READER of the MONTH!

AKHUEMOKHAN PATRICK SERIOUS!

"Meaningless, all is meaningless!" Words from a man who loves his GBA and thinks deeply about his games, Akhue is our reader of the month for his two page long poetic contemplation on the state of games today that he sent us, but which was a bit too cryptic to be printed. But one thing is for certain - he didn't like the Dreamcast much. Peace.

The way of the Samurai isn't just about fighting, there's the whole cultural aspect as well - like music for instance. My fave songs are 'It's Ronin Men' and 'Samurai, Early in the Morning', also anything by Katanarama or the Ronin Stones.

As there's not that much work for Samurai these days I do weddings and kids parties. I dance around a bit and if they don't like it I slice up their chubby heads with my really sharp sword. They must learn to be honorable and respect the Samurai.

When I was just a baby Ninja, my teacher said to me 'consider' that which exists to exist and that which does not exist to exist, and recognise things just as they are.' So I told him straight - that doesn't make any sense.

As a Samurai you treat nature with respect and reverence. So one day I saw this cute squirrel, tried to pet it and it bit me. So I shaved it's head up into wafer thin bits with my really sharp sword.

Being a Samurai, doesn't mean you don't have family. I've got a kid brother and he's really annoying, so I use my Samurai training to remain honorable and patient. But then I just stab him in the eye with my really sharp sword.

GTA VICE CITY EXPOSED

VICE CITY - THE FACTS!

Why *Vice City* will be more than twice the game *GTA3* was.

	GTA3	VICE CITY
WEAPONS	15	40
VEHICLES	50	120
HOURS OF MUSIC	3.5 HOURS	9 HOURS
VOICE-OVERS	2000	8000

- Release date: October 22nd 2002.
- Developers: Rockstar North.
- For PlayStation 2 and PC only.
- Main character Tommy Vercetti.
- You can now enter buildings.
- Auto targetting & instant lock-on.
- Features martial arts moves.
- Map display has height monitor.
- Motorbikes are included.
- Improved Police and citizen AI.

Everything you need to know about the new *GTA!*

At last! The most eagerly awaited game of the year has been unveiled and GM's here to bring you the very first details of... *Grand Theft Auto: Vice City!* (You don't know how much we've been looking forward to typing that).

Since our world exclusive review of *GTA3* last year it has gone on to

sell 7 million copies worldwide making it the most successful PlayStation 2 or PSOne game of all time. Ever. Not that it was all down to us or anything.

Enough of our yacking, see what Rockstar have got in store for us, remembering all the time that it's just a few short months away from release! Much more next month!

The Gameplay!

It's the same mission based structure with the familiar control set-up but Rockstar have addressed the biggest problem in *GTA3* - the aiming system. This time the crosshairs will lock on to the highest priority target rather than the nearest and will change colour according to the degree of threat the target provides. It's not just rival hoods you'll be capping this time as you can now shoot out the tyres of other cars - perfect for slowing down the police. Then there's a new crouch move which should be useful in street battles as Tommy will be able to take cover behind walls and benches.

The mini-missions will return and while details are scarce at the moment we discovered that a special pizza delivery mini-game is to be included.

The Story!

As *Vice City* is situated in a different place and time period to *GTA3* there are no shared plot strands, this is completely new territory. This time we're in control of Tommy Vercetti a 'wiseguy' and street hood, who works for the Forelli brothers. When we catch up with him he's just been released from prison where he's patiently served his sentence without ratting out his employers. As reward for his

loyalty, Sonny Forelli sends Tommy to expand their 'business' down in Vice City. Sadly, Tommy messes up his first deal and loses his bosses' money. In order to pay back the cash to his bosses, who aren't known for their patience, Tommy has to use his initiative and talent for violence to gather the cash in Vice City. On his side is bent lawyer Ken Rosenberg who provides a pastel suit and contacts in the Vice City underworld...

▲ You only have to wait till October till you'll this charming cover in your local games shop just waiting to be snapped up.

▲ How's that for 80's styling - stone washed jeans, white trainers and a souped up BMW. Lead character Tommy wears his Hawaiian shirt and Adidas Superstars well and check out the silver Uzi - Miami nice! Ahem.

▲ With the brand new aiming system in place it should be easier to pull off drive-by shootings. An essential skill for would be gangsters.

▲ Rockstar promise that *Vice City* will be loaded with mini challenges and sub missions. Golf!

p. 10 HALO 2

Say er, "Hi, you alright?" or even "Hello!" to *Halo 2*! Gorge your eyes on the first screens and facts and check out the poster on P.58!

p. 12 DOOM 3

Eye vibrating new screens and info on what must be the best looking game in the world. Ever. Remember friends, everything you see is IN GAME!

p. 15 RESI 0

A fresh batch of beautiful *Resi 0* screens plus an all new and dead mysterious character. Looks like a goddam hippy. And please, don't have nightmares.

THE BIGGEST NEWS FIRST! ♦ THE BIGGEST NEWS FIRST ♦ THE BIGGEST NEWS FIRST! ♦ THE BIGGEST NEWS FIRST! ♦ THE BIGGEST NEWS FIRST! ♦

The City! Take a GM Guided Tour...

Vice City is based on Will Smith's second home - 'Miami', location, of course, of Miami Vice and Scarface. It's the land of sun, sand, bikinis, linen suits and is much easier on the eye than the dark streets of Liberty City... Plus it's twice the size! Yep, if you thought Liberty City was big you ain't seen nothing yet. Also rather than having the three island setup, the whole of Vice City is open to roam around right from kick off. But it's not just streets to explore as *GTA: Vice City* has interiors as well, so Tommy will be dispensing his unique blend of community action in discos, hotels, shops and bars! The look of the game has tweaked and is far tighter than *GTA3*. The textures are more high res, there's a new lighting system to handle all of Vice City's neon and the character models have been altered. Instead of the boxy appearance all inhabitants are fully skinned, far more convincing and found in greater numbers. Vice City is alive with activity with tourists, joggers and sweating old people all blessed with better AI. Then there's rival gangs who are busy with their own illegal activity and police maybe too busy with them to care about you. Great!

▲ With the palm trees, beaches and blue skies it's a paradise compared to the gritty streets of Liberty City. It's like being on holiday!

► Now you'll be able to enter buildings like this as some missions are made up of interior and exterior action.

The Soundtrack!

Not only will Tommy look good but he'll sound good. Yes, he'll speak and who better to provide the voice over than star of *Goodfellas*, Ray Liotta! Amazing casting, mainly as it's so obvious. Rockstar also boast they've acquired the service of another 20 top Hollywood actors to provide the rest of the voices. No *GTA* game would be complete

▲ Ever since he was a young boy he always wanted to be a gangster and now he's typecast.

without the radio stations, but instead of creating their own mood music, Rockstar have licenced over 90 songs from the 80s including tracks from *A Flock of Seagulls*, *Cutting Crew* and the *Morecambe and Wise* of pop - *Hall & Oates*.

The Vehicles!

▲ An old skool stretch limo. Just the thing to ferry around the local mafiosa in bulletproof comfort.

▲ Check out the Lamborghini! Just the thing for pulling up to the discoteque in style.

All the vehicles available will be authentic to the time period so expect sharp looking Ferraris and the odd DeLorean would be nice. But brand spanking new to the *GTA* universe are bikes! Yep, Tommy will be able to straddle a hog and leave the police eating his dust. And ladies will be able to hop on the back! You can also expect boats to play a much bigger part in this game as a series of canals and harbours are sprinkled throughout Vice City.

SCANDAL MONGER

PLAYSTATION 3 CELLS OUT

Top boffins from Sony, IBM and Toshiba have created a new chip called 'The Cell', which is rumoured to be for a PlayStation 3! Development is at very early stage but it should be ready for mass production by 2004. It's said to be able to 'handle high-bandwidth communication and run multiple devices' - which can't be a bad thing.

SHOUTING "LLAMA, LLAMA, LLAMA!"

How much would you pay for some fabulous old-skool shooting action on your PC? How about a fiver? That's all GridRunner++, the latest from legendary developer Jeff Minter, will cost you. Check out the demo, from www.llamasoft.co.uk. Full review next month.

LIGHTS, CAMERA, TAXI

Film production company Mindfire Entertainment has announced that a movie of mental driving game *Crazy Taxi* is currently in production. They hope to create a film with the quirkiness of *Taxicab Confessions* and the high octane action of *The Fast and the Furious*. Well good luck to them, but it's gonna be no *Karate Kid*.

SITTING IN A TREE

Baldur's Gate and *Neverwinter Nights* creators BioWare are teaming up with Microsoft to create two new RPG's, one for the Xbox and for the PC. This exclusive deal will allow BioWare to make a break from their usual *Dungeons & Dragons* setting and create entirely unique and original worlds. Exciting stuff!

BOMBERMAN ON XBOX, MAN

Yep, it might be the most powerful console ever and able to chuck around huge 3D worlds, but it seems there's still a place for old skool puzzle games as *Bombberman* is set to return for the Xbox. Developers Hudson will be responsible and as the explosive puzzler is such a great multiplayer game there could be some on-line potential.

STOP PRESS! GTA3 ON GAME BOY ADVANCE OUT EARLY 2003!

THE BIGGEST NEWS FIRST! ♦ THE BIGGEST NEWS FIRST! ♦ THE BIGGEST NEWS FIRST! ♦ THE BIGGEST NEWS FIRST! ♦ THE BIGGEST NEWS FIRST!

GOTHAM GOES GA-GA AGAIN!

The same day that Microsoft announced *Halo 2*, they also lifted the lid on the Project *Gotham Racing 2* for all you racing hotheads.

Bizarre Creations are beavering away to cram even more in this time. There'll be new cities including Hong Kong and, bizarrely, Edinburgh, as well as a whole load of new cars. In fact, the reason there aren't too many shots to look at right now is because one of the cars, the Enzo Ferrari, is so brand new that Ferrari haven't even unveiled it yet and they don't want the world seeing the *Gotham* version before the real thing's on show.

There's Porsche, as they say in Wales. This is Edinburgh, though. Oh well.

That looks clever, but do you have any idea how much a new set of tyres costs?

Master Chief's looking a lot more battle-scarred this time. Hardly surprising, is it?

More weapons await. This one looks like it has a serious scope attached. No hiding place!

The lighting and shadow effects look utterly fantastic. This is all in-engine, mind you!

Check out that detail! Even the reflections on the Master Chief's helmet are done in real time. We're drooling.

▲ If you were a squeaky little Covenant bad boy and you saw this heading towards you, what would you do? We'd flee.

▲ "What do you need?" "Guns. Lots of guns." He's going to need them; this time it looks like the Covenant have their eyes set on Earth. Stop 'em!

HALO 2 UNVEILED!

➤ Halo again, Master Chief!

"*Halo 2* is a lot like *Halo*," says Bungie head honcho Jason Jones, "Only it's *Halo* on fire, going 130mph through a hospital zone, being chased by helicopters and ninjas, and the ninjas are all on fire, too."

Sounds to us like he thinks *Halo 2* is going to be quite good. And from what we've seen, he might just be right. *Halo 2* ain't yer average sequel. You thought the original looked pretty good - Bungie think they can do better. So instead of just upgrading the original *Halo* code they've gone for a complete rewrite, jamming in every possible graphical effect they can and, they reckon, pushing the Xbox to its limit. Nice.

Bungie are promising more weapons - again, Master Chief can

nick guns from dead enemies - bigger landscapes and more vehicles to explore them in. And in a cool Xbox Live tie-in, they have something special planned for the multiplayer component. "Imagine the essential *Halo* single-player experience - pitched battles between the humans and the Covenant, massive vehicle and infantry engagements," says lead designer, Jaime Griesemer, "Now imagine that every combatant is an actual person playing over Xbox Live!" Sounds good to us.

But what's the game going to be about? Details are being kept quiet but from what we've seen, Master Chief is going to have to save Earth from the Covenant and chums. The only problem? It's not out anywhere until Christmas 2003!

It's a-Live!

Great news if you live in the USA - Microsoft are launching Xbox Live on November 15th. It's their online broadband gaming service, enabling you to play the next generation of Xbox titles over the net, and also bunging in real-time voice communications so that you can shout at whoever's caning you at *Halo 2*.

And the latest rumours are that it'll be rolled out over here this year too. Though broadband in the UK is still in an hilariously flakey state. But when it does arrive, expect it to cost £40-£50 for all the kit you need plus a year's service, if the \$49.95 US price tag is anything to go by. More details soon.

▲ "Hello! I'm Z! Bandito from Hawaii! And I'm waiting to give you a good kicking on Xbox Live! See you there, tiger!"

TIS THE SEASON TO BE RASLIN'

➤ **SmackDown!'s season revealed!**

Following up from our exclusive *WWE: SmackDown! Shut Your Mouth* shots from last month here's a glimpse of the new improved season mode we told you exclusively about last issue. This time each character will have a story with events that are specific to them and mirror events that happened in TV shows, rather than the rather random storylines that appear in the previous games. This means they're be more variety to the Season Mode and consequently greater replay value in the one-player game.

Also we've got our first glimpse of new additions to *SmackDown!* with personal stylist Rico and ye olde favourite Shawn Michaels in some new fetching attire. *WWE Smackdown! Shut Your Mouth* is out on the PS2 this November!

The Rock and Rikishi look to have put their troubled past behind them as they team up for this Tag match.

From sociopath to preacher, D-Von has seen the light since the original Dudley Boys split.

Jeff Hardy really did nick the Undertaker's bike in one of the recent shows. And here it is in *SD14*.

Here's Rico making sure Chuck and Billy don't start getting too friendly. Great sides!

Michael Cole finds out just what the Undertaker thinks about having his bike nicked!

SCANDAL MONGER

DRAGON ON A BIT!
George Stobard and Nico Collard are back! No really! Yep, get ready to point click and puzzle solve with the third *Broken Sword* game - *Broken Sword: The Sleeping Dragon*. Developers Revolution will be at this ECTS to reveal the dragon in question, why it's sleeping and what the PC, Xbox and PS2 version look like.

NO STOPPIN' THE COFFIN
Activision have snapped up the rights to mental Sega game *Gungrave*. Pencilled in for a winter release, it's cell-shaded, action intense

It's big, daft and on it's way to the UK. shoot-'em-up, starring an undead assassin called 'Grave' who has 'guns' which he'll use to bring down a crime syndicate. Oh yeah, and he carries a coffin on his back.

SPLITTERS OFFLINE
Bad news concerning *Timesplitters 2*, people. Despite its developers Free Radical revealing that the shoot-'em-up sequel would be playable on-line, 'technical problems' have prevented this happening. And rather than delay the September release dates for the Xbox and the PS2, they've canned the idea. Blimey, that's a choker! Do you think they'll bother trying again with TS3P

It'll only be splitscreen multiplayer in TS2

GAMECUBE SQUARES UP

➤ **Final Fantasy Explosion Coming!**

Square are going out of their way to make everyone happy at the moment. After confirming that they are about to sprinkle their RPG magic on Nintendo for the first time since the SNES, they've finally shown screens and details. *Final Fantasy: Crystal Chronicle* will be coming to Japan early next year for both the GBA and the GameCube and will feature a link-up

capability so you can play it on the GC and carry on the same adventure on the GBA. It'll be the first FF to dispense with turn based battles. Also the GBA version will support a four-way multi-player cooperative play option! And to keep the fun flowing a *Seiken Densetsu* (or *Secret of Mana*) title, a *Chocobo* game and *Final Fantasy Tactics Advance* are also coming out on the GBA next year.

But that's not the end of Square's generosity as they are releasing both *Final Fantasy 1* and *2* for the PSone. Originally released for the NES 15 years ago, the games that kicked off the classic RPG series are being retouched with improved graphics, FMV sequences, quick saves and 3D maps. Japanese gamers will be getting their share this year, but we might have to wait till 2003 to join in the fun. Harurrrmph.

Unless you're an elderly gamer this is probably your first look at *Final Fantasy 2*.

The world's first glimpse of *Final Fantasy Crystal Chronicle* on GameCube. Fights are now realtime!

The graphics might have changed over the years but *FF's* gameplay will be very familiar.

CHEAP AT HALF THE PRICE
Great news for the tight fisted as bouncy PS2 platformers *Monsters Inc.* and *Jak and Daxter* are becoming part of the 20 quid Platinum range. Also Konami have announced that *ZOE, ISS, Silent Scope, Age of Empires 2, Ring of Red* and *7 Blades* will also be available for £20. Their budget range is to called 'The Collection'. Classy!

DOOM 3

THE BEST-LOOKING GAME EVER!

