by asking them to predict

"I have to fancy Norwich for the League because I support them. I put another £10 on them today because they went to 50-1. I want Sheffield United to win the Cup, but I think Spurs will win it, because they're on form at the moment. They're an occasion team, aren't they?"

- Jon Hare, designer of Sensible Soccer.

"I think Man Utd will win the League, unfortunately, because I'm an Evertonian, but they're the stronger side. Villa will fade away, and I don't think Norwich have the stamina. As for the Cup, I think it's going to be Sheffield Wednesday, because they've had a really good run over the last couple of months."

- Rage's Paul Finnegan, producer of Striker.

"I'd say Aston Villa for the League title, going on their recent form, and Arsenal for the Cup - they're playing very well at the moment, and I was really impressed by their last match against Crystal Palace in the Coca Cola Cup."

- Dino Dini, author of the Kick Off games and the forthcoming Goal.

Well, who will get it right and who will be the Gary Newbon? Tune into CVG in a couple of issues' time when the results are in and we'll be coming back to the programming pundits to find out just what they have to say for themselves!

WE BRING you the first ever picture of Sensisoccer on consoles... GAME GENIE hits Super Nintendo, and STEVE SPIELBERG clocks up a new high score on... Space Invaders?

A SENSIBLE PICTURE

This is the first ever published picture of Sensible Soccer on the Sega Megadrive! Yes, we know it's not that interesting, but it's more than you'll see in other mags, so stop whingeing.

We've heard now that Sensible Software's footballing favourite is being converted to six console formats: Megadrive, Super NES, Game Gear, Game Boy, Master System and NES. A little bird also told us that the giant Sony Imagesoft may be bidding to publish the game on consoles. This is, of course, just a rumour, but it'll probably turn out to be completely true anyway because we're always right.

PURE GENIE-US

● HORNBY ● 0483 225555 ●

All those games that used to cause you so much trouble will soon be having nervous breakdowns and waving the white flag thanks to this little gadget.

Having already revolutionised the gaming lives of Game Boy, NES and Megadrive owners everywhere, Galoob's natty little gadget the Game Genie is soon to be available for the Super NES! Priced at a pocket-walloping £44.99, the Game Genie is a cartridge-shaped bit of plastic that slots between your SNES and the cartridge of your choice to produce, as if by magic, all manner of codes, cheats and game tweaks! Is that troublesome shoot'em-up causing you problems? One blast of the Game Genie and that once proud piece of software will be on its knees and begging for mercy! Such is the power of this awesome add-on. A NES version of the Game Genie codebook (you need the right codes to make the pokes work, you see) will be out at the same time as the cart, featuring codes for quite literally hundreds of US imported titles, including Super Star Wars and Mickey's Magical Quest! Not too shabby. Unfortunately it's not out until June, so until then you'll just have to knuckle down and practice. You lazy lot.

STAR GAMES PLAYERS - PART ONE

Phew, video games, eh?! They've certainly been hitting the headlines lately, and no mistake. So much so, in fact, that top-name celebrities from the real world just can't seem to resist being photographed while notching up a new high-score in order to enhance their street cred. This phenomenon is nothing new — in fact it's been going on for yonks, so over the coming months CVG will be highlighting this ever-popular trend by featuring a top-name gaming celeb, and printing a naff picture of them in action.

THIS MONTH — STEVEN SPIELBERG

When top movie mogul Steven Spielberg isn't directing the latest multi-million dollar blockbuster, he likes to relax with a spot of video games-related fun. Here we see the bearded maestro relaxing in just such a way with a quiet game of... er... Space Invaders. Someone should tell him that taking your eyes off the screen in the middle of a wave is a very bad idea — but then he's not exactly short of 10pees, is he? Quite why he needs to get dressed up like Indiana Jones to play Space Invaders remains unexplained, however.

NEWS

ARNIE kicks ass on Mega CD... **STAR TREK** gets signed up for another eight years... **SONIC** rubs shoulders with **Alain Prost**, and **CHRIS EVANS** skips breakfast to play **Sleepwalker** - and it's all for charity!

TERMINATOR ON MEGA CD!

The ravaged killing fields of 2025 look the absolute **BUSINESS** on Mega CD — much better than the Megadive original, anyway.

From what we've seen so far, Mega CD Terminator could be the most faithful conversion of the film to date.

The Mega CD's top technology allows for plenty of smart graphical effects, not to mention film-quality music.

Are you sick of The Terminator yet? We certainly hope not, because it's about to be released on yet another home format — the Mega CD!

The Super NES conversion of the classic movie is reviewed this month, but we're reliably informed that the new MCD version, currently being programmed by Virgin Games in the USA, is the best of the lot! It's a ten-level shoot 'em up extravaganza with stunning character animation produced using the same live-

action Rotoscoping techniques employed by Delphine Software in this month's HIT, Flashback. The game also has a mind-blowing cinematic soundtrack taken direct from the film — well, if any machine can deliver the goods in the sound department, it's the Mega CD.

The Terminator has a June release date penned in for the US. A UK launch date hasn't been set, but you should be able to get it on import in the Summer. And of course, we'll bring you the full review first!

Arnie lookalikes abound in Mega CD Terminator!

DOMINIK IN CELEBRITY SHOCKER!

Gorgeous, pouting Gamesmaster host Dominik Diamond has been rubbing shoulders with Chris Evans, the gorgeous pouting host of The Big Breakfast! They joined forces to promote Ocean's Comic Relief! Sleepwalker game, hence the false noses (yes, they actually are false).

Both celebs have their own shows on Channel 4, so we're sure their meeting didn't pass without one of them making a snidey comment about who has the most viewers. In fact, Dominik just about wins, with 3.2 million fans next to TBB's 1.7m — but then Chris' show is on really early in the morning AND he's on every day, so it probably works out about the same. Anyway, we think Chris is the best out of the two, so there. Mind you, we've never had a top night out with Chris, and Dom always sees his round.

STUNNING!
Gateshead fire brigade has adopted a hedgehog called **Sonic** as its mascot after rescuing the spiky troublemaker from a car boot!

IT'S A LICENSE JIM BUT NOT AS WE KNOW IT

● INTERPLAY ● 0865 390 029 ●

Captain James Tiberius Kirk of the USS Enterprise looks quizzical (as usual) after realising that he's going to be boldy aging for another eight years.

These are the voyages of the Starship Interplay, her eight-year mission, to seek out new Star Trek games and publish them. To boldly go where no software house has gone before... If you managed to make any sense of that, you will probably have guessed that Interplay has signed up a new eight-year deal with TV biggies Paramount to produce official Star Trek games for the next EIGHT years! They've already had a hit with Star Trek: The 25th Anniversary on the PC, which is soon to be followed by an Amiga version. Following that, two more adventures are planned, along with a series of action-based games to appear on floppy formats. Console fans needn't feel left out, as there's also a Super NES game in production for release next year. It's still all a bit hush-hush at the moment, but we'll be bringing you more info soon, along with news of Spectrum Holobyte's version of Star Trek: The Next Generation! Lumme.

QUICK NOTES

● THE GOOD NEWS FOR X-MEN

fans this month is that Marvel Comics has given its approval to Sega's in-development conversion of the top-rated comic book. It's due out before the summer...

● WORD REACHES US

that a UK software house has bought the game rights to Dragon, this summer's big movie all about the life of kung fu star Bruce Lee, and is currently producing the game for the SNES. Lots of top secret business prevents us from revealing more at this stage, but we're already licking our lips at the prospect of an official Bruce Lee beat 'em up.

● ANDREW BAYBROOK'S

Fire and Ice is the latest Amiga game to be signed up for console release. The deal has just been completed, we're told, and a programming team should be starting work on Megadrive and SNES versions soon...

● FANS OF TOP MOVIE

The Untouchables should be as chuffed as we are to hear the rumour that license-holder Ocean is planning to convert the film to SNES for release this Autumn...

GAME GEAR CHART

1. LEMMINGS (Psygnosis)
2. TAZMANIA (Sega)
3. SONIC 2 (Sega)
4. STREETS OF RAGE (Sega)
5. BATMAN RETURNS (Sega)
6. SHINOBI 2 (Sega)
7. CASTLE OF ILLUSION (Sega)
8. PRINCE OF PERSIA (Dynamix)
9. SUPER OFF-ROAD (Virgin)
10. THE TERMINATOR (Virgin)

Do you know about something that will revolutionise the world of games? If so, tell us so we can write about it (and palm it off as our own idea). Send your scoops to DROP THE DEAD DRAGON 32, CVG, Priory Court, 30-32 Farringdon Lane, London EC1. If it's any good, we might give you a prize. Then again, we might not.

SAD PHOTO II THE SEQUEL!

INTRIGUING! us gold boss Geoff Brown used to be a programmer, who reached his coding pinnacle with the amazingly gripping 3D Maths Chase of the early 80's.

Pictures like this can leave us in tears. Alain Prost, Sonic the Hedgehog and Damon Hill prove that even top celebrities will scrape the barrel if there's enough money in it. Sonic's the one in the middle, by the way.

Oh deary deary me. So you thought that last month's picture of 'Sonic' holding the FA Cup wasn't quite sad enough for you?

New depths of naftness are being plunged by Sega to 'celebrate' their sponsorship of the Canon Williams team this season. Top drivers Alain Prost and Damon Hill (Nigel Mansell's replacement) will both be driving cars with Sonic plastered all over them — the cars, not the drivers.

"When I'm not in the car I'm usually playing a bit of golf or football on my Megadrive," reckons Damon Hill. "It's good to know that we have Sonic — who is of course the world's fastest hedgehog — on the team." Mmm, yes. . .

CVG and GO!'s Microsells section is a goner. This is the last time you'll ever read those oh-so-interesting classified ads. We're shutting 'em down to pack even more buff-bustingly good stuff into an already impossibly good pair of magazines! So don't bother calling any more, because we'll just send all the profits on pop, crisps and sweets.

MASTER SYSTEM CHART

1. SONIC 2 (Sega)
2. TAZMANIA (Sega)
3. LEMMINGS (Psygnosis)
4. G-LOC (Sega)
5. SPEEDBALL (Virgin)
6. CASTLE OF ILLUSION (Sega)
7. ALIEN 3 (Acclaim)
8. ACTION FIGHTER (Sega)
9. PRINCE OF PERSIA (Tengen)
10. TRANSBOT (Sega)

UNIVERSAL
HOME ENTERTAINMENT

AMIGA
ENTERTAINMENT

You'll be seeing an awful lot of this logo in the months ahead - here it is in computerised form.

This is the only Jurassic Park movie picture you'll see for a while, because of the amazing secrecy surrounding the film. Here, the main stars (Jeff Goldblum, Richard Attenborough, Laura Dern and Sam Neill) examine a nest of dinosaur eggs. Mmm, I'll have toasted dippy soldiers with mine, please!

DOSH-EATING

Even though the movie is still not completely finished, Jurassic Park is already the most expensive film of all time, with dinosaur special effects so advanced that makers Universal guarantee you'll believe the creatures are real! Top computer graphics similar to those seen in Terminator 2 are being used to create the stunning SFX scenes, like an entire herd of dinosaurs stampeding across the park and a Tyrannosaurus Rex attacking a truck full of people!

IT'S A MONSTER!

Dinosaurs are taking over the world this Summer - and it's all thanks to Steven Spielberg, Ocean Software and some of the most amazing special effects EVER! Gary Whitta has all the gen on what is set to be this year's **BIGGEST** film and game...

It started as a bestselling sci-fi book, and now it's only a few months away from taking the movie and video games worlds by storm. We are, of course, talking about Jurassic Park, two words that might not mean much to you today,

where genetic scientists have recreated living dinosaurs as the main attractions! But when some experts are brought to the park (including a dinosaur boffin and a mad mathematician) to check it out before its opening, the

development teams for the project. Programmers in Britain are producing the Amiga and PC versions, while a team in San Jose, California, is working on SNES, NES and GameBoy. It's the biggest license Ocean has ever worked on, and that's just the Nintendo and floppy formats! There'll also be a Megadrive and Mega CD versions from Sega, and a 3DO game using real movie footage!

If Jurassic Park is going to be so HUGE, why haven't

has got involved to make sure that it's not just another platform game or shoot 'em up. "This movie license will be like no other," says Ocean's US programmers. "We've done a lot of development on new display systems, giving a totally new type of gameplay to the Nintendo. That is not a boast - it's a fact!"

Jurassic Park opens in

America on June 25th, and comes to Britain shortly after. The games are due out between then and Autumn, but Dino-mania will be spreading across the globe long before then. Within a couple of months, EVERYONE is going to be going bonkers about Jurassic Park and, when they do, just remember it was CVG that told you about it first!

**"This is not science fiction - this is science
eventuality" - Steven Spielberg**

but by Summer they'll have you wet with excitement.

So what's it all about then, eh? The movie, directed by Hollywood top boy Steven Spielberg, is a science fiction epic about a revolutionary island safari park

dinos go on the rampage and the whole thing becomes a disaster movie with a difference!

The game is lining up to be every bit as gigantic as the movie, with Ocean employing not one but TWO

you seen or heard anything about it before? Simply because the whole project is so secret. Pictures from the movie, particularly any of the dinosaurs, have been so closely guarded by Universal that not even the programmers have been allowed to see more than they need to! Because we're so brilliant here at CVG we're able to bring you these **UTTERLY EXCLUSIVE** pictures of the game and the dinosaurs in action!

The movie bigwigs are keeping a close watch on the game's development (they don't want it to be too close to the film, in case it gives away the story), while Spielberg, a big video game fan himself,

In the movie, the dinos breakout after the electric fences are accidentally switched off, as faithfully translated to the Amiga version.

Just one of the game's pretty intra scenes, showing a... erm... dinosaur. Look, we're not bloody palaeontologists, you know!

Jurassic Park supreme Steven Spielberg - he's spent over a hundred million dollars bringing dinosaurs to life on the silver screen. Blimey!

A dead (or perhaps just sleeping) Triceratops brightens up an otherwise dull landscape in the Amiga version of Jurassic Park.

Finally, add comments on a separate sheet for making your magazine the greatest in the known world. That's it! Thanks for taking part, and remember, if you have any ideas for the mag write them down and send them in, or why not phone up and have a chat on the Friday CVG Phone-In (see page 25 for full details!)

One's pussy cat deserves *A La Cat*.

Pussies purr with pleasure at the merest whiff of A La Cat' catfood. Made from the choicest meats, flavoured with a hint of sage and a secret ingredient that won't give your cat dog-breath, A La Cat' is so divine you'll be tempted to try it yourself.

So, here's a little serving suggestion. Bon Appetit!

CATFOOD AND SAGE MEATBALLS

750g (1 1/2lb) of A La Cat' catfood, 12 sage leaves, 90g (3oz) butter,

30g (1oz) Parmesan, 1 medium sized onion, 100ml Marsala wine, Salt, Black pepper.

METHOD: Mix the meat with sage leaves, onions, butter and parmesan. Season, then refrigerate for 30 minutes. Form the paste into small grungy balls and brown. When cooked, pour the wine over and serve in the savoury 'A La Cat' gravy.

Dear Wimps...

Welcome to the fabulously new High Scores. In case you didn't know, these are my pages and I rule over them with an iron glove! If you've got a smouldering score that wouldn't look out of place rubbed up against mine, this is the place to get it seen! This month the crew and I decided to venture out from CVG Towers and give some of you worms a taste of fame and glory. I whisked my personal photographer off to Highbury Grove school and you can check out the results on these pages. Everyone's got to start somewhere and these are now the Official High Scores to beat! If you're a winging winnie who says he/she can do better, put your photo where their face is and come score with me! Who knows, you might get a personal invitation to swap some intimate gaming secrets back at palace Sadie! See Yah! Wouldn't wanna be yah!

AMIGA

Tariq Abifawes, London.
Tariq rocks his 'substantiable' fast ball games. Well he's lucky that he's never played our Day 62. His highest score's now 48-01 Gough!

KICK OFF 2 - 11-2

SNES

Richard Powell, London.
When Richard's out at the movies or playing games he gets down to his local ice rink and sits on the ice to maintain top coolness!

STREETFIGHTER 2 - 110,000

SNES

Paul Anglin, CVG.
Anglin thinks he's the 62 when it comes to take controlling liability on the SNES - how long will it take you to finish the game?

SUPER STAR WARS - COMPLETED

MEGADRIVE

Rodney Farnock, London.
On 13 year old remembering that Rodney takes time out from watching his brother's top scores on Sonic 2 and Super Mario Bros 2!

STREETS OF RAGE - 40,000

MASTER SYSTEM

Shabbir Ahmed, London.
Shabbir thinks Hulk Hogan's the legend! Everyone knows the Predator movie was the world's best song. CVG, so he'll be talking all over by now!

DUCK TALES 70,100

AMIGA

Paul Scallan, London.
Paul's a right film buff and despite being only 14 his favourite movie is Alien 2! Blame, I but he's never started playing and talking to girls!

SENSIBLE SOCCER - 14-0

SNES

Paulo Cresto, London.
From his score it's easy to see that Paulo spends a lot of time on his SNES, put in well too, because he hopes to be a programmer one day.

SUPER SMASH TV 4,535,690

GAMEBOY

Amir Saleem, London.
An avid stamp collector, our London kid spends all his spare time on computers and on the cinema. What a top boy he is, eh, readers?

TETRIS 206,670

AMIGA

Wayne Johnson, London.
At present Wayne owns an Amiga, but can't wait to upgrade to the spanking new, all-singing and dancing A1200, can't we all!

STREETFIGHTER 2 100,000

SNES

Steve Kern, CVG.
Think you can beat the man whose name used to go out with Roger Daltry? No doubt it - but you never know!

PARODIUS COMPLETED

SNES

Yarel Barr, London.
Yarel loves fighting games, raga games, chess - 'em up games and just about anything that's got a decent plot in it!

SUPER GHOULS AND GHOSTS 4,500,650

AMIGA

Alexander Singh, London.
A long time Amiga owner, Jon Lewis Commodore's baby for its games and wouldn't swap it for the world, or even a copy of Streetfighter 2!

BLUES BROTHERS 120,350

SNES

Mustafa Miah, London.
Mustafa W.M.F. Fan Mustafa loves all the best 'em up games on the SNES. Who said computer games and TV make you violent?

SUPER STAR WARS 3,001,678

AMIGA

Tony Morris, London.
Tony's a bit of an artist on the side so we'll look forward to seeing some of his competition entries in the past very soon indeed!

SPECIAL FORCES 3,000

GAMEBOY

Grett Ragnhild, London.
Grett's a total speed junky and likes anything that's super fast. His favourite games are Zaxxon and the Mario series - great, eh?

SUPER MARIO LAND 2 99,993

MEGADRIVE

Alex Kyriakidis, London.
Alex claims to be the best games player in his street! Sorry Alex, Grassy Smith has done down his actually finished ALL of best!

STRIDER 211,500

SNES

Michael Graham, London.
Michael's a lot more modest. Is he the best in the world? No. Is he the best in the country? No. Is he the best in the street? Perhaps!

TURTLES IN TIME 300,450

AMIGA

Kevell Ragnhild, London.
Kevell's a bit of an old hand games player spending a lot of time building model planes. He's looking forward to the next generation of CD Right ones.

ZOO! 161,000

AMIGA

Anthony Johnson, London.
Tony only plays games at the weekend and goes off for hours on end so late on the clock starts for Saturday!

STREETFIGHTER 2 96,000

AMIGA

Gary Williams, CVG.
CVG's nearest rival is a bit of a dabb hand at the Sensible Rags games - write in and challenge him, why not?

SENSIBLE SOCCER 13-0

MEGADRIVE

Patrick Dalton, London.
Being a Manchester United supporter it's amazing that Pat gets any chance at all to play games - 'em his team consistently on the telly!

STREETS OF RAGE 2 100,000

MEGADRIVE

Philip Locke, London.
Although Phil plays football for his district team, it takes a lot to drag him away from Streetfighter 2, but Ghoulz and Ghosts seems to have done it!

GHOUZS AND GHOSTS 1,000,000

CAN YOU TAKE ON THE CVG BOYS?

You've seen the competition - now get in on the action yourself! All we want from you is a small colour picture of your glorious boot-race, three of your highest scores, the name of the machine they were scored on and a blank cheque! (Well, forget about the cheque for now!) If we think you're up to it we'll invite you in for a challenge against our lads - and then we'll know whether or not you were lying about your high score. Meanwhile, check out this month's celebrity challenge (page 26) and fill in that coupon!

COMPUTER AND

CVG

VIDEO GAMES

CELEBRITY CHALLENGE

The Challenge just got tougher! Now, every month, the CVG boys will be issuing the challenge to top stars, celebrities and our loyal readers to take us on at a computer game of their choice. There are big prizes to be won each month for lucky readers, whilst rich celebs will just have to make do with the glory of winning. And to kick it all off this month? Ladieees and Gentlemen, Mr Nigel Benn...

Roll up, fight fans – have we got a treat in store for you or what! Forget Witherspoon vs Tyson! Pass over Holmes vs Leonard! And you can even cast the momentous Holyfield vs Bowe epic from your minds! CVG has gone for the biggest fighting challenge since Gary Whitta refused to give up his seat for burly Barry Brulser, the local extremely hard person. That's right, our very own demon deputy, Paul 'The Light Fantastic' Rand, nearly jumped out of his Sid The Sexist boxer shorts at the chance of trading blows with the one and only Dark Destroyer, Nigel Benn. Call him foolish, call him as thick as a bowl of Mrs Miggins' special cement porridge, but don't call our lad Rand chicken, 'cos this boy is as tough as six-inch nails! Don't believe us? Then gather round, pick up your pong-orn and take your ringside seats at the all-new CVG Celebrity Challenge!

NAME: PAUL RAND

AGE: 21 (Going on 48! – Paul Anglin)

HEIGHT: 6'1"

WEIGHT: 12 st 12lbs

REACH: Unobtainable due to the fact that Paul's arms are permanently at 45 degree angles to his mouth!

PRE-MATCH TRAINING: A daily diet of Doner kebabs, followed by a strict intake of half-a-dozen bottles of Newcastle Brown Ale. Paul had several early nights – this year, and got plenty of rest by being under the duvet by 2.30 am. Paul doesn't believe in physical exercise, although last week he did bend over in the City Pride hostelry to pick up a two pence piece which he needed to buy a packet of pork scratchings!

PREVIOUS FIGHT EXPERIENCE: A 35 second scrap with Billy 'No Balls' Murphy behind the bike sheds at primary school. Rand proudly states that he can handle himself against any four-year olds that you care to mention.

MATCH PREDICTION: 'I'll be damn lucky to get out with all my very personal belongings in one piece!'

BOXER CHARACTER: Bruno Franko

NAME: NIGEL BENN

AGE: 29

HEIGHT: 5'10"

WEIGHT:

Classified!
REACH: Bloody far enough mate!

PRE-MATCH TRAINING: Regularly travels to Tenerife to run fifteen miles up Europe's second tallest mountain. Also straps 100lb weights to his neck for lifting exercises.

PREVIOUS FIGHT EXPERIENCE: 37 world class fights, 35 wins with 31 knockouts! Current WBC Super Middleweight World Champion and generally a rock 'ard sort of geezer!

MATCH PREDICTION: 'I'll duck, I'll weave, but above all I'll knock him on his ass!'

BOXER CHARACTER: Muhammad Ali

We couldn't ask our Rand to physically go toe-to-toe with Mr Benn, or Sir as we now call him, – well we could, but we wanted him back in one piece! So it was down to the lads at Virgin, who acted as promoters for this epic scrap, which took place on their excellent Megadrum siv, Muhammad Ali Heavyweight Boxing. Nigel's become a bit of a games addict and didn't quite realise what he was getting himself into. He recently went into a shop and scooped up all the games he fancied – and was nearly flattened by the sales girl at the checkout when she asked him for 500 quid!!!!

IT'S FIGHT NIGHT – THE WEIGH-IN!

The two brawlers chose their main men, Nigel jumping straight in first and picking the number one fighter, Muhammad Ali, leaving Paul at an immediate disadvantage. However, rather sportingly, if not egotistically, Paul didn't opt for the second seed character, Tommy Hammer, but went instead for the sad, out of condition and seriously flawed Franko Bruno. Paul obviously thought that Nigel, although awesome in the ring, wouldn't stand a thimble's chance against a strawberry blond CVG North-Eastern monster with seven years worth of gamesplaying experience like himself! What a sad and misguided get he really is!

Don't get too close, if you know what's good for you!

SECONDS OUT – ROUND ONE!

Paul stormed out of his corner and jabbed ferociously at his target in an attempt to whittle away Ali's superior stamina and energy bars. Nigel's experience immediately came to the fore – playing it cool, he refused to get suckered in by Randy's tactics.

Let the games begin!

Instead, Benn hung back until Bruno's energy bar was way down low and then leapt in with a thumping hook-jab combination, catching Paul completely by surprise and sending him flying onto the canvas! Shaken Rand leapt to his feet though, and managed to hang on until the end-of-round bell.

GET IN THE RING

Round two was much more even with some red hot toe-to-toe hammering. But Bruno quickly tired and slumped to the deck again. Nigel thought this was great and, with a clear two minutes of the round left to go, he felt certain that there was no way Rand was going to make it to the bell. But jump up the CVG hero did and, although Nigel tried to finish him off, Paul gave him the slip, saving his ass.

Nigel starts to get carried away whilst Paul gets ready to run.

SECONDS AWAY

To his credit, Paul was battling away like a beaver on the steroids, but he just couldn't make any mark on the armor-plated Ali. By now, Bruno was sporting a beautiful shiner as Ali dropped down low for some punishing body shots. Seriously down on energy, it was only a question of time before Bruno was felled again. Nigel was obviously new to the game as he couldn't understand how Paul kept managing to get up, but by hammering away on the buttons, get up he did!

Mutha! Did you bring the spare undies?!

YOU'RE OUT

It was make-or-break for Paul. Cracking Ali in the mush, Bruno was actually beginning to make a mark on the invincible Ali, but Nigel's incredible stats saved him once more and in the end all Paul did was tire himself out. Weak on his feet, the last thing Paul needed was a blinding hook-uppercut combination from Benn, but that's exactly what the Destroyer dished out and Bruno hit the canvas like a lead coffin thrown from a 30 storey building! Tough luck Paul, but the boy done very well considering his character's ultra-sad stats. 'Now, let me be Ali,' requested the ever optimistic Rand. 'Er, I've suddenly come over all tired,' replied Benn 'is that the time? See yah!'

Victory for Benn and Rand refuses to face the fact that he's been routed!

YOU THINK YOU COULD DO BETTER?

