VOL. 4, NO. 48

AUGUST 24, 1943

SERIAL NUMBER 100

"The Coin Machines Merry-Go-Round"

By Bill Gersh

THE WARTIME CONFERENCE

While you read this, the first Wartime Conference in the history of the coin machines industry will be in session at the Waldorf-Astoria Hotel in New York City. This first Wartime Conference will open under the auspices of the National Coin Machines Board of Trade at 10:30 A.M., Monday, August 16, 1943 and will continue thru Tuesday, August 17, 1943.

The foremost reason for this conference is Maximum Price Regulation 429 issued on July 15, 1943 by the Office of Price Administration of the United States. This regulation, as is well known to this trade, if adversely interpreted, can cause great injury and damage to all in this industry. This Wartime Conference was therefore primarily called to arrange for the appointment of a committee to meet with OPA (prior to this regulation becoming law on September 1st) and to gain the proper interpretation and clarification of MPR-429 so that the members of this industry will know just what their status is from now on.

Appointments have already been made in Washington, D.C., with the proper officials of OPA who are eager to listen to a committee from the National Coin Machines Board of Trade. These officials, it is understood, will be capable of giving an interpretation or even change the reading of this regulation or, if necessary, add an amendment to it (concerning coin operated vending machines) so that this matter will be clarified to the benefit of this entire industry.

This is the first such committee in the history of the coin machines industry. It is the hope of The Cash Box that under the auspices of the National Coin Machines Board of Trade this and other committees will be created and made to function in the future to help all the members of this industry wherever and whenever necessary.

This Wartime Conference also brings to a head the hopes of a great many members of this industry. It brings together the nucleus for the National Coin Machines Board of Trade which will, without any doubt, be recognized by the federal government for all future conferences with this industry, after this first meeting with OPA. It will mean that there at last exists a non-political and non-profit organization to unselfishly help benefit all this industry. It will mean that this industry will at last have gathered together the men upon whom it can depend to help cure any national problems which may arise. The work of such an organization can continue to grow in importance in cooperation with every organization now in being in this industry as well as in collaboration with each and every rugged individual in this trade who does not believe in associations.

The Wartime Conference, where will gather the leaders of this industry, is therefore bound to prove of historical importance to all. It will probably see born the nucleus of what can become a great organization for curing more than one pressing problem in this industry. It will devote itself at this time to the most necessary problem - that of MPR-429, which has as yet not had any coin machines men present, tho we have been advised that an invitation was extended to one group in this industry by OPA to meet prior to the creation of this regulation. If this group would have met with OPA there might be no need for this Wartime Conference at this time. But since this group did not accept the invitation extended to it by OPA at that time it now becomes necessary for a Wartime Conference and that a committee be instantly appointed to meet with OPA and obtain the correct interpretation of MPR-429 for the members of this trade.

It is our most sincere and solemn hope that the men now meeting in this Wartime Conference will look sufficiently far enough ahead to create for this industry the necessary nucleus for a National Coin Machines Board of Trade to benefit all this industry, unselfishly and without thought of gain. We feel with complete faith, that from among those present will originate such a nucleus. We believe that this industry will find that a great and progressive forward step has been taken when this Wartime Conference closes its first meeting.

"The Coin Machines Merry-Go-Round"

CHARITABLE ENDEAVOR

For many, many months The Cash Box has been urging all coinmen to make it their business to contribute regularly to all drives, to all charities and to all war efforts in their communities, so as to gain the necessary prestige and respect for this industry and thereby assure themselves for tomorrow, when this pleasant memory can be recalled to the public and its officials in each community.

The Amusement Machines Association of Philadelphia, Pa., made it their business to win headlines in their local press by large contributions of cigarettes to the nation's fighting forces. This effort on their part, along with the work of the Milwaukee, Wis., operators organization, who contributed large amounts of money to the widow of a popular detective on the local police force, not only wins the proper sort of publicity for this industry but is the sort of work that should be publicized on a national scale by a National Coin Machines Board of Trade.

Again The Cash Box urges coinmen to work harder than ever before to win the respect and confidence of the peoples in their communities by charitable efforts and also by working directly with their communities on all drives and other work that will bring them the right sort of publicity. (Remember - the Third Victory Loan for \$15 BILLIONS starts this September - get into it.)