» **Doom 3's looking scarier - and it's coming to Xbox...**

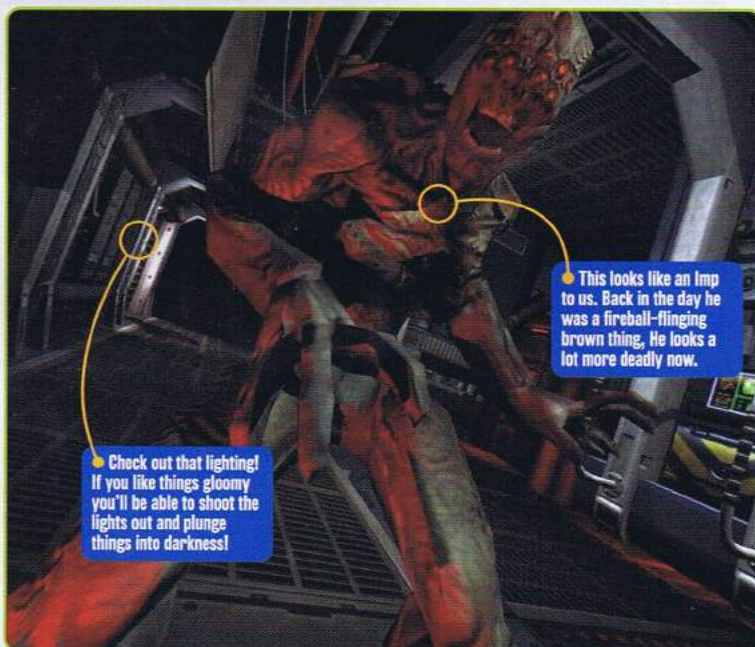

Doom 3's been on show again and id themselves having been spilling their guts on the horrors you can expect. It's gonna make your jeans grow, but not in a nice way. More of a 'phew, what's that whiff?' fashion.

And the party's no longer a PC-only affair. Id's John Carmack confirmed that an Xbox version is in the pipeline, but that they won't be starting work on it until the PC version is out the door.

Don't go expecting the world's biggest game - Carmack's more interested in making it an intense experience rather than a long one, and he reckons that hardcore players will probably be able to play through it inside a weekend.

That should be one hell of a weekend. When Robin saw *Doom 3* at Activate - Activision's annual press event - he emerged ashen-faced and quivering, mumbling, "The horror. The horror!" Once he'd calmed down he described stomach-churning scenes of Space Marines having their innards torn out by hungry demons, and the spectacle of blasting one of those fat, grey-skinned zombie types at the top of a staircase and watching it tumble, all too realistically, down the stairs.

Not even the news that the deathmatch is likely to be a simple, four-player affair can dampen our enthusiasm for *Doom 3*. We're praying it'll be out in the spring, but in traditional id fashion it'll be out 'When it's done.' Hurry up! There's hellspawn to be blasted!

• Check out that lighting! If you like things gloomy you'll be able to shoot the lights out and plunge things into darkness!

• This looks like an Imp to us. Back in the day he was a fireball-flinging brown thing. He looks a lot more deadly now.

• You can use console screens just like web pages. id are including an HTML-like language so you can make your own!

• Check out the textures! No detail's too small for it to be rendered as well as possible. This game's going to melt your eyes.

• The monsters don't just look good, they bleed in all the right places too. Bless 'em.

• The tell tale logo of the United Aerospace Corporation, UAC were around in the original *Doom*. They're still here.

• Now that's what I call a Demon! It's come on a lot since it was all pink. See above for how it used to look in days of yore!

Why We're Mad To Be Doomed!

If you've only ever seen the GBA version you might be wondering what all the fuss is about. Let us explain...

Back in the early 1990s there was one main reason for buying a PC - *Doom*. Long before Resi had you filling your kecks, *Doom* was terrifying the PC world, and later made appearances on the PSone, Atari Jaguar and even the SNES. What made it so scary? Atmosphere. Bags and bags of dark, malevolent atmosphere. Hordes of hideous monsters, flickering lights and the best shotgun in any game, ever, just added to its greatness. And it invented deathmatch. Fact!

Want to find out more? You can still get the shareware edition here: <ftp://3darchives.in-span.net/pub/idgames/idstuff/doom/doom19s.zip>. Then bring it more up-to-date with the fancy Doom Legacy upgrade: http://www.3ddownloads.com/s/howfile.php3?file_id=96767

▲ The proper way to play *Doom* was with the shotgun alone. Nice shooting, partner!

▲ Blasting Imps with a pistol is slow work...

▲ Eek! Demon! Still scary after all these years.

SHENMUE 2

➤ Ryo's crosser than ever on Xbox

What's the point of *Shenmue 2* coming to Xbox without *Shenmue* appearing first, you might wonder? Good point, well made. Seeing as the second episode picks up where the first left off, surely you won't have a clue what

you're supposed to be doing?

Ah, Sega and Microsoft have thought of that. *Shenmue 2* is appearing shortly in the US, and to stop folks being baffled by Ryo's trip to Hong Kong to hunt down Lan Di, there's an extra DVD included in the package: *Shenmue: The Movie*. It's a 90-minute run-through of the original that should leave everyone ready to take on the second chapter.

Some *Shenmue* critics might reckon that's the best way to experience *Shenmue* rather than have to play it... We're waiting for details of a UK release.

Would you mess with this angry-looking chap? No, neither would we...

All the real-time wandering around is enlivened by the occasional fight.

STARSKY & HUTCH

➤ Confused? Just ask your dad...

Back in the late 70s, Saturday night meant only one thing - *Starsky & Hutch* night. That red car with the white stripe. Smooth-talking hustler, Huggy Bear. Chunky cardigans. And of course, Starsky & Hutch themselves, the coolest cop double-act ever.

And now Empire are blasting them into gaming life. The PS2, PC, GC and GBA are all getting a taste of the action, a madcap combo of driving and shooting. Starsky drives the car, Hutch leans out the side and shoots at the bad guys. In single player you can either take the wheel or do the shooting, but - woohoo! - there's a two-player mode where one of you can drive and the other shoots - with a light gun if you want.

Even if you've never heard of the titular duo, this one's worth keeping an eye on. But a quick warning - you'll have your work cut out keeping your dad off the thing!

Hutch'll never pull off this trick shot, we reckon.

That Detective Hutchinson is going to do himself a mischief at this rate.

PITCHED BATTLES

➤ first ever *FIFA 2003* shots! The biggest selling football game returns!

▲ Old Trafford has never looked so good. Neither have the other 23 stadiums.

▼ With no power bar short, neat passing moves are much more easy.

▲ There's correct kits and sponsors for 450 teams.

After a disappointing World Cup edition, the all new *FIFA 2003* is already lining up in the tunnel, leaner, fitter and more realistic than ever before. Boasting an awesome 10,000 players in 16 leagues, the early version we played offered Motty and McCoist on the mic, hugely improved passing and more realistic ball control. Powered by an all new engine it is set for PC, PS2, Xbox, GameCube and GBA this Autumn.

EA's Canadian developers have ripped it up and start again from scratch as they aim to take on the almighty *Pro Evo* head on. One problem they've addressed are methods of scoring as previous *FIFA* games weren't keen to let you score if it wasn't a 30 yard screamer. This time, thanks to better ball physics, goals will come from close range toe pokes and deflected free kicks. Also it will be easier to build from the back as strikers will be able to shield the ball from defenders to let support arrive. EA have their biggest coding team working on this so expect big things when it's released in November.

▲ Realistic deflections on shots and scruffy goals have replaced those insane overheads.

▲ Giggsy and the rest of the player's faces are now recognisable straight away.

GARAGE V GANGSTER GRAPPLING

Backyard and Def Jam wrestling games announced.

If you are tired of pounding Mr Ass in the ring, then brace yourself for

a pair of novelty fighters with a difference. Electronic Arts' *Def Jam Wrestling* pits the heroes of the hip hop record label like MethodMan, Ludacris and Jay Z against each other in a grapple battle. But if tasting the pain again sounds too tame then Eidos have snapped up the rights to the *Backyard Wrestling* and plan to unleash their street fighters at a later date. Neither game is off the drawing board yet but we will bring you more news on both as soon as they hit the mat. We can't wait until they do a game of that Fighting Wino website.

COLIN KILLER

➤ *World Rally Championship 2* races onto PS2...

That name might not be set in stone but you can be sure that whatever it is called, the sequel to the awesome *WRC* will be worth the wait. Rebuilt from the wheels up by Criterion Studios this new off-roader has been crafted

to be even more fluid and realistic than last year's podium pincher. Sprawling across 14 countries with 124 real stages, the entire event stretches over an amazing 800km of compacted snow, baked sand and foggy forest. McRae will need to watch himself...

▲ The reflections on the cars have been polished so that they are even more gorgeous.

▲ The damage modelling has also been worked on to give more realistic dents and bumps.

▲ With the licence to every stage, all the cars and most drivers, *WRC2* has realism on its side.

ZEROING IN ON THE EVIL

Horrific New *Resi 0* shots!

Check him/her out! Here's the latest character to be added to the *Resident Evil 0*, the forthcoming prequel to the much loved survival horror series.

Sadly we know very little about them. Other than, if it's a woman we don't fancy yours much. She has a man's feet.

To compensate we've got some cracking new shots from the GameCube

thriller. It's due out in Japan this November so it will be next year before a PAL version is completed, but already the switching between Barry and Rebecca suggest myriad gameplay possibilities. And while we're on *Resi*, we can confirm that both 2 and 3 are on their way to the Cube. They're going to be unenhanced ports and look like the DC/PC games. More *Resi 0* soon.

▲ The top floor of the train has rooms that look just like the ones that you find in Spencer Mansion. This ain't Virgin...

▲ As you can switch between Barry and Rebecca when you want, you will be able to control one to take out zombies just as they're about to take a bite out of the other. Sorted!

SCANDAL MONGER

THE DON RETURN'S

The classic laserdisk landmark, *Dragon's Lair* is being given a new lease of life thanks to *Dragon's Lair 3D* on all the next-gen machines. The original's gameplay was as flat as its cartoon graphics but Ubi Soft promise that this version of *Dirk The Daring* will be far more enjoyable in his previous battles.

GAMEBOY COLOURED!

BMX star Dave Mirra is no longer going to have to put his name to Acclaim's bizarre and thoroughly saucy extreme sports-with-strippers game. He'll instead return in *Dave Mirra 3* with the rude, now Mirra-less one going by the title *BMX XXX*.

DIRTY DEEDS POLL

Cretaceous gamers have been taking part in a mad rush to change their name to Turok after Acclaim offered five strange souls the chance to spend a year named after their dino stalker in exchange for an Xbox and £500. An amazing 3,000 people applied, which just proves that there must be more kids called things like Fifi Trixibelle, and Peaches Honeyblossom than just Paula Yates' daughters.

STRIKE THREE

Weeping PS2 survival-horror fans still missing *Resi* can wipe their eyes before they start blubbing again over another gruesome slice of Capcom violence. *Clack Tower 3* stars a junior demon slayer named Alyssa who wanders through numerous London locations developing her dark powers and defending her families heritage as the finest undead killers in the capital. Out in Japan before the end of the year, we will keep you all informed about a UK release.

▲ Cockney zombies! They're the worst.

'NAM-O-RAMA

16 years after the movie and the Speccy game, Oliver Stone's *Platoon* is returning to the PC thanks to Monte Cristo. Working like a *Commandos* style RTS, the game follows the 1st Airborne Cavalry Division and their raw recruits as they turn into toughened Vietnam vets. Offering lush jungle environments, weather effects, tanks, APC and network play, *Platoon* should arrive in November.

STOP PRESS! DOG TAG COMPO TO RETURN FOR MGS2: SUBSTANCE!!

ANGEL DELIGHT

Latest shots of Lara Croft's PS2 welcome home party!

▼ With the shadowy setting and mysterious title don't expect things to be sweetness and light for Lara. Also all the crouching and creepign about suggest they'll be a lot more stealth involved.

It seemed strange not having a *Tomb Raider* game out last Christmas as it became the gaming equivalent of the Queens speech. But fans of the gun-toting lovely should not despair as she's set to return this Yuletide in *Lara Croft Tomb Raider: Angel of Darkness*. And she certainly is as these few shots are looking pretty gloomy.

No dusty toms and sand in her pants, Lara's skipping along urban roof tops in the rain and from what we can see from the shots she's a flexible as ever. Also it seems Core are putting the PS2 to good use with some nifty lighting effects. More soon!

It's awfully dark. So why does she need the shades!?

Ladders prove no problem!

Is she up to no good?

Or is she just a bit shy?

SHIGSY SPEAKS!

» More Mario on the way!

With *Mario Sunshine* out in Japan, Shigeru Miyamoto and his chums celebrated by getting together for a bit of a chat with the press.

While a lot of the talk was on *Sunshine* specifics. (Miyamoto wanted to know how many people had managed to get 30 Shines) there was exciting news of *Mario's* future.

"It's necessary to make the interval between a game and its sequel as short as possible," he told the crowd. Yeah, but which games was he talking about? Well Mario quite obviously. He spoke about introducing "Mario series games with less lag time between them." But guess what? "We are taking a similar approach to the *Zelda* series."

Yay! We might still be waiting for *Mario Sunshine* and *Zelda*, but it looks like there'll soon be more on the way, and Shigsy's definitely up for it. "I'll be 30 this year," he said, "This is becoming my life's work." Aw.

Anderton will up against both robot and human foes

They'll be jet packs to use just like in the movie.

CRUISE CONTROL!

» *Minority Report* first shots!

Minority Report had everything a good movie could - Spielberg, Tom Cruise and a stick that made you throw up. Aces!

And now the world of *PreCrime* and bald fortune tellers will be arriving on the PS2, GC, Xbox and

even the GBA. Gamers will take up the Tom Cruise role of *PreCrime* Officer John Anderton in an all new adventure that sees him caught up in another tale of intrigue and conspiracy. This 3D action game is down for a November release. Expect more, much more soon.

It's a mix of hand to hand and weapon based combat.

▲ There's the Sick Sticks but why don't they invent a Turd Prod. Now there's a weapon.

She's tall, she's a redhead and she's the second playable character in the *Devil May Cry* sequel, but that's as much as we know.

She's the mysterious heroine of Capcom's 'hard action' follow-up but she's shrouded in mystery. What we can tell from these brand new shots is that she's got some moves to rival

Dante's, but where has she come from? Even though at the end of the first game you get the idea that Dante is going to team up with Trish, it turns out he's a two woman kinda guy. The cad!

There's still no confirmed release date, but we hope to have a hands-on test soon. As it were...

THIEVING!

It's been floating about the upper reaches of the charts for just short of a year now, so who exactly is still buying *GTA3*? And with *Vice City* due out next month, Rockstar could well find their baby blocking off the top two spots.

▲ You touch my car, I splatter your knees. Come to think of it, I'll splatter your knees anyway.

▲ Julian soon remembered his mum's bonfire night advice. "Never return to a firework after it's been lit!"

HEAVING!

Another popular series still riding high is *Gran Turismo* who have a pair of their own cluttering the charts. Obviously the lure of Tokyo and Geneva, 95 hot cars and those loveable little Pod chaps were too much for race fans.

▲ Part car, part cheesegrater, the pit crew kept well out of the way of this particular concept!

▲ Hang about, is this a grab from the game or has your little sister been mucking about with my camera again?

LEAVING!

World War Two is the new punk rock apparently. *Medal Of Honor* is digging its heels in at the top, but *Prisoner Of War* is sneaking up the table with a conspicuously late surge, and could end up nicking the title itself.

▲ "Top hole Gingo! At the crack of dawn we'll tunnel under the vaulting horse and get down the kebab house".

▲ "What do you mean they had no chilli sauce Timpkinson? I specifically asked for a chicken chilli doner!"

He's a mechanic not a plumber and the sun don't shine any more on his home world, because someone stole it...

Knowing when to stop is very important. Like stopping eating before you end up coating your shoes in partly-digested nachos. Stopping drinking before the world goes all blurry and you end up taking Pat Butcher home. Or stopping making *Spyro* games before you end up hating the little purple flamethrower and chucking darts at his stupid cute little smoke-belching snout.

Well, that last one describes developers Insomniac perfectly because they have ditched the dragon and shifted over to Sony to work with the oddest couple since Dwight Yorke and Jordan. Freed from making more games around their popular reptile seems to have

also freed their minds to create a different kind of platformer. One based less on precise leaps and more on a superb mix of shooters, bags of enemies begging for death and a rip roaring, all action atmosphere.

CLANK IT UP

So while the idea of a two characters, one of whom gets carried around in a backpack might sound like a rehash of Sony stable mates *Jak* and *Daxter* you quickly realise

how much freedom *Ratchet & Clank* gives you. From choosing your own weaponry to revisiting planets just for

...the chatter between our two heroes even brings a smile to your game-wearry face...

the fun or the cash, the whole game structure is open ended. Just think of it like *Crash Bandicoot* but in free-roaming mode and without the annoying bouncing muppet. And rarest of all in this platforming world of cutesy plots and vomit inducing characters, the chatter between our two heroes even brings a smile to your game-wearry face, and we haven't laughed at a game this much since the last time the *Army Men* were on parade.