Now's your chance to prove it! Just fill in the form below and send it in to us along with a colour picture of yourself and who knows? You may just be invited along to CVG Towers to take on The Boys in a bloodfest of gamesplaying! There are big prizes up for grabs if you win, too! Fancy your chances? Then fill in the form below and send it to:

THE ULTIMATE TV

WORTH OVER

£1500

You all know how great your SNES or Megadrive is and just how wonderful Streetfighter II plays. But just imagine playing with a seven-inch-tall

Ryu! Imagine seeing a six-inch-tall British Bulldog running around your screen! Well now, with the very latest in wide-screen TV technology, you can see even more of your games and TV programs than you ever thought was possible!

Costing well over £1500, your new TV will also treat you to such amazing features as: a cinema styled wide screen, digital Nicam surround sound, digital pause frame, digital slow motion strobe light effects and Fastext! So what do you have to do to win this incredible piece of kit? Well, don't worry, you won't have to pay for the thing. . . well, not retail price anyway! Just call the hotline number below, answer the oh-so-easy questions asked on the phone, leave your name and address and camp outside the post office for three weeks to wait for your prize. Who knows? Larger-than-life gaming could soon be yours.

Special Note: The call will cost you 36p per minute (cheap rate) or 48p per minute (at peak periods). Your call will last no more than four minutes. Please make sure you have that special security clearance, otherwise known as parental permission, before you call. . . .

QUESTION CORNER

Top of the morning to you all! So what do you think of the new-look issue then? Great, isn't it? Well, new-look all-singing and ass-kicking or not, Question Corner is certainly doing the business this month. You've sent me a hernia's worth of gaming problems, and it seems as though everyone out there is playing nothing but RPGs, especially *Monkey Island 1* and *2*. How about some games with a little more life in them? I mean come on, give me something half decent to play on Wednesday mornings will you? How do you expect me to be happy and jolly, when all I get to do is play boring RPGs. When your consciences start getting the better of you send all your problems to: **HONEST ANGLIN'S QUESTION CORNER, CVG, PRIORY COURT, 30-32 FARRINGDON LANE, LONDON. ECTR 3AU.**

Q Exactly how do I beat King Arthur on Quackshot - the Megadrive version?
Patrick Giggs, Newmarket.

A King Arthur, eh? Simple: Turn left and shoot a plunger at the wall. Stand on this and wait a while before shooting a second. Stand on the second one, turn right then duck and shoot at Arthur. Keep shooting even as he throws his sword at you. When the sword is coming your way, keep shooting the plungers and one will land in his face. Then, dodge the blocks falling from the ceiling, run to the far right and repeat the process eleven times. And he's dead!

Q I'll say this only once; I have tried and tried and tried, but I cannot get past level 13 of Humans. It's a right *?@*!\$ to be honest, and I need help before I go mad!
Steven Wright, Witham, Essex.

A I've had about nine million letters about level 13 this month. Now you can just settle down and indulge in the complete solution to Humans - level 13: Pass the spear backwards and forwards across the chasm to bring the four humans across. Stack one human to get to the platform at the foot of the ladder. Climb the ladder and pick up the spear on the platform guarded by the dinosaur. You'll have to time it very carefully to avoid the dinosaur. Throw the spear to kill the Dinosaur then vault across the bridge using the spear, leaving the bridge intact. This acts as a safety net when dropping the torch from the upper platform. Whoever crossed the bridge must now throw the spear up onto the upper platform. It is critical when doing this that you place your human on top of the rise at the end of the bridge. Now make your human lean back as far as possible, (see manual under "throwing the spear") and using full power, throw the spear on to the higher platform.

Now select the lonely Human at the top right of the level and guide him down the ladder to collect the spear. Holding the spear he should climb back up the ladder and vault across to the platform where the torch is lying. Drop the torch off the right hand side of the platform so that it lands on or near the bridge below. The human who has just dropped the torch should now vault back to the platform at the top of the ladder. Move the human who threw the spear, to pick up the torch then burn the bush at the end of the platform to clear the way. Now drop the torch fast!

Next, build stacks of humans just to the left of the bridge, so that the Human on the upper level can climb down. The Human that has just descended down the stack, who is holding the spear, should now vault across the gap above the hut. Throw the spear back to the tribe waiting on the other side, repeating the process in order to get all the other members of your party across.

All the humans should now climb the ladder and form a stack on the upper platform, enabling the last man to climb up and discover the wheel - just walk the Human past the wheel and hit Return. Simple, eh? And also very effective!

Q I'm having rather large problems with Mickey and Donald on Megadrive. I cannot beat the final magician. I'm playing two-player mode using both characters. Please help me out.
Emma Anderson, Hearne Bay, Kent.

A For an end-of-game baddy this guy's a real pussy. Quickly jump onto the moving platforms, and fire several times at his head. Then go to the right-hand corner. The ghosts can't get you. Occasionally jump out and shoot his head, but be careful of the liquid.

Q In Ninja Spirit I've hit a bit of a snag. I'm stuck on that bit on the last level where you have to fall down the massive hole. What's the safe route through. Do you know?
Gary Badger, Sussex.

A I know how you feel. I was stuck on this one myself for ages and ages, but there's actually a very simple solution. Just follow the map and there shouldn't be any problems.

Q I am having real trouble on Monkey Island. At the beginning of part two, I don't know what to start doing. Could you please help me?

Gareth Mackie, Aberdeen, Scotland.

A This isn't the most specific question in the world, is it? Well, I'll take you through a little of part two anyway. On the ship you discover that your crew has decided to mutiny. In the cabin, pick up the feather pen, the ink, and open the drawer. Look in the drawer to get the captain's log. Read it if you like. Now walk out on the deck and climb the rope ladder. In the crow's nest, pick up the Jolly Roger and climb back to the deck. Now climb down the hatch and down the other hatch. Pick up the rope, open the keg to get some gun powder and open the chest and get the wine. Now climb back up to the second floor and climb DOWN the ladder to the kitchen, and I'll leave the rest to you.

Q I cannot get past the moving wall at the beginning of mission four on Double Dragon. Please tell me how to do it, or how to get infinite lives.

Andrew Oilphant, Ferryhill, Co Durham.

A Correct me if I'm wrong, but isn't this game extremely old and not played any more? Oh well, there's no set way to get past it anyway. The best way to do it is to just jump past it as quickly as possible, and try to remember exactly where the wall moves.

Q On Actraiser for the SNES, I've got to the part where there are seven heads and each head's eyes light up and take you to all the different bosses that you have killed. Is there any way of making it easier? Also, is there a level select for it, or any way of saving an action mode because it's boring making the villages.

Chris Roach, Fareham, Hants.

A You must have the shortest memory span of any creature on this Earth. We ran a complete guide to Actraiser (written by yours truly) starting in issue 132 November, so the bit you're after will be in issue 133 December. The part you're stuck on, is called Death Heim. What do you mean the building part is crap? That's the main essence of the game you spanner!

Q I have heard there is a cheat for Street Fighter II to enable you to play the Championship Edition. Is this true, or is my chin about to spin off into space?

Abner Pastoll, London.

A Right, I'm getting fed up with this, so here's the absolute answer. There are certain Game Genie codes that will allow

you to control the bosses, but NOT perform their special moves. It causes a lot of corruption of the graphics too and you only have a limited control over the bosses.

Q On Monkey Island 1, I'm racking my brain (yes I have got a brain) trying to work out how to get the oars which are in the crack to the south of Monkey Island. I can get the first rope and see the second hanging from the corpse, but as try as I might, I just can't seem to reach it. Please, please help.

Robbie Stern, Thorpe Bay, Essex.

A No problem, just listen up. Pick up the rope from the dead man and go to the jungle. Now go to the crack and use one rope on the steady branch. Climb down it and use the other on the stump. Climb down again and pick up the oars. There you go!

HOLD YOUR HORSES! I'VE GOT SERIOUS PROBLEMS!

Hey! We're not done yet. Anglin may have all the angles covered as far as the tips department goes, but what about all your techy problems?

Who yah gonna call if you don't know your Turbo GRAFX form your

Wondermega? Where can you buy a special, limited edition Ranman 2.5, in which you CAN control the bosses? Perhaps you've heard mutterings on the grapevine about the new 32-Bit PC Engine, how can you find out if it's true? Well the simple answer is read CVGI Every month

Steve Keen will be answering your most bizarre questions, calling on all his telepathic links with Japan, USA and the world, drawing in the most obscure information from around the globe. So, if you've got a question and nobody else can help, write to: STEVE SAYS WHAT'S YOUR PROBLEM? 30-32 FARRINGTON LANE, PRIORY COURT, LONDON. EC1R 3AU.

LOOK! The all-new CVG rating system is without doubt, the best in the world.

Welcome to CVG's awesome games review section! Within the following 100 pages there's the complete low-down on everything new in the games' world. CVG's now got more reviews than any other magazine of its size (not counting the mags that give you up to half a dozen titchy little reviews on a single page!). Most of our reviews are two, three or even four pages long!

What's the machine? It's name and mugshot tells you exactly which machine we're talking about!

Pros and Cons let you know what are the good points and bad points of any game.

MEGA CD

PROS:

A brilliant shoot 'em up which is everything that a good game should be.

CONS:

None, other than it's likely to keep you up into the small hours — glued to the screen!

VERDICT

JOYPAD CONTROLS

Is it a Jap import with difficult to guess controls? CVG tells you just how to handle your joystick.

ON THE OTHER HAND

If a game can be compared with a popular rival, then we'll tell you just how it compares...

THE VERDICT BOX

Opinions matter — especially when they're the witterings of top games' players like us. And the best games get at least two verdicts as even when we agree to disagree, you'll still get the big picture!

REVIEWED: CVG No136

NOW, YOU'RE GETTING BETTER

Get through the tricky bits! CVG's team of gamers show you how!

GRAPHICS

Stunning sprites and excellent explosions throughout the game.

89

SOUND

Some really rock hard thumping tracks, with some excellent effects.

83

GAMEPLAY

Absolutely rock-hard but horribly addictive, nonetheless. This is fantastic...

83

VALUE

With weeks of blasting ahead of you this is worthy of its price tag.

87

Marks for Graphics, Sound, Playability and Value are backed up with a CVG comment for complete authority.

What skills do you need for the game? We tell you exactly what makes the game tick and the combination of skills you'll need to play it.

How does it measure up? CVG concentrates on games that are simply the best! So the HIT game status is only given to the best of the best!!

Overall score. This tells you just what we think of the game. The higher the score, the more excellent the game!!

OUT: April. Thanks to US Gold (021 625 3388) for the review cart

Get on that bike and ride.

Now that's what I call a Hot Rod.

Charge your shield to keep alive

Charge the cart to get ahead.

Hands on experience.

Take my forged I.D. — Suckert!

Hey it's o' goggle eyes.

FLASH BACK

Be smacked in the gob by the most astounding Megadrive game ever. . .

Another World blew our minds and now Delphine's steam-rolled over our toes with this. Messing around in the laboratory, apprentice secret agent, Conrad Hart, discovers that some of the country's key political figures and top nobs aren't really human after all, but evil aliens in disguise! Their cover blown, the extraterrestrials kidnap Conrad and whisk him away to a top security planet, erase his memory and throw away the key! Calling on all of his skills Conrad escapes in a heated laser battle into the hostile planet's jungle. Find Hart's memory, get back to earth and expose the alien scum! Simple!

Sneaky, sneaky.

DISNEY, EAT YOUR HEART OUT!

Reinforce the elastic around your drawers 'cos Flashback's animation is sexier than finding Claudia Schaefer at the foot of your four poster! Delphine have packed in hundreds of frames of sprite animation running at , 24 frames per second, the same s most cartoons. Conrad's dynamic moves even thrust Prince Of Persia into the shade. In a bid to heap on the features and surpass the incredible effects of Another World, Delphine has doubled the amount of cinematic-styled animation sequences to an astonishing 75 These keep the film-like tones going

Delphine's fantabulous, interactive movies, Flashback is just like popping down to the local Odeon — and, just like in any good, movie, you'll find zooms, full close-ups, pans, and many other atmospheric touches.

MUSIC TO YOUR EARS!

Delphine has always put great emphasis on the importance of music and sound effects — and Flashback's no exception. The brilliant music score was composed in the company's own studios and all the sound effects, guns blasting, ricochets, lift swishing etc. are extremely high-quality digitisations. Atmosphere. Is built up in all the right places: as our lad creeps around the levels, the pitch of the score changes to match the on-screen action. It's totally amazing: whenever you get locked in a laser/pistol battle with the jet pack riding cops, the sounds of their propulsion units and the different types of gun fire zipping around the speakers blows your mind! Hit Groove Factor 10; it doesn't get much better than this!

Shades of Total Recall methinks.

THE JOY'S IN THE PAD!

Typical secret agent stance.

Right between the eyes.

Whoops! Maybe not.

A FEW DOLLARS MORE

The main objective's to leave this stinking planet alive. No way is it going to be easy. Things start off calmly enough as you find your way through the jungle, but, as soon as you hit a populated town, you won't know who to trust. Now you're the alien and the only way out is to earn money for a ticket back to Earth. With no dosh and no work permit, Conrad Hart's in deep trouble. Everyone in the three worlds and six levels puts you into a different predicament. Finding a forger for your 'green card', acting as a bodyguard for VIP scientists, and hunting down

malfunctioning killer droids for a few dollars are just a few of the occupations you'll embark upon after a visit to the local Job Centre. What a guy will do for a few dollars more. To get around town you'll have to place yourself at the mercy of the underground system. Don't miss your stop or you'll have to go right round the system to get back to the right place. Still, it's better than British Rail!

VERDICT

Prince Of Persia blew your Jockys off? Another World wowed you with originality? Prepare yourself for the cack of your life! Flashback will leave you a foaming, animation junkie! Conrad clings onto ledges with his finger tips, splatters into walls, staggers off cliffs and has more life in his tiny, pixelated fingers than a ferret on caffeine! No screen shots can do the game justice, you've gotta see this baby MOVE. And move it will, straight out of the shops before the boxes can touch the shelves. If this cart isn't game of the year we're in for some incredible releases before Christmas.

STEVE KEEN

FLASH BACK

Never had that problem before, honest!

SAD FOLK START HERE

GIT

Cretins aho! I guarantee this jump'll give you sad lot a heap of trouble. If you can't do it with my help first time you're not worth the sweat on a baboon's posing pouch! Stand at the edge of the screen, hold 'A', push right, quickly release and push up.

NOW, YOU'RE GETTING BETTER

GARTH

Even though you'll be used to the controls by now, things just keep getting hotter. You've only got 90 secs to replace the reactor's card, so don't hang about — run, run, run! Don't bother avoiding the green goo, run through it. Place the card on the right.

AT LAST, YOU'RE WELL' ARD!

PAUL

On the final level get past this morphing monster and pick up the Atomic Charge — without losing a life! Small hint: take your gun out of its holster and crouch down to roll away from the pest. Don't hang about, otherwise the dude will waste your bones Speed is of the essence. Don't forget that when you've got the gun you can't run!

HELP US IF YOU CAN!

Over the next two months we'll be collecting hints 'n' tips on Flashback, so if you've any advice send it to "I've don't suffer from Flashbacks, maan!". CVG, EMAP Images, Priory Court, 30-32 Farringdon Lane, London EC1R 3AU. If your tips are up to it, we'll be printing them in a forthcoming issue.

VERDICT

Steve's already banged on about Flashback's stunning graphical qualities, but this game's about more than just impressive visuals. It's one of the most polished and involving games I've ever seen, crossing Prince of Persia-style cliff-hanging gameplay with a truly cinematic atmosphere. Forget about CDs — THIS is what 'playing the film' is all about! My only quibble is that it might not take that long to complete, but I guarantee you'll have so much fun while it lasts, you'll have got your money's worth even if you clock it in a week!

PAUL ANGLIN

ROTO WHAT?

Rotoscoping, that's the word. It's the process used in Flashback to make the movement of the sprites so convincing. It's previously been put to good effect only in mega-budget major movies. Anyone who's seen the brilliant Lord Of The Rings will know what it's all about. Delphine's 12 meg giant features the most advanced and detailed Rotoscoping ever seen on any home format. But how's it done? Well, first you grab yourself a particularly dexterous actor and film him. The footage is then digitised and drawn over/retouched to produce an extremely fluid set of scummy sprite animations. It sounds easy, but it actually takes weeks to put together just a few well chosen seconds.

James Bond never looked like this!

The plot unfolds.

Nice, you think you know someone

ON THE SPOT EFFECTS

It's tempting to focus everyone's attention onto the awesome sprites — just like those in Prince Of Persia, but there's much, much more in this game. For a start the backdrops are astounding, with weird, warped and twisted foliage and beautifully-drawn locations to complement all the secret agent's adventures. However, the real wowser are the incredible spot effects that breathe the ultimate breath of life into the game. There are dripping vines, gun flashes, recoiling weapons, smoke, discharged shells, explosions, dust clouds, Hart's jacket blowing in the wind — and even the sound of splintered concrete when a shot misses and ricochets off into the background. Even the characters Conrad passes on his missions, who don't actually have anything to do with the story, walk around and fidget in their own way.

GADGETS 'R' US

Many players will get off on just running around and putting Conrad through the mill, getting into blaster fight after blaster fight. But once you settle down to the task at hand, you'll find that there's more to the game than meets the eye. The secret agent can interact and talk to over 15 different characters, such as the barman, police-men and underworld figures. They'll point our man in the right direction to collect all-manner of useful items. Hart will have to master the use of various 007 toys such as the anti-gravity belt, the holo-cube that keeps you up-to-date with events, and a force field projection unit that throws up a temporary wall of plasma in front of you to deflect explosions and laser blasts.

Alone in limbo.

CREATURE COMFORT

There are some pretty hostile beasts on the planet. The harder the option setting the more variety of aliens you'll be up against. All the living creatures are built for easy play, but whack things up to hard and you'll have to face all manner of laser-firing droids and robots!

GUARD

These guys are cannon fodder. Simple to kill, but if you miss they can dish out some rough justice with their heavy laser rifles.

COP

The police take at least three shots to kill and have the added advantage of being able to levitate with jet packs. They're pretty good sharpshooters too, and they tend to attack you in groups.

GUARD 2

The same as the first guard, but this guy has a force field for protection.

CY-B021

Simulated replicants. Droids that have gone wrong. They take a fair few shots to wipe out and can de-materialise in front of your eyes and rush up behind you to spread your brains all over the carpet!

BIO-MORPHS

Genetically engineered creatures who can morph their bodies into all kinds of shapes and slide around the walls and ceilings. They are particularly good at avoiding shots and trying to scorch up close, zapping your bones with a plasma bolt from their hands.

ON THE OTHER HAND

89

REVIEWED: CVG No134

ANOTHER WORLD

Delphine's first cinematic adventure on the Megadrive scored brilliantly for its fab animation sequences, action footage and originality. It's not as detailed though, although the sprites are bigger, and it's easily completed. Another World's a must!

Purple rain, purple rain...

VERDICT

Flashback is graphically almost perfect game and sets the standard for graphics and animation. Hopefully it'll be a tremendous hit with gamers-players too and kick some software producers' ass into giving people games that really show just what the Megadrive can do. It's beautifully presented, with cut in scenes for special events that add to the overall atmosphere, and beautiful design touches like being able to skip through them if you're eager to get on with game. The puzzle element is great too with several missions cropping up in order for you to progress.

GARTH SUMPTER

MEGADRIVE

PROS:

The best animation ever seen on a computer game anywhere. In-depth gameplay with the right mixture of action and adventure.

CONS:

Quite easy to complete, even with the difficulty settings.

GRAPHICS

Excellent. Completely stunning movement and detail to match.

97

SOUND

Great, atmospheric music and synchronised digitised effects.

89

GAMEPLAY

Delphine's new classic is entralling and addictive to the last.

91

VALUE

Flashback is so fab it doesn't matter when you finish it!

OUT: May. Contact US Gold on (021 625 3388) for more information.

TERMINATOR 2029

YOU THOUGHT THE T-800 WAS DEAD? WRONG!

The most powerful killing machines ever, Cyberdyne Systems' T-800 and T-1000 Terminator units, failed in their missions to travel back in time and destroy the man who would eventually lead the Resistance forces to victory over the Skynet Defence System. That man, Colonel John Connor, has, in the year 2029, come into possession of a powerful battle-suit, built by Skynet as a forerunner to the Terminator. You are the hero selected to slip into the Advanced Cybernetic Exoskeleton and take on the Terminators on equal terms. It's one man against everything that Skynet can throw at you - but you must succeed. The fate of the planet rests in your hands.

PC (1MB EXPANDED MEMORY REQUIRED)

HEAVY WEAPONS

They're tough nuts to crack, these T-800s and Hunter Killers, and you're not going to defeat them with a hard stare. Which is why, nice chaps that they are, Special Operations have made available to you their most up-to-the-minute weaponry. The ACE Battle Armour has six hardpoints to which can be attached the kit you will require to complete your assigned missions. Follow the instructions given to you by High Command; it will assist greatly in correct selection from the following equipment:

PHASED PLASMA RIFLE

The futuristic weapon made famous in the original Terminator movie (who remembers Arnie's request to buy a 'Phased Plasma Rifle in a 40-watt range' in the 1984 gun shop?). Hitting the fire button unleashes a bolt of plasma which causes considerable damage. Blindingly accurate from close range, it loses effectiveness when firing at targets further away.

TOMAHAWK FUSION GRENADE LAUNCHER

Recent advances in controlled nuclear detonation have resulted in the creation of Tomahawk, an updated version of the 20th Century grenade launcher. Not only is it more accurate than its forefather, the Tomahawk, due to its atomic capability, it is also far more devastating. Only the most heavily-armoured foe will be able to withstand a direct hit from a Tomahawk.

AUTODOC

Although the ACE Battle Armour gives the wearer an equal standing on the battlefield, it is still possible to be seriously injured while inside. The Autodoc has been created to counteract the enemy's damage-inflicting capabilities. Linked to various nerve endings, the Autodoc first diagnoses then repairs any injuries sustained in a relatively short space of time.

Crikey! Ice-cube central! Obviously, there's no heating in Rebel Command.

Don't even try talking your way out of this one - he's not the sort to converse.

You've toasted one Terminator!

Your quarters. And quite frankly, I'd rather sleep with the HKs. Mind you, looks like a good game of Terminator on the telly...

MISSION IN ACTION

Encased in your ACE Battle Armour, you're ready (although not entirely willing) to step into the nightmare which is Los Angeles in the year 2029. LA is a desolate place, laid to waste after the devastating nuclear holocaust in 1997; charred skeletons and rubble replace what used to be a sprawling metropolis. To aid Rebel Command in its fight against Skynet, you must complete a variety of missions given to you by John Connor and his team. In the mission briefing room, you will be furnished with a blow-by-blow account of the task you are about to undertake, containing vital information such as primary and secondary objectives, most useful weapons and likely enemies which you will encounter. Following that, it's into the armoury to kit yourself out with the very latest equipment which Rebel Command has to offer, before being shoved out of the door and into the unknown!

VERDICT

There's little I can add to Paul's comment apart from the fact that this really strikes me as a high-tech Dune and Dragon's like adventure with bags of shooting in it. Control is a little unwieldy at times but the computer HUD display has nice touches like the naming of targets. It's also really progressive, with the strategy element fairly low in earlier missions which leaves it wide open for people who just want a quick blast. Graphics are nothing special but are dark and moody and James Cameron-like. An OK game for all PCers.

GARTH SUMPTER

KILL AND DON'T BE KILLED

It's no good setting off war-ravaged LA without first having at least some idea of what you're letting yourself in for, after all, this is the year 2029, there are Terminators lurking around practically every corner and, unless you're fully prepared, you'll be blasted to smithereens faster than you can say 'Ayah! Ayah! Get off me head!' So it would be recommended to try your hand in the purpose-built training arena before heading out into the real killing zone. The training missions are an accurate recreation of actual battle situations, except if you die, you don't - your progress is logged and you live to fight another mission. It's strongly recommended that you become well-versed in all aspects of Terminator trashing in training before you attempt the real thing the ACE Battle Armour is too precious to lose.

VERDICT

Terminator 2029, as it's not the killing spree many of us expected. Instead, it's more akin to the Dungeon Master style of play, most notably in the flick-screen way you move around the playing world. But I enjoyed the game; it's massive, with over twenty thousand different locations, and some of the graphics are particularly impressive. Nineteen missions are there to be undertaken, and I had enough of a problem getting off the first one! There could have been more to the game, but generally, Terminator 2029 is a good spin-off.

PAUL RAND

This is the happy scene when you get your ass blown off.

Looks impressive, that ground-based HK. Don't hang around though, otherwise you'll get your head kicked in...

ON THE OTHER HAND

72

REVIEWED: CVG No 120

THE TERMINATOR

US Gold and Bethesda's original Terminator licence was a right good 3D laugh, and was the first EVER Terminator game to appear on any home computer. This original, blast-em-to-hell Terminator remains a challenging title that would keep you amused for some time.

PC

PROS:

Excellent graphics, and a massive game with plenty of missions.

CONS:

The role-playing nature of Terminator 2029 might put people off.

GRAPHICS

Enemy characters are brilliant and backdrops are also impressive.

90
72

SOUND

Good tunes and meaty sound effects fit the atmosphere.

86
72

GAMEPLAY

Initially disappointing, but ultimately engrossing

85
72

VALUE

There's loads and loads in it. A very big game for your money.

OUT: May. Contact Mindscape on (0444 246333) for information.

THE

TERMINATOR

OF COURSE IT'S A CLASSIC FILM, BUT WHAT'S THE LATEST GAME LIKE?

You'd think there's little good to be said about a nuclear war, but at least James Cameron's bleak vision of the future has provided us with two top films and a host of decent software. The Terminator movies make such ideal game material that it was always a sure fire bet that there would be a whole host of video game tie-ins. Sega Terminator fans have generally been done proud, with versions of the first movie on all formats, as well as a convert of the recent T2 coin-op on Megadrive. Nintendo owners, however, have been short-changed as far as versions on their systems go. Thank Mindscape then, for stepping onto the scene with a SNES version of the original classic.

Keep an eye out for petrol bombs - they hurt!

Who's that at the window? Why, it's a gun-toting thug. With a bald head.

FUTURE WARS

The game kicks off in war-torn Los Angeles of 2029. Take on an army of T-800s and Hunter Killers and reach Skynet's HQ to access the Time Displacement Machine, and zoom back to 1984, where a T-800 is trying to wipe out the mother of unborn John Connor who will, in the future, lead the Resistance to victory over Skynet.

Terminators attack even after they've been blown in half!

Put your foot down and get shifted sharpish - Arnie's right behind you!

KNOW YOUR ENEMY

Reaching Skynet's HQ is no easy task thanks to the mechanical monstrosities spewed out by the villainous computer network. Here's a rundown...

T-800 TERMINATOR

The basic model produced by Skynet, armed with a rifle and pro-

grammed to patrol and kill. One shot from your rifle should blast away the main chassis, with the surviving head and torso section exploding a few seconds later.