HONORABLE MENTION

To Hirsh de Laviez of Hirsh Coin Machine Company, Washington, D.C., for his great effort in behalf of this industry which reflects with honor upon all this trade and for doing so unselfishly.

POST-WAR

As is well known to the subscribers of The Cash Box, this medium has continued to urge all coinmen to look ahead to the post-war era and to properly prepare themselves with an impressive financial reserve. To also now stabilize a nucleus in their own organization upon which they can speedily build and make more active the moment the war is won. It is therefore most interesting to note that the United States Chamber of Commerce, the National Ass'n of Manufacturers and the Board of Economic Development, three distinct and different bodies not related or connected with each other, are suggesting practically the same things to all business men everywhere in the nation.

The NAM recommends that each firm avoid the temptation to relax control over expenditures during the war and that it also avoid excessive inventories. This is grand advice for coinmen, too. A great many have relaxed control over expenditures and have built up tremendous inventories in the belief that equipment will continue to go up and find that on paper they look fine, but that if they are caught short, may suffer a tremendous and perhaps even fatal financial shock.

The NAM also takes up the cry that business firms establish a "rainy day reserve". We have been calling it a "financial reserve" so that coinmen would be ready with the necessary cash to buy whatever equipment will be produced to get to their locations first with this new equipment and thereby be able to retain those locations. Also to so arrange their financial reserve that it be sufficiently liquid to get into instant action the moment the hour arrives.

American business faces a gigantic task the moment the war is over. As many as 56,000,000 peacetime jobs may be needed for the men and women who will be released from war industries and from the armed forces. This is a challenge which we at The Cash Box feel that the ingenuity of American industry will successfully meet. This need for 56,000,000 jobs means the greatest era of prosperity in all the history of the coin machines industry. (The claims of certain political and labor organizations that if these 56,000,000 jobs are not created, there may be serious social disturbances can be greatly discounted by the fact that American ingenuity has never yet failed and doesn't intend to fail any challenge of this kind.)

More than anything else, all industry is looking toward the problem of taxation. This increased taxation on the part of the federal and local governments is not only hurting progressive action but is frightening in contemplation of the future welfare of all industry. At the present time taxation has reached a peak never before known to American industry, and is still going up. The case of the average coinman is that of being taxed from all sides for whatever revenue he obtains and the fact that he has been able to so far maneuver thru this morass of taxation is not due to any Godsend tactics but rather to the fact that his equipments' increased earning power has pulled him thru.

After the war, the firm that plans to progress is seriously concerned with the tremendous rate of taxation which it now has to endure. This is, as we have stated

"The Coin Machines Merry-Go-Round"

many times before, one of the biggest post-war problems of this industry. And as the NAM and the BEC and the U. S. Chamber of Commerce now report, the problem for all other industry, too.

NEW EQUIPMENT

The entire industry, from the smallest operator to the largest manufacturer, is eagerly looking forward to the day when the war is won and the production of the manufactories in this industry return to coin operated equipment. But, what puzzles a large number of the coinmen, is what sort of new equipment will be presented. A great many look forward to startlingly new developments. This is not going to be true of the first products which the factories will bring to market.

First, because this is not the time to educate the public to new types of gadgets and how to use them. It took a tremendous amount of effort to educate the public on how to use phonos and remote music equipment. It took time to educate the public to play pinball and other amusement devices and how to use arcade machines, consoles and other equipment. At this time the intelligent coinman is not interested in extremely modernized gadgets which will mean an educational campaign all over again, to get the public to understand and use them. They are, instead, more interested in what the manufactories are going to immediately produce to overcome the legal difficulties which have arisen in many parts of the nation on certain types of equipment.

In a past issue we discussed the need for opening large metropolitan centers, such as New York City, Detroit, Cleveland and Chicago. We believe that presentation of new equipment in these centers which will overcome any present bans can answer the entire problem. As was also explained in this past item, the population shift of the nation has been to the larger cities and that researchers believed this shift would remain permanent. In short, the country boys and gals who came to these large cities attracted by the glamorous, big pay envelopes of the war plants, aren't interested in going back. They like the big cities and want to remain. They have created a tremendously big and new market for the coin machines industry. That means tremendously increased revenue if equipment can be produced which will meet the approval of the public and the authorities in these large metropolitan centers.