Home and Away!

Every planet comes with their own imported enemies and fierce local creatures, that don't seem to care that you are trying to save their home worlds. The hairy little ingrates. Sod the prime directive, give 'em a little spank. That'll make them more grateful. I dunno, aliens today, eh!

▲ These bee like stripey things swarm above swooping down when Ratchet gets too close.

▲ These flame 'bots slowly toast the terrain with their flamethrowers so don't get too close.

▲ Chucking out missiles and running away all the time, this train of 'bots is a pain in the butt.

▲ The animation on these metal fighters is great as they look confused as you wallop them.

Box Clever!

Don't worry platform fans, those old favourites the crates are still around. Some explode if you get too close, some hold ammo and some even hide extra lives.

▲ These glowing globes are extra lives, and since you can only carry four it is good to reveal more.

Infotainment For The Metallic Masses!

Most of the cut-scenes use little robots called Infobots to explain the plot and to show you your next mission. Game characters will sell you these machines so that you can move onto the next level and learn about other planets.

Metal Mates!

Unlike certain other backpack buddies, Clank is a nice robot who knows when to keep schtum. In fact this metal guru is the brains of the pair.

▲ Al's Robo Shack is the place to get Clank fitted with the incredibly handy heli-pack.

Fools And Their Tools!

Armed to the teeth, with guns right up to the gums, Ratchet is definitely going equipped as he heads into battle with the Blargrs. But thanks to a simple inventory system it doesn't take minutes of menu navigation just to flip from one to the other. And you'll be surprised at some of the stuff that fills up his fluffy arsenal of destruction. Boomerangs, spanners, heck, there's even a bomb glove. Top notch nasty tackle!

▲ Ratchet always carries with him a handy spanner for making quick adjustments to robot's faces.

▶ The Bomb Glove also comes as standard but it ain't accurate.
▶ The wrench can also be chucked about in a handy boomerang style.

▲ The Pyrociter might have a fancy name but in the end it is just a cheap, short range flamethrower.

▲ Complete with its own sight, the Blaster cost serious money and chomps through the ammo. But just look at the benefits!

Assaulted!

They might not be the KP variety but nuts replace cash in this world.

Like a girl waiting in a train station at night, Ratchet attracts loose nuts.

Shops are the only place that you can collect the flashier shooters and ammo.

Like in *Crash*, crates conceal yet more screws and nuts that you can scoop up.

Fabulous Furry Freaks!

Whatever kind of creature Ratchet is, he is a pretty nimble with a twenty separate moves including a smart somersault and the ability to scale walls with his bare claws.

▲ Where would the hero be without the ability to hang off ledges?

◀ This cat doesn't hate water but while he can swim on the surface he won't go beneath the waves.

◀ The hover-pack can not only be used to reach higher ledges, you can float with it too.

▶ Leaping can also be used to get more power into those wrench smashes.

Tree Huggers!

The story behind *Ratchet & Clank* is an environmental tale to warm the heart of even Swampy. With the evil Blargs stealing planets to create a new home world after exhausting their own, they land on Ratchet's planet to steal all the trees.

This is Chairman Drak, the evil mastermind behind the Blarg's plan.

On every planet the pair visit, Blarg machinery is working to steal the trees.

First Impressions

Bat Eared Joy And Chummy Robots

Our very first thought about *Ratchet & Clank* was to try and turn down the brightness because this pair seem to have mugged the Tweenies for their poster paints. Loud, cartoony and really rather big is the only way to describe levels that are full of aliens and some great background animation. You might be scampering around dealing death to the robots that surround you but there are always jets wooshing overhead and spaceships landing. The 35 different weapons are looking good and have a few original ideas behind them too. Take the Glove of Doom, not only does it have a great name but when you see the little 'bots bouncing toward the enemy in a suicidal joy, it gets even better. As for the Suck gun, we died far more times than we needed to because we kept wanting to use it on every robot around.

And the gameplay itself? Well it's really fun because without puzzles to worry and not too much platform prancing, you can concentrate on the basics of killing, cash collecting and crate crushing. In fact it really made us think of what *The Wrath Of Cortex* should have been, and for a PS2 platformer that is pretty high praise.

Smell The Glove!

Second on our list of favourites to the Suck gun, is the awesome Glove Of Doom. Okay so the name makes it sound more powerful than it is but it is still pretty handy.

▼ Unleash the glove and the little robots dance towards the enemy with big bombs in their bellies.

◀ When they find the rival robot, they leap on board and light the fuse. Messy but very entertaining.

It Sucks And Blows!

The Suck cannon is a big money blaster that might cost you tons of nuts to buy - but not only does this weapon look good but it comes with an inexhaustible supply of ammo!

▲ It weighs in at a hefty 7,500 nuts but if you are very lucky you can find one just lying about.

▲ Big 'bots like this tree chopper can't be hoovered up but smaller ones are sucked into the nozzle.

Getting Around!

The levels in *Ratchet & Clank* can be pretty big and so sometimes our furry-eared hero needs something to get around town apart from his space ship and the chopper stashed in Clank's head. So here we see a tiny suggestion of the kind of local transport they have round their way. All the usual stuff you know - Trains, taxis and, erm, giant space slides.

▲ These slides allow you to zip around Metropolis and all you need to do is leap on.

▲ These little taxis wait in the city to take you back and forth from your ship to Big Al's Robo Shack.

▲ This train also hovers around the city on Kerwan but its cargo of 'bots want to punch more than your ticket.

GOOD COP BAD COP

Free-roaming and fiesty, the 35 firearms make every termination new and entertaining.

The constant shooting might get tiring and the camera can be annoyingly positioned.

Ah, a derelict space station with more than a hint of menace. Sounds like a job for... Samus Aran!

Bad Boys

Don't let all the exploring put you off. *Metroid Prime* still packs a goodly load of evil space monsters to blast at.

Space pirates! Curiously lacking in eyepatches and parrots, sadly.

Horrid insectoid things! Where did I put my super-strength bug spray...?

Enormous things in giant jars! Samus'll never get the lid off. She's a girl.

Our prime directive - storm Ninty and have a proper go at Samus Aran's latest adventure. **Mission complete!**

There's no rest for a bounty hunter. After saving the universe three (count 'em) times, does Samus Aran get a nice relaxing holiday? Well, perhaps, but it's not long before those pesky Space Pirates start acting up again and she's slipping back into

her special space suit to investigate weirdness on Tallon IV and, we imagine, save the universe yet again.

FIGHTY MORPHIN!

Our first post E3 play proves *Metroid Prime* ain't yer average first-person shooter. In fact, it's barely an FPS at

all; think of it more as a first person adventure. Samus does get to shoot a load of hideous alien monsters - using an arm-mounted weapon that morphs impressively into different gun types - but the main focus of the game is on exploration and investigation. When you're not shooting stuff

you'll be activating Samus' scanning visor to, um, scan stuff - handy for unlocking doors and solving puzzles.

And when you're neither scanning nor shooting, you'll be curling up into a ball for some spherical action. Samus' ball mode is amazing, switching seamlessly to third-person view, the ball a shiny

masterpiece of metal with beautifully glowing blue bits. And it's not just for looks; as a ball you can get to places you wouldn't otherwise reach, so spending time rolling around is going to be mandatory.

It's looking utterly gorgeous with more polish than a Mr Sheen factory. December, come quick!

Prime Mover!

There's an enormous world for Samus to explore, and much of it involves crawling about - which adds an extra slice of tension pie when you're looking round empty areas.

◀ A staircase! Keep an eye out for monsters under the stairs!

▼ Nothing much in here. Or is there? How can you be sure...

That parasite queen looks fairly secure in that giant jar. Let's hope she doesn't escape and go mental, eh?

Eat Laser, Alien Scum!

What would be the point of being a fully-qualified space bounty hunter if you didn't get into some downright dangerous situations involving yourself, nasty aliens and some seriously heavy-duty weaponry? Exactly. If you're not going to do some serious Killage you may as well stay at home and watch *Countdown*. How many consonants was that sir?

▲ Good job Samus upgraded to the latest space suit with auto-aiming. The pirates don't stand a chance.

▲ Roger the space pirate is about to become a lot less jolly. Jolly Roger, see? Ach, I give up.

▲ Hold the fire button and your gun expands and charges up. Then let go for massive damage.

❖ Balls!

So, you probably thought that the best use for Samus' morph ball mode was that spin attack in *Smash Brothers*, didn't you? Ha, it has a lot more to it than just knocking seven bells out of pugnacious Nintendo characters. Let's take it for a spin. Did you see what we did there?

▲ Need to explore areas that a full-size Samus can't reach? Get tiny!

▲ When you're in morph ball mode you still have firepower. Which is nice.

❖ Halo Lotta Love

As well as dealing with solid, dangerous things, you also have to interact with holographic items that act as keys and switches. Not only that, they look rather spiffy as well. Try and touch them - look, you can't!

◀ Leave me alone, space insect thing. I tire of your solidity and crave the intangible.

❖ That's much nicer. Glowing holograms are a lot more pleasing to look at.

❖ Suits You!

Tsk, girls, eh? Their genetic makeup means they're incapable of packing light for even the shortest trip, and Samus Aran is no exception. Luckily in her case you won't find 20 pairs of slingbacks, 18 of which she won't wear at all. Instead she has a selection of useful spacesuits.

▲ Yes, yes. That's a lovely gravity suit you're wearing. No, the pads do match!

▲ Yes, it looks lovely from the back. And no, it doesn't make your bum look big.

❖ Let's Rip This Joint Apart!

If the scenery in *Metroid Prime* isn't quite to your liking, just whip out your big guns and give it an explosive redesign. A bit like *Changing Rooms*. In space. With blasters. Imagine Carol Smilie with one of those. No, actually don't.

▲ Hmm. I'm not sure about all these cables and girders. Nope, they'll have to come down. Take that, post-industrial functionalism!

❖ Not convinced by the gun you're using? Samus can quickly reconfigure it to suit your needs.

A Prime Slice Of Superior Gaming

The first thing that strikes you about *Metroid Prime* is just how stunning it all looks. Within seconds of starting play you'll be treated to in-game sequences that you'd otherwise swear were pre-rendered. The effects are just stunning, from Samus' visor itself through to rain-swept outdoor environments, glorious lighting and incredible animation.

Clamp your jaw shut again and start playing, and you find things take a bit of getting used to. Switching between normal vision and scan mode - a vital part of the game - needs quite a bit of getting used to, but it all clicks into place before too long, and you can quickly get into one of the most involving pieces the GC has to offer. Shooting, scanning, swinging - with Samus' handy grappling hook - and rolling around in ball form, they all quickly become second nature, enabling you to enjoy *Metroid Prime's* many delights.

Difficult to pigeonhole, this one. Obviously it pays homage to its 2D roots, and there are elements that put us in mind of PC titles like *System Shock 2*. Basically, *Metroid Prime* is very much its own game, and shaping up to be the game for your Christmas list.

GOOD COP ☺ BAD COP ☹

Glorious visuals and a tasty mix of shooting, exploring and puzzling should make this a must-have GC fun-fest.

No multiplayer. And Samus' enormous shoulder pads are just soooooo 1980s. Get yourself a makeover, girl!

WHERE IT'S AT

Bounding into the final stretch, there'll have to be a damn good reason for *Metroid Prime* not making Christmas.

We were Legolas once, so we bought some stickle bricks to compensate! Ho ho! Take my wife...

While it's very worthy to appreciate JR Tolkien's work for its sheer scale, exhaustive detail and intricate plot, it's more to fun to appreciate it for the loads of battles with daft creatures chopping each other up with swords. So when EA got the licence for the movies, rather than make a game about being small and living in an idyllic leafy village they've cut right to chase, well right to the scrapping more like.

The game is one third *Fellowship Of The Ring* and two thirds *Two Towers*, which means it's none stop Orc smacking. And the senior members of the Kicking Orc Ass Council are Gimli, Legolas and Aragorn, all three individually playable.

POTION CAPTURE

Visiting EA's headquarters we managed to playtest a couple of the levels and must confess this is one fine looking game. Using motion capture from the battle scenes and character likenesses they've really captured the feel and look of the movies. The Fangorn Forest and the Plains of Rohan levels we played were both heavy on the action, but

▲ Legolas is the most difficult and potentially rewarding character to use.

▲ Frodo and Gandalf both show up but only as nonplayable characters to help the trio.

also laced with some neat RPG touches. With three attack buttons and one parry the key to successful attacks

was mixing up the combos like you would in a beat-'em-up. Each combo you use is rated and at the end of each level, players are rewarded with experience points which can be traded for new equipment and improved abilities. If they can add some variety to the neat but slightly predictable gameplay, this has a chance of being more than half decent.

You Need A Little Elf Respect!

Out of the three playable characters, Aragorn will probably be a favourite thanks to his all round skills, but it's the Dwarf and the Elf which are most interesting. Gimli is incredibly powerful but the problem is his combos are very slow. Legolas on the other hand is very quick but as he uses twin daggers as his primary attack is a bit lightweight. So which one do you choose? Each has a major strength but a fatal weakness. Definitely one for the more tactical thinker.

▲ Aragorn is proficient with both sword and bow and is the easiest character to control and develop.

▲ Gimli is awesome at close contact but his combos are slow so it's tricky to build up the experience points.

▲ Legolas is very quick but fairly weak and at first very tricky to play as the bow is not a powerful weapon.

Tiny Towers

Less impressive was the GBA game which EA talked up as an RPG, but mainly centred around slashing at things and collecting a few experience points. In its favour were a greater selection of playable characters including Gandalf and Frodo.

▲ Its a neatly animated game with a top down view but for all the bright colours it seems to the weaker of the two games.

So you can play as Gandalf! Guess that means he wasn't burnt to a crisp.

GOOD COP BAD COP

Remains very faithful to the look of the films, is big on action and looks very playable. Encouraging.

The gameplay is a little one dimensional and looks a bit like a 3D Golden Axe. We await the full game for confirmation.

Can a dead ninja really come back to the land of the living? **Shuriken.**

REVIEWER: Jim McCauley

Solid Snake might reckon he's the daddy, but really, all his sneaking around is just old ninja tricks wrapped up in shiny paper. If you want proper ninja sneakery, find yourself a proper ninja.

Rikimaru's learned a lot of new tricks, and now he's a fully-tooled-up, creeping, climbing, shuriken-flinging agent of death. In true ninja style he can grab his enemies' weapons and use them himself. Killing stealthily and completing tasks earns

extra skills. And the massive game world's been set up so that you can go almost anywhere. Hurrah! However, like its predecessors it looks somewhat...functional. Activision promise that it's due for a lot of polish. We'll keep you informed.

Kill!

Ecks Vs Sever 2 is absolutely rammed with cool weapons. Which ones would you pack in your globe-trotting kit bag then?

▲ Never underestimate the knife. It's very useful for making silent kills.

▲ Assault rifles are handy - not that we'd recommend them for dog control.

Ecks Vs Sever 2

Ecky thump! Crawfish serve up a second helping of ballistic GBA action...

Who'd have thought that the GBA would become such a first-person hotbed? And here comes another FPS for that Ninty in your pocket. We were well impressed by the original, and the sequel is looking

even better, with almost too much squeezed in for us to tell you about.

So...You get [deep breath] 24 missions split between Ecks and Sever and spread all over the world, five multiplayer options (including a two-player co-op mode, and combat practice against up to six AI bots), bags of guns, loads of spy toys and lumps of scenery that you can blow up if you're feeling particularly destructive.

Not bad, eh? We've been having great fun playing with the game's sniper rifle, taking

down enemy agents before they even know we're here, and there are also laser tripwires and flying spy cams to play with; everything your modern agent about town needs. Yep, this and the also-impending *Doom 2* show that the GBA's just the thing for some intense 3D action. Prepare for a lot of locking and loading and a very sore trigger finger, soon.

GOOD COP **BAD COP**

Tons of action and options, plus multiplayer, all squashed into the teeny tiny Game Boy Advance. Woohoo!

The usual difficulties of doing the FPS thang with the GBA's controls apply. Not too bad once you get used to it, though.

For a company with more Force powers than most, LucasArts has often got it horribly wrong when working out what sort of *Star Wars* games we'd like to play.

Big head kart racers (*Super Bombad Racing*) and car combat (*Star Wars Demolition Racer*) have made it onto the shelves. Whereas the Galaxy's Most Feared Bounty Hunter and Official Owner of the Coolest Gadgets in *Star Wars* has had to wait 'til now to get his own game. It's about time.

...it's all about hunting down intergalactic scum over 18 levels...