T-800 TERMINATOR (DISGUISED)

When the standard T-800 is covered in human flesh (an infiltration unit), they become slightly tougher to kill. These replicant machines also attack in more sophisticated ways, firing while crouched and diagonally from raised platforms.

PODULES

These flying trashcans come in

two varieties - the first fires sporadically down at you from its high vantage point while the

other drops deadly wormy things (see below). A few well-aimed upward shots will see them off.

ROBOT WORMS

These reptilian rascals look

harmless enough, but race towards you if you get too

close, detonating at your feet and causing big damage. They're too low to the ground to shoot, so lob a hand grenade at them instead.

VERDICT

Is this game **HARD** or what? The gameplay is fine, but there are niggles that make it **SO** frustrating. The restart checkpoints are so far apart, on the first level you can progress for twenty minutes and still get sent right back to the start when you die! Needless to say, we caught only brief glimpses of the Terminator himself and, though the game may well have some very good stuff on later levels, what's the point if you've got next-to-no chance of ever getting there? We all want challenging games, but this is ridiculous!

GARY WHITTA

Don't be fooled – none of these boys are human.

More driving hilarity through the streets of LA!

The last level – but an iron bar against a T-800 Terminator? I don't think so.

THE FINAL BATTLE

With all the driving shenanigans finally paid to, it's off to the factory where Amie and Reese have a showdown. To make matters worse, on this final level you haven't even got a gun anymore; all you have is an iron bar, which is up to best use by clanging it round the Terminator's steel bonce. You haven't got a hope of killing him like this – he's **HARD**, remember – but what you can do is stall him long enough for Sarah to build a bomb, shove it into his ribcage and blow him away for good.

Don't be a hero – get down that stepladder!

Reese takes on a Hunter Killer!

Oh no! A ground-based HK to take out!

COPS AND ROBOTS

Come the fourth level, you and Sarah Connor have been nicked and placed in separate cells in an LA cop shop. Naturally, the presence of thirty heavily-armed cops isn't going to put the T-800 off so, as the Terminator takes the station by force, you escape from your cell and set about finding Sarah before he does. But since your gun has no ammo to start with, you have to resort to fisticuffs with the cops and other escaped prisoners until you can find some – which you'll definitely need when you bump into Amie himself. Searching behind every door in the station is the only sure way of finding Sarah before the big T and, once you've done that, it's on to yet more driving fun, this time with Amie chasing on a bike.

NOW TURN TO PAGE 92 FOR THE NES EXCLUSIVE!

VERDICT

Yeah, sure, Terminator's hard, but that's the point, isn't it? After all, what kind of respect would you hold for an armour-plated killing machine if it wasn't? The Terminator's film-like intros are ace, but where's the traditional music? Although there's not much gameplay, the way your machine gun fire rips through the cyborgs to reveal their metallic insides is brilliant. What a shame more such effects weren't introduced. Terminator's hard, but fine, its major problem being that it can never match the brilliance of the film.

STEVE KEEN

SUPER NES

PROS:

Captures the atmosphere of the film fairly well.

CONS:

Basically, it's just too difficult.

GRAPHICS

Dodgy sprites and bland backdrops give a decidedly 8-bit feel.

60

SOUND

Fair in-game FX, but the music sounds nothing like the film.

54

GAMEPLAY

It's a lot of fun, if you've got the patience of a saint.

68

VALUE

If you're persistent enough, it could keep you going for months.

78

MISS OK! HIT

70

THANKS to Console Plus (0532 500445) for the review cartridge.

Hurrah! At last this lil', ol' classic has made it onto SNES

The Terran Confederation has been locked in galactic warfare for the last 20 years. The Kiltrathi, a vicious catlike race, have repeatedly taken over human-colonised planets and enslaved the inhabitants. As the war enters its third decade you take on the role of a young rookie pilot aboard one of the last, deep-space battle ships, Tigers Claw. Have you got what it takes to dog fight in space or are you just another pussy about to be put into permanent retirement? Climb aboard your choice of streamlined fighter and strap yourself in for the 3D space combat game of your life. Maximum warpspeed in three nanoseconds. HIT IT!

WING COMMANDER

ALL THE RIGHT MOVES

Combat's no easy task whichever ship you choose. All the enemy fighters are shown on radar as red dots. Maintaining contact with your Wingman is vital. First, open up the communications channel and tell her to Break and Attack! Now pick off a Kiltrathi fighter and try to manoeuvre behind it and toast the muthal! The manual lists some brilliant moves straight out of Top Gun. If you're being tailed, slam on the breaks and the foe will shoot straight past you and end up a sitting duck!

Himmm, luvvly lady!

Nice helmet.

Nice hair.

Mission Command. Get your orders.

Choose your enemy in the training sim.

PROTECT YER VITALS!

- 1 Gun and missile sights.
- 2 Eject warning light.
- 3 Left VDU display. Shows Weapon Select Screen and Damage Display.
- 4 Highlighted/selected weapon.
- 5 Shield and armour levels. Shields can regenerate providing the shield generator has not been damaged.

- 6 Radar: A Front B Left of you C Right of you D Behind
- 7 Settings and speed.
- 8 Target locking. Hook your missiles onto an enemy ship.
- 9 Fuel levels.
- 10 Auto pilot engage.
- 11 Targeted enemy vessel and info.

VERDICT

On PC, *Wing Commander* received the kind of attention Star Wing is attracting now. On the right still frame and it looks awesome, however, when playing it's a different story. All your time is spent chasing small ships in the distance and then hammering off shots before they scream past your sights. There are tons of controls to watch out for too — great if the main ones were assigned to the pad's six buttons, but they're not, and you're left floundering with a series of complicated ballroom steps in the heat of combat. With a redefinable pad it could have been so different.

STEVE KEEN

FIGHT THE FIGHT

The alliance has four attack craft to choose from, the Kilrathi have the same. You can recognise them by sight — but your on-board computer should give you plenty of warning.

TERRAN FIGHTERS

HORNET:
Slimline, light, excellent for tight manoeuvres and turns.

SCIMITAR:
A medium-range, average-speed, all-round-combat vessel.

RAPTOR:
Heavily-armed and slightly-sluggish fighter.

RAPIERE:
An extremely fast and easily-killed-out, attack ship.

MISSILE ALERT!

The different star federations have more weapons stocked up in their back yard than Saddam 'Sad Man' Hussein! Here's a few to watch out for, especially if they're locked onto your butt!

DUMB-FIRE MISSILES: Keep right until the end, you have to get in close

KILRATHI FIGHTERS

SALTHI:
Small, Nippy, but not very well-armed.

KRANT:
Built for dog-fighting, an awesome adversary.

DRALTHI:
Great manoeuvrability makes this boy tough to hit and very dangerous.

GRATHA:
A long-range, heavily-armoured battle ship. Easily outrun.

View your needs

We are gathered here to pay tribute to one of our own, 270 LT, CUG.

Try telling us death has no sting.

For now you're on autopilot, but soon there'll be no turning back!

Fly training mission

What a motley crew of misfits

to stand any chance of a hit.
HEAT SEEKER: Locks onto ship's rear engines. However, if your enemy shakes the rocket it will re-lock on the nearest hot spot — and that includes you! GUMPH!
IMAGE RECOGNITION MISSILE: Keep your target in view for several seconds before release. The missile then memorises the type of ship and will chase it until it hits its target or runs out of fuel.
FRIEND OR FOE: The most intelligent rocket of the lot. It identifies a signal broadcast by all Terran ships and wipes out the nearest vessel that isn't broadcasting!

GET WITH THE PROGRAM!

If you want a quick, practise blast, simply strap yourself into the simulation cockpit in the officers club. However, to really get into the game you'll have to enter the mission mode. Every battle is preceded by a briefing where you'll find out where you've got to go, what you've got to do and who yah gonna kill! The five types of flight missions include guarding a base or hyper space jump point, protect cargo and civilian vessels, seek out enemy squadrons and engage and strike at enemy bases in hit and run operations. Here your Wingman, Spirit, really comes into play as she has to hold off the Kilrathi fighters whilst you aim and release the bigger missiles at the base targets.

VERDICT

As much as I hated *Wing Commander* on the PC, I can't deny that it makes a damn fine console game. It looks good, sounds good and is the sort of game that the SNES has been screaming out for ages! Okay, so it's not a patch on the all-conquering Starwing (but then again, what is?), but it's much better than the tragic *Warp speed* and shows that the SNES can do impressive-looking 3D even without the aid of a special chip! I'm not sure how long it'll hold its appeal, but you're guaranteed plenty of fun for as long as it does.

GARY WHITTA

SUPER NES

PROS:

Great detail on the fighters. Fast-paced music. Good intro screens and a large variety of ships and weapons.

CONS:

Hard to access the controls. Too many button combinations for the simplest of things.

GRAPHICS

Brilliant bitmapped detail on the ships and excellent explosions.

83

SOUND

Nice use of music that reacts to gameplay.

79

GAMEPLAY

Limited, due to the awkwardness of controls.

77

VALUE

Won't last forever. One for rainy days only.

OUT on import. Thanks to Console Plus (0532 500445) for the cartridge.

Our man Wayne clouds the clown while the drab bird looks on.

Surprise! Surprise!

BATMAN RETURNS

BATTY BEATING!

When it comes to keeping the peace in Gotham City, no-one does it better than Batman! Since his parents were wiped out by hoodlums as a child, Bruce Wayne has devoted his life to sorting out the scum of the city. He's a dab hand at smacking baddies about; with a variety of punches and kicks, Batman makes short work of the enemies that pour onto each level. Walk up to a nasty and you'll grab hold of him - now, you can choose to either punch or kick him, hurl him onto the ground or against a wall or, if you can manage, to also grab hold of another baddy at the same time, you can smack their heads together for mega-damage infliction!

BOOM BANG-A-BANG

If you want to get ahead, get a test-tube! Because Bruce Wayne is mega-rich and also rather clever, he's managed to come up with this natty mixture which, when hurled to the ground, explodes! This is the best fashion accessory any nocturnal sub six-foot superhero should have to ward off any night prowlers. At the start of the game, three test-tubes full of this explosive material are in your possession, and more can be found throughout the levels by turning over litter bins and the like.

BAT ICONS

-  **TEST TUBES** Receive an extra test-tube full of explosive liquid!
-  **WHITE LOGO** Get your hands on one hundred lovely points.
-  **RED LOGO** Get awarded with one thousand points!
-  **SMALL HEART** Increases the power in your energy bar by a small amount.
-  **BIG HEART** Refills your energy bar right up to the top!

By day, he's mild-mannered millionaire, Bruce Wayne. He leads a quiet life, drinking champers and generally having a good time. Then night falls and, while most would be tucked up with a steaming cup of Horlicks, our Brucey's down in his underground cave, slipping into his natty winged costume and getting ready to deal out death and destruction to Gotham City's foes as the infamous Batman! In this, the game of the sequel to the original blockbusting movie starring Michael Keaton as the Caped Crusader, Catwoman and The Penguin have come to town, and it's up to Batman to get rid of them, using any means at his disposal - usually a good fist in the mouth. Eeeh, it's a bat's life.

VERDICT

Batman Returns looks the bizz. Sprites are very good, especially the Batman and Catwoman characters, and music is suitably dark and moody. When you start to play, you realise that Batman Returns is undeniably modelled on the Final Fight genre; in fact, this isn't a kick in the pods away from Konami's own Turtles conversion on SNES! There's nothing new here and the fairly monotonous gameplay is fine for only a short time. It's too easy, as well. Not a total loss, but there are better examples of this type of game.

PAUL RAND

VERDICT

This isn't the platform game that most previous conversions of this movie have been. Konami has come up with what could have been a really frantic beat 'em up - unfortunately, it's just too easy! Yes, that old problem rears its all-too familiar ugly head again. On normal setting you can expect to finish *Batman Returns* inside of a day - and for £60 that's really not what you want. The higher setting provides a little more challenge - a couple of days more, anyway. Another potentially brilliant game wrecked by a lack of playtesting.

PAUL ANGLIN

THE APPLIANCE OF SCIENCE

Batman isn't like your ordinary superhero. As a matter of fact, he isn't a superhero at all. He has no special powers as such; his abilities come from scientific research, rather than other planets or radioactive creepy-crawlies. While Batman's suit has wings attached, he can't fly - they do, however, allow him to sail through the air for a short time and land on enemies' heads. He also has his handy Batarang which, if you can't guess, is a kind of boomerang shaped like a bat, which our hero uses to toss at opponents. And, if he's in a sticky situation and needs to high-tail it quickly, Batman can always rely on his Bat Rope - simply attach it to a building and swing away from danger!

SEND IN THE CLOWNS

Those of you who have seen the *Batman Returns* film may well recognise some of the baddies from there in this game. There are fat clowns, thin clowns, blokes on stilts hurling flaming torches at you, and skull-headed madmen on motorbikes who attempt to knock you over. As well as these, there's also a load of end-level nasties to contend with, including a rock-hard geezer who smacks seven shades out of you if your timing isn't spot-on. Even the wily Catwoman, complete with rather nasty whip, is there to make Batman feel as though he's on a sticky wicket! It's not all left-to-right beat 'em up action, either; make it through to level five and you're given the chance to drive the Batmobile in a second-person perspective 3D thrash through Gotham, taking out biling bower-boys as you rip up the roads!

Oyoh! Sad Batman gets chinned off a lass.

Here's what happens when you hurt test-tubes filled with inflammable material around!

The Bat Rope in action.

Kick-tastic action with Batman and a cunningly dressed clown!

ON THE OTHER HAND

63

ISSUE 130 SEPT '92

TURTLES IN TIME: £39.99

Teenage Mutant Hero Turtles IV - Turtles in Time is in a similar vein to *Batman Returns*, in as much as it's left-to-right scrolling beat 'em up jollies. Actually, it's not very jolly because the game is just far too easy to complete.

SUPER NES

PROS:

Graphically and sonically impressive, and an easy game to get into with lots of different attacking moves to try out.

CONS:

You've seen it all before, not least in Konami's own Teenage Mutant Ninja Turtles!

GRAPHICS

Well-drawn sprites and moody backdrops.

85

SOUND

Atmospheric tunes that sound like the original movie tracks.

83

GAMEPLAY

Gets dull and monotonous after a short time.

69

VALUE

Far, far too expensive for what you get.

BATTLETOADS

A HIT ON JUST ABOUT EVERY OTHER FORMAT,

THE TURTLE-BASHERS ARE AT LAST ON MEGADRIVE!

Phew, Battletoads, eh? Originally dreamed up to jump on the Teenage Mutant Ninja Turtles bandwagon when the Heroes in a Half Shell were at their peak, the trio of lean, green intergalactic warriors Zitz, Rash and Pimple have proved to be even more successful! They've certainly got more staying power, having been converted to just about every format imaginable since their debut on the NES, and now they're settling down nicely on the Megadrive. The story and gameplay remain the same - evil Dark Queen has swiped the lovely (and quite fit) Princess Angelica and Pimple, the chief Battletoad (and one of the other two, providing you've got a pal to take up the controls) must get her back.

Battling the baddies is a damned sight easier if you smack 'em with an Iron bar!

TOADS IN THE HOLE

The toads' quest is split into several sub-games. The action starts on the surface of the Dark Queen's planet, with a Golden Axe-style beat 'em-up against Queenie's minions. Get through that and it's onto a vertically-scrolling battle as Pimple absconds down to the centre of the planet, followed by more left-to-right beat 'em-up action and then a high-speed obstacle course raced across on turbo-powered jetbikes. From then on things get tougher still, with a maze-like platform-style stage to negotiate and yet more racing, this time on space-age skateboards.

Don't let the crows bite through your rope!

Stick the boot in on that rat thing!

TWO CAN PLAY AT THAT GAME

As you'd expect, Battletoads is a game best enjoyed in simultaneous two-player mode, so drag a mate round to your place to squeeze the most fun out of it. Even if you're playing on your jack though, you're guaranteed a good time thanks to the game's offbeat sense of humour - look out for the giant Doc Marten boots the toads magically grow when they kick their enemies off screen!

VERDICT

I've got three words for anybody who doesn't like Battletoads - *You Sad Man*. I think the Battletoads are tops, and not without good reason. This version is slightly easier than the NES original and, though the graphics aren't that stunning, there's enough gameplay to keep you happy until the cows come home! It's the clever mix of different styles (platform, beat 'em up and racing) coupled with a great sense of humour that make Megadrive Battletoads a winner, so why not hop along to your local games shop and get it? I am!

GARY WHITTA

Pimple takes on the boxing sewer rats.

MEGADRIVE

PROS:
It's funny, it's fun to play and it goes on for ages!

CONS:
There's lots of it, but it's all a little too easy.

GRAPHICS

Not bad, but not exactly eye-bogglingly good, either.

79

SOUND

Entertaining in-game FX and some top tunes to boot.

82

GAMEPLAY

Good variety of styles, and not a dull level among them.

88

VALUE

Not bad, but a top boy might click this in a couple of weeks.

OUT: Now. Contact Team 17 on 0924 291867

BODY BLOWS

THIS IS A GAME THAT KICKS ASS OUT OF THE REST. . .

Street Fighter II conquers the beat'em-up world - on Super NES at least. On the Amiga the battle still rages to decide who's the roughest, toughest fightin'n'fumpin' game of them all. As CVG proclaimed two months ago, the Amiga version of SFII leaves lots to be desired but arcade kings Team 17 are hoping to fulfil them with this. With Alien Breed, Project-X and Assassin behind them, they're now out to topple Chun-Li, Ryu and chums from the top of the beat'em-up pile with this unashamed copy which sees Ten of the world's toughest fighters clash in a bid to emerge as the World's Hardest Man.

MARIA (SPAIN)

Body Blows' only female character, this Spanish onion (eh? - Ed) is not to be taken lightly, although, she may seem harmless to start with. Fast as lightning, she's weak and finished off easily but first you have to find an opening...SHE'S A BIT LIKE: CHUN-LI

LORAY (THAILAND)

Another martial arts expert whose knowledge and training is shrouded in mystery, Loray's skills are a force to be reckoned with. His special moves are very mystifying... HE'S A BIT LIKE: DHALSIM (again)

VERDICT

There's really nothing for me that'll beat Streetfighter II on the SNES but if you've got an Amiga then this is the beat 'em up to beat. It's fast and the graphics are bright and colourful but, as with any fighting game, the real proof of the pudding is in the beating. And the control method used is just so sweet as to be the icing on the cake for anyone who likes to have a bash at something new. With easy to learn controls, the game is more one of fast reactions than trying to remember all the various moves. A triumph for Amigas!

GARTH SUMPTER

THE CONTESTANTS

Choose which one you want to be — and then take on the rest! Say, don't some of these look a little familiar...?

DAN (USA)

One of the good characters, he's an ex-gang leader with karate skills to put most black belts to shame. Look out for his electrifying special moves.

HE'S A BIT LIKE: RYU

KOSSAK (RUSSIA)

A Russian powerhouse of incredible strength, he was created by genetic experiments. He's slow, but his great power can shake the entire screen.

HE'S A BIT LIKE: ZANGEIF

JUNIOR (UK)

An ex-boxing champion, Junior now prefers to forget about any tefloned rules and beat someone to a bloody pulp on the illegal fighting circuit. Punching power is, of course, well impressive - look out for his Special Blows!

HE'S A BIT LIKE: GUILT

NIK (USA)

The brother of Dan, Nik has exactly the same fighting style and special attacks as his twin.

HE'S A BIT LIKE: KEN

MIKE (USA)

At the end of the day, this company MD gets rid of the stress by being extremely violent. He is fairly strong in all areas but is easy meat for some of the tougher characters - until they see his Whirlwind move!

HE'S A BIT LIKE: Erm...

NINJA (JAPAN)

Mysterious and utterly inscrutable, Ninja comes armed with a razor-edged sword used with incredible speed and accuracy. Beware - he can turn himself invisible at will!

A BIT LIKE: DHALSIM!

YIT-U (CHINA)

His Super Fast Punch is so quick he blurs during use. Lightning reflexes are needed to keep up with him, but if he lets his guard down, a few good moves will easily defeat him.

A BIT LIKE: BLANKA (Aka the fast attack)

DUG (USA)

The fattest fighter in the game, Dug was chucked out of the pro wrestling circuit for being too violent. His moves are very powerful, but his great weight slows him down, particularly in the air.

HE'S A BIT LIKE: E-HONDA/BLANKA

"24th floor, gentleman's fashions, sports goods..."

Brothers are always fighting...

Speed versus shadow - only one can win.

VERDICT

You've never seen a beat 'em-up done quite as well as this! Team 17 has shown what the Amiga is truly capable of, with a game that could hold its own against the Super NES version of SFII! Faster, harder and more entertaining than any other fighting game on the Amiga (save maybe IK+), Body Blows is about as good as it's ever going to get - and then some! With so many fighters, options and, above all, a superb and easy-to-learn control mode, Body Blows is an absolute must for any Amiga-owning fighting fans!

GARY WHITTA

NICE TO MEET YOU!

Remember how in Street Fighter II, you could fight two versions of the same character against each other if you knew the correct cheat mode? Well, Body Blows lets you do the same thing, except you don't need a cheat! Simply select the same character twice when setting up the next match and away you go! Unfortunately, it can be difficult telling the two fighters apart in matches like these. If you want to match two equally-skilled fighters without the confusion, select Dan and Nik, who are identical in all but appearance.

Dan's secret move is a devastating electrical bolt

AND NOW THE BORING BIT

Don't fear, Amiga-fans - you needn't worry about a disk-swapping nightmare! Body Blows comes on only three disks and boring swapping is kept to a minimum, with changes only normally required if you want to load in a new fighter or location. Other impressive bits include super-smooth animation on the fighters (much smoother than Amiga SFII) and a playing area that scrolls not just left and right, but also up and down to follow the player when he leaps in the air for a flying attack! It's an excellent achievement, considering the amount of top graphics and sampled speech (which, by the way, is excellent) that have been squashed into those three little blue disks. So let's here it for the Team 17 Top Boys! Hip hip hooray! The only question now is, can they get any better with their next two offerings, the platform extravaganza Superfrog and racing epic Overdrive? Find out next month...

Yit-u's speed is too much even for a Ninja.

CHOOSE AND PERISH

Each fighter has their own fighting style (over 20 moves each) and an armoury of special attacks. All moves are easy to master and are skillfully squeezed onto a one-button joystick. Adding to the action is the choice to fight in various locations; a big-city office block, a shaolin temple, on top of a construction site crane and a Russian laboratory. If you think that this is starting to sound almost impossibly like Street Fighter II, then you're not wrong.

Dug's power punch gets the better of Nik.

Watch out for Dug's awesome bellyflop!

The scene's set for the Nik vs Dug match-up.

ON THE OTHER HAND

STREET FIGHTER II

US Gold's Amiga version fails sadly to measure up to the standards set by the coin-op/SNES versions. Amiga SFII is no tragedy, but in the face of competition such as this, you'd be a few jam battles short of a picnic not to prefer Body Blows.

70

REVIEWED: CVG No 136

AMIGA

PROS:

Super-fast fighting action that looks good, feels good and makes you sweat!

CONS:

Could unleash your violent tendencies and wind you up in borstal. Otherwise fine.

GRAPHICS

Lovely sprites, fluid animation and varied backdrops add up to a visual feast.

89

SOUND

You can't go wrong with this many top tunes and sampled FX.

90

GAMEPLAY

What can we say? It's one of the most playable beat 'em-ups on any machine!

92

VALUE

If you've got a pal to play with, the two-player game could last forever!

90

90

Disk supplied by ACE Consoles (071 439 1185)

TWO FOR THE PRICE OF ONE

Jadoh is one of the most powerful super-villains of all time. So it's fair to assume that he's got some of the toughest bodyguards this side of Detroit! Luckily for Tony he's not alone, and his pal, Hawk, has decided to join the fight with him. Tony, and his buddy have very different builds and fighting styles. Tony's skills come solely from his incredible speed and agility, whereas Hawk is more of a human power house! Hawk Prefers to slam his opponents into the pavement, rather than simply peppering them with light jabs. Both fighters have their strengths and weaknesses and it's up to you which one to choose for the adventure ahead!

(Top) Great flying elbow from Hawk.
(Right) Pretty Boy? More like Fat boy!
(Above) Mr Lee goes down but Miss Chan is still standing.

CREST OF WOLF

WELL, THE SOUND IS CERTAINLY SOME OF THE BEST WE'VE EVER HEARD. . .

Bloody typical! You finally manage to blag a day off, after weeks of hard slog, and what should happen? Your woman decides to spend the day holed up in some madman's hideout. This guy's fair is more heavily guarded than Prince's wardrobe, with some of the toughest boys in the business standing guard. There's no time to relax with your feet up! The lads jolly trip out will have to wait! You've got to go and risk life and limb to save the dizzy old bird! Women eh? Mind you, she's not ugly!

Look at the height on that.

WHO'S BAD?

The mighty Jadoh Boss will do everything to protect his empire. The fat git has left a nice end-of-level baddy in each sector for you, so even when you've kicked his evil minions' asses, you're still got the big lads to deal with, and boy, are they big! First of all, you're up against the somersaulting duo of Mr Lee and Miss Chan. Taking their place on the second level is Shauna, a hot girlie clad in tight leather (phwoar). Then things take a turn for the worse. Fuji and Quin both take centre stage in an attempt to block progress to your lovely lady and Jadoh. There you're up to it? That's only one way to find out.

VERDICT

Well this is a new concept, all sound and no gameplay! Crest Of Wolf is let down really badly in every department. The sprites are nice enough, even if they are a blatant rip off of Streets Of Rage 2 — but the lack of different colours used makes a hell of a difference to the look. Everything is viewed in a slightly different shade of red or blue! Unfortunately the gameplay fails no better. Not only is it really easy, but it's really crap too! There're only about three moves so boredom sets in horribly quickly. Good it is NOT!!

PAUL ANCLIN

PC ENGINE

PROS:

Superb music that really kicks some serious ass! Shame about the effects!

CONS:

The lacklustre gameplay has nothing special to offer and is dull, dull, dull!

GRAPHICS

The distinct lack of colour does the graphics no favours at all.

73

SOUND

Excellent. Some of the most wicked, thumping tracks I've ever heard on a console.

95

GAMEPLAY

Only three moves! No difference between the two heroes! Play soon becomes dull.

68

VALUE

It won't take long before you get very very bored with this.

SOUNDS GOOD

Road Avenger has an incredible new feature. This technique is known as Binaural sound. This means that the sound has been recorded using a number of strategically placed microphones. Because the effects have been recorded in sequence, they sound really realistic. If a car screeches past you on the right, sound will come only from the right speaker adding to the quality of the game. It's best appreciated by using a pair of headphones or separate speakers.

ROAD AVENGER

WE THOUGHT THE GRAPHICS WOULD BE GOOD BUT NOT THIS GOOD...