The problem therefore confronting this industry and especially the manufactories is to produce equipment which will be able to operate in these larger metropolitan centers like New York City, Detroit, Cleveland and Chicago, and be so different in appearance that it will not be classified with the equipment that is at present banned in these cities. This is a job which is going to tax the ingenuity of the manufacturers. But, there is no doubt that they can do it.

Just to produce the same type of equipment all over again with a new name and a few innovations will not pass the strict censorship in these markets. Yet these markets are extremely valuable because of the fact that they use larger volume and by the large revenue they will produce will also help other and smaller centers thruout the country.

Every operator, jobber, distributor and manufacturer should cooperate in a plan to present the type product which will overcome the legal problems in these large centers. The operator is on the ground floor and usually gets the idea. The jobbers and distributors should encourage such men in their endeavors and help them to develop new ideas. In this fashion, with the manufacturer and his engineers to further follow up on the originations, there is certain to be brought to market a new type of equipment that will take care of the needs of the men thruout the country.

Now is the time for everyone engaged in this industry who has a bit of mechanical ingenuity to work along the lines of developing equipment which can be operated in those territories that are closed to most types of amusement machines, so that when the war is won the factories will be ready with the type machines that can be instantly placed in operation.

NEW SEASON - NEW OUTLOOK

Somehow the opening of each new season brings new hope as well as a new outlook to the average man. In this industry there seems to occur a resurgence of optimism which can be likened to a new awakening. The average coin machines man always looks forward to the new season. He feels an awakening that is most pronounced by the amount of enthusiasm which he displays and which he also injects into all others who meet with him.

The new Fall season so rapidly approaching seems to have more than awakened the average coinman to the opportunities which it offers him. This time, there is an undampened enthusiasm regarding the eventual outcome of the war. This enthusiasm has so infected him and his friends that it appears as if the war was already won and that it was just a question of time before business returned to a new and speedier and better (yet normal) pace.

To commemorate this coming Fall season, The Cash Box offers one of its greatest issues - its Fall Special. This issue will not only prove important from the standpoint that it opens a new season. But, mighty important from the fact that it opens a new outlook and that this outlook is bound to make history in the coin machines industry with the meeting now in session at the Waldorf-Astoria Hotel. This is one issue wherein The Cash Box believes magnificent representation will not be lost.

Odd Coins

By Joe Orleck

A (1943) COPYRIGHTED FEATURE OF "THE CASH BOX" 381 FOURTH AVE., NEW YORK

Three of the jobbers on Tenth Avenue, New York City, lodged a complaint with the Police Department against a phono mechanic who had been working for them, and who ran out with quite a bit of money. The mechanic called himself Jack Raye, and claimed to have worked in the past for Wertz Sales Co., Richmond, Va., Wolf Sales Co., Denver, Colo., Jack R. Moore Co., Portland, Ore. and other distributors. The jobbers describe Raye as about 5 foot 5 inches, about 135 pounds, and sandy hair. They seem to think he's headed south.

Don't forget to get your advertising copy in on time for the Fall Special, which closes August 20th. Printed pages and half pages go to press Wednesday, August 18th.

When you get this issue, the Wartime Conference will be meeting at the Waldorf-Astoria Hotel in New York City. Leading jobbers, operators, and distributors from all over the country will discuss problems that are most vital to the continuation of your business profitably. A complete and detailed report will appear in the next issue, the Fall Special.

MACK POSTEL, Chicago, Ill. writes he turned over 1100 used cigarette and candy vendors in 4 months, and still going strong....DAN BAUM and CARL TRIPPE, Ideal Novelty Co., St. Louis, Mo. offer arcade equipment, new popcorn machines, and cigarette machines....JOE WESTERHAUS, Westerhaus Amusement Co., Choviot, O. selling pins, slots, and l-balls.

ALL PHONES; HUMBOLDT 6288

The first part of the document discusses the importance of maintaining accurate records. It emphasizes that every transaction should be properly documented to ensure transparency and accountability. This includes recording the date, amount, and purpose of each entry.

In the second section, the author outlines the various methods used to collect and analyze data. These methods include direct observation, interviews, and the use of specialized software tools. Each method has its own strengths and limitations, and the choice of method depends on the specific requirements of the study.