There's six distinct worlds with a boss at the end of each to de-commission.

with pistols, whipcord, grenades, flamethrower, sniper rifle and a jetpack. All this kit gets put to good use in simple but effective blasting with flexible controls that let you, for example, back flip and lob grenades.

It adds up to a very promising looking debut for the boy Fett. So much so, he might be able to move out of that pokey white flat he had in *Episode 2*...

Go Gadget!

Jango's jetpack adds a whole rocket powered dimension to shooting the crap out of the galaxy's wrongdoers. You can thrust about the place in three second bursts to start with (upgradable to ten later on). And don't forget the guided missiles which you can fly to their targets with a thrilling rocket eye view.

You can thrust straight up to get a vantage point. Flying while shooting or genading is positively encouraged.

You can also get rocket assisted left and right strafes to dodge attacks.

In an Innovations Catalogue Far, Far Away...

Jango's obviously been flicking through the *Star Wars* equivalent of the Innovations catalogue to build up such a good range of gadgets and weapons. There's also a decent amount of sophistication in the controls so you can target two enemies at once, lob grenades while doing jet-pack boosted jumps as well as tie up folk and flamethrower 'em...

Last used to great effect on Obi Wan in *Episode 2*, the whipcord can tie up enemies and civilians...

Your victim can then be flamethrowered. That's downright rude. He's not know for his niceness, is Jango.

Twin blasters let you lock onto and shoot two targets at once. And jet pack it out of there, if necessary.

GOOD COP BAD COP

One of *Star Wars* coolest characters gets his own game. Plenty of innocent weapons to test your cool guns on.

Reasonably straightforward action game. We're a bit worried about a lack of a depth to the blasting.

WHERE IT'S AT

Still plenty of polishing to do. We want to see our face in *Slave One* by the time it comes out in December.

Boo! Yes, it's Extreme Hide and Seek - one of those crazy games that's never really caught on...

Handy hint: if the little 'cross in a box' reticule appears, don't shoot. That's your teammate.

▲ What better way to spend a rainy evening than with a stroll around a rooftop, shooting everyone in your way?

▲ When you're not blowing chunks out of harmless buildings, you're spending a lot of time shooting holes in humans. A chap's got to earn a living somehow...

Red Faction 2

NEW SHOTS! ♦ UPDATE! ♦ NEW SHOTS! ♦ UPDATE! ♦ NEW SHOTS! ♦ UPDATE! ♦ NEW SHOTS! ♦ UPDATE! ♦ NEW SHOTS! ♦ UPDATE! ♦ NEW SHOTS!

Did you feel the **earth move**? Sounds like there's more **Red Faction action** on the way...

We've been wracking our brains in the GM office trying to think of movie sequels that had absolutely nothing to do with them the originals. Roy came up with *Halloween 3*, I plucked *American Psycho 2* out of my memory, and Tom hid under his desk, shaken by all this talk of scary films.

The reason for this diverting office banter? *Red Faction 2*. It's decidedly different, at least story-wise. Forget about Parker and the evil Ultor Corporation, because they're only mentioned in passing.

FACTION PACT

This time round you're Alias, a nano-augmented super-soldier, working with five of his service buddies to overthrow the evil Commonwealth and its corrupt head, Chancellor Sopot. All well and good, but you'll be more pleased to know that *Red Faction 2*'s still

about blowing stuff up with awesomely powerful weapons. The big problem with GeoMod the first time round was that it wasn't quite as brilliant as you might have thought. Nice idea but the implementation felt a bit artificial, as if halfway through development they realised that being able to blow holes in everything didn't really

work, so they reined it in severely. This time round it's looking a lot more natural - it's obvious what needs to be destroyed and what can't be blown to bits. Volition have also expanded the game's scope. Throughout the game you work with your five teammates, each of them specialists in different areas. There are some fun non-FPS bits, like when manning the weapons on a helicopter gunship. The multiplayer now supports four combatants plus AI bots, and there's now mouse and keyboard support for FPS purists.

We're expecting the latest code any day now.

...first time round it wasn't quite as brilliant as you might have thought...

A Gun In Your Pocket...?

You'll be really pleased to see *Red Faction 2*'s new range of heavy-duty weaponry. Naturally there are enormous, landscape-deforming demolition jobs, but you'll also find assault rifles, machine guns, a spiffy railgun and much more.

Here's your NICW - Nanotech Individual Combat Weapon. It targets for you, gives you an enemy health readout, and fires grenades as well as bullets. Tasty.

Deformed!

Red Faction 2's not just about mayhem and destruction. Mostly it is, but you'll also have to plug in your brain and use the GeoMod tricks to your advantage in order to solve puzzles and get anywhere. Here's a basic cortex-tickler from one of the early levels. It's not that challenging, but it's a taste of what to expect.

▲ Hmm. There's a gantry, but no means of getting up there. A quick blast of the grenade launcher...

▲ ...and you bring it crashing down in a suitably noisy way. Now you can find even more stuff to destroy.

GOOD COP BAD COP

New story, new location, new weapons and new characters. Everything's so new and shiny that it hurts our eyes.

Despite some eager reviews, GeoMod wasn't that great. Let's hope they've given it more thought this time round.

WHERE IT'S AT

Red Faction 2 should be here in time for Christmas. We'll be taking a closer look at this seismic sequel soon.

▲ If you like big explosions, then this might be up your alley. If you don't like big explosions, you're weird.

! UPDATE! NEW SHOTS! UPDATE! NEW SHOTS! UPDATE! NEW SHOTS! UPDATE! NEW SHOTS! UPDATE! NEW SHOTS! UPDATE!

The robots are rising again in a mental mechanized assault on the Xbox's top shooter...

Sci-fi pioneer Isaac Asimov wrote three rules of robotics outlining how the metal machines should follow orders, protect their shiny hineys and never harm a human. But what most people don't know though is that the Microsoft organisation have created a fourth rule which states if the robot is over 40 foot tall and armed to the teeth, it can do whatever it jolly well likes.

Exploiting this extra clause to the max are the cold hearted combat 'bots of

MechAssault as they set off on their mental mission to crush all of their enemies underfoot. They don't care if choppers, hover tanks and even skyscrapers stand in their way because these rumbling, lumbering tin cans come with three types of heavy weapon, jet packs and some super strong armour. Fancy giving them some jip? We wouldn't advise it!

HEAVY METAL

But unlike the tons of previous robot rampages where turns and beads are more important than battles, this is an all-action, swarfega-fuelled, heavy metal meltdown. During the two levels of city and snowy shooting that we played the fighting was fiery and frenzied, with everyone from

▲ Take down a tower and it will crush all the soldiers who stand outside. Tasty!

tiny little troopers to tanks targeting you. Luckily, the leggy walkers are pretty mobile with jet-packs to power you out of trouble and

...these lumbering tin cans come with three types of heavy weapon...

▲ The story and great looking 'bot designs are taken from the BattleTech comics.

a twisting torso that lets you turn and take out enemies in 360 degrees. This system might make the controls complex but after a few minutes of the colourful combat you quickly pick up the basics of robotics.

With a split-screen two-player mode - and anything up to twelve others online too - as well as 20 solo missions this is a heavyweight blaster that looks set to get your oil flowing.

Inferno!

The 'bots are bigger than an Xbox and nearly twice as heavy, so even twenty story skyscrapers are no trouble to them. In fact nearly everything in the world can be destroyed so long as your beautifully rendered 'bot has enough firepower to shatter the superstructure. And believe us, it usually has.

▲ With the bridge destroyed the tanks can't cross the river. But you can still wade across. Break out the wellies...

▲ Once you have punched enough holes, the building finally crumbles.

Digital Destruction Derby

Each one of the twelve fighting robots carries three different types of weapons: small laser and machine guns can be used to take out the tiny soldiers, the missiles are handy for the other Mechs and the plasma gun is great for changing rooms, permanently. Add to that your hefty hovery jetpack and your full three sixty degree twisting torso you soon realise you're sitting in a pretty formidable fighting machine.

▲ You can crush them, bruise them or even shoot them but the little guys can still damage your metal brute.

▲ The plasma charge PPC can take out buildings so lightweight tanks and choppers are just fodder.

▲ Rival robots appear and run between the towers using them as cover as they lob rockets at you.

GOOD COP BAD COP

Bright 'bots, enormous explosions and plenty of fun firepower make for excellent entertainment.

The button thumping action might not last the course without something more substantial to fill you up.

You're listening to the sound of the streets: sirens, gun fire and lots of people going "this looks like *GTA3*"

The first thing to know about *True Crime* is that you're not actually committing any of it.

Activision might have nicked elements of *GTA3* for this decent looking action fest but you'll have to flash your cop badge before stealing, sorry, 'commandeering' any citizen's motors. Mowing down pedestrians and bazookaring your fellow roz's copters out of the sky will also be frowned upon.

At the very least you'll lose

Cop Points, which give your undercover cop, Nick Kang, extra fighting moves, more accurate shooting or better car handling. The driving, shoot outs and combat takes place in 400 square miles of realistically mapped LA.

WOO FIGHTERS

Cruising around the city on the trail of dodgy hoods there's 20 assignments and 100 sub missions all linked in a freeform *GTA* stylee. The out-of-car shooting and

fighting already looks less frustrating than in Rock Star's game. Much cleaner lock-on targetting and martial arts style scrapping means you'll want to get your arse out of the driver's seat. And once you do, John Woo-style

...John Woo-style double gun blasting and 30-odd fighting moves...

double gun blasting and 30-odd fighting moves give this a distinct Hong Kong chopsocky action movie feel.

Despite the *Streets of LA* subtitle it also boasts, rather smugly, lots of *Insides of LA* too. We saw bar room brawls and a sneak-and-strangle mission in an enemy base. Expect to see gun ranges, shops and dojos too.

Unlike *Vice City*, possibly thanks to the long arms the law's famous for, this'll stretch to all three next-gens and already looks the business.

Police Work

True Crime's missions are nicely unpredictable and take in car chases, drug busts and hit-and-runs to name but a few. Completing or failing missions sees the story move in different ways. The example we saw involved a downtown race against the clock to help a barkeeper...

▲ The mission starts on the streets.

▲ Then we switch to an interior for *Crouching Tiger*, crazy Ass Kung fu.

A Little Bit Woo, A Little Bit Way!

GTA3's out-of-the-car combat was often so frustrating that you'd do anything to stay in your motor and resort to good, old fashioned running people over. This makes much more of its chopsocky, John Woo style action. There's proper energy bars and martial arts moves for the fighting as well as *Headhunter* style ducks, rolls and taking cover for the shooty bits...

▲ You never saw anything like this high kicking in *GTA*.

◀ Nick can be attacked from all angles so be prepared.

Shooting people at a jaunty angle! Looks a bit *Max Payne* don't ya think?

GOOD COP BAD COP

Grappically widdles on *GTA3*. The interior locations and out-of-car combat are already looking impressive.

Could be too law abiding and not able to hold a flamethrower to the shockingly great feeling of evil coming from *GTA*.

The twisting views in *Ninja Assault* mean enemies can attack from any direction. Let 'em too close and they'll jump you from above.

The mechanical spider looks tough, but it's not as sneaky as the flying ninjas.

That's a weird enemy. In the bonus games you'll have to shoot down fish.

The cunning enemies will hide behind pillars and lob stuff at your face.

Ninja Assault

Forget fighting ninjas with swords, pull out your gun and blast the stealthy sods...

Namco are back on the scene with yet another light gun game but instead of *Time Crisis*' Richard Miller, Guren and Gunjo are the ninja heroes on hand to rescue the lovely Princess Koto.

Like *Onimusha 2*, *Ninja Assault* is set in feudal Japan but you won't be slashing in the streets here. Instead it features modern weapons and laser cross bows.

So get out your G Con 2 and start gunning down loads of different enemies from armoured soldiers to mechanical spiders and high flying ninjas who vanish in a split second and spookily reappear right in front of your face. Sneaky stuff.

The familiar *Time Crisis* style-on rails gameplay is

spiced up by a two player co operative or a Jujitsu versus mode and completing these modes will unlock all new scenes in the main game.

Namco have also added an extra female character and an extended story mode for super sharp shooters who've already gunned down some serious ninja ass in the arcade game.

GOOD COP BAD COP

New feudal Japan setting and weird screen filling bosses such as a cannon equipped mechanical spider.

On rails gameplay and a lack of any new weapons mean *Ninja Assault* could be very short lived.

He's got bigger sidies than **Noddy Holder** and sharper claws than **Smita Smitten**. He barks at the moon too!

▶ Total Kilt!

Marvel have kept an x-ray eye on every stage of *Wolverine*, sending comic book big shot Larry Hama to script the story.

▲ Big set-piece action scenes and dramatic music are definitely trademarks of the game frantic gameplay.

▲ These PS2 shots show the detail that has been put into Logan's new leather, not lycra look.

▲ A really rather lush cel shaded look makes this feel very comic book indeed. You're almost on the page.

Assemblies must be much more fun at Professor X's Institute for Higher Learning. 'Today Class 3C will levitate the White House and after morning prayers, 2B will demolish a Sentinel army'. It sure beats the hell out of another tuneless rendition of Little Donkey by the massed ranks of the remedial recorder class.

But even these happy school daze seems to have ended for Wolverine because the hairy hero has left the *Mutant Academy* to uncover his mysterious past and who made him the metal mutant he is today. Taking the latest

...superior eyesight can be used to pick up the path of enemies...

line of comics and Hugh Jackman's gravelly movie version as inspiration, *Wolverine's Revenge* is a dark and damn good looking third person adventure.

LOGAN'S PUN

With an eye for the biggest explosions and most dramatic deaths, Logan runs through eight worlds using his sixth sense to warn him of danger, his keen sense of smell to track his prey and those adamantium claws. But Logan isn't just limited to slicing with steel because using his superior senses he can use stealth to infiltrate the

Department H research facility. And these skills are smartly shown with visible scent particles dripping off characters, a glowing heat haze that reveals hidden hoods and even Logan's superior eyesight which can be used to pick up the path of any enemies. The developers have cleverly used these skills too, creating puzzles that

slow the all-action pace down, making you think and fight to complete each area.

With Professor X (Patrick Stewart) and Luke Skywalker himself (Mark Hamill) as Wolverine this is one comic book hero that sticks closely to the Marvel series and still manages to build what could be a great game on those adamantium bones.

▲ Like all the versions, the GameCube can boast some great facial animation on the frowning fighter.

▶ Slash & Burn

All of Logan's combat moves have been designed to be simple. So with an easy combo you can demolish a wall, skewer a soldier or lob a robot into a minefield. As these Xbox shots reveal the bonus 'Strike' special moves are even more impressive, reacting to the amount of enemies around you.

▲ Notching up Strike moves will add experience points revealing more bonus artwork and costumes.

▲ Ordinary humans don't pose much threat so they gang up and use darned heavy weapons against you.

GOOD COP ▶ BAD COP

Furious fighting moves and dramatic animation really portray the hairy hero in what could be a comic book classic.

Too many automatic moves could suck the fun out of claws combat and make button bashing the best path to success.

▶ WHERE IT'S AT

Meat still needs to be put on the bones but *Wolverine* looks on course to make that spring 2003 release.

UPDATE! NEW SHOTS! UPDATE! NEW SHOTS! UPDATE! NEW SHOTS! UPDATE! NEW SHOTS! UPDATE! NEW SHOTS! UPDATE!

The thing is with Clones, they might be all smiles on the outside but they're crying on the inside...

Mad Cow Crazy!

Each combat unit comes with two weapons and occasionally a little BSE - a little bit of something extra.

When using the Republic Fighter Tanks you can use a first person view to take out long distance targets.

Each weapon has a primary and secondary function, and some have a special speed boost or one shot kills.

While there's strategy involved this is primarily an action game. A sort of mission based *Twisted Metal*.

Everyone familiar with the *Clone Wars*? Well we first heard them mentioned way back in 1977 in the original *Star Wars* when crabby old man Obi-Wan mutters something about them, but until we saw *Episode 2* did we really know what was going on?

The war is between the troops of the Confederacy of Independent Systems led Count Dooku and the Clone Army of the Republic under the command of the Jedi Knights Mace Windu, Obi-Wan and Anakin Skywalker. Gamers will control one of these three depending on the mission, but rather than kicking ass with light sabres you'll be leading the Clone

...you'll get to bez about on speeder bikes, fighter tanks and gunships...

armies in a series of combat units. You'll get to bez about on speeder-bikes, gunships, fighter tanks and assault walkers, while over 30 other units will also feature.

EPISODE 2 POINT 5

The action starts immediately after the events of *Episode 2* with your overall directive to stop Count Dooku from assembling an ancient Sith weapon of mass destruction. You do this by completing multiple objectives sprinkled through the 16 stages. The game plays like a ground based *Jedi Starfighter* with the tasks made up of

defending bases, attacking enemy strongholds and escorting ally ships.