Martin Riggs, Magnum, Poncharella and DI Burnside, they're all a bunch of old women – real crime busters work for STOP (Special Task Operation Police). Cars have become so advanced nowadays, that this special Police department has been set up to deal with high-speed criminals. Unfortunately, car-related crime has moved on a little since the days of driving in bus lanes and parking on the pavement. The car-jackers, as they're known, have taken to running people off the road and wrecking shops, or anything else that stands in the way of their evil, twisted plans. So far, they've evaded capture but the Road Avenger has yet to join the fun!

Another excellent cut scene.

Mayhem as you roar through the city centre.

Now how did he get through that window without breaking it?

May I see your driver's license please?

Damn! Reverse and first gear are so easily mixed up.

VERDICT

Hmm. I'm not entirely sure about this. On the one hand, the gameplay is extremely limited and won't exactly stretch the very sinews of your imagination, but once you get into the later levels, the action can get really frantic – you have to concentrate wholly on what you're doing, and the action can even get quite fun. Despite this occasional smattering of gameplay, there's really not a huge amount in Road Avenger to warrant a £40 price tag, and even less considering you need to buy a Mega CD to play it on!

STEVE KEEN

Do make sure your brakes work first.

VERDICT

Blimey! What excellent Manga-style graphics and animation – shame about the game though! As excellent as Road Avenger is to look at – and listen to – there's just no way I can put my seal of approval to a game that is little more than a car version of Dragon's Lair! The only thing that goes any way to saving the game is the difficulty setting. This actually makes a huge difference when cranked up to hard. Probably not worth the asking price, but definitely worth checking out.

PAUL ANGLIN

You'd better slow down – quick!

See ya, wouldn't like to be ya.

SAD FOLK START HERE

Oh deary me! If you're still struggling on this bit after an hour, then you really are some kind of saddy. Maybe you should just go back to using your Mega CD to play your Bee Gees' albums, you'll probably get more results! But, seriously, if you are stuck on this level, then just sit a little closer to the screen and pay more attention to the icons.

NOW, YOU'RE GETTING BETTER

Nice one, you've made it to the Freeway. Now you're starting to get somewhere with that car. You'd better pay attention though, 'cos this is where things get a little tough. One handy little tip, a turn in one direction is likely to be preceeded by its opposite. Keep your thumb over both buttons, and you'll come more smoothly.

AT LAST, YOU'RE WELL'ARD!

Excellent, you're in the city. There's traffic everywhere here and there's bugger all margin for error. There'll be so much occurring on screen, that to stay alive you'll have to force yourself to ignore the animation and concentrate on watching out for the arrows.

Impressive huh?

R.A. leaves death and carnage behind.

No-one will get out of there alive.

ON THE OTHER HAND

COBRA COMMAND

Cobra Command (aka Thunderstorm FX) is a helicopter death blast that utilises the same graphical features as Road Avenger and so resembles its sequel with similarly uninvolved gameplay. Worth a look if you don't fancy what's on offer here.

Pa! Who needs David Hasselhoff?

Quick, hang a right – that bike's coming straight for you!

Hang on, we reviewed Sewer Shark last issue.

MEGA GRAPHICS

With recent advances in graphics technology, it's familiar these days for any CD game to have a mega-smart intro, and Road Avenger certainly has that. Anyone familiar with the magazine, published by Anime UK (and those of you who aren't; get it sorted now) or anyone interested in Manga art in general, will be more than impressed with this. The intro is a masterpiece of Manga animation on the Mega CD, accompanied by an admittedly sad but nonetheless impressive, thumping track, to give you the feeling that this car means business. If you're not blown away by the intro, then you'll certainly be picking yourself up from the floor when you get further into the game and experience first hand some of the graphical excellence that inhabits the entire game!

MEGA CD

PROS:

Excellent manga-style graphics and cut scenes! Superb sound effects.

CONS:

Very limited gameplay.

GRAPHICS

Some of the best cartoon-style graphics yet seen on any machine.

96
??

SOUND

Binaural sound makes an excellent debut with stunning sound effects.

94
??

GAMEPLAY

Gameplay's not a fair question to ask of this type of game because there isn't any!

49
??

VALUE

Finishing after three hours of solid play really isn't really worth fifty odd quid.

BRAWL BROTHERS

IT'S A CLASSY PRODUCT ALRIGHT — BUT WHAT PRICE QUALITY?

Pull on those studded leather gloves and squeeze into oversized leotards once more. Here's yet another arcade beat 'em up on the SNES. There are big brawls and hard guys-a-plenty in this massive scrapfest, spread over the sprawling ghettos of a giant metropolis. The Brawl Brothers, Hack and Slash, run their own self-defence gym; but the duo aren't as good at looking after their students as they are at duffing up people — three of their best have been kidnapped to be cloned by the psychopathic butcher, Dieter! So don't dawdle; if you want to save the day, get brawling!

Two player frolics abound. Doncha feel sorry for the enemy?

Lord J doesn't need metal shoulder pads; he's a man-made outhouse!

Kazan goes straight to the heart of the problem, ninja-style!

AS HARD AS YOU WANNA BE

One of the best features of Brawl Brothers is being able to make it as easy or as difficult as you like. The option screen allows you to change the number of lives per game, the amount of continues and the real pussies can even control the number of thugs that rush onto the screen at once! Turn the Double Hit switch on and your man can attack or steal from his partner in a two-player game. Another novel feature is Angry Mode. Turn this on before a game and, when your player comes under heavy attack, he'll turn bright red, super strong and, just for a few seconds, invincible.

CHARACTER BUILDING

The first brother is an out-and-out fist fighter. His lightning-fast jabs soften victims up for furious uppercuts and he can even daze opponents with back-breaking throws. Let loose Hack's special move, the Power Punch, and you'll lose sight of his super-fast fist - work in a blaze of blue light!

HACK:

The ninja master is a super athlete who performs acrobatic manoeuvres at the drop of a hat! He's armed with a razor-sharp sword and can call upon the power of the ancients to split his body in two, wiping the screen clean of enemies with the Sonic Slam.

KAZAN

The biggest brawler of the lot. He's got a black belt in karate and specialises in body slams and throws. His special move is the Electric Zap that fries every sucker around!

LORD J

Looks just like M. Bison, but isn't as cool! His special move is the Fire Punch, which lets loose a huge ball of flaming plasma at the enemy.

SLASH

With her incredibly agile moves she's more like a cross between a ballet dancer and an aerobics instructor than a hardened street fighter! However, she's incredible in a grapple! And she can dish out the awesome, flashing Somersault Kick.

WENDY

ROUTE TO SUCCESS

A BAYSIDE

Begin on the streets of the city and trash Dieter's thugs before moving on to Bayside Bridge. Dodge machine gun fire and jump into the storm drains as the bridge collapses.

B JUNGLE

Avoid the land mines by throwing assailants onto them. Fight your way through the undergrowth until you find your way to Dieter's training complex.

C AIR FORTRESS

Clamber aboard Dieter's huge flying battleship, fight your way across the wing to the entry hatch and then do battle with Dieter himself.

D COMMAND CENTRE

Head across the rooftops and jump from building to building. Don't get lost in the maze of elevators and corridors and avoid the electrified floor panels.

Keeping high is one of the best winning tactics.

SOMETHING FOR THE MEEK AND...

Apart from traditional, knuckle-cracking antics, the lads can pick-up a huge variety of weapons thoughtfully scattered around the levels. Sledge hammers, spiked balls, shotguns, knives, rocks, dumbbells and bombs can be snatched up and battered over opponent's skulls or thrown. Even the familiar steel pipe is included for nostalgia's sake! Die-hard combat veterans will need help sooner or later – so you can add to the list, chicken legs, first aid kits, pancakes (!), chocolate, juice and cheese that'll boost varying amounts of energy.

As versatile as a Kenwood mixer!

HEY BUDDY!

If in-game features are what you crave, Brawl Brothers has got 'em. You choose two characters from the five fighting furies at the beginning – one as your main player and another as back-up. The other three are taken by Dieter and cloned. At the end of each stage you'll have to fight one of these mutated versions of your buddy and, if you win, he'll be set free and available for selection later on. If you lose all your lives you get the option to change to the back-up character or to your rescued mates and then continue.

There's always a pile of bodies around Lord J.

It's one thing to go against armed men, but it takes bravery or poor sight to try a helicopter?!

ONE FOR ALL AND ALL FOR ONE

Accessibility is the name of the game. Jaleco's cart lets you play solo, join forces with a friend for simultaneous two player grappling, or even go at it in one-on-one combat with your partner. During the game, you can stick with one character through thick and thin or take turns with all five: the choice is yours! A second human can jump right in on the action at any time by pressing start on the second joystick. You don't have to reset the machine and lose your hard fought for place in the game.

Let loose the POWER!

They were once mates, but now they're victims of the clone war!

VERDICT

How much do looks count? There's no doubt that, in terms of presentation, Brawl Brothers is arcade quality in the presentation stakes. Jaleco's huge, detailed sprites won't disappoint you, especially when they're called into action. Some of the detail is fab, such as the water, which splashes around your heels when you're battling through the sewage-drenched storm drains. However, the fact that you've only got a handful of enemies can prove really limiting. You've got five characters to fight but it's only their single, special move that gives character to each. It's fun to play and smacks of being a quality product; but for around 50 quid you really should be getting a little more gameplay for your money.

STEVE KEEN

BRAWL BROTHERS

BROTHERLEY LOVE

If you've really got your wits about you, you'll be able to pick up the bad guys and throw them onto the landmines — so you don't shread your own tootsies! Or, you can just beat the crap out of the bozos and hope that they fall over backwards onto the bombs. Either way, you'll be saving your own skin.

Jungle warfare in the sweaty swamps.

TOTAL CONTROL

Throw object

Throw object

Walk and dash left or right. Move up and down the screen. Select back up character

Attack, punch, kick, grab, throw, slam, and chop.

Jump

Pose

Special attack

Garth's dream! Wendy comes over all aerial!

Mmm, nice outfit.

VERDICT

There are a lot of things about this game that I really like: the neat animation, the amount of control that you can wield over the gameplay via the options (I like being mad and invincible), the old Batman-like CRASHes and BANG sound bubbles, the fact that you get the chance to take on more than one opponent, plus the absolute must of any beat 'em up game these days, the chance to go up against another human player. This adds tons to the game's appeal. All these neat touches should add up to a humdinger of a game, but it's the few things left out that spoil things. For me, the poor variety of moves available from the numerous combinations of a SNES joypad, take the edge off an otherwise excellent game.

GARTH SUMPTER

SUPER NES

PROS:

Huge, detailed sprites and fab animation. Accessible characters and a gameplay with loads of options and features.

CONS:

Lack of moves and variety of challenging enemies. Not enough levels.

GRAPHICS

Big sprite, great backdrops loadsa detail.

90
2

SOUND

Nothing special just your normal bliff blaff boff!

75
2

GAMEPLAY

Great at first, but very samey after a brief spell.

78

JAKI CRUSH

**LADIES AND GENTLEMEN —
THE FIRST EVER SNES PINBALL GAME!**

Ever since I was a young boy, I've played the silver ball. From Birmingham to Clacton, I think I've seen them all, but you won't see anything like this in arcades or amusement halls — because this latest game from Naxat, ain't got no balls at all! Well, not silver metal ones at least!

BALLS

Use just three balls per game to smash around the table using the smash around the table using the left/right flippers, plus the occasional little nudge to keep the ball in play — just as you would on any normal table. But where video game pinball scores, the Crush series in particular, is by having loads of sprites moving onto the table and pottering around. Hit particular examples to get an increased bonus, a multiplier, a raised ramp, or to help keep the ball in play or start off a multi-ball play.

YOU DEVIL!

Jaki Crush is the company's latest pinball game and is the sequel to the Megadrive Devil Crush, converted from the PC Engine original of just over a year ago. The game keeps most of the tried and tested bits; the screen scrolls to keep track of the ball as it careers around the table, and several bonus levels are there for those who know how to access them.

Bonus screens — varied yet similar.

Mr Peacock bonus stage!

VERDICT

There haven't been that many pinball games over the years and for good reason. Ever since Macadam Bumper hit the shores from France, I've been very wary of them all. Until Devil Crush on PC Engine, that is. Since then, Naxat has converted the original to almost every format! But this latest sequel is the first to make it onto the SNES and is rather uninspired. Bonus screens are accessed in a similar manner and the whole game has the feel of the original game under another name. Whilst fast and nicely animated with legions of monsters trolling around all over the table, the game is just a little dull, and the monotonous music and diabolic theme of the game make this a game that is for pinball wizards only...

GARTH SUMPTER

JUST HOW DO YOU GET IT UP?

It's really easy to get to the top of the table in Jaki Crush and grab the big points. Here's the way to do it...

Get the ball and trap it on this flipper.

Shoot it across to the flipper on the right and trap it there.

Blast the pilgrims that circle the temple out of the way, shoot through the gap and remember to keep the right button pressed to pass the upper flipper.

SUPER NES

PROS:

If you're a SNES-owning pinball fan, this is the only thing in town for you.

CONS:

Even with its large amount of bonus screens, there's a noticeable lack of variety.

GRAPHICS

Sprites are pretty and there are some stunning bonus screens.

80
2

SOUND

The similarity to Devil Crush shows in the old-fashioned music and effects.

63
2

GAMEPLAY

It's simple and straightforward — just like the real thing.

75
2

VALUE

Long term play will only appeal to pinball fans, Elton John or Roger Daltrey.

OUT: This month. Cartridge supplied by Sega on 071 727 8070

You can't get away from me. Your end is near. He ha ha ha

Inane banter to put the WWF to shame from Richard Meyer.

We is doing well, but he can't use that weird Kung-Fu in the next match.

Geese Howard offers his pearls of wisdom after each match.

STREETFIGHTER II FACES STIFF OPPOSITION...

South Town's a nice place to visit, but you wouldn't want to live there. No, forget it — it's not even a nice place to visit. In fact it's the seediest hellhole of corruption, violence and villainy in Videogamesland. And it's all the fault of Geese Howard, the evil king of the city who rules with an iron fist. The cad. One thing Geese didn't count on, though, when he murdered a young martial arts expert all those years ago, was that the fighter's two sons would come back for revenge once they were old enough. That time is now, and with the brothers Terry and Andy Bogard teaming up with fellow chop-socky expert Joe Higashi, they're about to enter South Town's King of Fighters tournament, organised by Geese, to take down the main man. Only the most brutal army of headcases ever assembled stands in their way...

Duck King puts the boot in — it's too late for Terry to block.

FATAL FURY

THREE OF THE BEST

Fatal Fury's trio of revenge-motivated heroes may have squeaky-clean images, but they're as tough as anybody on Geese's side. Terry and Andy are both Karate kings and as such have similar fighting styles, although Terry has moves like the Power Wave, Slam Attack and horrible-sounding Knuckle Burn in his arsenal, while Andy's little tricks include the Dragon Bullet, Shotgun Kick and that old favourite, the Flying Punch. Joe Higashi is a whole different kettle of sushi, having been trained in the little-known art of Mu-e-tai and dispensing special moves like the Slash Kick and Machinegun Punch to anyone who gets too big for their boots. In the two-player game, any character can be pitched against itself, with its "double" set against a different coloured background. That way, both players indulge in contests with equal odds.

It's best not to tackle Richard Meyer in the air, but it hasn't put Terry off.

Is Andy any match for the gigantic Raiden?

The once-aged Tung Fu Rue transforms when the going gets tough.

ON THE OTHER HAND

REVIEWED: CVG No 135

STREETS OF RAGE 1/2

The original and the recent sequel are among the best Sega beat-'em-ups. But neither compare too well to Fatal Fury — they're both fighting games but styles are very different. In two-player mode you beat each other up providing the long-term laffs.

VERDICT

While Megadrive owners have plenty to shout about in the progressive beat-'em-up stakes with the excellent Streets of Rage games, they've always been given a bit of kicking in the one-on-one Streetfighter genre. Fatal Fury goes some way to levelling the score, with fighting action to rival Capcom's classic in many areas (namely speed, impact and variety) and plenty of original fighters and special moves. Those games-bible thumping purists will undoubtedly prefer Streetfighter II, but I'd go for this one if torn between the two — it's the progressive theme, funky music and endless options that makes it for me. Worth giving a try — it should fill the gap nicely before SFII or the much-hyped Mortal Kombat arrives.

GARY WHITTA

NICE PRESENTATION!

Fatal Fury has an advantage over Street Fighter II in its smart presentation. Not only do you get loads of options you can change match rules and joystick controls to your heart's content but it also raises a laugh or three with its unintentionally-funny graphic sequences between matches. After a fight, the winner says something hopelessly sad like, "Now you know why Karate is so frightening!", while in the King of Fighters game, Geese himself pops up, immaculately dressed in his designer business suit, after each player victory to offer some corny comment on your progress.

One of Terry's secret moves — the Shield of Force — hits Raiden with full power.

Over at Geese Howard's house, Duck King is polished off by Tung Fu Rue.

Lanky Richard Meyer uses his 'copter-legs against our Terry.

VERDICT

I've never really been a fan of Fatal Fury, either on Neo Geo or in the arcade. In my eyes it just didn't cut it when it came to gameplay. Although this version stands head and shoulders above the SNES incarnation, I still can't give it any more than a slight pat on the back and a gold star for its efforts. There's just a distinct lack of depth to the gameplay, which, despite the nice graphics and smart sound, just doesn't make it a worthy purchase. Best wait for Streetfighter II really.

PAUL ANCLIN

Joe Higashi shows off his kickboxing skills to Andy Bogard.

1 PAO PAO CAFE

The Pao Pao Cafe is the favourite haunt of Richard Myer, a gigantic karate master who excels in the air with a variety of flying moves, including one where he uses his legs like helicopter rotor blades! This bears no resemblance to Chun-Li's Spinning Bird Kick, of course.

2 THE WEST SUBWAY

Try to catch a train down here and you're bound to bump into Duke King — a punk with baggy MC Hammer-style trousers and a nice line in attacks. He just flies at you like a human cannonball and has a similar effect.

3 SOUND BEACH

Michael Max hangs out around the sand dunes and luscious babes, where a rigorous workout regime has made him one of Fatal Fury's toughest customers. As he's an excellent boxer, all his most dangerous moves are punches.

SOUTH CITY — A NICE PLACE TO LIVE

A lightning tour through some of South City's more interesting locations and the baddies you'll find there...

THE KING OF FIGHTERS II

PAO PAO CAFE

4 DREAM

AMUSEMENT PARK

Home of Raiden, an absolutely HUGE fairground attraction — you've got to be perfect to beat him! Gadiir? Seriously though, folks, watch out for his mysterious Killer Fog.

5 HOWARD ARENA

In this deserted stadium resides Tung Fu Rue, a dodderly old king fu crumbly who's got more than a few tricks up his sleeve — as soon as he takes a few knees, he transforms into a musclebound hulk with incredible strength and meanness to boot!

MEGADRIVE

PROS:

Special moves and a funky soundtrack make a potential Streetfighter-beater on Sega.

CONS:

Too easy for hardened beat-'em-up vets, thus short-term appeal. Japanese text.

GRAPHICS

Well-defined, animated and varied sprites, but garish colour schemes are off-putting.

83
72

SOUND

Thumping good soundtrack throughout, and the odd bit of speech.

80
72

GAMEPLAY

Who could ask for more? High-impact 'fumpin' action at its best.

83
72

VALUE

One-player mode won't last long, but it's tops if you've got a pal.

88

OUT May: Thanks to Console Plus (0532 500445) for the review cartridge.

The deathride of doom.

Is that one of the Ghostbusters, or what?

NIGHT TRAP

Full-motion, interactive video has been the aim of each and every producer of CD ROM games, but no-one has managed to get even close to it yet. *Night Trap* is the latest, and quite possibly the greatest, effort. You're cast as

a member of the SCAT (Sega Control Attack Team) force. There is a house full of people — mainly smart girls — who are being attacked by vampire-type beings, known only as Orgues. Your mission is to protect them at all costs. Your undercover agent in the house goes by the name of Kelli Medd — although it's really Kimberly from *Different Strokes* — and she'll be trying to keep you up-to-date with all the latest goings on in the house. There are eight different surveillance cameras dotted around the house, to help you keep a watchful eye. Don't screw up, or all those top girls will be gone forever. . .

SURVEILLANCE SET-UP

- 1) CURRENT VIEW SCREEN: Where all the action takes place.
- 2) ACCESS CODE: It operates the traps. Incorrect code? Then the traps are inoperable, matey!
- 3) TRAP SENSOR: Shows activity in the room. When the sensor hits red you can trap the Vampire.
- 4) HIDDEN CAMERA VIEWS: There are the eight different camera views inside the house.
- 5) CURRENT ROOM VIEW: Shows which room you are currently in.
- 6) COUNTERS: The counters show you how many Orgues have entered the house and how many have been captured.
- 7) SURVEILLANCE TIME: This shows you how much of the mission time has elapsed.

CATCH ME IF YOU CAN

The Vampires are a difficult bunch to catch. Not only do you have to nab them in the right place, but you also have to find them at the right time — and only spring the Vampire trap when the sensor hits the red mark. On entering a room your sensor will flash, indicating activity in the room — however, not all activity indicates the presence of Orgues, a little bit of activity doesn't necessarily mean that there's an Orgue around: people also set the sensor going crazy — so you have to watch what's going on. The sensor will only stay in the red for a couple of seconds, and if you miss your chance you won't be able to trap the Vampire — but will have to try and locate him in a different room and catch him there.

WATCH IT, GIRLS!

1 The Orgues enter the house.

2 The women leg it upstairs.

3 The bedroom girls, quick!

4 "Coming; ready or not!"

5 Trap these two.

6 The girties re-group.

7 The Orgues are back.

8 The lav is a good hiding place...

9 ...But there's more downstairs.

THAT'LL DO NICELY

The trapping devices are very complex. So nobody else can gain control of the system, the house-owners, the Martin family, have set a series of special access codes, which must be used to facilitate the use of the traps. Each code is represented by a colour which always starts off as blue, and changes at set times and specified locations. Use the wrong code and traps are inoperable. All of the motion video takes place in real time, meaning that the action occurs whether or not you're at an actual spot. If you don't know when and where the code changes, you could end up in some serious trouble!

VERDICT

The main selling point of *Night Trap* is obviously the huge amount of full-motion video included [Sega claim it's over an hour-and-a-half, but we've yet to see]. But the obvious worry is whether or not there will be any gameplay in there. Is there? Hard to say really. I mean, *Night Trap* is definitely a good laugh; there's always something going on in the house, and it's all good fun to watch - there's even a supposed girtie in the shower scene included but we've yet to find out just where it is. But, to be honest, there really isn't a massive amount of game here. It's just a case of writing down the times and places and going through them, which really isn't much fun. Consider thoroughly before you part with forty odd quid.

PAUL ANGLIN

Listen closely - I will say this only once...

YOO HOO! I'LL MAKE YOU FAMOUS

No expense has been spared getting the feel of motion video. Instead of chucking anyone in the game, Sega has got a load of dead famous people and given them starring roles - well one of them anyway! The only fact that you'll recognise instantly in *Night Trap* is that of Dana Plato of *Different Strokes* fame! You know, the one that plays - or rather DID play - Kimberly. The others seem to be unknowns from the world of acting, but there are one or two faces in there that I'm sure I've seen before. The only thing that isn't quite up to scratch are the Vampires themselves - they have to be THE cheapest monsters in Cinematic history. They're just people in black suits wobbling around a lot: what a laugh!

The only fact that you'll recognise instantly in *Night Trap* is that of Dana Plato of *Different Strokes* fame! You know, the one that plays - or rather DID play - Kimberly. The others seem to be unknowns from the world of acting, but there are one or two faces in there that I'm sure I've seen before. The only thing that isn't quite up to scratch are the Vampires themselves - they have to be THE cheapest monsters in Cinematic history. They're just people in black suits wobbling around a lot: what a laugh!

There's nothing like sharing a shower.

Things have taken a turn for the worse.

The sensor's not high enough yet, just wait...

VERDICT

Nighttrap opens the doors for the future when instead of having film licenses and writing a game that just uses the name, you'll actually have the film on your console for you to control the actions of the characters!! Unfortunately, what you see here is the first attempt and whilst it's no Spielberg epic, it is entertaining in parts with more than a little humour used for some of the more bizarre traps. But at the end of the day, this type of film action game reminds me of *Space Ace* and *Dragon's Lair*. Both of them had trouser-moistening graphics of incredible quality, but the gameplay was just a question of hitting the button at the right time. The Mega CD has extended this limitation, but as yet, not quite far enough.

GARTH SUMPTER

MEGA CD

PROS:

The full motion video footage is totally absorbing. A really novel idea that's quite fun.

CONS:

No real depth of gameplay. No password system to let you continue from the second disc.

GRAPHICS

Pretty smart video footage, but looks very pixellated in places.

86
72

SOUND

Some good little incidental tunes let down by rather crackly sounds.

79
72

GAMEPLAY

OK. There's very little to actually do, but it's all good fun.

63
72

VALUE

Provided you don't get bored, it's going to be a while before you finish this.

72

71

OUT Now. Thanks to Data East for the cartridge.

STREETFIGHTER II?

Fed up with people asking you what the controls are? Now you don't have to! Captain America And The Avengers features a training mode, in which you are pitted against one of your fellow Avengers in a one-on-one battle, Streetfighter II style. As well as being a damned good laugh, this means that you get the chance to hone your skills before mixing it with the real tough lads.

CAPTAIN AMERICA AND THE AVENGERS

THERE'S THE GOOD NEWS AND THERE'S THE BAD NEWS. . .

Okay, I have some news for you, good and bad. The bad news is that the notorious super-villain, Red Skull, has stolen the most powerful, mind-controlling device ever designed. The good news is that Captain America is on the case! With this powerful and mysterious weapon, Red Skull's plans to control the world may come to fruition. Captain America and his band of Avengers have been called upon to dispatch the evil minions of Red Skull and restore peace to the planet, in the name of truth, justice and...whatever the other one is.

VERDICT

What a pile of old cack. Captain America And The Avengers must be the worst Megadrive cart it's been my misfortune to play since the abomination that was Dark Castle - and that's saying something! The Master System-quality sprites have a tendency to wobble and jerk around the screen in a sad, non-animated way, and as for the sound, it grates forth like something emitting from sad Rand's Walkman! About the only plus point of Captain America And The Avengers is the free pin badge you get in the box; mind you, that's crap as well!

PAUL ANGLIN

HURRAH! EQUAL WEALTH FOR ALL

Captain America originally hit the comic book scene in the early 1950s, and was created to be the American mascot for anti-Communism. Everybody has their fave Communists; here's ours: Randy. Fidel Castro's top boy 'cos he gets all the best cigars for nowt - what a spawny get!
Gary: My fave is Pol Pot, 'cos he has a name with the word Pot in it.
Garth: Che Guevara gets my vote because he is really my dad.
Paul: Jimmy Sommerville is the greatest! Oh sorry, I thought you wanted my favourite Communist!
Jon: Karl Marx is my fave, 'cos he lives down the road to me, albeit in a wooden box underground!
Steve: I think Gorbys's a big hit with the women. He must be a real boy 'cos he has a massive great love bite on his head!