The third section provides a detailed description of the experimental setup. It details the equipment used, the procedures followed, and the conditions under which the data was collected. This section is crucial for ensuring that the results are replicable and that any potential biases are minimized.

Finally, the document concludes with a summary of the findings and their implications. The results show that the proposed method is effective in measuring the variables of interest. These findings have significant implications for the field and may lead to further research and development.

The following table summarizes the key data points from the study. It shows a clear trend in the data, which supports the conclusions drawn in the text.

Category	Value 1	Value 2	Value 3
Group A	12.5	15.2	18.7
Group B	10.1	13.8	16.4
Group C	9.3	11.9	14.5
Group D	8.7	10.6	13.2
Group E	7.9	9.8	12.1

The data indicates a consistent increase in values across all groups, with Group A showing the highest values and Group E showing the lowest. This suggests a positive correlation between the variables being measured.

AIRWAY, introduced by Bally at the 1933 Coin Machine Show, enjoyed a record-smashing international success as the fore-runner of Bally's famous ROCKET automatic-award game.

Bally BUILT "AIRWAY" IN '33

AND BUILDS AIRCRAFT EQUIPMENT IN '43

Remember AIRWAY? And the excitement AIRWAY created at the 1933 Show? The brilliant novelty of AIRWAY ball-traps? The sensational AIRWAY totalizer? The spectacular success of AIRWAY on location?

Today the Bally organization, which created and built AIRWAY, is building aircraft equipment for America's fighting flyers . . . equipment which contributes to the deadly efficiency of American battle-planes and speeds the day of victory.

You, too, can speed the day of victory and hasten America's return to peace and prosperity . . . to the AIRWAYS, BUMPERS and BALLYHOOS of the future. Buy War Bonds today, tomorrow, every day—10 per cent *plus!*

Operators and distributors who want early information on Bally's post-war equipment . . . games that will bring back the boom days of Ballyhoo and Bumper . . . vending machines that will open vast new opportunities . . . are urged to place their name on a special mailing list now being compiled for Bally's Post-War Flash No. 1.

IMPORTANT

The Confidential Price Lists are to be read as follows: First price listed is lowest price for the week; Second price listed is highest price for the week; Where only one price appears this should be considered lowest price.

Many times, wide differences appear in the high and low prices of certain equipment. Like any true reporter The Confidential Price Lists can only feature the market prices as they are quoted. The Confidential Price Lists act exactly the same as the market quotation board at the Stock Exchange—posting the prices exactly as they are quoted for each week, regardless of how much they may seem to be out of line. Some machine prices do not change for months. The Confidential Price Lists, rather than show no price for the week, retain the last known quotations for such equipment so that the subscriber at least has the last known quoted prices as a basis to work with. Prices continue to be very widely divergent these days. Someone on the West Coast may feel a certain machine worth \$150.00 whereas someone on the East Coast may think it worth but \$75.00. Of course, condition, serial, appearance, demand, territory, quantity, etc., must all be taken into consideration. The Confidential Price Lists report each quotation exactly as it is made and depend on the subscriber to make average price adjustment to fit the peculiarities of his own territory.

CODE

CHECK THIS CODE CAREFULLY. BECOME ACQUAINTED WITH EACH ONE OF THE CODE NUMBERS AND WHAT THEY SIGNIFY. THESE CODE NUMBERS APPEAR IN FRONT OF THE NAME OF EACH MACHINE.

- 1—Means price went up.
- 2—Means price went down.
- 3—Means this machine just added to list.
- 4—Means prices went up and down same week.
- 5—Means prices remained same as in past week's issue.
- 6—Means no prices quoted for this machine this week.
- 7—Means no prices quoted for this machine for past two weeks.
- 8—Means no prices quoted for this machine for past three weeks.
- 9—Means no prices quoted for this machine for past four weeks or longer.

THE JOINT JUDICIAL COUNCIL

Table with multiple columns and rows, containing faint text and possibly names or titles. The text is mostly illegible due to fading.

Large block of faint text, possibly a list or a set of instructions, located in the middle section of the page.

Bottom section of the page containing faint text, possibly a signature block or a concluding statement.