Alongside the one-player game are several multi-player options for up to four players. Best of them all is 'Conquest' which combines the vehicle combat action with elements of RTS. Scattered along the Conquest maps are outposts that can provide bonuses and

the longer you use them the more benefits you get. Twenty seconds gives you a few defensive turrets, 40 some automatic laser towers and over a minute provides you with other units which you can order about! Blimey, it almost sounds like a *Star Wars* console game that will have some brains behind the bright flashing lights.

These are the out posts that can be occupied in the Conquest multiplayer.

Crisp Walkers

What's so sweet about getting to doss around with the Clone Army is that you get to see early prototypes of the Imperial vehicles in action. As well as the speeder-bikes and walkers, there's some dodgy looking AT-AT's knocking about as well. And we can't forget those creamy Jango Fett looking Stormtroopers.

That is one ropy looking machine with the legs of a new born foal. The huge mutha of a gun kinda compensates

Here's those friendly Clones involved in the ground war. You'll have to support them with your artilery like guns.

GOOD COP BAD COP

Action packed adventure that quite amply bridges the gap between the second and third episodes.

But later on we got into a scrap with the Whomping Willow and learned new stealthy skills, using a sneak button to avoid a wizard. The PC version looks similar, but contains more platform and puzzle action (you leap up the Whomping Willow instead of decking it. Lucky Willow!)

If you want to have a ride in the flying Ford Anglia, you'll have to play Potter on PSone. Unlike the next gen consoles, you get to play out the best

part of the book where Harry gets behind the wheel and chases the spooky train.

Then there's the eye bleedingly gorgeous GBA adventure which not only has some 3D Quidditch action, but also links up with the Gamecube version for an

extra secret Forbidden Forest level. Finally if you want probably the most complete Potter experience with dialogue from the book, go for the Game Boy Color RPG with it's all new team based battle system and, yes, Quidditch!

Harry's Looking Hot!

Despite having the same content as the other next gen *Chamber's*, the GameCube adventure is easily the best looking Potter at the moment.

Hogwarts has never looked so good. But it's going to get messy.

Link this up with the GBA version to play in a secret level.

Who wears ear muffs these days? Potter is such a spud. Still, he can work magic with a broomstick.

Chase The Hogwarts Express!

As Jade from Big Brother would say, it's the Ford Angular. After flying the car to school, disaster strikes. The Chamber of Secrets has been opened and Hogwarts pupils are being turned into stone. It's up to Harry to find out who is the heir of Slytherin House and discover who is trying to frame him.

▲ After missing the train to school, Harry hops in the flying Ford with Ron. Why isn't this in all the versions?

▲ Power up your spells by holding down the fire button. But, hold it down for too long and you'll miss.

▲ Harry teams up with his best mate, Ron Weasley and Hogwarts' resident ghosts.

Solid!

Professor Snape reckons all the fame is going to Harry Potter's head and always sides with Draco Malfoy. Still Harry will get a chance to get his own back in the Duelling Club. Unlike the console versions of the game, the PC Potter has a duelling league.

▲ Snape stands side by side with his favourite pupil, Draco Malfoy.

▲ Watch out for the prefects. Harry has to keep his eyes peeled for them.

Gilderoy On GBA

You'd need to sit in the middle of a floodlit Old Trafford to see the ridiculously dark Philosopher's Stone on GBA. But you can alter the brightness on *The Chamber of Secrets*.

◀ Like the PS2 version, you'll have to be stealthy to avoid prefects at night.

▲ JK Rowling has written some exclusive content that wasn't in the book for the GBA adventure.

Pottered!

Once again the GBC *Potter* is a huge RPG crammed with dialogue from the book. But this time it's more like a trad RPG as you get involved in team battles. Like the book Lockhart, Hermione and Ron will join him for the final battle - which I'm sure is a relief.

▲ Ron helps Harry get rid of the house gnomes from the Burrow's back garden.

▲ This time you'll get stuck into 2D games of Quidditch on GBC.

Have You Got A Light, Boy?

Harry can use magic to light his wand and look around dark rooms. You can buy new spells from Ron's brothers Fred and George, you'll earn others for completing tasks and learn some more in the classroom.

▲ Harry searches for Ginny's lost items in the Burrow.

◀ If you earn all 600 house points you'll unlock an ending which shows Gryffindor winning The House Cup.

▲ Harry has to sneak around in Diagon Alley's shops or he'll be caught and chucked out, losing him those precious house points.

First Impressions

The Magnificent Seven?

Some American Schools have banned Harry Potter from their libraries because they think the little wizard is an evil spawn. Well, after playing the PSone version of *The Philosopher's Stone*, some would have to agree.

But anyone who has played the handheld versions will think differently. And it's the GBA and GBC which shine again here. *The Chamber of Secrets* is one of the best looking GBA adventures ever and with the promise of GameCube link-up and 3D Quidditch, this should be even better than its predecessor. The same goes for the GBC version with its new Quidditch mini game and extra 10 hours of gameplay.

The PSone adventure with its auto jumping and bean collecting looks a bit like the kiddie *Philosopher's Stone*, but at least you get to fly the Ford Anglia. HP on PC doesn't look like he's changed much since the last game either, but the duelling club sounds good.

Now for the next gen Potter wars. Well, with its lush looks and the bonus secret level, GameCube is winning at the moment. And with some tricky boss battles all three look like far better adventures than *The Philosopher's Stone*.

GOOD COP BAD COP

Hogwarts has never looked so good. Warner and EA have managed to recreate Potter's world perfectly.

Despite being a kids book, *Harry Potter* can be enjoyed by all ages. If only the same could be said for the games.

Truckin' and tradin' with hard edged hicks who were born to be wild and make some serious dough!

Trucking isn't the most obvious of game genres. Sega started the craze with the simple but limited *18 Wheeler*, and *Super Trucks* tried to recreate the boring 'real' sport of racing with trucks. *Big Mutha Truckers* is a tongue in cheek trip of carnage over America which gives reality the hard shoulder and offers wannabe beer bellied road hogs the chance to wreak havoc and make money at the same time. In Big Mutha mode, you get to

pick a character, choose a cargo and deliver your goods to a set drop-off point. Legal goods don't command such high pay-offs as bootleg clothing and cargoes that have the police hunting you down like an axe murderer. Similarly, if your cargo has a high value, local biker gangs will attempt to smack up your truck and steal your precious goods. Even the cops aren't completely clean, so expect to meet more than one corrupt sheriff.

GREASY SPOON

A bar and garage offers you the chance to meet with fellow road warriors and hunt for high earning jobs that can build your personal fortune. Trucking takes place over inner city streets and, as you

▲ Nothing annoys the cops more than crushing one of their donut brothers.

travel from state to state, winding freeways loaded with angry commuters. The more cars you manage to accidentally crush, the higher

...multiple routes mean you can take longer back roads to avoid traffic...

▲ If you've taken a wrong turn, petrol stations are great for three point turns.

your damage will be until your journey ends in a blaze of glory. Multiple routes mean you can take longer backroads to avoid traffic, cops and bikers. But this wastes valuable time and if you miss the drop off, it's all over. For PS2 owners who long to rocket down the M5 while breaking the law and heading to the odd greasy spoon en route, *Big Mutha Truckers* is ideal.

Nasty Trucker

It's highly unlikely that you reach a drop off point without gaining a few damage points. I mean, how are you going to have fun without slamming into barriers or nudging passing vehicles. *Big Mutha Truckers* makes it genuinely fun to attempt ridiculous acts of 18 wheel wrecking. Smart!

▲ The in cab view isn't very practical as you can't see what's directly in front of your truck in traffic.

▲ The lunatic hick tried to recreate his childhood bike riding tricks.

Sitting On Top Of The World

For the authentic trucker experience, an in cab view can be selected, making the road seem a very distant place. The third person view is best for making sure you don't run over innocent motorists or, even worse, sneaky cop patrol cars. If you do accidentally manage to flatten one of the Rozzers (accidentally, ha!), they'll be on your case for the rest of the game, so err on the side of caution however much the temptation to squish one of the little beggars.

▲ The inner cities mean that GTA 3 style pile-ups can occur - but keep an eye on your damage meter.

▲ The truckers were so hard they thought smoking fags and driving was cool. Stupid Mutha Truckers!

▲ Get into trouble and the shades and sun screen will fly across your dashboard.

GOOD COP • BAD COP

Expands the truck genre with added trading, cop evasion and multiple routes on each freeway.

The humour could wear thin - and there's only so many jokes you can make about redneck hicks.

TEST SHOTS! ♦ UPDATE! ♦ LATEST SHOTS! ♦ UPDATE! ♦ LATEST SHOTS! ♦ UPDATE! ♦ LATEST SHOTS! ♦ UPDATE! ♦ LATEST SHOTS! ♦ UPDATE!

Still got love for the streets, still not loving Police, this gangster car jacker is still stalled in Soho...

Still as hard to pin down as a nutter with a nailgun, *The Getaway* squirms and wriggles like a guilty man in the dock. But after more hold ups than Ronnie Biggs, it finally looks like this criminal chaser has done its time in Soho and after three years it is now looking forward to that release date.

The latest scenes to sneak out of Sony have revealed yet more London locations, enourmously detailed interiors

and some fantastically violent gun battles. In the middle of 40 square kilometres of the capital, we have also now seen a gun battle in an art gallery, a warehouse, whorehouse and yet more rough and tumble in a restaurant. And these beautifully rendered rooms are just a handfull of the 20 buildings that can be explored.

SOHO SQUARED

More importantly it looks like Team Soho are set to deliver on those *Max Payne*-style gun battles with a mixture of hand to hand combat, fun with firearms and a little bit of sneaking mixed in with the slaughter. At the moment it is hard to tell how these scenes

▲ 22 other characters including cops and crims have been included here.

fit into Mark Hammond's 12 missions, but it does look like this bank robber isn't afraid of taking out a few rozzers if it

...this bank robber isn't afraid of taking out a few rozzers...

helps him avoid the law. With still 12 more missions from Frank Carter of the Flying Squad yet to be revealed and not even the upcoming *GTA: Vice City* promising the chance to blow the doors off buildings to catch a crook or avoid the rozzers, *The Getaway* could still prove to be a totally awesome gaming experience.

White Van Riot

After all those flash shots of sexy Audi TTs tearing it up around London it comes as a bit of a shock to see on the new street scenes that one of the 50 licenced vehicles is the kind of little van that plumbbers use. Okay it's realistic but who is going to make a *Getaway* in a Suzuki Carry?

▲ It's a Bushell wagon! Altogether now 'I wouldn't say it if it wasn't true'.

▲ Pedestrians seem to have been added since the last time we got a look at these mean streets.

Capital Crimes

Just in case *GTA 3* was hogging all the attention from those bastions of moral outrage at *The Daily Mail*, *The Getaway* manages to match that level of filth not with hookers and Mafia hits, but with realism and just a little bit of sadism. Even Ice-T would be proud of this Cop Killer. While *GTA* is a bit 'knockabout' and *True Crime* is on the side of the good guys, *The Getaway* remains very hardcore and close to the knuckle. We're sure there's a moral to all this...

▲ *GTA3* has a bit of a cartoony edge but this remains very realistic and gritty. It's a man's game.

▲ Even the cop's bullet-proof jacket can't seem to stop your two man crime wave. Not exactly *The Bill* is it?

▲ Why do we get the feeling that this game might be set for a Mature rating when it finally appears?

GOOD COP BAD COP

24 missions and a 40 kilometre patch to explore including interiors makes your mouth water more than fruit pastels.

Can mobster realism ever compete with the gun-toating, Yardie toasting mayhem of *GTA*?

After three years underwraps in Soho, the release date is now set for some time in November. Probably...

Just like the taste of boiled egg if you eat it too fast it comes back...

Is it four already!? Doesn't time fly! Anyway, skateboarding. It's good isn't it - especially for Activision who continue to smother every console with their all-conquering extreme sport saga while reaping the rich benefits.

After *Tony 3* gave us better graphics and bigger levels, Neversoft's new challenge is to take

the game to another level. To infinity and behind, so to speak. They haven't peppered the game with new moves but altered the structure of the Career mode which has always been the

backbone of the Tony games. This time everyone starts off as an amateur boarder blessed with ordinary talents.

level increase but now the objectives become unique for each superstar boarder, using their career defining moments as inspiration.

Neversoft have got rid of the two minute time limit which encourages gamers to snoop around the levels looking for treats - the tastiest being the tennis and basketball mini-games. Also the leisurely feel to the play gives a pleasant, open-ended, almost RPGy feel.

We'll have a more in-depth play test shortly and more details of *Tony 4's* on-line capabilities, so hang five dudes...or whatever.

The big change to the game concerns the objectives. Rather than completing a list of tasks in a linear fashion, this time you must find one of the level characters who will give you a task. But this won't be just high scores and stunts as this time you have to race against in-line skaters or complete certain tricks within a time limit in order to open up other parts of the game and collect skill points to improve your stats.

The new Tony continues the good work the third game did for freestyle moves. With no time limits to hurry you along it will pay to use as big a variety of moves to get the big points - so don't over look the flatland tricks and make sure you explore the whole caboodle.

You need a boarder with big balance stats to remain upright.

As soon as you slip into these flatland tricks you can chain them all together.

One of the best new features are the mini-games as Tony gets to show off his tennis and basketball skills. Prove that you've got the ball skills and earn money to spend on new clothes and equipment.

Tony Hawk's Pro Skater 4: GBA

GAME BOY ADVANCE

The tiny Tony hand-held games have been hugely successful on the GBA so there's no surprises that it's getting a piece of number 4.

Developed by Vicarious Vision it uses an enhanced version of the usual isometric view which hopefully should make it easier to judge those angles. It will use the console game as the basis for the challenges but many of the career objectives will be designed specifically for the hand-held version. Good news for those with link up cables and friends as it will support four player multi-player challenges.

Number 4 will work pretty much work like other GBA games using the same areas but using slightly simpler objectives.

You can't really call that 'big air'. Looks more like 'mini handheld air' to us.

180 BS ROCK N ROLL
2530

The Tony Hawk's games have always been among the most impressive looking on the GBA, if only the isometric view could perform in a slightly more convincing fashion.

First Impressions

Skate Tough Or Die, Pilgrim!

The two levels we got to meddle with were a college campus set up and superb San Francisco. And they are biggedy big! So huge in fact that they make the Los Angeles level from the last game look like your backyard. The neat thing is that now without the time limit you can explore every alley and crevice at your own leisure, taking that slacker approach that sits so snugly with skateboarding. There's loads of hidden rails and areas to bounce off and you can actually alter the layout of the area by removing ramps and obstacles once they've served their purpose.

As for the challenges, they're much less obvious than before. For instance on the college level you grab on to the bumper of a professor's car and skitch a circuit of the carpark. It's just so Michael J Fox! You can even use this new skill to boost your speed when attempting a giant big leap.

It's all very tight and tidy stuff that will impress but this is Tony's fourth outing and it should be interesting to see if Neversoft have found the right combination to sustain the massive success that the earlier versions established.

GOOD COP BAD COP

Really attempts to take the game forward rather than just offering the usual sequel updates.

Has to make the most of the online capability to take the franchise past just being some bloke on a wheeled plank.

Missing Link? You'll be glad to welcome him back in this evolutionary epic...

Who'd have thought that Link had a family? We just thought he came into being, fully-formed, in the original *Legend of Zelda*. But no, at the outset of his latest outing - still known as

Legend as Zelda, but we're sure Ninty will give it some kind of subtitle before it finally appears - we see Link at home with his family. There's Granny Link and all the rest, but significantly we meet Link's sister, Arilla.

him before - we find him aged all of 12 - it's not long before Link tools up and sets off to find her. Them's the basics and yeah, we *know* that it doesn't sound like the most

inspiring start for a *Zelda* title. Have faith, though, knowing Shigsy this'll be just one part of a complex, multilayered adventure and you'll probably end up forgetting that you're actually out on a sister hunt.

So, have you had time to accept *Zelda's* new cel-shaded looks? Don't worry about acceptance, once you

see this baby move you're going to absolutely love it. Don't worry about comparisons with kiddie cartoons because *Zelda* looks a lot better than the average Saturday morning animation. By keeping it simple Shigsy and co have made it possible to cram a lot more personality into the game, from Link's facial expressions onwards, and the light and shading effects are stunning.

"You talkin' to me? You talkin' to me?"

Legend of Zelda's going to be a voice-free enterprise, but don't let that trouble you. Even though the dialogue's text-based, you'll get a real feel for Link's emotion's through the splendid facial animation system. Here he is looking none too chuffed at something. Probably that someone's called him Pixie Boy for the third time this morning.

What's guarding that bridge? And does he know where the Billy Goats Gruff got to?

▲ A hungry Gleeock waits for his dinner. Pray it won't be you. But it seems rather likely.

▲ As ever, the combat system is simplicity itself. You'll probably be wanting to attack here.