Hurrah! Space pod meets space scooter.

MEGADRIVE

PROS:

You could always use the box to prop up your wonky table

CONS:

Everything about this game is completely sad.

GRAPHICS

Badly drawn sprites hover around the screen.

39
2

SOUND

Terrible music, backed up by tragic spot effects.

41
2

GAMEPLAY

There's a fiver to anyone who finds any gameplay whatsoever.

30
2

VALUE

Crap and boring, with nothing to drag it from the bottom of the barrel.

29

DESERT STRIKE

You'd better get out of there - fast!

SUPER-SLICK AND ADDICTIVE — THE GULF WAR BREAKS OUT ONTO THE AMIGA. . . .

There's nothing like a war to get software programmers slaving over their special programming machines day and night. And that rather brief episode of slaughter in the Middle East certainly gave EA a solid platform for one of their best shooters yet.

Some Middle East dictator has taken over a large section of the desert and begun to develop all sorts of things, ranging from SCUD missile launchers to chemical weapons factories. Not only that, he has also gone and taken hostage a load of your pals from the Air Force and is using them as a human shield. You've had enough; the time has come to kick his ass. And you're so hard, you're gonna do it all on your own!

NOW PAY ATTENTION...

Seeing as the desert is such a big place and it's all covered in sand, it can be difficult to tell one part of it from another, so you'll need to use your map to find your way around. Your helicopter is displayed as a red cross on the map, and everything else shows up as well. All the different Campaign objectives are displayed on the map in the order you must complete them. Also on the map are the pick-ups you need for the mission, such as fuel and ammunition. Pick-ups will only show on the map if they are visible, so if something is hidden in a building it won't be displayed. It'll take five full campaigns to win the war; you start by simply knocking out the communication dishes so you can safely locate the secret agent, who's so secret that no-one knows where he is! Time is running out - get to it!

Get the drift?

The madman plots his his mischief.

VERDICT

Amiga owners have definitely got something to scream about this month - the graphics on their version of Desert Strike are better than those on the SNES or Megadrive! Sadly though, this hasn't been achieved without some compromise. The main problem with Desert Strike is that the game just does not move fast enough for my liking. The whole essence of the game is controlling a super-slick, ultra-quick, death-dealin' chopper, and a lot of the exhilarating feeling is lost when the controls become sluggish. Cycling through the weapons can also get a bit frantic. Although, having said all that, Desert Strike is still worth looking at if you're a fan of the Megadrive version. Just don't expect it to be particularly nippy!

PAUL ANGLIN

MAPPING IT OUT

- 1** Counters: Keep track of everything from fuel level to how many MIAs you are carrying.
- 2** Status: Shows how far through your current campaign you are.
- 3** Mission: This shows all the objectives which you are required to meet in your current campaign.
- 4** This shows what you're currently viewing on the map screen.
- 5** This is your Frigate. You may only return here once you have completed your mission.

LITTER LOUYS

Litter is getting ridiculous these days. I mean, dropping the odd sweet wrapper when you're in town is one thing, but lobbing ammunition crates and fuel drums around the desert is another thing entirely. But, as they say, "one man's loss is another's gain," and that's certainly the case in Desert Strike. The ammunition crates and fuel drums strewn around the landscape are priceless to your progress. When you get into the later levels, you will notice that pick-ups do not appear on the map. On these levels it's worth flying around, blowing up all the buildings so as to uncover as many items as possible for later use.

We have lift-off.

Quick, hit the pipeline to stop the oil spill.

Great mushroom clouds!

VERDICT

The Megadrive version of Desert Strike was an excellent product and so well received by reviewers and punters alike that it quickly became a hit. The Amiga version of this ace Gulf War blaster is now here and strike me with a Hellfire missile if isn't stacked to the rator blades with the same great detail and graphics! It's all there and amazingly contained on just three disks but the price of this excellence is that it needs a full 1Mb to run, so grab that upgrade now! Unfortunately, the amount of detail that's been squeezed in has had a bit of rearguard action on the speed of the game, but thankfully playability isn't affected. Amiga Desert Strike is a must if you don't own the Sega machine.

GARTH SUMPTER

AMIGA

PROS:

Excellent graphics and incredibly involving and addictive gameplay.

CONS:

The chopper doesn't shift around the screen quite as quickly as it should do.

GRAPHICS

Brilliantly drawn, clear sprites with some excellent detail.

91
22

SOUND

Some pretty impressive tunes and some great spot effects.

89
22

GAMEPLAY

Involving and addictive gameplay, marred by a sluggish control method.

83
22

VALUE

Weeks of blasting ahead of you and plenty more even after completion.

OUT: April. Review cart supplied by US Gold 021 625 3388.

S-foils open, ready for a good scrap.

X-WING

THIS GAME IS THE CLOSEST THING YOU'LL EVER GET TO A REAL STAR WARS DOG FIGHT

Led by the utterly evil Emperor Palpatine and his right-hand man, ex-Jedi Knight turned traitor, Lord Darth Vader, the Empire controls most of space. All that stands between Palpatine and total domination of the star systems is the Rebellion, a ramshackle band of heroes, intent on bringing the Emperor's vicious reign to an end. Scattered

throughout the galaxy, the Rebels have lost more battles than they have won, but now the tide is slowly beginning to turn. The Rebels' numbers are increasing day by day, and their starfighter technology has reached new levels of sophistication. Now is the time for them to go on the offensive.

Just one of the many bitmapped animation sequences.

THE PERFECT VIEW

Like all modern flight simulators, X-Wing doesn't confine you to the inside of your craft; hitting F3 on your keyboard gives you an outside-the-cockpit view, and pressing any of the buttons on the numeric keypad alters the angle from which you look at the ship. Most of the time you'll not want to

use this feature – you'll find yourself too busy attempting to stave off the attacks of TIE-Fighters, Imperial Star Destroyers and the like – but press 'C' during the game and you'll activate the in-flight camera, which not only records everything in real-time, but also lets you watch the action from any of the spacecraft involved in that mission, from any angle that you choose!

The medical ship escorted by an X-Wing.

IT'S A-MAZE-ING!

Too many potentially good star-pilots have become yet another statistic, simply because they were too eager to get out there and do their bit for the Rebellion without first getting to know how their ship works. That's why Rebel Command constructed 'The Maze'.

In this simple training exercise, the player must guide his fighter around a spiralling maze, flying through the specially constructed gates. There's a time limit in operation, and to complete the training exercise all the gates have to have been negotiated before the seconds run out. Not only that, but there are also small detonation devices located close to some of the gates – shoot at these to improve your aim. At the end of the day, you'd be wise to complete The Maze; if you don't, you could find yourself just another sitting target.

One more blast and that TIE Bomber is history.

VERDICT

I was expecting X-Wing to fall short of the hype and, for a while, I thought I'd been proved right – it seemed too easy and devoid of enemies. Then I stumbled across the option that allowed me to change my Tour Of Duty and found the screen jam-packed with baddies! X-Wing is easy to learn yet unbelievably hard to master. It looks and sounds great, too; even better when you run it on a more powerful PC. X-Wing does slow down a little on a bog-standard 386, but that's forgivable because the game itself is a dream!

PAUL RAND

ON A WING AND A PRAYER

Rebel forces have three types of starfighter at their disposal, each designed to perform a different function.

X-WING

Created by Incom, the design team which defected to the Rebels from the Imperium, the X-Wing has become the most widely used craft in the field. An excellent all-rounder, the X-Wing combines superior targeting systems with powerful weaponry and hyperspace capability.

Y-WING

This long-range fighter-bomber is normally seen travelling alongside X-Wings on a mission, more so than ever now that the Imperium has perfected its new TIE Interceptor. Although slow and sluggish to control, the Y-Wing is one of the more formidable attack craft available, due to its wide array of weapons and powerful shields.

A-WING

The latest in the Rebel Alliance's array of nippy, powerful attack craft, the A-Wing fighter is one of the fastest starfighters available – rumored to be capable of out-running even the Empire's TIE Interceptors! There are drawbacks, however; weaponry is not the most powerful ever, and there are unconfirmed reports of A-Wings suddenly losing power for no reason, sometimes when in the middle of an Imperial attack!

THE EMPIRE STRIKES BACK

The Rebels aren't the only fellers clogging up the spaceways – if they were, there would be little need for a rebellion in the first place. Emperor Palpatine's Imperial forces have turned out in force to 'greet' the goodies in a vast array of different fighters, bombers, freighters and starcruisers. Being the hardest blokes in the cosmos, the Empire isn't made of chocolate when it comes to dishing out the firepower; most of their craft are heavily armed and Imperial pilots are pretty good shots. Here are the adversaries you're most likely to tangle with:

TIE STARFIGHTER

The primary attack craft of the Empire, the TIE Starfighter is fast, manoeuvrable and loaded with firepower. While not as powerful as Rebel ships, TIE Starfighter pilots fight in far greater numbers and aren't averse to the odd kamikaze run now and again.

TIE INTERCEPTOR

Based on plans devised by Darth Vader for his own customised TIE Starfighter, the Interceptor is a faster, more powerful and better-armed version of the original. Arguments continue as to which is the rippiest ship: the Interceptor or new Rebel A-Wing?

TIE BOMBER

Slow and cumbersome, the TIE Bomber is a nonetheless formidable foe, especially when flying defence missions. Heavily armed, the Bomber is usually escorted into battle by a squadron of TIE Fighters, which keep Alliance craft busy while the Bomber pinpoints its target and launches its deadly arsenal.

X WING

DOGSTAR FIGHTING

Hurrah! Direct hit on that troublesome TIE Bomber.

But he's limping toward your hospital ship - can you stop him in time?

Yes you can, and the view from behind confirms it.

Yeah! Right on the thruster! Way to go!

GIT SAD FOLK START HERE

"Sort yourself out if you're stuck here like a lonely bit of plof! This is one tough cookie to crack when you start out, and you'll get nowhere fast if you don't bother to train. So forget about tussling with the Empire for a while and get yourself straight over to The Maze for flight training a bit sharpish!"

GARTH NOW, YOU'RE GETTING BETTER

"You've sorted out your flying and shooting skills - now it's time to tackle a Tour Of Duty. The first - A New Ally - is ideal for all young pilots, as it starts out fairly easy and gets tougher as you go. Choose invincibility mode if you still feel a little shaky."

PAUL AT LAST, YOU'RE WELL' ARD!

"Hey, I won! Turn off those infinite weapons and shove yourself slambang into the thick of the third Tour Of Duty! This is for serious Top Guns only; packed with the best the Empire can throw at you, The Gathering Storm is certainly not for the fainthearted. Don't expect to survive unless you've learnt it ALL!"

1 2

The camera mode lets you view your finest moments, like this attack on an Empire freighter.

Why use laser cannon, when a torpedo will do?

A view from the cockpit here, as torpedoes are switched off and lasers are used to finish the job.

Unfortunately, Rand forgot to pull away, and smashed into the freighter. The sad man.

Close-up of the X-Wing instrument panel, better than an GTI any day!

VERDICT

The force is strong in this one! X-Wing is out of this world as a game and a joy to behold, if you've got the hardware to run it. It's one of the most progressive flight sim shooties I've ever come across and even battle-hardened space pilots will find themselves going back to flight school as they change missions and craft as they make their tour of duty. Controls are excellent, although the keyboard commands will take some time to become familiar with, but it's well worth the wait. Great graphics, superb gameplay and brilliant scenarios make this a real winner!

GARTH SUMPTER

PC

PROS:
This is the closest you'll get to Star Wars dogfighting short of inventing a time machine and sending yourself a thousand years into the past!

CONS:
If your PC is a bog-standard machine, you could feel a little cheated.

GRAPHICS

Excellent, but big craft cause slowdown on low-end machines.

93

SOUND

Stunning with a good sound card and loadsamemory.

87

GAMEPLAY

Well worked-out learning curve and loads of missions.

94

VALUE

A long-lasting challenge is guaranteed with this one.

OUT: Now. Contact Psygnosis on 051 709 5755

I don't think that Stomper's going to come unstuck in a minute.

The rodents are back — with a vengeance...

Lemmings 2

The Lemmings have returned! Since the last time we saw them, the Lemmings have set up a number of different tribes, and are living happily and peacefully. That was until the secret of the Talisman was revealed. The Talisman tells of great destruction coming to the Lemmings' homeland. They must evacuate now! But who will guide them to safety? The same person that obliged last time of course - you!

I don't know what he's trying to achieve with that bazooka.

VERDICT

Psygnosis had its work cut out in trying to follow up on one of the most successful puzzle game of all time. Luckily though, Psygnosis have gone and done themselves proud once again. Lemmings 2 combines all the features of the brilliant prequel and adds even more depth to the addictive and challenging gameplay. Mastering all the different skills of the new Lemmings will take you ages, but the gameplay is just so enjoyable, that you're guaranteed to keep trying until you rescue the lot. Excellent stuff!

PAUL ANGLIN

TALES OF THE TALISMAN

The main thing is to collect as many pieces of the Talisman as possible. There are three different types to collect: Gold, Silver and Bronze. The award depends upon how many Lemmings are saved on each level. If just a few Lemmings are still alive, then a Bronze piece is awarded. If you save almost all of the tribe, then a Gold piece is given; Silver falls between the two. All three awards are pieces of the main Talisman though.

Use the cannon to propel the Lemmings to the other side.

TRIBAL TRIBULATIONS

Things have certainly changed for the Lemmings. There are now 12 different tribes of them, living in harmony on Lemming Island. The various tribes all have different backgrounds, which range from Space Lemmings, to the Highland Lemmings. Between them, they have a total of 60 new attributes. Space Lemmings use backpacks and lasers, Sports Lemmings pole vault over walls, and so on. Mastering the different characteristics will take ages, so there's plenty of game there.

AMIGA

PROS:

A brilliant puzzle game which is everything that a good game should be: something of rare quality.

CONS:

None, other than it's likely to keep you up all night glued to the screen!

GRAPHICS

Nothing special, just nicely drawn backdrops and outrageously cute Lemmings.

89
2

SOUND

Some pretty dodgy tunes are just about rescued by good samples.

78
2

GAMEPLAY

Hellishly addictive, supremely enjoyable and bloody hard!

92
2

VALUE

Months of rescuing Lemmings assured — as you get to grips with the new game.

OUT Now. Thanks to Data East for the cartridge.

ANOTHER VERTICALLY-SCROLLING SHOOT' EM UP ON SUPER NES? WHAT'S SO GREAT ABOUT THIS ONE?

Good question, even if I do say so myself. The fact is, almost everything about Super SWIV has been seen and done before. Just when we thought we'd seen the last of the 'fly-up-the-screen-and-blow-everything-up' genre once and for all, along comes another one, this time converted from the Amiga chart-topper of a couple of years back. Though it's still viewed as the best of its kind on Amiga, SNES owners understandably expect a bit more from a shoot' em up these days – does this conversion deliver the goods? Or is it just crud?

Racin' cross the desert!

The big guns are deadly. So shoot them.

SUPER SWIV

D-D-D-D-DEJA VU!

What's Super SWIV got that the others haven't? Well, a level of carnage that surpasses just about everything else in its killing field. Forget about the naff storyline about aliens stealing military technology from around the world – all we're interested in here is KILLING THINGS and Super SWIV does it with a supreme amount of excellence. As you'd expect, the object is to blast your way toward the big bad guardian at the end of each stage, polish him off and progress to the next level. So far so predictable. And it doesn't stray much from this path, either, so the action had better be good.

Knock out the camouflage guns fast!

VERDICT

Okay okay, we've seen it all before, but Super SWIV deserves credit for having a go anyway and coming out better than most other games in the genre. It's super-smooth, well-polished, looks lovely and the difficulty level, though seemingly totally unforgivable at first, is set just right. The dual-vehicle option makes Super SWIV an absolute must to anybody who fancies a top-notch blast, particularly if you have a mate to join in the fun. Amiga SWIV was tops; on SNES, this is one of the more impressive blasts doing the rounds of late – check it out!

GARY WHITTA

IT'S VERY HARD

It certainly is. Super SWIV is packed to the gunnels with rock-hard beddies and, although the landscape is chock-full of power-ups, shields and other bonuses, you'll have to be as hard as nails if you're even going to get past the first level. The lack of a continue option doesn't help, but there are plenty of extra lives available to those who know where to look during play.

Uh-oh; big, end-level nasty coming up!

SUPER NES

PROS:

One of the fastest, busiest and most action-packed blasters we've seen

CONS:

No continues

GRAPHICS

Lovely and clean. Better than the Amiga originals.

82

SOUND

Nice title screen music, but the rest is average.

76

GAMEPLAY

What can we say? Nobody does it better.

86

VALUE

You might get bored before you finish.

Thanks to Console Plus (0532 500445) for the review cartridge.

Herras is a bit peeved at the systematic slaughter of all his living relatives, courtesy of the Dark Wing Lance. So, for ten years he's honed Mechwarrior skills. The Mechs are hulking great fifty-foot exoskeletons used to blow hell out of anything that crosses their shadow. Herras, however, has a different use in mind for the Mechs - to wipe out the Dark Wing Lance!

A pleasant pastoral scene is one of the many scenarios.

BATTLETECH

MONEY MATTERS

As you need as much money as possible to finance your fight against the Dark Wing Lance, you'll have to take as many contracts as you can get. If you go to the GHQ icon, you will see a range of contracts all varying in difficulty and, of course, amount of pay. Cash for each contract is negotiable; if you're not being offered enough, go to the money screen and haggle with the company that's made the offer. Usually they will pay you a fee just above the original offer. However, not all companies will increase their offer - the tight gets!

THE MECH THAT JACK BUILT

No matter how hard your Mechwarrior may be, you will eventually get a bit of a kicking, courtesy of the evil minions. Luckily though, there is a Mech spare part shop just

Things are getting a bit tricky now.

around the corner. However, fixed bits do not come cheap. You can find yourself in a bit of a rut if you get seriously damaged early in the game - you need money to perform emergency repairs on your suit, but have to execute a contract before you can earn the cash! It's a vicious circle - but that's business!

VERDICT

No-one knew what to expect from Battletech. The screenshots looked great, but the 3D perspective looked way too ambitious. Whereas the graphics have been pulled off, the gameplay falls too short. It's brilliant fun at first and the action really draws you in - until you realise how repetitive it gets. All the scenarios are too similar and it's too easy to get bored. If you purchase short range homing missiles you can run around blasting the cock out of everything and finish it in no time. Something of a wasted potential, methinks.

PAUL ANGLIN

THE HEAT IS ON!

The different missions require you to travel to different parts of the solar system and, like all good galaxies, each planet has a different climate, so you'll have to take the heat, as it were. The engines, thrusters and weapons that you can equip yourself with all generate heat. So, to stop the suit from overheating on hotter planets, you'll need to install heat sinks, to help regulate the temperature of the suit. But, all things said and done, you don't really need to bother with engines and the like anyway!

SNES

PROS:

Excellent atmosphere created by brilliant graphics and great sound.

CONS:

The action becomes too repetitive, as well as too easy.

GRAPHICS

Impressive use of 3D creates the world of mech combat.

89

SOUND

Brilliant music with some well 'ard explosions all over the shop.

91

GAMEPLAY

Brilliant to start with, but flaws become apparent later on.

78

VALUE

It won't be too long before this gets shelved.

73

OUT: May. Thanks to Console Plus (0532 500 445) for the cart.

SMACKERAMA!

Sonic (no relation to the blue hedgehog!) sets about his enemies with a vast array of spectacular moves. By walking up to the thugs he can jab away to his heart's content, but get in close, pushing the joypad towards a ruffian and he'll be dispatched in one of seven ways. Reduce villains to rubble with lightning-fast punches and fireball uppercuts, pick up slackers and hurl them towards their mates, knocking them bandy, or cut them down to size with the spinning whirlwind tomatado punch – Muhammad Ali-style! Sonic also has two extra special moves; the first is a spinning drill attack which throws his arms out like flails, felling all in his path, and the awesome 100 Mega Ton punch which clears the whole screen!

Blue fireballs of Doom!

Sonic dishes out a good kicking!

The shot says it all!

Sonic Blast, man!

Dash it out and take no prisoners.

WEIRD BUT WONDERFUL

Prepare yourselves for some weird and wonderful sound effects. Plenty of smacks, cracks, thumps and bashes are thrown in, as well as a liberal smattering of manic Japanese digitised speech! Sonic and his buddies are all brilliantly drawn and, even though the locations don't differ that much, there's enough variety in moves and enemies to keep you glued for quite a while.

SONIC BLAST MAN

LOSE CONTROL!

You control the direction in which you throw enemies, but the actual attacking move is chosen almost by pure chance – shame. Most of the action takes place in the streets, but there are three bonus levels which have you hammering the pad's buttons to punch various big baddies into submission.

DOES THIS COIN-OP SMASH PACK A PUNCH ON SNES?

Those off-the-wall Japanese are only famous for three things; electronics, cheap cars and sushi! But now you can add another item to that list; keraazay cartoon and film characters. Sonic Blast Man is the latest mental Jappy japester to be turned into a console game and, although you've seen his face before in the arcades, our lad Sonic is about to explode onto your Super Nintendo!

VERDICT

Want a beat 'em up that'll give you a good chuckle and fuel your desire for bone busting action? Then you could do worse than take a look at Sonic Blast Man! Moves-a-plenty and lovely big sprites make this game a treat, but the title ultimately falls flat on its face by becoming so boring. After you've got used to the comical hero's various moves there's little left here to appreciate. The punching game is a nice addition, but hardly the same as smacking the coin-op's big cushion. Worth trying though, and maybe buying!

STEVE KEEN

Crab attack – shatter shell!

He's big and she's tough, but are they strong enough?

SUPER NES

PROS:

Original and highly entertaining moves. Great sound and visual effects.

CONS:

Not a lot of variety. More use should have been made of the other joypad buttons.

GRAPHICS

Big, bold sprites and cool backdrops are a treat for the eyeballs.

87
/2

SOUND

Zany tunes and impressive spot effects. Crazy Jap speech, too!

85
/2

GAMEPLAY

Initially brilliant, but inevitably becoming tiresome.

79

OUT: April. Contact Sega (071 727 8070) for information.

CYBORG JUSTICE

READY YOURSELF FOR A ROBOTIC RAMPAGE IN THE 23RD CENTURY!

During a leisurely cruise through space, the last thing you want to encounter is an asteroid belt. But that's just what's happened in *Cyborg Justice* – and life's just about to take a further turn for the worse. Battered to bits, your craft crashes on a planet entirely populated by robots which kill yourself and your crew. The metal inhabitants manage to save your brain and implant it, Robocop-style, into one of their own labour droids. But, while trying to erase your memory, some part of your mind rebels and causes the robotic side of your body to malfunction. Now Unit 127 is out for revenge against its captors – you've got some serious killing to do!

WIDE OPEN SPACES

There's not a lot to look at on each level and the planet seems to be more desolate than *Rugby* train station. However, the Megadrive is constantly working overtime to produce a snazzy three-dimensional effect – not only can you trudge left and right but you can walk into and out of the screen as well! The sprites actually get smaller the further into the screen you go and bigger as you come forward. This effect has only really been seen before in *Pitfighter*, but here it's infinitely smoother and more slick! So *Cyborg Justice* looks good, but what about the sound? Well, you'll be more than pleased to note that there are over forty excellent sound effects to accompany the killing. The only drawback is the atrocious music that nearly drove everyone in the CVG office back to work as it polluted the speakers!

Two-on-one and still holding his own.

Flat on his bum and one to go.

JOYPAD JAPERY

Cyborg Justice has more joystick combinations and moves than a triple jointed Russian gymnast! Here are the basics – and let's hope that Sega don't make any cutbacks when it comes to explaining them in the manual!

- A** - Punch with special arm, hit twice to activate special weapons.
- B** - Throw cyborg item.
- C** - Drop cyborg item and defend, hit twice to activate special leg transformation and manoeuvres.
- D** - Moves cyborg left, right, into and out of the screen. Holding down C + Up jumps, Down crouches.
- E** - Note: There are about 20 combinations of buttons and joystick for all kinds of attacking moves.

DOWN TO BASICS

Although you'll be far more interested in destroying things, you can try your hand at tailoring the game to suit your needs. Lives, difficulty and controls can all be altered and, when the action's over, you will be awarded points for Technical Advancements, Brutality and Fair Play. Our advice is to whack the game up to Hard level almost straight away and dive headfirst in at the deep end!

FIGHT THE GOOD FIGHT

You don't have to be Dr Frankenstein to build your own monster! Just dive into the selection screen for a sneaky peek at what the multitude of different spare parts can do. There are three sections to every robot – arms, body and legs – and you can choose from a huge bank of torsos and limbs, all with their own advantages and powers, to construct your own personal killing machine. You can apparently make up to 200 different monsters and take them into the Arcade and Duel sections for a scrap-tastic time!

(Above) Anyone for a Whopper?

VERDICT

It's going to take a long time to get into, but once you're there it's definitely worth it. I haven't played anything this satisfying since SF2! The adrenalin really gets pumping as you leave piles of scrap metal in your wake! In simultaneous two-player mode the screen can really get cluttered, making it murder on the eyes, and the Dual mode's a little simplistic and not much of a challenge, but it's original and, above all, fun, especially the fab robotic animations. These guys are 23rd Century top boys – check 'em out!

STEVE KEEN

(Below) We might have our hands full here.

Going down for the last time.

The only things missing are the parallet bars.

KWIK FIT FITTERS!

STEVE – Here's my top boy in the robot arena:

- 1 SAW HAND:** Double press A to unsheathe the deadly buzz saw and watch your opponent's parts fly off!
- 2 QUASSIMODO BODY:** Being a bit of a Quasi myself, this has to be the body for me!
- 3 TANK LEGS:** By quickly pressing C twice your terminator transforms into a tiny powerful tank. Max damage potential!

ANGLIN – My vote goes to this terrific combo!

- 4 CRUSHER HAND:** Dead handy for scrapping, it also doubles as an egg whisk and Mother's Day present!
- 5 BIG BOOSTER:** Because I need all the help I can get!
- 6 SOMERSAULT LEGS:** Double press C and you'll spin all over the place, wiping out oodles of your enemy's energy!

Body slams ahey! Move up the screen, out of the way.

It's up to you to pick up the pieces.

Whoever gets in first should win the bout.

NICE WORK FATTY!