Dark City!

It's when you get out of the sunlight and into somewhere all shadowy that you really begin to appreciate the genius of *Zelda's* cel animation. You think you've seen shadows in 3D games before, you ain't seen nothing yet. It's like you're living in a Disney film.

First Impressions

Evolutionary, not revolutionary

Okay, so it looks like something you'd expect to fill the gaps in SM:TV between *Eat My Goal* and *Wonkey Donkey*, but once you get past *Zelda's* new cel-shaded looks you'll find something pleasingly familiar. Shigsy might have diddled with the visuals but anyone familiar with Link's N64 excursions will have no trouble picking up his new outing.

Once you've seen Link's spinning sword attack in action, you'll be hooked. And speaking of hooks, his hookshot's there too, pumped up with some spiffy animation and a great cut-scene for when the hook finds something to hold on to.

Course, it wouldn't be *Zelda* without puzzles. Block shunting and switch-flipping both have their parts to play, and there's one great bit where you have to use fire arrows to melt a pathway through ice. However, whether this *Zelda* packs any signature puzzles - like the ocarina, or the time travel from *Majora's Mask* - remains to be seen. Ninty are keeping schtum on this one.

It's shaping up nicely, and looking set to be another must-have *Zelda*. But hey, Shigsy would never dream of releasing anything less.

GOOD COP BAD COP

Yay! It might look scarily different, but beneath the new looks it's the *Zelda* we all know and love.

Don't go expecting any radical new developments in the gameplay department, mind.

WHERE IT'S AT

All being well, it'll be with us in February. Assuming Shigsy doesn't change his mind and hold it up again.

Drive to the top of that little hill and you'll probably be able to see for miles in every direction. Amazing!

Just like the PS2 versions, the cops in the GameCube edition are relentless and show absolutely no mercy.

The incredibly huge landscapes even have grass on them. Except in the desert.

You'll find cities and towns scattered around. Time to go exploring, smugglers!

Smuggler's Run Warzones

SHOTS! ♦ NEW GAME! ♦ FIRST SHOTS! ♦ NEW GAME! ♦ FIRST SHOTS! ♦ NEW GAME! ♦ FIRST SHOTS! ♦ NEW GAME! ♦ FIRST SHOTS! ♦ NEW GAME!

Fun with contraband in the latest evolution of Rockstar's rooting-tooting law-evading racer...

Auto Smuggler

There are nine vehicles in total to choose from, with a special edition car that wasn't on the PS2 version.

The ATV is one of the best vehicles to use in multiplayer games, thanks to its superb top speed.

Certain vehicles have speed boosts, and those are the ones you should use for the chase and destroy missions.

Law enforcement dudes will shoot your car into tiny pieces if you hang around staring at their choppers.

Weapons!

Four new weapons have been added to the original bundle from the PS2, including an acid bomb that eats away at the other cars and a cloaking device to help you escape in tense multiplayer games. That lot sounds like it would come in handy for getting a parking spot down the multiplex of a Saturday.

Drop a barrel of explosive behind you and watch as it bounces down the hill and straight into the pursuing rozzers.

As well as things that go bang, you can use more subtle techniques like smoke trails or vertical boosters.

Like a dodgy Columbian who heads back home across the US border a few kilos lighter, the developers hope to give *Smuggler's Run* fans an intoxicating treat with this semi-sequel/update.

Smuggler's Run: Warzones is an enhanced version of the PS2 game *Smuggler's Run 2: Hostile Territory*, with new features, new weapons, improved graphics and some extra multiplayer modes.

In case you've never seen the PS2 editions, the gameplay is a bit like *Crazy Taxi* on a massive scale.

...you can play all sorts of variations on the old fetch-and-carry...

Instead of ferrying passengers downtown, you've got to collect contraband dropped from aeroplanes and transport it miles back to your base.

IMPROVED

The landscapes are vast. If you see a hill way off towards the horizon, you can drive to it and even climb up to the top, which certainly makes it unique among driving games. On the GameCube, everything is crisper and smoother, and the scenery pop-up that was noticeable on the PS2 is now much less evident.

A wide selection of four-player modes have been

included, and it's here that the game is really at its best. You can play all sorts of variations on the old fetch-and-carry theme, plus a new *Unreal Tournament*-style Domination mode, which works better than you might imagine. If battling isn't your thing, there's also a race between checkpoints scattered over the countryside.

The controls have been translated accurately to the Gamecube's pad, which is just as well given the big differences in handling between the vehicles, terrain and weather conditions. The game is released next month, when we'll be able to tell you if it really is that much better than it was on PS2. Place your bets now.

The police don't take kindly to folks who drive around in souped-up bin lorries.

GOOD COP ♦ BAD COP

Endless landscapes and a smooth frame-rate, even with four players on screen, is a lovely thing to see.

Slightly bland to look at, and not a huge amount of visual detail. Mind you, it is mostly based in the desert.

WHERE IT'S AT

The game was all but complete when we played it, and we'll have a review for you in next month's GM.

Bond Battle!

Never one to shy away from a battle, *Bond* is spreading himself across the consoles. Which one do you think looks best?

▲ The bullets are flying on PS2. This is looking like a flashy version of the N64 classic, *GoldenEye*.

▲ With its moody shadowy lighting, 007 is looking smoother on Xbox than on PS2 or GameCube.

▲ Bond uses a Q lab gadget to nail Drake's henchman on GC. This doesn't look as good as the other two so far.

Look! It's Pierce Brosnan's fingernails. Aren't they clean? Miss Moneypenny would definitely approve.

It seems a bit odd splashing out the cash on Pierce Brosnan's likeness, when for the most part all you see is 007's hand clamped to his Walther PKK. It's only when he starts to chat up the laydeez in the cutscenes that you get the full on Brosnan experience. Still, we suppose it adds to the whole Bond experience.

007 HEAVEN

EA treated us to some full-on 007 heaven and while *Nightfire* isn't based on any of the films, you'll still feel like you're playing in James Bond's greatest hits.

...You'll feel like Roger Moore playing in *The Spy Who Loved Me*...

Forget Brosnan for a sec. As soon as you leap in the Lotus Esprit lookalike Vanquish vehicle and drive underwater, you'll feel like Roger Moore in *The Spy Who Loved Me*. There are some classic Bond snow chase scenes too which have you sitting on the back of a snowmobile gunning down evil Rafael Drake's forces. It's Bond doing what he does best - showing off in style. And what style!

But once you get past the fancy driving bits, the shooting's not bad. From the

very first minute it looks far better than *Agent Under Fire*.

You won't be trying to open a door with Q's gadgets from the start. Instead you raid a castle. You can either hide in a delivery truck, wade in with your weapon or sneak around gunmen on balconies

and shoot out flashlights. So far, so *GoldenEye*. It would be nice if EA could pilfer some of Bond's movie back catalogue, but armed with some top class shooting and driving, this could be the best Bond game since the N64 classic. Oh James!

Guns, gadgets and girls. *Nightfire* could be the ultimate Bond experience.

007 PC stylee

You won't get to drive underwater in the PC version of *Nightfire*. Still, there are some extra shooting and online levels that aren't on PS2, GC or Xbox. Apart from that it's got the same plot and a great mix of weapons, women and widgets.

▲ It's not often that you see Bond handling a sniper rifle, but when he does...

▲ Zoe Nightshade, the lady interest from *Agent Under Fire*, is back.

GOOD COP BAD COP

With its underwater driving and mix of stealth and full on shooting action this looks far better than *Agent Under Fire*.

Although there are extra shooty sections in the PC version, it's a shame that there are no fun driving levels.

Way Of The Samurai

Live by the sword or get **butchered** by evil samurai gangs brawling in bars...

REVIEWER: Richard Melville

The trend for slicing samurai skin in feudal Japan was kickstarted by *Tenchu* and led to the creation of the epic *Onimusha 2*. Now Acquire are back with a scrapping adventure which stomps firmly into *Onimusha* territory. Before beginning your

quest you have to pick the look of your warrior. There are over 40 swords which can be collected from enemies and friends throughout your quest. Chairs and tables are obstacles that can cause you to stumble and, should you find yourself on the floor, you'll need to kick your way back up to stand any chance of spearing the spine of an

enemy gang leader. Free roaming levels feature stunning rivers, trains and detailed restaurant hideouts so any *Onimusha* addict should keep a look out for the full review next issue.

GOOD COP BAD COP

A quickfire plot, complex combat and villages full of missions make for a heck of a feudal doozie. Doesn't look as jaw dropping as *Onimusha 2* and might be a bit tricky to pick up for those with two left thumbs.

If you want to live then you'll have to take a crash course in combat and get a grip on all those anti-Skynet weapons.

Amazingly, your basic weapon is an electric hitting stick. Bash them robots!

It's guns that you really need. Lots and lots of guns. Use the lock-on.

If all else fails, bung explosives at them. Here the lock-on's vital.

There are plenty of gun emplacements to use. Just don't get cocky and let the gun overheat.

The Terminator: Dawn Of Fate

Can you have a **prequel** that takes place **43 years** after the **original**?

Aieee! Temporal anomaly ahead! *Dawn of Fate* is, yes, a prequel to *The Terminator*. It takes place in 2027, 30 years after the machines took over. The film itself takes place in 1984.

Try not to worry about the causal consequences - just relish the fact that this means an all-out scrap against Skynet, as you help John Connor's human forces against T-800s and hunter-killers and try to stop an evil plan to send Arnie to kill Connor's mother. What are the odds of it all going wrong and you having to send Kyle Reese back in time too? Pretty good, seeing as you get to play as Reese.

It all happens in a survival horror stylee, but you have

the option to lock onto specific targets or switch to a first-person viewpoint. Eleven huge levels await, all based on James Cameron's original vision of a machine-dominated future.

Will the machines win? If they do, does that mean the game doesn't happen? That's the trouble with time travel, y'see...

GOOD COP BAD COP

Doddlies of robotic slaughter in a grim, machine-dominated future. Which is always good for a chuckle.

The usual fiddly survival horror controls await, but the lock-on and first-person views help a bit.

WHERE IT'S AT

Our version looks good as finished. As long as we don't get enslaved by killer robots, the review should be soon.

Why are Terminators so cross? Because they're always seeing red! Arf!

The swampy level of Kalau Wastelands is full of flashy rain effects and deep water for your pod to plunge under.

Will Bill's baby be the one to finally produce a sled shredding, track twisting *Wipeout* worrier?

The music stopped, whistles went unblown and both glowsticks and jaws hit the floor. Even those stupid white gloves and face-masks came off when *Wipeout* hit the clubs.

Thrust onto the shelves and the dancefloor in the early Nineties, Sony's cool-soundtracked, sled speedster wowed the crowds and

helped the grey console make the leap from hardcore machine to a must have bit of kit for ravers and gamers alike. Which explains why Bill's boys have photocopied the five time futuristic funster for their polygon pushing power house.

CARBON DATED

The racing pod doesn't handle in quite the slippery sled storm way as Sony's original, instead gravity plays a part as you fight the airbrakes to stay on course. But that doesn't mean you can't go off-road as plenty of dead end routes and open

areas let you discover hidden points power-ups and snaffle bonus weapons in some of the nastiest, fastest, closest racing around.

So what if it might have less original content than the Sing-A-Long With Will Young song book? *Quantum Redshift* takes the standard rocket racer and puts a brick

on the particle accelerator. Okay, so things start out slowly as you climb through the five difficulty levels but once you reach the top *Redshift* class the world whips past at sphincter-splitting speed complete with five other rivals and enormous explosions from the collectable weapons. But this thunder bolt of raw power isn't enough to trouble the Xbox, not even with all the complex rain and water effects going on around you. In fact, *Redshift* offers better bangs, bigger blasts and plenty of perfect particles physics throughout all of the nine huge circuits.

Each ship is equipped with a shield and two weapon stations.

The plasma cannons keep firing once you hit the button.

We haven't seen anything as original as the Quake weapon yet but the power of the rockets certainly looks good.

Foxes? In space? With dinosaurs? And Pterodactyl Princesses? It could only be the return of Fox McCloud!

What's the betting they'll end up calling it something like *Fox McCloud in Dinosaur Planet*? Curse those trademark disputes!

Weirdly, this is Fox McCloud's third outing, and his third set of developers. *Starwing* came to us courtesy of Argonaut, Ninty themselves handled *Lylat Wars*, and now

it's Rare's turn. Perhaps Nintendo envisage a future where every developer gets the chance to make a *Star Fox* game...

WHO'S THE FOX?

Early showings clearly betrayed *Star Fox's* roots as *Dinosaur Planet* for the N64, but Rare have been working their magic for some time now and it's all looking incredibly special. Fox himself is far and away the furriest character ever to grace our screens - you could just reach into the screen and stroke him. Yes, it's all very *Zelda*-esque, but there's more than

enough going for it not to be dismissed as a mere *Zelda* clone with a fox and a bunch of dinosaurs. Does *Zelda* pack an enormous triceratops sidekick who can dig holes for you, distract the enemy, guard you or simply play fetch with a ball? No, it doesn't. Weapons-wise, Fox is equipped with a staff, which works as a simple hitty

stick but can also be jiggled into something more powerful. Slippy Toad is, thankfully, kept at a safe distance from where he can provide Fox with new gadgets and equipment. Let's hope the inept amphibian's toys work properly...
As for the story, lovely *Dinosaur Planet* has been overrun by the evil General Scales, who's gone and captured a pterodactyl princess, and it's up to the *Star Fox* team to save the day. With its accessible gameplay style and ultra-shiny graphics, *Star Fox Adventures* seems more than likely to deliver.

...by far the furriest character ever to grace our screens...

Up, Up And Away!

Being evolved from *Dinosaur Planet*, *Star Fox Adventures* features a lot of ground-based running around - not the most natural environment for Fox, we're sure you'll agree. Thankfully, he *does* get to strap himself into his trusty Arwing for some space action. Cast your peepers on these lush and glorious shots and watch the furry fella go!

▲ Gigantic floating temples in space? That Fox fella discovers the weirdest cosmological thingies, doesn't he?

Fox Hunt!

Removed from his beloved Arwing, Fox can't just target enemies and blast them out of existence any more. It's a shame, we know, but wait a moment. But being a fox, naturally he's an expert at staff-based combat (are you sure about this? -Ed). Grab sticks, lads! Let's get out there and whack things till they hurt!

▲ A fox with a staff against a yellow dinosaur with a hammer. You don't see that every day.

▲ By the power of Greyskull! Swirling coloured lights suggest special things for Fox's hitting stick.

GOOD COP BAD COP

A glorious mix of *Zelda*-style play, fab graphics and the occasional portion of old-skool *Star Fox*. Luvverly.

Come on, though. If you want something *Zelda*-like then you'll wait for *Zelda*, rather than *Zelda* with extra bits, right?

This is a fantastic looking game. The animation is top notch and the FMVs are up to Square's high standard.

But their movement still needs work. It's not scary enough.

When attacking, you lock onto a target with the shoulder buttons then move in and begin striking.

▲ Sora's a nimble fella and can leap and lash out at bosses of any size. Fear him!

▲ Keep with the action set-up - there's quite a bit of platforming involved when searching.

Sprinkle a bit of duck, grind a little mouse and grate some er...Goofy, to get the year's sweetest adventure!

You Don't Know About My Crew

What makes this such a weird and wonderful game is rather than collecting a gang of small men with gravity challenging barnets, your 'cru' is made up of Disney characters. And they fight for you! Oh yes!

▲ Donald, Goofy and Peter Pan kick Captain Hook's ass!

Wait, what do we have to do to grow small?

▲ Some of the puzzles are taken directly from the films.

okay? Now, don't blow it. Just take him out.

▲ It's not just Disney characters as here's Cloud!

Who has consistently made the best RPGs over the years? Easy, it's got to be Squaresoft. Ok, so who has created the most endearing and enduring cartoon characters of the last century? Warner Bros. But running them very close is the ol' House of Mouse, and they've teamed up with the *Final Fantasy* daddies for one of more interesting games of the year.

Kingdom Hearts takes shape as an 'action RPG' and follows the adventures of Sora, a young lad who's island is hit by a storm which scatters his mates to 'far off lands'. His job is to find his

...the games comes across as RPG lite with as much emphasis on the action...

friends and defeat an evil menace that's growing in strength known as The Heartless. He's helped in his quest by Wizard Donald and Captain Goofy, protectors of the Disney Castle, who must have done a rubbish job as they've managed to misplace their King, Mickey.

GOOFY POOH

While this is all airy fairy stuff there's something very appealing about this Disney RPG as instead of meeting up with Zorag of the Quim Forest or some such nonsense, you bump into Winnie the Pooh who asks you to get some

honey - which is to be expected, as he's a bear.

The gameplay comes across as an RPG-lite with as much emphasis on the action as exploring. It's actually got more in common with *Onimusha 2* than *Final Fantasy* as Sora, Donald and Goofy really get stuck into the scraps, collecting experience points as they go. And while it

may be short of the intricate magic mixing of the *Final Fantasys* it lacks nothing in terms of scale - this is one big game. Best of all though is that it looks incredible. You've got Square's genius for FMV combined with Disney flair and it really does illuminate the PS2. Good wholesome fun so Disney can make more money!

Just about every self respecting Disney character gets to make an appearance.

Starter For Ten

This has got a cracking opening for an RPG. Rather than wandering round a village chatting to people, this has got a fight to the death with a huge shadowy boss. Blimey, you weren't expecting that from a Disney. And then what happens? Oh... And then, you wander around talking to people. Them's the breaks.

▲ Here's the head of The Heartless, a huge murky figure that can churn out minions from his clammy hands.

▲ But it turns out it was all just a dream! So Sora can potter around his village playing with his pals. Bless.

GOOD COP BAD COP

Looks incredible, plays neatly and there's plenty of novelty value thanks to the Disney cameos.

The gameplay is a bit monotone and the plot is a bit on the melodramatic side. But then it is Disney after all...

Spybotics™

UNDERCOVER. UNDER CONTROL

PC
REQUIRED

YOU ARE A SECRET AGENT
YOUR PARTNER IS
A HI-TECH ROBOT
A WORLD OF
MISSIONS AWAITS
YOU!

WIN! LEGO® SPYBOTICS™

If you like the look of LEGO® Spybotics™ we're giving you the chance to win not one, but all four of the cool secret agent robots. Worth £59.99 each, that means you could soon be the owner of almost £240 worth of cyber spies. All you have to do is answer this simple question:

What are the names of the four LEGO® Spybotics™ robots?

And send it to:
Spybotics Giveaway, GamesMaster, Future Publishing,
30 Monmouth Street, Bath, BA1 2BW. The closing date for entries is 3rd October.

LEGO® SPYBOTICS™ is a fast action strategy game that mixes both virtual and interactive gameplay. You'll become a member of the Secret Mission Agents Robotics Team (or SMART for short), and using your hi-tech robotic gadget you'll go on hazardous covert missions and become the ultimate secret agent.

Every Spybotics robot comes with ten exciting pre-set missions (5 single-player, 5 multi-player), and the briefings are done through rich CGI movies which explain the challenges that lie ahead, and then show you how to recreate this in the real world. Adjust the detailed mission settings to increase the level of difficulty – the greater the challenge, the more points available – enabling you to sit on the top of the online

agent ranking system and be the top agent! Download special functions into your remote controller, such as lasers and health for those additional challenges, and guide your Spybotics robot to mission success.

When you think you're good enough, try Special Operations. Imagine the most challenging top secret mission – you can create it here and put all your secret agent training to good use. But be careful Agent!

Each pack comes with your very own Spybotics robot, a CD ROM, a USB download cable and a three-channel programmable remote controller. But you don't have to be a computer wizard with expensive equipment to use LEGO

Spybotics. We've made it simple for everybody to get started, so you can construct your Spybot and begin your first mission within around sixty minutes.

LEGO Spybotics are available from August at LEGO stockists throughout the UK and are priced from £59.99. There are four different Spybotics robots to collect, all with different strengths and unique tools to help them complete their missions. Check out the Spybotics website at www.lego.com/spybotics for more info.

So enter the exciting world of robotic espionage with LEGO Spybotics and turn your room into hi-tech robotics command centre.

GM WALLPAPER

STAR LETTER

BAD INTENTIONS

Dear GM,
Good guys, damn! I am so sick of picking up video games and reading through the background story to find out that once again I am expected to be the 'good guy'. What is this fairy-tale-happy-ending preoccupation? It's nonsense, it's dull and it's repetitive. What if I don't want to save the world? What if I happen to feel it would be more fun to destroy it? I yearn not to have to stop terrorists at the airport, but instead, be one of them. I don't want to kill the monsters, I want to be the monsters! If so, why do games like *Grand Theft Auto*

and *Carmageddon* sell so well, despite so many people trying to stop us playing them? People don't always want to be good. In fact thinking about it there are very few instances where being good is half as much fun as being bad. Let's face it, the guardians of our delicate moralities are always going to accuse evil video games of corrupting the youth of today, so the way I see it we might as well give them something to moan about. The more sensitive game players out there can charge about safe in the knowledge that they are on the side of good, killing only the bad monsters that deserve it anyway. Their collective consciousness is eased by the fact that they are on the side of good. Well what kind of twisted logic is that? And more importantly, it's drumming a false sense of security into the 'impressionable youth' - that anyone who fights on the side of good will never be beat.

Trouble is, games that promote evil are deemed bad and unsuitable for society. A child of six can walk into a newsagents and buy a copy of *The Sun* and see naked women and death, but you can't buy *Mortal Kombat* till you are 15. Sorry, I don't want to save the day, I want to murder, maim and kill to my heart's desire - and I hope that I'm not the only one.

Tom Lewis, Devon

You can almost taste the anger! While there will be many gamers that agree with you, the fact is that developers do care what the censors do to their games - and if it affects how many they sell. So it's probably not worth the hassle to consciously court controversy. What does everyone else reckon?

TEARS OF A CLOWN

Dear GamesMaster,
I have two things to say. Number 1: Tom, what is the crack with your hair? It is like a clown's, can u not get it cut or something. 2: When the hell is *The Getaway* coming out coz it looks wicked. I read your mag all the time and could you print this letter in Your Shout please. Oh that was four things.

Sam Andrews, Cumbria

Any suggestions that Tom looks like a clown are completely ridiculous! As for The Getaway, check out P. 42. And we'll have even more next month, you mug. (Just getting into character.)

POGUE MAHONE

Dear GamesMaster,
I don't know if this is a mistake or not but in your free tips book that I get under PS2: *WWF Smackdown! Just Bring It* you keep talking about Shane and Stephanie McGowan, I presume you mean Shane and Stephanie McMahon?

Alan Lee, Liverpool

Yep, well spotted. The mistake occurred because our spell check was set to "Toothless Irish Folk Singers" rather than "Big Men In Small Pants" setting. Sorry for any confusion caused.

MONEY IN MY POCKET

Dear GamesMaster,
Games are a rip off. You save up £50 and could spend it in two minutes. If you buy a game for PS2, GameCube or Xbox it costs £40-£50. Even GBA games are £35. You are only left with £5-£10 if you are lucky. If you buy a strategy guide, memory card

or pad then you have nothing. Zero pounds. Zilch. £50 is a considerable amount of money (a weeks shopping for the average family). Or it was. So when you are given your pocket money or wages and your parents say 'Don't spend it all at once', in today's fast moving technological market, it is almost impossible not to.

Liam Knaggs, by email

How true - read our reviews first. We play the bad stuff so you don't have to. It's a shame that hunting through second hand games is still the best way to get value for money, but at least console prices have come down.

THE KIDS ARE ALRIGHT

Dear GamesMaster,
First of all can I start off by congratulating you on an excellent magazine, and also I would like to

thank you, and I will explain why. When the GameCube was released me and my brother decided to club together and get Ninty's dream console. When I told my friends about my latest purchase they all laughed, because they all (foolishly) believed that the GameCube was a "kiddie console". Since I had bought your mag on the way to school I decided to show them some of the pictures of the games and in particular *Resi Evil*, and they all agreed that they were wrong and since then two have bought GameCubes and another is buying one very soon. So once again THANK YOU for not only saving my neck but spreading the word that GameCube is not a kiddie console.

Darryl Crawley, by email

No problem Darryl. Glad to be of some assistance. We reckon Ninty and Capcom owe us big time!

THOSE WERE THE DAYS

Dear GamesMaster
I have the Dreamcast and the PSone and they have some really good games on them - but they also have some pretty rubbish games too. I was rummaging around in my garage when I found my old Mega Drive 2. I decided to set it up and play a few games on it. As I played I was amazed at how much more enjoyable some of the games were compared to some of the games on the DC and PSone - Games like *Gods* and *Mega-Lo-Mania*. Game designers today have amazing technology that they can use and yet they still make some real lousy games. I think it would be a great idea to bring back some of the old games on some of the latest consoles. Designers can improve them and give them new and more complex plots. Have you heard of any plans to bring any of the old games back?

Evid Thomas, Cwmbran

There's a few - Contra, Metroid and Shinobi for starters. What you really want though is Sega Smash Pack, a GBA compilation of Ecco the Dolphin, Sonic Spinball and, best of all, Golden Axe! Out now in the US, the campaign for its UK release starts here!

LOST WIFE

Dear GM,
Today I laid waste to dozens of zombies, I shot holes in some terrorists holding a building to ransom, I took out some weirdly named baddies in a top secret Alaskan base and still had enough time to explore a spooky town in the hope that I could find my lost wife. Then off went my

PSone and I returned to the "land of the living" feeling very pleased that I had saved the world a few dozen times. Do I have any side effects from playing these "nasty games"? Nope. Apart from huge blisters on the ends of my fingers. People who whine about games influencing violent behaviour obviously don't play them themselves. I love my PSone and I can clearly see the line between virtual and reality. Got to go, Tony Hawk is challenging me to skate with him.

Yours sanely,

Adam Wilmot,
Swansea

We agree. We seriously doubt playing videogames makes you more violent. Team GM is the softest bunch of tarts you'll ever meet. Although Tom can get a bit surly.

UNDER THE RADAR

Dear GamesMaster,
As a regular reader I find it impossible to wait a month to be informed of news from the gaming world. I'm not blaming you, but I'm really surprised that there is no GM website where readers could pick up tips & cheats from previous issues, talk to fellow gamers in chat rooms, read about any previews or maybe just ask simple questions to one of the GM team that we would normally have to wait a month to be answered. I know the whole GM team works really hard but if you had the best games website as well as already having the best games mag you would kick the arses of other mags even more than you do now.

Chris Fowler, Cardiff

There's no GM site (yet), but there is gamesradar.com which is marshalled by GM old boy Ollie Hurley. Let the Hurister keep you happy between issues!

Here's where you can sell your stuff and grab yourself a bargain too! Mark your ad 'Cart Boot' and send it in with the coupon on p63!

ART HOUSE

Are you a whizz with the old felt tips? Why not send us a pic (no bigger than A4) and show it off to the nation? Our fave each month wins a free game on any format! And don't forget to include the coupon on page 63!

Shadow seems pretty popular with you readers and here's another fantastic sketch of *Sonic's* darker side courtesy of Carlos Walker from Nottingham. Top!

Top work from Mark Eden of Rotherham as this is exactly what the console war looks like. Perhaps just a little bloodier.

Tom Mills keeps it *Army Men* style with this energetic PSone box cover.

How's that for a school photo. Great *Final Fantasy* detail from Jason Peilow of Bedford and some mean biro work.

Charming *Animusha 2* caricature from Diana Chan. Nice bit of wind emanating from behind. Curious.

Brilliant shading here from Matthew Fenwick of Whitley Bay, Isaac from *Golden Sun* has never looked so chirpy.

Steven Heath from Devon has chosen to keep it simple with his *Final Fantasy* tribute with this rather melancholy looking Chocobo. Give us a smile beaky!

FINAL FANTASY

GAME DESIGNERS' WORKSHOP

THIS MONTH'S WINNING GAME!

Have you got a great idea for a game? Each month GamesMaster dishes out a free game to the best effort. Think you can do better? Send in your design now!

New from the fertile mind of Kyle Patterson comes *Insane Sports* that have *Something to do with Racing or ISSR* for short. It's a daft racing game as a race of evil aliens must be defeated by racing them...okay. While it might not have the most convincing of concepts it's teeming with options, characters and kick-ass weapon. Great presentation!

How to Enter

Make your game idea as detailed as possible. Include pics of what it looks like, sketches of the characters, what they're like and how the game plays, then mark your envelope 'Games Designers' Workshop' and send it with the coupon on p.63. If you win, you'll get a game on a format of your choice.

This month's high concept comes from Patrick Lerwill from County Antrim, who's *Medevil Mercenary* struck the right balance between gratuitous violence and a heart wrenching plot which involves the Mercenary's brother who is called Eric! Nice touch and great illustration.

OUT NOW!

➔ Reckon you can review games alongside the GM team? Want to get your name and pic in print and win a top quality wodge of gaming goodies? Just review one of your games for us, mark it up 'Out Now' and send it in with the coupon below!

➤ Super Mario Advance 2

PRICE: £30 PUBLISHER: NINTENDO

REVIEWER

Lloyd Davies

When I first heard that *Super Mario Advance 2* would finally be released I screamed with joy. Then I heard that *Super Mario Advance 2* would be a remake of the SNES classic *Super Mario World* and I almost wet myself. But now I've actually got it after months of waiting and I'd like

to tell all you GamesMaster readers just how great it is. Where to start? The gameplay. It takes the inspired magic of *Super Mario World* and quadruples it. You just know you're in for a great game when you start it up and view the brand spanking new intro. As well as this, Mario's taller, thinner and greener brother Luigi tags along in this adventure too. He can jump higher and further than Mario, but otherwise he's useless. Also, the same *Super Mario Advance* multiplayer game is included as well, which is always a laugh with three others. The marvel of a game and its 96 enchanted levels fits into your lifestyle perfectly. This game really is worth buying the GBA for and all I can say now that I've completed it is roll on *Super Mario Advance 3*!

It may be side scrolling, it may be 2D and it may be about a plumber riding a dinosaur, but it still rocks!

➤ Star Wars Obi-Wan

PRICE: £40 PUBLISHER: ACTIVISION

REVIEWER

Kate Wilson

As you probably know, the Xbox games are really expensive, and the last thing you want to do is buy a rubbish game and waste a huge load of your hard earned money. That's why I'm going to tell you about the *Star Wars Obi-Wan* game. The word to describe it is dreadful. There are

plenty more words that I could also say about it but I probably has better not in a family magazine. In the game you get to be the greatest Jedi of them all, Obi-Wan. After playing the final US version the biggest problem with *Obi-Wan* is that it simply isn't much fun at all. You may be a Jedi with a light sabre and the ability to manipulate your environment with your force powers, but exploration is dull, combat is lame and the level layout is uninspired. I need to play it more to be sure, but going by what I have seen so far I don't really want to play it any more.

▲ *Obi-Wan* joins the ever lengthening list of very disappointing *Star Wars* game. Now, if you want light sabre fun try *Jedi Knight 2*.

➤ Pro Evolution Soccer

PRICE: £35 PUBLISHER: KONAMI

REVIEWER

Matt Kempson

Now this is a football game. After years of FIFA dominating the footballing market, Konami, the makers of all things amazing, released *Pro Evolution Soccer*, which conquered the football promotion and blew FIFA away. The gameplay is simply astonishing and the passing system is out of this world. The player's facial expressions are great and the pre-match entrance is a great show of the graphics. The games difficulty goes from one star to six - six being almost impossible to master. You can play in a range of tournaments, but the depth really comes in when you play the Master League. You start off with a team of no-hopers who couldn't even get in your Dad's Sunday League team. But as you progress you win points - and points mean players - and you can buy your own dream team - if you win the first division you get lots of classic players to choose from in the freelance section. If you are shopping in the football market then this is definitely the game to buy.

▲ The king of football games and the good news is that *Pro Evolution 2* is somehow even better.

MAGIC MONSTER MYSTERY MAYHEM MALARKEY!

LOST KINGDOMS

Are you prepared to uncover the mystery that threatens to destroy the Five Kingdoms of Argwyll? Need a helping hand along the way? We're here for some guidance to keep you on the right track.

Easy Experience

Complete the first two stages to gain access to the Apothecary and Blessoon, then head to the Apothecary and talk to Guru. After speaking with her, Dahl-Nok Valley will become available. Go to Dahl-Nok Valley and to the right where some hives are located. Choose to fight the Giant Bees, and kill them easily with your Man Trap. Have it attack the Bee once then call it back. Now finish off the Bee with any desired character to gain experience. Each time you kill a Bee, you should gain about 100 to 140 experience. After killing three Bees, return to the main map then go back and repeat the process until you get the desired amount of experience.

Easy Money

Early on in the game go to Blessoon, and catch as many creatures as possible to sell them. The easiest way to get money is to catch and sell the Rats. You will get about 40 gold per rat sold to the Apothecary.

Capturing Enemies in a Card

If you come across a powerful enemy that you like the look of, get its life down to around two or three then hold L and press either A, B, Y, or X to capture it in a card.

The Guide

Face all the evil Capcom can muster with a spring in your step and a GM holding your hand. Erk...

This is the toughest *Resi* we've played. We have seen grown men weep trying to complete this, so to spare some of the tears and anguish here are a few tips on how to tackle some of the grimmer moments in Capcom's survival special.