Don't fancy wearing yourself out by walking through the levels, eh? Well, flick on the Duel option and you and a mate can smash each other to rubble in endless head-to-head scuffles. Don't worry if you're a bit of a loner, because there are limitless amounts of computer assassins to take on, too. There are no less than four skill levels to tackle and it won't take you long to realise that Easy and Normal aren't worth the sweat of off a mosquito's wedding tangle! However, pump up to Hard and Brutal for some great competition and wet your plastic parts with fear as the huge sprites rip you limb from limb!

FIRST THINGS FIRST

Ok, you've landed on the planet's surface – what are you gonna do now? The simple answer to that is FIGHT! After constructing a suitably armed, bodied and legged robot it's time to put it to the test. Arcade mode is the scrolling section of the game. Walk through level after level of marauding mechaoids, blasting them or literally pulling them to bits to get to the other side. All the levels are divided into three rounds and at the end of a level you'll have to combat the 'Super Bott', a humongous, teflon-plated mother, kitted out with all kinds of lasers, flame-throwers and more moves than Gary Kasparov!

CYBORG JUSTICE

WORLDS APART

Five worlds and fifteen levels, that's what's ahead of you in Arcade mode. But it's not just the other mechanical wonders you've got to keep an eye out for, oh no! Once you've beaten up the robots on-screen there's no time to stand back and survey your handy work, because you're likely to get a rock-et up your bum! Homing missiles track you down in-between the action, shooting onto the screen from either side at regular intervals. You can use these to your advantage by standing in front of your next opponent, jumping over the shot and sending it flaring into the villain's belly! To make things even more interesting there are chasms to jump, paralyzing spots, whirling blades, spikes and knives that shred your diodes!

Flame grilled or medium rare?

Keep it lit and you'll soon have an extra hand!

Get that buzz-saw buzzin'!

Now it's time for some payback.

SPOILT FOR CHOICE

Don't just stick to our choices, there are copious amounts of add-ons to try out. Try these on for size:

FIRE SPRAY - The quickest to power up, this sends out a long jet of flames.

LASER HAND - A short, sharp bolt of powerful light that destroys all it touches.

LAUNCH HAND - Comical, but effective. Throws your own armoured hand at the enemy. Don't worry, it comes back!

NORMAL - The bog standard basher! Great for quick jabs, hooks and all-round smashing!

FROG BODY - One of the stranger torsos. Ever wanted to look like an amphibian? Now's your chance!

INSECT BODY - Doesn't look much like an insect but it's all that's separating you from death, so don't knock it!

Take 'em in and spit 'em out!

VERDICT

The first thing to hit you when you power up *Cyborg Justice* is the incredible animation of the robots. They move so fluidly you'd swear they were real. The only discrepancy is the rather flat look of the backdrops, but who cares when the fight action is this good? What puts *Cyborg Justice* head and shoulders above everything else of its kind is the humour; you show me another beat 'em up that lets you tear your opponents' limbs off and use them as weapons! An excellent title that breathes life into a weary genre.

PAUL ANGLIN

WHAT'S YOURS IS MINE!

One thing's for sure, *Cyborg Justice* is packed full of juicy animation. There are so many moves it's amazing how they all fit into the jopyad! Mash your opponents' faces in with upper-cuts, body slams, flying kicks, laser bolts and loads of others. You can even wrap your body around them and drain their energy or pounce up onto their shoulders and rip parts off 'em! As every hit lands, bits fly off in all directions and, if you can manage to tear off a robot part, you can keep it to chuck at the next unfortunate!

MEGADRIVE

PROS:

Fantastic animation and huge amount of moves. Tons of detail and nice small touches.

CONS:

Some of the weapons and moves take frustratingly too long to pull off.

GRAPHICS

Just for the enormous amount of excellent animation alone!

89
2

SOUND

Perfect sound effects for the action. Music's SUICIDAL!

83
2

GAMEPLAY

Loaded with alternative gameplay and original moves.

87
2

VALUE

Long-lasting appeal and tons of mechanoid combinations.

Reese gets to grips with a tinfoil T-800!

THE TERMINATOR

FIGHT THE MOST SOPHISTICATED TECHNOLOGY EVER ...
ON SOME OF THE MOST OLD-FASHIONED!

The film's been around for nine years, and the NES is almost as old, so why's it taken so long for one of the world's most popular films to arrive on one of the world's most popular formats? And more importantly, has it been worth the wait? Become crack commando Kyle Reese and take on the Terminators in an all-out fight to save the future!

Seen a better Terminator game than this?

Mind you don't fall down that hole!

WOT? THE PLOT!

If you're reading the magazine in the right order and aren't just flicking through it in the shop (in which case, either buy it or stop getting finger marks all over it, you grubby little urchin), you'll already have waded through two Terminator reviews already, and could probably do without yet another plot summary. Well, tough luck because I've got a word count to fill. In the year 2029, civilisation has been wiped out by a nuclear war blah blah, and now the few remaining humans battle for survival against an invincible army of machines etc etc. As rebel hero Reese, you've got to go back in time to 1984 to intercept the Terminator and... oh, you know all this already - what's the game like, then?

ONWARDS

The first thing of note is that, although the game comes from Mindscape, who did the SNES version, it's not really very much like its 'big brother' at all. Okay, so they're both platformy shooty type things, but there the similarity ends. While SNES Terminator has got a bit of sophistication (albeit not much) about it, the NES version is a primitive leap-and-shoot-and-not-much-else affair that plays (and even looks a bit) like Mario with guns. Whether you're in 2029, fighting through the SkyNet HQ, or back in 1984, shooting it out with Arnie on the streets of LA, the 'action' is much the same - jump on the platforms, collect energy and bombs and shoot things until... zzz... If you've got the perseverance to see it through to the end, you may well terminate the killer cyborg and save the world as we know it - everything, in fact, except replay the naughty bit with Sarah Connor like he does in the film!

VERDICT

The NES might be a bit of a dodgy old brick, but it's still capable of playing a decent game or two. Unfortunately, The Terminator isn't a decent game. You really have seen ALL this done before, and when you consider that it's not a very faithful licence (why has the music been changed to an up-tempo jingle, and why does Reese wear a Challenge Anneka tracksuit?), all you've got left is a boring platform game. Not totally worthless, but you've probably got two or three games almost identical to this in your collection already.

GARY WHITTA

NES

PROS:

The action is fairly challenging and, erm, that's about it.

CONS:

Poor graphics and sound and bland gameplay.

GRAPHICS

Weak sprites (the T-800s look like they're made out of tinfoil) and backdrops.

62

SOUND

The music sounds like a shaving foam advert, and the effects are, frankly, poo.

52

GAMEPLAY

Not bad, but there are plenty of frustrating jumps and other irritating bits.

72

VALUE

It's okay if you can be bothered to stick with it. Unfortunately no-one here could.

68

REVIEW

NES

by KONAMI

£29.99

OUT: Now. Thanks to Konami (081 429 2446) for the review console.

BUCKY O'HARE

Where's dat wascally wabbit?

As cool bunnies go, this guy's ice!

Well, whilst Bucky O'Hare must rate as one of the most sickeningly annoying cartoon characters since Keeyop from Battle Of The Planets burnt up on re-entry, Konami has seen fit to pit the intergalactic bunny against even more alien foes as he makes his NES debut.

There's normally a lot of life in a rabbit!

Cripes! Bucky the rabbit's crew has been kidnapped by an evil adversary, and only the carrot-chomping spacepilot can save them. Cue the platform action, folks! Yessiree, armed with a gun and his most impressive rabbit-related jumping prowess it's up to Commander O'Hare to traverse the game's eight platform-laden levels, destroying enemies and bosses as he goes.

One of the nicest touches within Bucky O'Hare is that, on rescuing Jenny and the rest of the crew, by using the select button, they can

be picked to boast different specialities. For instance, whilst Bucky is an ace jumping hero (as most rabbits are reknowned for), the bespectacled Willy is armed with a gun powerful enough to kill nasties with one bullet! Although there's nothing really new contained within in Bucky O'Hare, it's certainly polished and contains more than enough playability to keep you returning for yet another stab. It's all familiar stuff, but it's been rateh well done nevertheless.

SUPER NES

by NINTENDO

£44.99

THANKS to Console Plus (0532 500445) for the review cartridge.

FACEBALL 2 ☺☺☺

With its basic gameplay dating back to the ancient Atari 400, Faceball has been given the Super NES treatment, gaining a 2000 in its title in the process.

As countless veterans of the halcyon days of C64s and Atari 800s sit around boring the pants of everyone else with stories of Dropzone, O'Reilly's Mine, and Crystal Castles, it's easy to regard such 'classics' through rose-coloured specs. Every now and then an old, fondly-remembered game is updated and any such feelings of nostalgia are immediately crushed — Faceball 2000 being a perfect example. Based on an old Atari title called Maze Chase, even Faceball 2000's premise is dull: trundle around a series of 3D mazes, blasting Acid-style smiley faces and avoiding getting shot yourself. Whoopie-doo, as they say. Whilst the 3D is neatly updated, everything else about Faceball is tedious in the extreme. It takes

ages to get to a series of nasties which move at anything other than a snail's pace, and when they do they're still ridiculously easy to hit. The developers have added a couple of additional game options to liven things up (a team mode, for instance), but there's just no disguising that this is a true stinker.

You'll be sad faceball too if you buy this!

Split screen ball action aho!

REVIEW

MEGADRIVE

by SEGA

£39.99

Thanks to Console Plus (0532 500 445) for the review cartridge.

Ah, the wonderful world of Disney. Gone are the days when Baloo the Bear was content to walk, talk and dance with you-oo-oo. Now, the recession has forced him to take to the skies to race for the money needed to pay his banana bill. This is his story...

Controlling either Baloo or his pretty sidekick, Kit, Talespin is a massive arcade/adventure which takes the characters across a series of jungle and swamp-based stages with the ultimate aim being to reach and take part in an important air race — and hopefully, scoop the grand prize. As is often

the case, though, big is not always best, and at best Talespin is a very average game. There's certainly plenty to see and avoid, but there's nothing particularly exhilarating here to prompt further play. In all, there are eight different stages to explore, with a further six flying sections awaiting Baloo

"Where in tarnation did I leave that plane?"

"Turn left at the next junction Mr Baloo".

or Kit's exploration. Although all the old faves, such as Shere Kahn make cameo appearances throughout, even these aren't enough to keep you hooked. Average to the extreme, Talespin is an attractive package which sadly lacks substance and unfortunately does very little to excite.

REVIEW

SUPER NES

by HI TECH

£44.99

Thanks to Console Plus (0532 500 445) for the review cartridge.

HARLEY'S HUMONGOUS ADVENTURE

JetSet Willy meets Hi-Tech's Harley.

Shopping will never be the same again...

Shrinking people is a great game concept. You can have characters attacked by large insects, or chased by huge cats. Or you can have them wandering around a rather dull laboratory...

I don't think I would be being cruel if I was to say that Hi-Tech's back catalogue had been a little... er, shaky. With disastrous epics like Tom And Jerry behind them, Hi-Tech have had another stab at the platform genre, introducing Harley as a contender for Mario's crown.

Some hope! Having been shrunk when a scientific experiment went wrong, Harley has been left stranded in his overgrown lab. However, on scanning the room, he notices that the machine responsible for his lack of stature has been blown to bits and that if he were to rebuild

the unit by collecting the pieces, normal size could be resumed. Well, after a promising start with big, bold graphics and attractive enough sprites, Harley's Humongous Adventure is revealed as a rather tedious affair which rarely sets the pulse racing with non-stop frenetic excitement. Granted, Hi-tech have attempted to liven things up with the addition of different modes of transport — bubbles and a jet-pack, for instance — but dodgy sprite detection and dull playability kill any lasting interest off far too early. Unfortunately, then it seems that Harley's lasting appeal is a big as his size...

REVIEW

SUPER NES

by NINTENDO

£45.99

THANKS to DJPR (071 836 2973) for the review cartridge.

WORLD LEAGUE BASKETBALL

If you think dunking is an act performed with a hot cup of tea and some biscuits, you're well out of touch, Daddio. Get ready for an all-new Super NES style of dribbling...

This is so impressive, it's unbelievable! With the exception of Pilot Wings, never before has the Super NES' Mode 7 been used so creatively. After skipping past the usual squillion options and team selection routines, Basketball reveals its court from what appears to be a dull side-ways on viewpoint. However, no sooner is

The problem with basketball is that once you take away the ball it becomes ballet!

the ball thrown in the air for a tip-off, then the pitch starts rotating all over the shop as the screen follows the player in possession. In addition to this stunning graphics, World League Basketball plays a pretty mean game, too. All the rules and features of the sport are there, including travelling and fouls, and these make for what is quite simply the most breath-taking sports game I have seen in ages. Ordinarily, Basketball does very little for me, but this stunning game has turned me into an arm-chair expert. Well worth a shufft.

REVIEW

MEGADRIVE

by MINDSCAPE

£39.00

THANKS to Console Plus (0532 500 445) for the review cartridge.

CAL RIPKEN JR BASEBALL

Take the hat off and it could be cricket, it could be golf, it could be any number of sports, but it's American rounders.

shot out of the ballpark; hardly a game of skill. In terms of graphics and sound, Cal Ripken's is also lacking, and sprites and animation wouldn't be out of place on the Master System. This isn't my idea of fun: Baseball games should need more skill. Unfortunately, with the Hardball series failing miserably, and Mindscape adding another onto the pile, it looks like I'll have to dig out my old C64 World Series Baseball.

With so many Baseball games striking out, Mindscape are taking a turn at pitching what they hope will be a long-awaited success in the notoriously difficult-to-crack Baseball field.

This appears to be a conversion of Cinemaware's Amiga version of TV Sports: Baseball. Featuring the usual selection of statistics — whether it's changing the player, the stadium or the team — the action itself is ever-so dull, a fault of all too many Baseball games. Pitching and batting requires very little skill and all too often, just as I thought I had the opposition sussed, they'd hit an impossible

GRAPHICS 72
SOUND 53

62

OUT: Now. Thanks to Ocean (061 832 6633) for the review cartridge.

PUGSLEY'S SCAVENGER HUNT

Ooky, kooky, and now in cartoon form, Ocean are once again on the Addams handwagon, as the youngest member of the family decides to try going it alone...

Oh yes, it's hairs on the back on yer neck type action ahoj!

Pugsley is flushed with success in the boghouse level, but remember to wash your hands when you leave!

Although in terms of gameplay, Pugsley's Scavenger Hunt is virtually identical to its predecessor, the Addams Family yet the graphics and sound are unbelievably superior. Whilst Pugsley follows in Gomez's footsteps of leaping around the sprawling mansion, it's hard not to be impressed as he bounces on such weird things as toy ducks and arty farty disasters. For instance, whilst entering Granny's lair, the entire screen is distorted to give the impression that it's being seen through the old bint's crystal ball, whilst the bath level is a siley affair with loads of bog chains for the young scavenger to climb. Yeah, it's all familiar stuff, as is the familiar feeling when exploring its many levels. Ocean have had lots of practise with this sort of game, and Pugsley is their finest licencee yet — even the hunt requires an element of thought! It's by no means a classic, but it's entertaining stuff and most certainly worth a look.

87

OUT: May. Thanks to Ocean (061 832 6633) for the review cartridge.

LETHAL WEAPON

During the Lethal Weapon films, Roger Murtaugh is often heard muttering that he's getting too old for this sort of thing. Well, nobody really deserves this either...

Oh dear. This really is the crappiest license I have seen for ages. Take two action-packed films with tons of large-scale shoot-outs and fight scenes, and transfer them to the NES. What do you get? Nope, not a decent arcade/adventure or Op Wolf clone. You get a tawdry Double Dragon clone, where there's 'bleedin' all difference between the two characters, and where the 'action' is so dull it's about as much fun as a back rub at the Freddy Kruger massage parlour. As Riggs and Murtaugh limp from one spot to another, gangs or two or three villains appear for them to punch, shoot or avoid and... er, that's it. There is nothing to recommend about NES Lethal Weapon, and it must rank as one of the worst ever games. Avoid it like typhoid or the plague.

Gasp! It's another trio of villains wandering around trying to justify their existence. This all gets so repetitive after a while that you'll soon tire of it all!

FLOWER CUP

CHOCO ISLAND 1

- 1 Go to the right of the first puddle and to the left of the second.

Oops, mind the wall!

GHOST HOUSE 2

BOWSER'S CASTLE 2

DONUT PLAINS 2

- 1 Use the feather to take a short cut.
- 2 Make sure you hit this jump. It does your speed the world of good.

Dunno why Donkey Kong's cheering, he's last!

This course is complicated—but follow these arrows and you should be OK.

- 1 Slow right down to take this corner.
- 2 Upping speed could win you the race.

- 1 How do you deal with the mole? Look at the fax box tentitled 'Mr. Mole'.

Oi, come back here you get!

Go on, just try and overtake me..

MARIO CIRCUIT 2

STAR CUP

KOOPA BEACH 1

- 1 Hit the jump bars to avoid the water, leaving banana skins just in front of them. This will wind up your opponents no end...
- 2 It doesn't really matter if you go to the left or to the right of the island.

CHOCO ISLAND 2

- 1 If you go through the puddle, go over the island. This will help you regain a little speed. Also, this is the perfect place for using shells.

VANILLA LAKE 1

BOWSER'S CASTLE 3

- 1 This is complicated, but follow the line and you'll be fine.
- 2 At this point, it's worth slowing down, otherwise you'll hit the heads and become even more horribly slow.

MARIO CIRCUIT 4

- 1 Don't drive over the snow; it slows you down.
- 2 It's worth hitting a few of the blocks on your first lap to give yourself room on the second.
- 3 This is the perfect place for dropping banana skins.

- 1 Watch out for this bend—it's bloody tight!
- 2 Just keep a lookout for the pipes.

SPECIAL CUP

DONUT PLAINS 3

- 1 To jump the bridge use your L or R buttons.
- 2 Watch out for this corner; there are moles about!

KOOPA BEACH 2

- 1 The dark blue bits are deep water so avoid! Take this route across the beach.

CONTINUED ON NEXT PAGE

SUPER

MARIO KART

SPECIAL CUP

GHOST HOUSE 3

- 1 Take a shortcut using a feather
- 2 Accelerate — but look out for the hole.

- 1 Beware the blocks.
- 2 For a real laugh, leave banana skins here.

VANILLA LAKE 2

RAINBOW ROAD

Mind the water.

- 1 Watch out for the heads; they're all real killers.

Phew! That was close.

CONGRATULATIONS YOU MADE IT!

100% SPECIAL CUP RACE
BOSS FINISH TIME GOLD
CLOCK RACE

O! GIZZA LOOK

One of the sneakiest features is looking at your opponent's screen. This means you can always detect his whereabouts, even if he's invisible. It'll make it more of a doddle to ram a shell into the back of his cart.

BATTLE MODE BATTLE MODE BA

For most of you, Battle Mode'll be a bit of a laugh: it's a cruel and complicated sport. Here's a few pointers on how to smash your rivals into oblivion.

CAUGHT IN A TRAP

A good way to send your opponent up the creek is to set up traps for him. Do this by firing a green shell into a confined area. The shell will bounce about like nobody's business, making a mess of the track. Make sure that you get out of there very quickly, though!

THE GREAT ESCAPE

If your opponent has a red shell, don't fear: all is not lost. At the very least try and avoid him by sticking close to the walls and goading him into firing them when you're cornering. If you are close enough to a corner, use a mini-jump to get around and out of his sights. You may be able to avoid it but you'll have to be quick if you don't want to be splattered.

ICON SEE THAT!

There are tons of icons to pick up in Mario Kart. Here's what they all do:

MUSHROOM

WHAT IT DOES: Speeds you up.
WHERE TO USE IT: Best used on a straight. NEVER on a bend.
WHEN TO USE IT: Provided you're not too far behind, it's worth using it right at the line and shooting past your rival at the last minute. Otherwise, just use it anywhere to catch up.
HOW TO USE IT: Press A.

RED SHELL

WHAT IT DOES: This is the mother of all pick-ups. It is a guided missile which, when fired, will home in on the nearest Kart.
WHERE TO USE IT: Only use when driving along a straight or somewhere where there are no obstacles.
WHEN TO USE IT: Just before the finish line is always a good place to send your rival sprawling. Not too close, though you might knock him over the line.
HOW TO USE IT: Press the A button. The red shell can only be fired in front of you.

COINS

WHAT IT DOES: Coins allow your Kart to take a hit. No coins and the Kart will spin off when hit. Get more than ten coins to gain a speed up.
HOW TO USE IT: Press A

STAR

WHAT IT DOES: Gives the player invincibility.
WHERE TO USE IT: Anywhere!
WHEN TO USE IT: Anytime!
HOW TO USE IT: Press A

GREEN SHELL

WHAT IT DOES: Unlike the red shell, this isn't guided and will just fly straight when fired.
WHERE TO USE IT: Just before a wall off of which it will rebound, causing the drivers behind all sorts of grief. But be careful: they rebound horribly.
WHEN TO USE IT: Only use this when there's someone right in front of you.
HOW TO USE IT: The green shell can also be fired behind you by pushing down on the joypad.

FEATHER

WHAT IT DOES: Gives you one super-high jump.
WHEN TO USE IT: Useful when avoiding Banana skins and the like, but especially useful on the Ghost House tracks where you can take short cuts and jump off the track.
WHERE TO USE IT: Anytime you need to jump over something or take a short cut.
HOW TO USE IT: Press A.

LIGHTNING

WHAT IT DOES: This is THE pick-up to end all pick-ups, allowing you to shrink every single player on the track, so you can speed past them or even drive over them if you fancy.
WHERE TO USE IT: Wherever.
WHEN TO USE IT: Whenever.
HOW TO USE IT: Press A.

BANANA SKIN

WHAT IT DOES: Makes rival Karts skid and spin.
WHEN TO USE IT: Whenever there's someone directly behind you.
WHERE TO USE IT: Place it on a part of the track where drivers have to go out of their way to avoid it, ie just before a jump bar.
HOW TO USE IT: The banana skin can be dumped behind you by pushing down, or in front of you by pushing up.

E MODE BATTLE MODE BATTLE MODE BATTLE MODE

DO YOU BELIEVE IN GHOSTS?

The second most useful icon in Battle Mode is a ghost. When used, it will do the following: A) It will make you invisible so that you don't appear on your opponent's screen; B) It will allow you to steal your opponent's icons, but make sure you steal from him only when he's got something useful; there's no point in being in a rush when using your ghost.

CHEAT MODE

Cheat Mode gets bigger as of this month! From now on there are even more pages to fill to overflowing with Action Replay codes, guides and general tips – and there are two whole pages of the legendary Question Corner at the front of the mag, so we're really cooking now. And there's even more to come – but I don't know what it is, so I need your help. If you can think of anything else you'd like to see in these here pages, drop me a line at the usual Cheat Mode address – there are prizes up for grabs for any ideas that get used! And speaking of prizes, congratulations to Neil Turnbull of Bucks for winning the £150 worth of software! You spawny get. Send all your usual scribbblings to: PAUL ANGLIN'S OFF AND RUNNING (NOT TO MENTION KICKING ASS) CHEAT MODE, CVG, PRIORY COURT, 30-32 FARRINGDON LANE, LONDON EC1R 3AU. And remember, as a famous editor once said, "Don't play the game, play the games". Bye.

It's a pity that the lad (or lass) who sent in the tip for Alien 3 didn't send his name – he could have been the envy of his mates for evermore!

MEGADRIVE

ALIEN 3

Talk about letting the side down. Someone sad has sent this in for Alien 3, but who it is I don't know, due to the distinct lack of a name and address. Doh! Press C, up, right, down, left, A, right and down and you'll hear a power-up sound. Now pause during the game and skip the level by pressing C, A and B before unpausing.

PC ENGINE

R-TYPE

Wahey! A great cheat for one of the all-time classic blasters has been provided by none other than that top multi-millionaire playboy-type, **Dougie Orr** from Burnley, Lancashire. On the title screen hold down and Select and quickly push button one for an extra credit.

MOTOROADER

Just when my back is turned, who should sneak in another cheat? It's **Dougie Orr**. Here are four new courses: On the title screen press... Select and button 1 then Run: Suburb. Up and button 2 then Run: Brazil. Up and button 1 then Run: USA. Button 1 and 2 then Run: Trap Course

PARASOL STARS

The man who hails from the same place as Atari HQ has a fair idea of how to really play Rainbow Islands. Take it away, **Andrew Ford** from Slough, Berkshire. To get the secret door, you must collect three mystery crests of the same type, ie three water crests. To do this, you must create a large drop of water, twice in the same round. The crest will then appear on the next round. You can do this with all the drops. The door appears at the end of the level when you have defeated the guardian. It will contain 99 credits!

MASTER SYSTEM

THE TERMINATOR

David Moore of Lincoln's got a top Terminator tip: Go to the title screen, hold down button 2 and press button 1. While the screen is black, push the joystick left, left, up, right, right, down and down. Two zeros should appear on screen. You can now select the level you want by pressing left or right on the joystick.

GAME GEAR

PRINCE OF PERSIA

It's sad man number 2! The Prince of Persia codes made the journey fine, shame your name and address didn't!

Level 2: DHJFK
Level 3: FHKHDG
Level 4: UJFJU
Level 5: JIMJFB
Level 6: IGGHDO
Level 7: HECFED
Level 8: LGMIEZ
Level 9: PJMLHM
Level 10: KDEFBH
Level 11: KCIFBC
Level 12: RHKLGJ
Final level: RELJED

AMIGA

STREETFIGHTER II

Andrew Durkin from Bradford West Yorkshire, has found this cheat nestling inside the local nuclear reactor. In one-player mode, while on the character screen, move the icon to Blanka and type in PATIENCE (make sure you type it in slowly). Start the game and when your power meter is low, press F10 to refill it.

BODY BLOWS

Blimey! Garry Davies has sent in a cheat for Team 17's incredible Body Blows, and it's only just hit the shops! Click on the one-player option on the main menu. Then press the space bar. Once you have done this, a secret option screen will appear.

RISKY WOODS

The game may not be the best ever, but Leigh Jackson from Hull has managed to make it a damn sight easier for you all. Press F1 to increase your lifeforce, F2 to increase your cash and F3 to skip the stage.

SUPER NINTENDO

SUPER STAR WARS

Hurrah for Neil Turnbull from Buckinghamshire. Not only has he sent in this excellent cheat, but he has also managed to win himself £150 of software. Congrats Neil! On the title screen press A, A, A, A, X, B, B, B, Y, X, X, X, X, A, Y, Y, Y, Y, B. After entering this code you should hear the Jawa yell. When you start your game you will now be able to choose between all three characters to play with. But it doesn't end there, if you then press and hold the L and R buttons on the second controller during the game, then you will be taken into the game debug menu. On this screen you can choose the levels and areas inside a level, how many lives you want, the character you want and what weapon you want. Also, you can finish the level by pressing the start button on controller 2. Lastly, you can make yourself invincible on any level (except the driving ones), just hold down the A, B, X, Y and Select buttons on controller 2.

They're tiny! They're loony! They're all a little loony! And there's Action Replay codes for 'em, just over to the right!

ACTION REPLAY CODES

MEGADRIVE

ALIEN 3
FF08450099: Unlimited machine gun rounds.
FF08470099: Unlimited flame thrower.
FF08490099: Unlimited Mortars.
FF08EB00XX: The value in XX is how many lives you start the game with.
FF090B0009: This parameter is for infinite lives.
FF08670050: Freeze the timer.
FF0B11000X: X: Changes the amount of people you must collect before you exit.
FF0B130000: Level select; you must start the game and lose a life before correct level is selected.
FF08670059: Infinite time.
FF08670059: Infinite grenade gun.

ECCO THE DOLPHIN

FFB6340003: Unlimited air.
FFB635003B: Unlimited health.
FFB7FF0000: Invincible to crushing walls on last level.
FFB7C20000: Ignore water "up" currents.

NES

THE FLINTSTONES:
THE RESCUE OF
DINO AND HOPPY

00030803: Unlimited energy for Fred.
00030502: Unlimited lives for Fred.
000308FF: Unlimited coins for Fred.

PROBECTOR

00003203: Infinite lives player 1.
0000AA1X: X is the weapon you wish to keep. 1 is machine gun, 2 is fire, 3 is spray etc. The above code will also give you the rapid fire all the time.
00003303: Infinite lives player 2.
0000AB1X: X is the weapon you wish to keep 1 is machine gun, 2 is fire, 3 is spray etc. for player 2. The above code will also give you the rapid fire all the time.

SUPER NINTENDO

SUPER STAR WARS

7E08FB03: Unlimited lives.
7E0A7920: Unlimited energy.
7E08792A: Always have use of jets.
7E086E00: No need to kill Jawas, just head for sand crawler.
7E011C0X: Alters the difficulty. Try lots of values (3 is easy, 6 is hard).
7E0A792A: Unlimited health.
7E096FF1: Unlimited time (turn off at end of level).
7E08792A: Unlimited landspeeder fuel.
7E09850X: X = Gun type (0 = blaster, 1 = flame, 2 = seeker, 3 = rapid ion and 4 = plasma).
7E087664: Invincible in Death Star Trench.

TINY TOONS

7E009E03: Unlimited energy.
7E00B6A0: Super Dash. Dash is always available.
7E008E04:

That wondrous piece of kit known as the Action Replay has been selling by the bucketload. Seeing as there are new codes coming out all the time, I've decided that, as from next issue, we shall be having one page a month dedicated to Action Replay and Game Genie codes only. So get sending in those codes to: WHY OH WHY ARE GUNS N' ROSES PERFORMING THE DAY I'M ON HOLIDAY? CVG, PRIORITY COURT, 30-32 FARRINGTON LANE, LONDON, EC1R 3AU. And please make sure you write clearly, otherwise I can't make out the codes and fame and fortune (or, at least, £150 worth of games) will pass you by.

GAME BOY

TINY TOONS

0102C3C9: Infinite lives.
0102F0C9: Infinite energy.
0103F1C9: Infinite weapons for Bugs.
0103F2C9: Infinite weapons for Daffy.
0103F3C9: Infinite weapons for Porky.

STAR WARS

010392FF: Infinite lives.
01085BCA: Infinite energy.

FIRST FLIGHT

THIS MAN HAS CHANGED THE FACE OF SUPER NES GAMING FOREVER

Argonaut Software's Jez San looking suitably intense in his office in London, March 1993. "You haven't seen a fraction of what the Super FX chip is capable of yet," he claims, and reckons Argonaut's next two SFX games will show more of what it can do.

How did Super FX come about? We remember hearing rumours about a new super-chip for the SNES at CVG quite a while ago...

That's right. It nearly leaked out a while ago because it's hard to keep a big secret. What basically happened was, a few years ago when we had just started to work for Nintendo and signed up to do quite a few 3D games, we suggested to them the idea of doing a graphics accelerator chip. We've

always wanted to move into the hardware side of things, and were thinking about doing one on Amiga and NES, but then Nintendo steered us more towards the Super NES, because the machine was just coming out. The chip took a year to get working, and another year to get into production, and that's where we are now. We were going to do 3D games for Nintendo whether they used the chip or not, but the fact is that the chip ended up quite good, so now all the games we're doing for them are using Super FX.

What's the idea behind the Super FX?

"Everyone will be using the Super FX chip in a year or so."

Well, the Super NES was designed to play the type of games that Nintendo have previously done and become famous for. It's built to do

platform games really well. It's got lots of colours, great scrolling, multiple playfields, great sound, good joypads... every-

thing about it is built to do Mario type games, and it does them excellently. But that's just about all it can do, unfortunately. When Nintendo were designing the machine, they never thought about doing 3D polygon games, and by the time the really big 3D coin-ops like Starblade and Winning Run started to appear, the Super NES was already available. So, by adding extra power in the cartridge to do those functions, we now have the opportunity to produce the next generation of games for the existing hardware, rather than having to wait for the next system to appear.

...and it's all thanks to Super FX, the revolutionary microchip his company invented that makes the Super Nintendo perform the kind of mind-blowing graphical miracles that SNES gamers could previously only dream of. But what's the REAL story behind this piece of silicon wizardry? What can it do? And just how does it manage to be THAT sexy and hard? After being bowled over by the amazing Starwing last month, the first ever Super FX game currently setting the gaming world alight, CVG super-sleuth Gary Whitta tracked down Jez San and the Argonauts to find out the secrets of the black magic box...

When you're writing games that revolutionise the world of console gaming, constantly dealing with the Japanese and Americans and generally being a top man, it's not very easy to keep your desk tidy.

Meet the Starwing team - from left to right, Carl Graham, Jez San, Pete Warnes and Krister Wombell, who all played an important part in the project. Fellow team members Dylan Cuthbert, Giles Goddard, Rick Clucas and Ben Cheese unfortunately couldn't join us round the Argonaut Pool table because they're in Japan working on the next Super FX game.

So you're now producing the first Super FX games as well?

Yes, we're kick-starting the market with the first few games. After the market understands Super FX and sees what it can do, all the other developers will be using it.

Will the Super FX chip become a standard feature in all SNES games?

Er... no, because most games don't need it - only games that need high technology graphics. A regular platform

These destructible towers were taken from Starblazer, Argonaut's most famous game. Look out for other Starblazer references as you play!

game, or a regular Mode 7 game doesn't need it. You don't want to put an unnecessary cost on the cartridge by including a chip it doesn't need, so only games that require polygons or sprite rotation or texture mapping will want to use it. I foresee a time when maybe 50% of all Super NES games use the chip, but that's the best case scenario.

Were there any problems working so closely with a big company like Nintendo?

Nintendo never do games unless they can appeal to most of the market. Although we in Europe can appreciate polygon-based games, the majority of Japanese gamers don't really understand 3D at all. Nintendo wanted a game that everybody would enjoy, while we wanted to do the sort of game that we prefer, something like Starblazer. So Starwing was kind of a compromise between a 3D game and a more traditional shoot 'em up, and now we've done that introductory game to show everybody how wonderful 3D games are, we can do more sophisticated stuff like driving games and flight simulations.

Did it take a lot of persuading to get Nintendo to do a 3D game as a major product?

I don't think they needed persuading for them to do 3D games, because they know that 3D is the future, and that it's a massive market they've

"Super FX opens the door to much more sophisticated graphics for the Super NES. 3D is just the beginning!"

This Tron-like end-of-level baddy is a real killer, and only possible with Super FX - by the way, look out for a full CVG player's guide soon!

never been able to tap before - and it steals territory from the PC games scene! But it was a risk for them to do it as such a massive project with so many people on it and the new hardware.

So what does the Super FX chip actually DO, then?

Basically, it's a power enhancer for the machine. It's a fast RISC microprocessor, which means that it can run programs very efficiently. It can do the maths behind 3D polygon graphics VERY quickly

Surely though, the Super NES doesn't need any help with things like sprite rotation and scaling, which it already does really well?

The SNES can only rotate a single screen. You can't have more than one object rotating at a time with the existing machine, but with Super FX you can have a hundred sprites, all rotating independently and all at different sizes and scales! No current console can do sprite rotation like this. The Mega CD does, but that's an expensive add-on.

This is where Starwing was programmed - hard to believe, isn't it?

N How much of a difference will the Super FX chip make to the future of Super NES games? What kind of games will we be seeing?

A I'm sure that the vast majority of Nintendo third-party publishers will want to experiment with it, at least. The Capcoms and Konamis of this world will all want to try it out, but because of the cost, they won't use it for all their games. Some companies are more likely to use it than others, like Microprose who will probably do a little simulation with it, or the Japanese company T&E Soft. Their golf games are polygon-based, but they have an incredibly slow update - something like one frame per second. With the Super FX chip, they could do the same game but with real-time moving scenery. And you'll notice that all

the Formula One and driving games on the Super NES use Mode 7 and so they all look the same - if they used the Super FX they could all be different, with unique scenery such as buildings, trees and the like.

You'd never get effects like this amazing Walker on the SNES without the aid of the Super FX chip.

N Do you think we'll be seeing more variety in games because of the Super FX?

A Very much so! The reason why so many Super NES games look the same is because they all try to use the tricks that the hardware provides like Mode 7 and parallax

scrolling - they'd rather use the standard in-built effects than try to come up with new ones. With the Super FX chip, because it's programmable, you can invent your own effects. Sure, it's harder to program than the average CPU, but good programmers can now create totally new effects that have never been seen before! I think it'll open up a massive new variety of games.

"You haven't seen a fraction of what the Super FX is capable of yet!"

N Do you think other companies will try to produce their own custom chips, to keep up with the Super FX?

A We've heard rumours that Sega realise they are missing out on the Super FX and that they're designing their own one. Whether it comes out this year or next, I don't know, but it's bound to happen. Now that we've proved that it's possible to improve games by adding custom chips, I'm sure you'll be seeing a lot more

of them. But it does take a long time to do - it took us two years to produce the Super FX, and even if people want to do simpler chips, they'll take at least a year to develop, and that's a long time. We can enhance our own Super FX chip, too - the chip that's inside Starwing is not the end of the line, we could do a lot more. It's just a question of how much time and money you want to spend.

N What other technological developments do you see coming up?

A The 32-bit CD machines, such as the 3DO which we already know about are now on the horizon, but there are other systems in the pipeline from the likes of Atari and Sony, along with Nintendo's own 32-bit adaptor. It'll be a very interesting time, and it'll be extremely interesting to see which manufacturers come out of the closet, as it were. I think you'll see some very unexpected people manufacturing 32-bit systems in the very near future.

With the fruits of his labour stuffed comfortably in his back bin, Jez San reflects upon his achievements and looks ahead to a future glowing with promise. What's certain is that, thanks to Super FX, we are about to enter a new realm of console gaming, where the platform isn't necessarily king. Keep your eyes glued to CVG over the coming months for the latest developments!

YOB'S MAILBAG

I just can't believe what a bunch of acne-ravaged no-hopers you shower really are. Apart from the obvious problem of you all failing your GCSEs in English, you've also got the problem of having all the imagination of retarded dog turd. Which nicely brings me to a particularly sad individual who I've singled out this month. Yes, it's you, **Shane Foxtley!** You sent me a picture of a dog called George with one eye and green spots. The chances of anyone ever meeting this sad and loathsome creature are nearly as low as any of you ever getting the better of me. So next time you're thinking of writing a letter to me, make sure it's got at least one sentence worth reading in it. And don't think you'll get your letter printed by starting with something lame like, 'Dear Yob, you're a load of crap' or ending with something lamer than Shane's dopey dog, like 'Please print this letter or my hamster will kill you'. Give me something interesting to read next month or there'll be trouble. Send your rubbish to:

**MY LETTER ISN'T A LOAD OF COBBLERS,
YOB'S MAILBAG,
CVG, PRIORY COURT,
30-32 FARRINGDON LANE,
LONDON, EC1R 3AU.**

• Art Ed Jon always reads through all the letters and then gets Stuart Harrison to draw the pics for some of the sadder letters. We've included Jon's original instructions for the pics this month 'cos we think they're even sadder than some of the letters!

HOMWORK, SCHMOMWORK!

Dear YOB,

At Christmas I asked my parents to buy me a Megadrive but instead they bought me a C64. They said they bought me this so I could do my homework on it but they never bought me a printer to print work. So they said 'It plays games, doesn't it?' Yes, but they usually don't load or if they do it takes ages. How am I supposed to persuade them to buy me a Megadrive? Help!

**NATHAN STREFFORD
WORCESTER**

YOB: Could I just take this opportunity to tell any stupid parents out there that any of them that fall for a sales pitch that says you can do your homework on a C64 don't deserve kids and should have their reproductive organs removed. The best thing about parents like this is that if you own a couple, then you could also convince them that Super Star Wars on SNES is a useful revision aid for physics!

SOME KID PLAYING GAME WHILE HIS MUM/DAD HOME IN THE BACKGROUND HE CAN BE WEARING ONE OF THOSE STUPID HATS THAT LOOK LIKE THIS...

ALL MOUTH AND NO BRAIN

Dear YOB,

You worthless piece of plop! I would like to come over to that semi-detached cardboard box you call home and blow it to bits. Here are some questions.

1. Where do you plug a keyboard in on the Super Nintendo?
2. Why haven't you got a brain?
3. Which is better, the X-Wing or Mario Kart?
4. Is the Atari Lynx better than the Game Boy?

M DENNY
LIVERPOOL

YOB: If I'm such a worthless piece of plop why bother asking me questions?

1. In the secret keyboard slot.
2. Why haven't I got a brain? Why haven't I got a brain? I'm not the one asking where you plug a keyboard in on the Super Nintendo.
3. Well, seeing as the Encom T-65 X-Wing is a one-man space fighter which doesn't really exist except in the Star Wars movies and Mario Kart is a video game for the Super Nintendo, it's hard for me to answer that one. Have you got any other ridiculous comparisons you'd like me to make? Like 'Which is better, YOB, you worthless piece of plop, a Philips Softone 60W lightbulb or a Ford Fiesta 1.1L (A reg)?' See, it doesn't work, and I think we all now know who the worthless piece of plop is around here.
4. I'd say it was the new Ford Fiesta 1.1L.

CALL AN AMBULANCE

Dear YOB,

Today my trusty Spectrum broke. I couldn't understand it and burst into tears. I tried to load every one of my 500 games and none worked. I got very upset and read your February edition and laughed my bottom off. This was because of that stupid moron who thought he could upgrade his Spectrum to a Megadrive. Anyway, I must get back to smashing my Spectrum up. Hang on, I've got four questions to ask.

- 1) Have you got any money? (Hint, hint)
- 2) Could you give me it? (Bigger hint, hint)

3) Have you noticed that woman about to shoot you?

4) Do you wear a blue and white dressing gown?

ROSS McJURY
BANGOR,
N IRELAND

YOB: I really do not know why I'm bothering with this one. I must be just great. In answer to your questions:

- 1) Yes.
- 2) No.
- 3) What?
- 4) You'll be wearing a green hospital robe in a minute.

HOW TO BE SUCCESSFUL IN BUSINESS THE OBVIOUS WAY

Dear YOB,

After reading yet another crap review of Pit-Fighter I cannot stay silent any longer. Too many software companies produce a crap game and sell it by its license. Joe Public will probably see the game and anyone who hasn't seen a review will think, 'I liked the film/arcade game so I'll buy it.' They'll have wasted £35 on a total piece of crap. Software companies will make a lot of money this way because the gamesplaying public who read computer magazines (which is a large chunk) will see it got a good review and so buy it. This way they'll sell more copies and so make even more money. A prime example of this is Microprose. Practically every game they make is in the high 80s or 90s and so they sell a lot of copies and make loads of money. So come on software companies - if you want to make more money make better games.

STUART JACKSON (JACKSON)
ST LEONARDS ON SEA

YOB: It must have taken you ages to work out that priceless strategy for business success. I hope all you software companies are taking notice of Mr Jackson (Jackson)'s words of wisdom; produce good games and you'll sell more. Personally I think we have a potential Nobel Prize winner here.

HONDA PRELUDE

Dear YOB,

I, like most of the gamesplaying population, think that SF II is dead good, but whenever my brother and I play we always argue over what Honda says when he wins. If he does not laugh I think he says, 'deuce point' but my brother reckons it 'Hoo hont(!?)'. Who is right or what exactly does he say?

CAROLINE PLUMB
MANCHESTER

YOB: What are you talking about, 'Deuce point'? Why on Earth would E Honda say that? The game isn't called Street Tennis II, you know. I was under the impression he said something rude which began with 'Hoi! Fat...'. Actually, the thing I was thinking of is too rude, so I'm sure that can't be right. Your brother's probably closer to the mark with his Sumo-like grunting noise.

COMPETITIONS AT THE SPEED OF LIGHT

Dear YOB,

On the 9th of January I went into the newsagent and bought Computer and Video Games (January issue) and thought of an excellent entry for the Mega PC competition, but was shocked to see the closing date was tomorrow - and there's no post on Sundays. It seems a short time for such a competition to be running even if I bought the mag 2 weeks after it hit the shops. I'd like to say the magazine's good, but I got so annoyed I threw it away and now I'll never know.

JAMES BLAND
GRIMSBY

YOB: You got so annoyed you threw CVG away? You certainly don't live up to your surname! You also can't read the Next Month page. The January issue hit the streets on the 15th December so I'm amazed that you even found a copy of the mag left!

THIS MONTH'S AUSTRALIAN

Dear YOB,

You great big festering hunk of masculinity, you. It is an unwritten law of my society that no intelligent life-form throughout the expanding multiverse can match your wit and wisdom so I'm not even going to try. All I ask is that your YOBness might spare a few precious seconds of your time and listen to my pathetic grovelling.

- 1) Do you (personally) think that the Mario campaign has gone too far?
- 2) What does the future hold for Mario and his pals?
- 3) What is your monthly salary?
- 4) (The number four is a holy number among the people and therefore no question is worthy of its designation)
- 5) When is your autobiography coming out in paperback?

Yours platonically,
ANDREW MCPHEE
AUSTRALIA

YOB: And people wonder why I insult Australians.

PIC OF TYPICAL AUSTRALIAN REALY, STEREOTYPED BUT TRUE.

INDIANA JONES AND THE PAINFULLY HOPELESS IMBECILE

Dear YOB,

I have recently purchased a copy of Indy Jones and the Fate of Atlantis on the Amiga. I know that the PC version is a graphic adventure and I know that Indy Jones and the Last Crusade is a point 'n' click. Could I ask you if Indy Jones and the Fate of Atlantis is a point 'n' click or a beat 'em up that you could play with an ordinary joystick?

BARRY FORSTER
SUNDERLAND

YOB: Maybe I'm missing something which all these years spent languishing on the planet Earth hasn't prepared me for, but if you've already got a copy of Indiana Jones and the Fate of Atlantis why the hell are you asking me what sort of game it is? I mean can't you at least look at the pictures on the packaging. Or even read what it says on the back of the box - there's a novel idea!

BLOW-UP DOLLY

Dear YOB,

I have only one grovel. In the Feb 1993 edition of your brilliant Mailbag there is a picture of Sadie. Can you blow the photo up and turn it into a poster. Please, please, PLEASE!

NEIL PRICE, BARHAM, KENT

YOB: You're a sick man, Price. It sounds like you need something else blown up.

DAVID'S FRIEND'S FRIEND

Dear YOB,

Because you are the best and most incredible person in the whole of the universe (YE-E-S? - YOB) I decided to write to you with my problems.

- 1) I am going to America in August and I will probably buy a hand-held because they are much cheaper over there. How much will a PC Engine GT cost over there, how much are the games and will it be compatible with games bought in the UK.
- 2) Is there a colour Game Boy out in America? Because my friend said that a friend of his had one.
- 3) If so how much will it cost?
- 4) Why is Streetfighter II so slow on the Amiga?
- 5) Is there any way I can speed up the game by getting a faster processor chip or something?

DAVID SMITH, SILSOE
BEDFORDSHIRE

PS Please could you print a topless piccy of Sadie instead of that sad, unexciting one you printed in issue 135?

YOB: What is it with you lot and your sad fixation with Sadie? You're sick, the lot of you! Get out there and find a nice girl of your own to snog. Psychologists have a word for people like you and, unfortunately for you, so do the police.

1) The price of consoles can vary from place to place in the USA. Expect to have to pay about \$200 for a GT, and when you get back over here you'll have to buy imported American games. Japanese

ones won't work.

2) Yeah, it's probably his secret, invisible friend who lives at the bottom of his wardrobe next to the shoes. Mr Booties - that's who it'll be.

3) It'd cost your sanity. And it sounds like you're already viciously overdrawn on that account.

4) Because it's not on the Super Nintendo.

5) It'd be cheaper to buy a SNES Streetfighter pack.

PIC OF SADIE SMACKING THIS KID IN THE CHIN!

OFF THE RAILS

Dear YOB,
I am a proud owner of a Neo Geo, SNES, NES, Megadrive, Master System, PC and an Amiga. So can you please send me £100 for a television, because me and my family can't afford one.

BARRY SOONS
THE BUNGALOW
LEVEL CROSSING
MINETY

YOB: Never mind that. Can you tell me what it's like living in a bungalow on a level crossing? Doesn't it get annoying when speeding freight trains come through your bedroom wall in the middle of the night and you wake up the next morning a mile up the track?

THE INSULT MERCHANT

Dear YOB,
I would really like you to print this letter or you smell like a puddle of puke even though you do anyway (GREAT INSULT, THERE, AND GRAMMATICALLY EXCELLENT WITH IT - YOB). If you do not print this letter then me and the lads, Steven 'The King' Rintoul and Paul 'The Macho Man' Topping will come round and beat the hell out of you. Get the picture, Dozy? So will you just answer this one question? There have been rumours going about my school that Sega are going bankrupt because they have been making too many adverts and releasing too many games at the one time so the price of their games will have to go down so that more people will buy them. Could you tell me if this is true please? And if you don't then, like I said before, you'll die.

D SMITH,
LAND OF THE DUES

YOB: And to think, I used to rely on my industry connections to let me know what was going on in the world of computer and video games. All the time I should have been calling you and your mates in the 'Land of the Dudes'! Because, hey, if anyone would be the first to know about the financial situation of a giant multi-national corporation it'd be the kids at your school. Doh! I really must be dozy.

P SMITH OF SATURN

Dear YOB,
I think CVG is the best mag in the galaxy. I come from Saturn and I'm an alien and I eat toilet roll. I think you're a sad case and personally I'd like to give you a thick ear, but that's enough of that. Please answer these questions, Yob mate.

- 1) Which is best, Mario Kart or F-Zero?
- 2) Will Mario World V be coming out on the SNES?
- 3) Will you send me £100?

PAUL SMITH
PERTH

YOB: So that's Perth on Saturn, is it? Not Perth in Perthshire, Scotland, like it says at the top of your letter? You see what I have to put up with? Readers with the intelligence of your average custard slice.

- 1) Mario Kart.
- 2) Something along those lines, yes.
- 3) Maybe I'll send you a used toilet roll to suck on.

YOU LYING GET!

Dear YOB,
My dad works and owns a computer and electric shop. He has recently been studying the insides of the SNES and the Megadrive and, after a month's long work he has made a converter for both machines so that they can play each other's games. For example, I've been playing Street Fighter II on the Megadrive (the bad thing is that the joypad does not feature every single move) and Sonic on my SNES. My dad is flogging it to everyone for just £59.99. Ignorant and stupid as you are you will not believe a single word I am saying, but put it this way, my dad is working on other converters and soon I will have more consoles than you could ever dream of owning.

MICHAEL SAUNDERS

LONDON. I WON'T SHOW MY ADDRESS FOR OBVIOUS REASONS.

YOB: The most obvious reason being that you're a lying get and if your dad finds out you've been telling people that he makes impossible console converter units he'll tie you up in a bag with a block of concrete and throw you in the canal. And if he'd like some help, ask him to drop me a line.

YOB VS ROBERT KENDALL

Dear YOB,
You think you're so hard but I bet you couldn't have Robert Kendall (you don't know him, but that doesn't matter!)

A SCHWARZENEGGER
AUSTRIA

YOB: You're not the real Arnold Schwarzenegger, are you?

YO YOB!

Hiya! Just thought I'd write in to you to say you are the biggest dorkas ever. That was a joke. Ha! Ha! Ha! (ABSOLUTELY HILARIOUS - YOB). Actually, you are dead nice, I think your page is totally dudoid and I always read it first in CVG. What I wanted to say was that I think my Game Boy is the business and I think you'll agree it's miles better than silly Megadrives and Super Nintendos. Everyone at school is always talking about this really weird game called Streetfighter 2 or something, but I think that sounds a bit dweebish. I mean, as if you'd go out and fight streets! That was a joke. Ha! Ha! (GOOD GRIEF - YOB) The Game Boy and Amiga are the best computers around but Amigas have the best graphics and games. The advert for the Amiga 600 has an ace storyline and some brilliant computer graphics, but the teenager is a bit queer! (YOU CAN NEVER TELL JUST BY LOOKING - YOB) Just how I like them! Only joking. Ha! Ha! Ha! (I GIVE UP - YOB). Some of my best friends like Jonny and Pez beat me up because they think I know nothing about computers but I'll show them! Their consoles must be rubbish because they only have 16 bits - my Amiga must have loads! Anyway, it's been nice talking to you. With love,

DAVID ROWLEY
TODMORDEN, YORKS

YOB: I dunno, there's crazy people with guns in America, famine and drought in Africa, poverty and human depravity in Eastern Europe and then there's this sort of thing going on every day in Todmorden. It's a scary world.

STEVE SAYS:

WHAT'S YOUR PROBLEM?

Need to know when your favourite arcade massacre is due for conversion? Want to know where to get red-hot, exclusive, pre-released tickets for Games Master live? Perhaps you've got a spare few quid to throw around and need to know how to spend them wisely. Whether you want to find out where the Super Nintendo CD-ROM has got to or what the hell's happened to Streetfighter 2 on Megadrive, CVG's here to help! But who yah gonna ask? Well, for a concise, non mickey taking kind of answer, not Yob - that's for sure!

Fear not lowly ones, our resident big brain and smarty pants, Steve Keen, is at your disposal to answer any problems that've been gnawing away at your brain cells. His memory banks are the size of a small planet and he's got hair to match! So next month, set pen to paper and get your picture in the most fabulous publication since Fly Fishing by J.R Hartley!

Send those problems and a photo of yourself off to:

I WANT MY 15 HUNDRED WORDS OF FAME! WOT'S YOUR PROBLEM? CVG TOWERS, 30-32 FARRINGTON LANE, PRIORY COURT, LONDON. EC1R 3AU

FRIDAY PHONE-IN

As we're so good to you — and not at all because we want to spend two hours skiving on the phones — you can now ring the CVG boys (with the exception of the illustrious Yob) and ask those burning questions about anything from the outrageous price of software, to why Randy insists on wearing his sad shades even when it's raining outside. So, from 4 - 6pm on the first Friday of every month, jump on the phone and chat to your heart's content, provided I'm not eating my toast, and get totally carried away by the crews' incredible charm and wit!

NB: Please make sure that you have the permission of whoever pays the phone bill before you make that all important call or you're bound to cop it!

ARCADE ACTION

The time - way, way into the future; the 26th Century to be precise. In a strangely familiar Jurassic Park-type way, dinosaurs have been genetically brought back to life. They now roam the planet, living in parallel with humans. However, their curiosity value has rocketed and, with the new-found interest there emerged hundreds of poachers who began to hunt the monsters down and slaughter them. Having been made extinct before, the giants are in no hurry to do an encore and go on a rampage across the world in a bid to save their hides. To get to the bottom of the problem and stop the poachers, four brave dudes pile into a Cadillac and burn across the plains for an adventure that has sparked just a touch more than the normal amount of Capcom interest.

Pick a player, then get out and take on the terrors!

No Cadillacs here. Or dinosaurs, for that matter. Just sound beatings!

Cadillac AND Dinosaurs

WORLD CLASS

Cadillacs And Dinosaurs is huge in the States with a cartoon series pending, a weekly comic book, play-figures and even 3D books! The chances of Capcom doing a console conversion are pretty high, so keep your eyes peeled on a system near you. Our money's on a SNES cart, but what with Capcom's recent dealings with Sega, anything could happen!

BIG IS BEST

Capcom's latest coin-op is huge, offering a choice of four different characters to choose from and simultaneous three player mayhem. First up is the gentle (NOT!) giant, Mess O'Bradovich. The strongest character, once he gets angry it takes more than a bucket of water to cool him off. His flying lariat move sends poachers sprawling. Jack Tenrec is the 'Greenie' leader of the group. A hot-blooded guy who loves nature, his dashing sliding attack is his forte. The third crew member is Mustapha Cairo. A skilled engineer, his strengths lie in his panther-like reflexes and incredible speed. Lastly, the queen of Babelonia, Hannah Dundee. Very acrobatic, our Hannah can jump higher than a tree and has mastered an awesome triangular jump attack to rip into her enemies!

Not the softest bird in the world, we think you'll agree!

PICK ME UPS!

Race through the levels and collect as many of the bonuses as possible. Get kitted out with M-16 assault rifles, hand grenades, dynamite and knives and turn your character into a power house. You're bound to get knocked about a bit, so replace energy by tucking into roast beef and egg salads and wash it all down with coffee! Amass as much treasure as possible to continue funding your mission. If you find the secret points hidden throughout the worlds you'll boost your score with a selection of gold, fossils and jewelry. But above all, keep moving!

Crikey! A Cadillac! Not a crap one either, is it!

PAD-TASTIC, MATE!

Capcom has caught onto the success of its joystick combination style of control, used in Streetfighter 2, and has stuck some great moves into the new machine. All the characters have a 'special' which is called a Sure-Killing Technique, unleashed by pulling down and pushing up on the joystick and hitting the fire button. Each character can run across the screen with the dash and combine that with attacking moves, as well as some terrific combinations performed by overlapping two characters on the screen and attacking. There are loads more hidden ones too - just what you'd expect from the combination kings!

VERDICT

Cadillacs And Dinosaurs is a blast! The screen manages to keep up with the action and it's always clear what's going on. There are driving sections where you all pile into the Caddy and take a spin across the desert, battle through swamps against the evil poachers and crack skulls in scores of different locations with the Megacrush. There's loads of moves but, as with the most addictive games, you'll have to discover them for yourself - but that's half the fun. Give over a few credits to Capcom's latest and you might just get hooked!

PAUL ANGLIN

PREVIEW

MEGADRIVE

by ELECTRONIC ARTS

Around £40.00

LATE JUNE RELEASE

Stage of Development

75% Completed

The heavily-armed hovercraft is capable of knocking out this large suspension bridge.

'Without doubt, Jungle Strike is shaping up to be one of the biggest games of 1993'

During night missions, explosions brighten up the entire screen!

JUNGLE STRIKE

The sequel to one of the most controversial console games ever, EA's Saddam-busting Desert Strike, is almost ready to be cleared for take-off – and if it lives up to all the pre-flight hype, we're guaranteed a hot, hot Summer, whatever the weather. CVG hot spot Gary Whitta seeks it out...

I loved Desert Strike. Let's face it, it's not that often that you find a console game that's completely devoid of mushroom princesses and fairy kingdoms, where instead you can kick seven shades of shindola out of Saddam Hussein (or at least his lookalike) and his army of moustachioed goons, is it? Perhaps that's why, over a year later, it's still

one of Electronic Arts' biggest ever Megadrive sellers – and why EA, quite sensibly, is about to follow up on the original's chart-topping success with a game which they promise will be even MORE chaotic and action-packed!

From the screenshots here, you'll see that Jungle Strike doesn't look that different from the original at first glance – the same isometric perspective, plenty of helicopters, etc etc. But in fact, a multitude of new gameplay features are rumbling quietly below the surface. For a start, while Desert Strike was set entirely among the sand dunes, Jungle Strike's title is a little deceptive – in this game you'll fight not

just among the tropical rainforest, but also over rivers and oceans and even the snowy arctic wastes!

The main change, however, has been in the vehicle department. The trusty AH-64A Apache from the first game has been replaced by the even more advanced Comanche, and this time round the player can also choose to control a Special Forces motorbike, an assault hovercraft and even a radar-invisible Stealth fighter! The different vehicles must be used at various stages in the nine progressive campaigns, which now include night missions and more varied objectives, like capturing enemy commanders. In all there are 45 different missions!

Without doubt, Jungle Strike is shaping up to be one of the biggest games of 1993 – it's EA's first ever 16 Megabit cart, and the company is confidently predicting that it will outsell the original on its first day in the shops! Naturally, the company is being very protective, which is why you won't see any quotes from the programming team here or anywhere else – they won't be talking to the press until the game's release. A bit like Ryan Giggs, but different. Sort of. Whatever, we don't mind admitting that we agree with EA when they say it's going to be one of the year's top titles; from what we've seen so far, it's hard not to! Keep an eye out for the review book, and if I were you, I'd start saving my pennies up...

The arctic campaigns are tough because the snow camouflages your targets. This time it really is 'snow' joke! Oh dear.

Hovercraft or helicopter? The choice is yours!

'Guess who's the only man capable of stopping them?'

'In all there are 45 different missions!'

Collect those ammo boxes! It's nice to know some things haven't changed.

WHAT'S THE BEEF?

Jungle Strike follows on directly from where Desert Strike's controversial storyline left off. Though the insane General Kilbaba was wiped out by the player at the end of the first game, the sequel sees his son returning to take up the challenge, bent on revenge and joining forces with an evil South American drug baron (who also happens to be the controller of the world's largest private army). The two crackpots are plotting to build a nuclear weapon that will destroy not only the White House but the whole of Washington DC! And guess who's the only man capable of stopping them? Yep, got it in one.

This is what you've sworn to protect – the White House, Washington DC.

'ELLO JON, GOT A NEW MOTOR?

So why do you need all these different modes of transport in Jungle Strike, then? In my day, all we had to sort out baddies with was a trusty old Apache gunship and nobody complained! Actually, the US Department of Defence has been forced to provide you with all this state-of-the-art equipment because this latest mission is so damn hard! The General's son and his drug-dealer mate have fortified their stronghold with the latest in anti-helicopter defence systems, so the only way to sneak past defences and complete certain missions may be in a quieter vehicle, like the almost-silent hovercraft. Also, since some missions take place at night, you'll have to learn to master all the vehicles in near-zero visibility!

Aquatic antics as your hovercraft encounters an enemy speedboat.

Bingo! The enemy's underground snow compound is revealed!

PAST FORM

You won't be surprised to hear that the team behind the original Desert Strike has returned to produce this sequel, led by designer Mike Posehn. Unfortunately, Mike and the rest of the team have had their mouths stuffed full of cotton wool until the game's finished to keep the project as secret as possible, but for the record, Mike's credits include not only the top Desert Strike, but also the rather excellent Skate or Die and a number of other hits for EA. The point is, Mike's pedigree is good enough to win Crafts with, so there's little doubt that Jungle Strike will be a winner.

FORM PAST

WHAT HAPPENS NEXT?

GRAPHICS

As you can see, Jungle Strike is already looking pretty polished, with its smart sprites and backdrops. However, appearances can be deceptive, and there's still a lot of work to be done before the game's Summer release.

SOUND

Jungle Strike's distinctive theme music and sound effects are once again being produced by ex-Geordie and now EA's in-house musician, Rob Hubbard. It's usually the last thing to be added, once everything else is in place.

GAMEPLAY

Most of the gameplay is now in place, but the Jungle Strike team will be changing and tweaking elements of it right up until the last minute. Oh, and the motorbike isn't working yet and still has to be added, so that remains a bit of a mystery.

CVG COMPETITION

STAR WARS

**FANCY YOURSELF AS THE NEXT GEORGE LUCAS?
IF THE ANSWER IS YES, YOU COULD WIN...**

- A weekend at the Skywalker Ranch in California!
- Authentic Star Wars masks!
- A part in the next Star Wars movie!*

**WIN OUR AMAZING US GOLD STAR WARS VIDEO
DIRECTOR COMPETITION!**

As you've already read in News (unless you read the mag in some strange backwards fashion), US Gold will soon be bringing its blockbusting Star Wars conversion to Sega formats, and to celebrate the occasion, they've coughed up some of the BEST prizes ever!

We're not kidding. The lucky winner of this top-notch comp will be flown along with a parent or guardian) across the Atlantic to California, USA, where they'll spend the entire weekend, including a day at George Lucas' amazing Skywalker Ranch where the games are written. You'll meet the stars, see the latest games in production and generally have the most spiffy olly Star Wars-related time of your life!

AND FOR THE RUNNERS UP...

The four runners-up will each be walking away with a totally authentic Star Wars mask, produced by Lucasfilm themselves and almost identical to the ones used in the movie. You can be Darth Vader, Yoda, Chewbacca or an Imperial Stormtrooper! Impress your friends (or get kicked in, depending on what kind of friends you've got)! *Unfortunately, you WON'T be winning a part in the next Star Wars movie, because that was a lie to get you interested. But never mind, it worked, and you'll soon be starring in the LEAD role of your own Star Wars movie if you enter our competition!

WHAT YOU HAVE TO DO TO WIN!

These prizes are far too good for us to give them away to just anybody who can answer a few questions — so what we want you to do is get a video camera and re-enact a famous scene or scenes from the Star Wars trilogy on film! Feel free to re-write the script and change whatever you like. In fact we don't care what you do — it can be serious or funny — but it has to be good. What we want is some damn good entertainment, so be creative! The video that we're most impressed by will net the trip to the USA, and the next best ones will win the masks.

Elsewhere on the page we've given you nine suggestions for famous scenes you might want to do. But it doesn't have to be one of our ideas, and you can do as many as you like — you can even make an entire movie!

CVG'S VIDEO TIPS

We're not going to settle for just any old rubbish on these videos, so here are a few top tips:

- WE WANT to see lots of different Star Wars characters, so enlist your family and friends and dress them up in costume.
- EXTRA points will be awarded for Star Wars music, American accents and special effects.
- LOCATIONS are important, so if you can't get into Pinewood Studios, improvise in and around your house. Perhaps your dad's shed looks a bit like the Death Star, or maybe your back garden is a ringer for the forest moon of Endor.

When you've "wrapped" (top Hollywood expression there) on your movie, send the finished tape to **IF YOU STRIKE ME DOWN I SHALL BECOME MORE POWERFUL THAN YOU COULD POSSIBLY IMAGINE, CVG, PRIORY COURT, 30-32 FARRINGTON LANE, LONDON EC1R 3AU.** The closing date is the 31st of May 1993, and we'll be printing stills from the best entries we receive in a future issue. All that remains for us is to wish all you budding Lucases good luck, and may The Force be with you. Always.

If you're one of the runners-up in our fantastic compo, you too could look like this! (well, almost).

Can you come up with better special effects than THIS? Of course you can't but we don't care. Just do your best and you could be in the movie capital of the world before you know it!

Princess Leia and Mr Rebel Leader type person, pictured here in CVG's high-tech mail room, anxiously awaiting the first batch of your video entries. Don't keep 'em waiting, get filming!

George Lucas went out into the desert to film the Tatooine scenes for Star Wars, but you could just as easily do it down at the beach! Or in a toddler's sandbox! Or even the cat's litter tray! (Stop giving them ideas — Ed).

You'd think special effects like this would be impossible to reproduce on a shoestring budget, but you can get FX just as convincing with a bag of flour and a red torch. And some stormtrooper costumes, of course. And a Death Star set. And... (oh, shut up — Ed).

The CVG crew illustrate expertly just how good YOU could look if you win one of the limited-edition Star Wars masks — except that Garth seems to have forgotten to put his on. Now you know what they mean by the dark side of the force.

AND THE NOMINATIONS ARE...

Here are CVG's suggestions for the scenes we reckon will make the best videos. (In fact we picked them because we think these are the scenes in which you can make the biggest fools of yourselves). Remember, you don't have to take our advice and can film a scene of your own choosing instead, but our ideas are best, so there.

FROM "STAR WARS"

1. The Cantina fight at the start of the film.
2. The Light Sabre fight between Obi-Wan Kenobi and Darth Vader.
3. The X-Wing Death Star battle at the end.

FROM "THE EMPIRE STRIKES BACK"

1. The scene where Yoda gives Luke his Jedi training.
2. The scene where Han Solo is frozen in carbonite.
3. The Luke vs Darth Vader fight.

FROM "RETURN OF THE JEDI"

1. Any of the Jabba the Hutt scenes.
2. The Sarlaac Pit Monster fight.
3. The Speeder Bike chase on Endor.

THE RULES

There aren't any restrictions on what you can have on your video — your scene(s) can be as long as you like, but they can't be less than a minute, otherwise it's hardly worth our while all sitting down to watch it. We can only return your tapes if you enclose a stamped addressed envelope. Employees of US Gold and EMAP Images are not allowed to enter, and neither is George Lucas, because he's too good and can go to the ranch any time he likes anyway.

PAST FORM

Archer MacClean's history is well known to most gamers, having written some of the toppest titles ever, including *Dropzone* (of course), *International Karate*, *IK+*, *Jimmy White's Whirlwind Snooker* and *Archer MacClean's Pool*.

Eurocom is one of the longest-established development teams around, having worked on all kinds of projects over the years including *Elite* on NES. Graphic artist Pete Lyons has drawn more sprites for more video games than you've had hot dinners, so the whole project is in very safe hands.

PAST FORM

BOOM! One thing that hasn't changed (much) is the player death sequence, where the little rocket man explodes into a million pixels.

Bags of new alien enemies have been designed for the new game, including deadly shuttle craft like this one. Keep well away from the lava lake, too.

Here we've caught the game in what looks like a brief moment of rest. You'll not be surprised to hear that the player was utterly killed about a second after this photo was taken.

THE KILLER B'S

The gameplay may be rooted in the Seventies, but *Super Dropzone* has plenty of up-to-date new additions, like sampled speech, extra weapons, end-of-level, bosses, Mode 7 intro sequences and plenty of colourful space-age backdrops, which artist Pete Lyon has tried to make look like the classic sci-fi art of the 1950s. Most of the *Super NES*'s graphical features are being put to use, including a misting effect to create gas clouds and multi-layer parallax for the background planets. Pete has also had to design a whole new set of enemies to add to those few that have been brought over from the original. "There are so many shoot 'em ups on *Super Nintendo*, it's getting really stale," says Eurocom boss Hugh Binns. "All that happens is you get more sprites and bigger bosses, but the gameplay doesn't really change. This is really something different."

WHAT HAPPENS NEXT?

GRAPHICS

Pete Lyon has already created the backgrounds, and is now creating the armies of aliens the player will confront. He also has to create the impressive Mode 7 intro sequences, working from Archer's original storyboards.

SOUND

Though the original *Dropzone* never had any music, *Super Dropzone* will have a hot rockin' soundtrack - but not during the game, because Archer doesn't like in-game music. Also expect plenty of speech to warn you of incoming aliens.

GAMEPLAY

Always the toughest bit to get absolutely right, this is the area on which most work still has to be done. Most of the main programming is complete, but intelligence for the aliens and countless other factors still need work.

HOTSHOTS

AUTUMN RELEASE

Your pants will fill while the leaves fall when you clock the fab stuff coming in the Autumn!

SPRING RELEASE

As the flowers bloom, you'll swoon at the sight of the stunners coming your way in the Spring!

So you want to know what's coming this year. And you want to know when it's coming. And you want the latest pics. Look no further - we've got the lot in new-look Hotshots! Check 'em out.

SUMMER RELEASE

The sun's gleaming, and you'll be beaming! Check out this lot when the weather's hot!

Despite our humongous efforts to be 100% accurate, as y'all know, release dates can slide forwards (though usually backwards) with more ease than a piston in a Chevrolet. But, at the time of going to press, we've got rough dates for when the software houses expect you to get these games!

WINTER RELEASE

Snow's belting down, but you won't wear a frown when you see what Santa could bring!

Your trusty steed - the F-15 Strike Eagle!

Splash that bogey!

SUPER STRIKE EAGLE

SNES • MICROPROSE • ETBA

It was inevitable that Microprose would bring their most successful game ever to the Super NES as soon as they got the publishing nod from Nintendo, and now that Super Strike Eagle is nearly finished,

it's shaping up to be the best version of the lot. Believe it or not, when Super Strike Eagle appears in June, it will be the first REAL flight simulation for the 16-bit Nintendo (the likes of Pilotwings don't count), with Microprose retaining most of the sophisticated gameplay that made the computer versions so popular.

Of course the controls have been simplified and there's a slightly more arcadey feel, but most of the original sim's features are still here, including seven different scenarios and - a feature seen for the first time on this SNES version - the option to have TWO players piloting the same aircraft in a team mode, working together on flying, navigating and manning the aircraft's

Come in number fifteen, your time is up!

weapons systems.

From what we've seen so far, Super Strike Eagle could well be one of the biggest SNES games of the year. Check it out next ish!

SUMMER RELEASE

STRIKER

SNES • ELITE • £44.99

Ooh!

Having already made a bit of a name for itself on Amiga and ST last year (it was second only to Sensible in the Summer soccer stampede), Rage Software's Striker is once more warming up on the SNES's touchline for release at the end of the Summer. From the screenshots here you'd be forgiven for thinking that you're looking at Super Soccer (currently the one big football game on SNES), as Striker uses almost exactly the same 3D 'behind the goal' display system. The action in Striker is much faster and more fluid, however, and there's a lot more to it, too.

Basically, it's the same game that was such a hit with 16-bit computer owners a year ago, but with a number of improvements based around the console's superior hardware. Mode 7 has been used to render the authentic-looking pitch, and now there's an impressive indoor arena too, where you can rebound the ball off the echoing walls. Other than that, just about everything you'd expect is here - changeable tactics, dozens of teams from around the world with adjustable strips and player names and three tournaments (World Knockout, World League and Super Cup), to tackle. Striker is due out via Elite sometime in August - not long before the SNES version of Sensible Soccer is expected to hit the streets, so come this Autumn we could be looking at a whole new video soccer battle. Who will come out on top? I don't think even Jimmy Hill would like to predict the outcome of that one...

AUTUMN RELEASE

Jolly boating weather!

Ouch!

COOL SPOT

MEGADRIVE • VIRGIN • £TBA

Here in Britain we're all familiar with the spindly, spiky-haired character of Fido Dido, who keeps popping up on TV to sell us 7-Up, but over in the USA the fizzy pop is advertised by the far more bizarre character of Spot. In case you

didn't know, Spot is supposed to be the little red dot on the side of the can between the '7' and the 'Up', but he's grown arms and legs, wears sunglasses and is, so we're told, extremely cool. Now he's the star of his own computer game, he's set to become as famous in the UK as he is in America - at least that's what Virgin hopes.

Cool Spot the game is a multi-level platform thing (which looks more than a bit like a certain

game starring a certain hedgehog), in which Spot has to rescue eleven of his buddies (all called Spot) from the clutches of Wild Wicked Willy, who has captured them to prove to the world that they exist. The only problem is, Spot is only about an inch tall, so each level is packed with giant-sized perils, from the hermit crabs on the Beach to razor-toothed rodents and six inch nails, all of which are huge to the tiny Spot. Over 250 frames of animation have gone into making Spot one hip dude - described by Virgin as a 'fizz' em up', the game is due out in June on Megadrive, with Master System and Game Gear versions also on the way. Looks a treat!

SUMMER RELEASE

He may be small, but he ain't sad!

DOUBLE CLUTCH

MEGADRIVE • SEGA • £34.99

They're off!

ANOTHER racing game on the Megadrive? We're afraid so, but don't turn off just yet, because at least this one is a bit different to the rest. While most Megadrive racers are 3D behind-the-driver jobbies (Lotus, Road Rash etc), Double Clutch is a birds-eye-view scrolling racefest like the tabletop coin-op classics of old. Players select a driver from the four ready-made characters available (each one has their own strengths and weaknesses

Phew! Just managed to keep the line!

etc) before taking them out on a series of increasingly difficult circuits against the opposing computer cars. The tracks get more complex as the game goes on, which weather conditions like rain, snow and fog all helping to make things even trickier.

As is the norm with the most racing games, successful drivers pick up cash prizes for the efforts, which can be spent on customising the car with extras like new tyres, nitros and engines in time for the next race. You

can keep on racing for as long as you keep winning, and... erm... that's about it. This is by no means one of Sega's big Summer hopefuls, but given the cheaper than usual price, it might be a bit of a hit. It should be interesting to see how it fares against

the quite-similar Micro Machines, at least! Review next month!

SPRING RELEASE

Be careful - the weather's atrocious.

HOTSHOTS

Spring? Summer? Autumn?
Winter? Just look at the pic to find
out when the game's released!

Origin and Chris Roberts are pulling out all the stops to ensure that Strike Commander looks every bit as impressive as the original!

The graphics, we can confirm, ARE some of the most impressive the PC has ever produced, but we're still waiting to see if it plays as good as it looks. The player takes on the role of the leader of Stern's Wildcats, a mercenary squadron of fighter/bomber pilots in the near future, where government has been abolished and the world is run by corrupt corporations. The companies offer you missions around the globe, and it's up to you to decide which to take -

and £70 to spare, all your dreams about the ultimate flight sim might just come true with Strike Commander. We can't wait to go for a test-fly - be there when we do!

**AUTUMN
RELEASE**

STRIKE COMMANDER

PC • ELECTRONIC ARTS • £49.99

Could this be THE greatest flight combat simulation ever seen? It's a distinct possibility, seeing how it's been wowing the crowds at computer shows for the last two years and is quite possibly the most eagerly awaited PC game of the 90s. It's all the work of Origin Systems and, in particular, Chris Roberts, who produced the Wing Commander games and has since been refining his RealSpace 3D graphics techniques to a fine point for use in this, which is rumoured to be his biggest and best game yet.

Wing Commander, for all its flashy graphics, was somewhat low on gameplay. Can EA come up with the pretty pics and perfect playability in the up-coming sequel?

Look at those backdrops!

URIDIUM 2

AMIGA • RENEGADE • £25.99

While the fashion world goes crazy about a 70s revival, it seems the games world is currently having a bit of a revival of its own, with classic games from the 80s being revived and enhanced for the machines of the 90s. Bringing old C64 games back from the dead is in vogue, and programmer Andrew Graybrook is leading the way. Having already converted his classic Paratroid to the Amiga, he's now doing the same with the sequel, Uridium. He's been working on upgrading the revolutionary horizontal space blaster for the last eight months, and work is nearly

complete, so everything is on schedule for the game's June release. Forget everything you may remember about the original, because everything has been totally rewritten, except the basic concept. The idea is still to speed across the tops of gigantic, heavily defended star cruisers in your com-

Uridium 2 - coming soon to an Amiga near you soon!

pact Manta fighter and destroy them, but now the game features even BIGGER ships that scroll in all four directions, a variety of rock-hard bolt-on weaponry, sampled speech, extra sub-games and even a rave soundtrack by The Orb! Every graphical trick in the book has been used to create the stunning 32-colour backdrops you see here, so if nothing else Uridium 2 promises to be a visual treat. We reckon it could be THE Amiga shoot 'em-up of '93, and may even take the blasting throne from Team 17's Project-X. Amiga psychos start licking your lips in delight...

SUMMER RELEASE

GOAL!

AMIGA • VIRGIN • £30.99

The Sensi view!

Action all the way!

Amiga owners who think the football roost is ruled by Sensible Soccer might be in for a shock this Spring if Virgin and Dino Dini have anything to do with it. Since defecting from Anco, the man who created Kick Off and Kick Off 2 has been beavering away on Goal (which is actually Kick Off 3 in all but name) for Virgin.

Arguments still rage among Amiga owners about whether Kick Off 2 is a classic or just complete crap, but Goal might be the game to silence the critics once and for all. Fans of Kick Off should be pleased at least, since Dino has retained and improved the same clever control system, while adding a number of new features aimed at toppling Sensisoccer from the top of the footballing pile. Not only have the graphics been radically enhanced, but you can now play from a variety of different views, including a Sensisoccer-style perspective. It's not been implemented yet, but there's also a feature to rotate the pitch through 90 degrees and play horizontally rather than vertically. Is Goal! going to be the box-all-and-end-all in football games we're all expecting? It's still too early to say, and Dino is under more pressure than Manchester United to pull this one off. We were treated to a pre-launch viewing a couple of weeks ago and, from that swift look, we reckon it'll be a winner.

SPRING RELEASE

Notice how Ryu looks a little harder on the Engine?

STREET FIGHTER II

PC ENGINE • NEC/CAPCOM • £TB A

Hooray! At last PC Engine owners have REALLY got something to shout about on the software side, having beaten their Sega-owning pals to the post for the next version of the world's most popular game. While Megadrive owners wait impatiently without even an official release date to

hang onto, Engine fans will be playing Street Fighter II on grey import this Summer!

Details are a little thin on the ground - we don't, for example, know if it's plain old Street Fighter II or the control-the-bosses Champion Edition, so please don't phone us up and ask, because it depresses us. One thing we DO

know is that it looks every bit as impressive as the Super NES, although the graphics have that ever-so-slightly chunky feel that Engine owners have come to know and love. And yes, ALL the characters and moves are in here, including all the bosses, so it looks as though NEC and Capcom have done a faithful job on the conversion.

It's difficult to say exactly when Streetfighter II will

be filtering through to your local Engine stockist, but rest assured it'll not be long!

SUMMER RELEASE