We've focused on Jill's adventure as unless you're completely hardcore and perhaps a bit mental, it's the one most of you will tackle first. And lastly whenever a direction is mentioned it's from the characters point of view so it's Jills left or Jill's right. Compronde? Right, let's go forth and kill things.

Resident Evil

DOG WHISTLE

The Dog Whistle can be found in the first floor study above the East Stairs storage room. You use it on the outside balcony once you've used

the Sword Key on the Dining Room Balcony. Once outside, equip the shotgun stand in front of the stained glass and face away from the

direction you've come from. Use the Whistle and two dogs will appear. Kill both and get the ornate dog collar. Inspect it to get the buckle.

Inspect that to get an Imitation key. This can then be used to replace the key in the Knights hallway so you don't get turned into mince meat.

Use the whistle here and prepare yourself for the dogs. There's herb if you need it, near the door.

This is what you've come for. Inspect the collar to retrieve the purple brooch from the buckle.

Then examine the the brooch to create the imitation key which can't be used to open any doors.

Instead, use it to replace the key in the Knights Hallway to stop the twirling blade booby trap.

THE FOUR DEATH MASKS

MASK WITHOUT EYES

This can be found in the Basement Nursery. Use the Herbicide to kill the demon plant. Just place it in the water supply and pump it through the red pipes.

Make sure you choose the red pipe as using the blue one will destroy all the green health herb.

MASK WITHOUT MOUTH

Solve the portrait puzzle. Use the switches to turn a Valiant orange, a Sage purple and a Saint green. Keep the others off. Then hit the switch underneath the Lisa portrait.

Ignore the crows in this area. They will only attack if you get the puzzle wrong. Then worry a lot.

The picture of the sage has turned purple.

MASK WITHOUT ANYTHING

Solve the Knight puzzle found along the East first floor corridor. Move the statues in this order - far right, near left, near right. Then hit the switch on the middle table.

Once you've got the jewellery box out from below the pictures, press the two switches to open it.

MASK WITHOUT NOSE

Defeat Yawn the Snake or grab the mask from the far end of the room and peg it. It's not necessary to shoot the snake as you're gonna meet him later on anyway.

The snake's only attack is its bite so keep away from the mouth as it coils around you.

THE MAGNUM

First you have to get the Wind Crest which is found in the Specimen room at the top of the East Stairs (the one Barry is lurking in). Get the Fishhook from the far wall and combine it with the Lure of the Bee found by the bookshelves. Swap this with the Bee Specimen found in the box by the door and place the Bee where you found the Lure.

Hit the switch, use a couple of Beretta rounds on the wasp as it's very annoying, and get the Crest.

This is then used in the grave along from Lisa's cabin. Place it in the right hand tombstone.

The graveyard is inhabited with crows, ignore them and just move and work very quickly.

You'll then receive three more crests to examine. Press the switches to raise the metal bars. Then place them in the tombstone on the left!

SPIDER ROOM

This is found behind the double doors in the first Residence hall way. All you'll need is your lighter to light three candles and then make a note of the silhouettes created. Enter, turn right, light the red lamp in the far corner. The green lamp is in the downstairs bar section and the orange one can be found by the upstairs pool table section.

All this trouble to get the code for the J-Volt door. Remember the marks if playing on Hard.

Could it have some kind of meaning?

Right by the green candle there's a load of goodies to pick up so hunt around.

Check the pool table and note what's on the balls. Blue 2, purple 4, green 6, red 3, orange, 5.

Some billiard balls. 2, 3, 4, 5, 6...

SHARK TANK PUZZLE

After wading through the Aqua Ring, enter the Control Room and go down the ladder to the Access Tunnel. Check the memo on the left hand wall. Remember the number of the valve. Head to the side window control panel and drain the pool. A shark will headbutt the window. Now you're against the clock. Release the safety at the

console with the black chair in front of it. Lower the pressure doors at the console by the main window. Malfunction! Head out into the hallway and choose the correct valve as indicated in the memo. Release the safety once more and lower the pressure doors. Now lower the water at the console below the shark-butted glass.

Don't mess around in the shark tank. Just run towards the camera as soon as you enter.

There's a time limit to this puzzle so make sure you know which panel you have to access.

J-VOLT PUZZLE

J-Volt is a chemical that can kill Plant 42. To create this we have to access the store room in the Residential Gallery. All the clues were given in the Spider Room, but if you're lazy all you need to enter is red - 3, orange - 5 and green - 6.

it with the NP-004 to get UMB No. 10. Then collect some water in an empty bottle and combine with Yellow-6 to get UMB No. 7.

Once inside, collect four empty bottles and check the values and equations on the walls. Fill one bottle with water, fill another with UMB No.3. Combine to get NP-004. Next collect Yellow-6 and combine

Now combine UMB No.7 and UMB No. 10 to get VP-017. Then finally add some UMB No. 3 to the VP-017 to get the J-Volt. You need to apply this to Plant 42's roots which can be found in the room next to the Aqua Ring Control Room. Once you've got rid of the wriggly things you can roam freely.

If you're playing on Hard you won't get the colours so use the silhouettes to get the code

Approach the roots but don't go too close, then select and use the J-Volt to kill the demon shrub.

TOUGH NUTS

Here's a few non-puzzle related tips to help you past those gristly sections in the game.

CRATE

In the hall outside the Residential Save Room use the crate to cover the holes in the floor to prevent Plant 42's branches attacking everytime you walk past. Push the crate over the crack next to the pile of boxes and then clamber over the whole pile to reach the door.

Covering the other hole will not stop Plant 42 attacking, and it can get very annoying.

KILLER BEES

To defeat the bees in the Residential Gallery, quickly run, in take the first left and retrieve the insecticide from the dead corpse. Leave the room and head to the end of the corridor and use the the spray in the hole in the wall behind the Residential map.

Don't look through the hole as you will get stung. Just use the spray and watch the cut scene.

BOULDER SECTIONS

There are two boulders in the Mine section to avoid. The first one requires a straight run and the veer left to activate the cutscene. The second one falls as you use the hexagonal crank three times. Instead of running back just run forward and left.

FUEL SUPPLY AND WALKING

Near the end you will have to refill the fuel capsule that you find in the Boiler Room in the Chem Research Lab (opposite the x-ray room). Once it's full DO NOT RUN AS IT WILL EXPLODE. It pays to clear your path of baddies before you make the return trip so you take your time.

There's one chimera guarding the power cell, so make sure he's truly deaded before you return.

JIGSAW PUZZLE

To get the Emblem Key you need to enter the Wardrobe Room which can be found on the ground floor of the mansion where you'll find a jewellery box. To open it we have to solve the jigsaw puzzle.

It's simple. Just arrange these pieces so they form an octagon. Put this piece on the left hand side.

Next fill the top of the octagon with the piece with the two straight edges. Make sure they fit tightly.

The largest piece fills the bottom right of the octagon leaving two familiar looking gaps.

You should be left with two smaller pieces. Swivel them round till they squeeze into the gaps.

Make sure all the pieces are placed in neatly, otherwise the puzzle won't work.

Inspect this lovely trinkett and the emblem key will magically appear from inside! Whoopee do!

SURVIVE THE HORROR

DOGS

Too quick for the Beretta so use the shotgun. Often sleeping, so try to catch them off guard, but if they attack try to hit them before they leap and finish them off quickly on the ground. If you're stuck with the Beretta wait till they leap at your face then shoot and repeat.

The dogs are very tricky. Keep moving until you can take them face on. Don't get surrounded.

CRIMSON HEADS

If you kill a zombies and don't dispose of the body, they'll return as these super zombies that are very quick and slash at your face. The shotgun headshot is most effective disposal but the best tactic is to avoid creating them in the first place. Use headshots on normal zombies, incendiary shells that burn the corpses or use the petrol hip flask and lighter to dispose of the bodies - burn several in one pop by dropping the zombies in the same spot and piling the bodies.

HUNTERS

Very dangerous as they can deliver one hit kills. They like to leap from distance so get your first shot in early then position yourself to get another hit just as they rise. Again the shotgun is great but Acid rounds are the most effective.

Do not fanny about with the hunters, use your shotgun.

CHIMERAS

Nasty looking buggers but not as dangerous as hunters. Beware the attacks from the ceiling but as long as you keep moving they're not a big problem. Only the one guarding the power supply needs taking out and the grenade launcher or shotgun will suffice.

The Chimeras aren't as effective as the hunters but there's a lot of them so keep on your toes.

SHARKS

There's no point in getting drawn into a battle with these as you're on their turf (or water) and their mother can eat you whole. Just keep moving as soon as you enter the Aqua Ring. One Beretta shot will take care of them once the tank is drained.

SPIDERS

Gruesome but only dangerous if you get close enough to be hit by their poisonous spray. Easy to avoid and can be taken out with the Beretta from distance.

A tricky one for all your arachnophobes out there. Just try and keep calm and keep running.

CROWS, BEES, ADDERS

Too small to bother using up any ammo on. The only time the crows will bother is in the graveyard, the bees can killed by tackling the nest and the snakes are best dodged. Just keep moving... quickly.

BROWN CRATE AND FLAME THROWER BIT

In the mine, after you leave Barry with the lift, you'll enter a circular tunnel complex. Here you'll meet Lisa. Avoid her and travel through the tunnel to the cargo room. Collect the supplies on top of the crates, then push the brown crate onto the Suspended Lift. Return to Barry. Cross the bridge and go down the ladder to find the brown

crate. Shove this into the Garbage Compactor, crush it and collect the broken flame thrower. Take this to where Lisa is and have her follow you till you reach a metal lever in the wall in the right hand branch of the tunnel. Pull it and peg it to the locked door and place the flamethrower on the metal hooks. Enter through the door!

Avoid Lisa Trevor to reach the cargo room and push the crate on to the lift and hit the switch.

Then descend the ladder by the trunk and push the crate into the garbage compactor. Crush it!

Lead Lisa down the right hand branch and wait till Lisa is right by then pull the lever and sprint.

Shove the Flame thrower onto the metal hooks that appear and access the door. Quickly.

X-RAY PUZZLE

In the Laboratory you'll have to solve the X-ray puzzle to get the security password. You'll find the room off the right-hand corridor in the Lab basement. Read the researcher's letter to learn the screen name and password which will be JOHN, ADA. Collect the first X-ray which will be Clark's and another belonging to Gail. Place the Clark X-ray in the left hand space of the row of X-rays and Gail's in the right. Then hit the switch on the far side of the wall. Four body parts will glow red, the initials of which will make up the password. Use the human organ diagram to recognise the parts, which should give you the password CELL. Use this on the computer in the Research Lab.

Read the memo to get the screen name and login to access the Umbrella security system.

Put the X-rays in alphabetical order and identify the glowing organ parts. This is the Colon.

Next up is the Esophagus. If you don't believe me there's a diagram just to the left of the X-rays.

Next is the organ that regularly gets punished on Friday evenings. Yes it's the Liver!

And lastly it's the Lungs. Put all the first letters together and what do you get? CELL! Tops!

REAL SURVIVAL MODE

Beat a "Once Again..." game on either Normal or Hard in under three hours. Same as Hard but auto-aim is turned off and Item Boxes aren't linked.

INVISIBLE ENEMY MODE

Beat "Real Survival" mode once or beat a "Once Again..." game on either Normal or Hard with both Jill Valentine and Chris Redfield. Get this, the enemies are invisible! Yer see what they've done there.

ONE DANGEROUS ZOMBIE

Complete "Once Again..." game on either Normal or Hard, with both Jill Valentine and Chris Redfield. Your old S.T.A.R.S. teammate Forest (the guy you got the Grenade Launcher from) is alive and covered in grenades so if you hurt him he explodes taking you with him - just to make it a tad more difficult!

WEAPONS

SAMURAI EDGE

Beat a "Once Again..." game on either Normal or hard and in under five hours. It's an upgraded pistol that fires in three round bursts. Infinite ammo.

ROCKET LAUNCHER

Beat a "Once Again..." game on either Normal or Hard and in under three hours. The same weapon you use against the Tyrant but with infinite ammo.

HIDDEN COSTUMES

You'll find the key to the Closet in the Item box in the Once Again Mode. The Closet is in the picture just off the Statue Room where you collect the Mansion Map. You remember, you picked up a survival knife right by there.

Unlock the hidden costumes and get to look really cute as zombies rip your head off.

SHINJI MIKAMI MEMO AND COSTUME CATALOGUE

Beat the "Invisible Enemy" game, and in under five hours. Inspiring words from the games creator and some unused costume ideas.

BOSSSES

SNAKE

You'll face Yawn twice, each time it's a case of moving swiftly and aiming at the head. One method is to sneak into the coil of the snake and then shoot the head from behind. Use the shotgun or the grenade launcher.

CRIMSON HEAD

This fella appears from the coffin once all the death masks are in place. Use incendiary grenades and be prepared early as he's quick.

NEPTUNE

Easy. After you've drained the tank the mother shark will start flapping about once you've mounted the metal platform. Simply push the green generator into the water and switch the power on.

LISA TREVOR

The lumpy one is very strong but very slow so the first two times you face her, just run away. When you have to face her in Tomb, let Barry have his gun back and use your Magnum to pin her back till she falls off the edge then rush over stand above her as she clings on and shoot down. Or keep her at bay while you push all four stones off the side. Lisa will then leave.

PLANT 42

The best way is to use the J-Volt, but if you're in a hurry barrel up the stairs in the walkway, arm the shotgun, blast away and keep moving. You can use the grenade launcher but it's trickier to aim.

SPIDER

Acid shells are the best for the Black Tiger. Get as many rounds off as possible as it first approaches then spins round the back to continue attacking and avoiding the poison spray.

TYRANT

The Tyrant battle in the lab is fairly easy. Run in a circle around the tubes to keep your distance, then use the C-Stick to swivel round to fire and swivel back to continue running.

Keep moving, not allowing the Tyrant to charge, and wait till the rocket launcher is dropped.

Once you've found all the vehicles on the list, try the *Turismo* mission in one of your new sports cars.

You'll be getting involved in more car chases in *Driver 3*, out next year.

Choose the *Take a Ride* option before searching for those hidden cars.

Tanner will have to get out of the car to look for all the secret vehicles.

PIKMIN (GC)

Secret Mode – Meet every kind of *Pikmin* (that's Blue, Yellow and Red) and collect all the Rocket Parts, before escaping from the planet within 30 days and you'll reveal a challenge mode. In the challenge mode you have to breed as many *Pikmin* as you can in one day. Here's how to do it:

Get the yellow *Pikmin* first, go to the Impact Site and go into the part past the box with the number 10 on it. Make the *Pikmin* pick up the bomb rocks on the other side of the box and use three of them to knock down the white wall.

Once you go inside, stick close to the sides so you

don't drown your *Pikmin*. To the right and around the corner is a Clam. Grab a *Pikmin* with a bomb rock and stick it in the Clam's mouth. Do this twice to kill the Clam. Take it back to the onion and you'll get 50 *Pikmin* seeds.

PC MEDAL OF HONOR: ALLIED ASSAULT

Dear GM,
I have just got a copy of *Medal of Honor: Allied Assault* for the PC, and am stuck already. I'm on the second mission and am trying to destroy the U-Boat in Naxos Prototype, but I keep getting killed by the crewmen. Please, please help.
Peter Collins, West Midlands

There are two bombs that need to be planted, one at each end of the U-Boat. Once you know where they are it's advisable to pick off a couple of crewmen unnoticed before blowing your cover by planting the bombs. Make sure you do it behind closed doors and without attracting the enemy (remember to use the silencer). Plant one of the bombs then arm the machine gun and sprint through to the other end of the U-Boat to set the second charge while killing the crewmen as you go. Once you've done all that try to escape the same way you came in - then leg it!!!

Use as much cover as possible as you fight off the Germans on your way out.

XBOX MOTO GP2

Dear GM,
I am desperately trying to complete the Season mode on *Moto GP 2*, but cannot complete the Spanish circuit Jerez with a podium position. Can you please give me any hints or can you suggest the recommended bike setup I should use. Thank you.
Barry Doleman, Cumbria

Here's our ideal bike setup for Jerez. You may want to try these settings in Practice mode first and tweak them according to your riding style. Good luck.

Use the Practice session to ensure a good position on the starting grid.

Transmission
Drop your gear ratio down by three notches. The slower you set your top speed, the quicker you'll be up through the lower gears.
Handling
Just drop handling down by a single notch. You'll want your bike to be stable while still getting a reasonable response from your controller.
Acceleration
Drop this a notch from default to keep a good balance with the gear ratio. This will reduce loss of traction when exiting corners.
Brakes
Drop this a notch from default so you don't suffer any under-steer. You'll be prone to front end sliding otherwise.
Tyres
16.5 inch tyres are ideal. It's the stability in corners that's important. Steering won't be too heavy because of the Handling setting.

GAMECUBE 007 AGENT UNDER FIRE

Dear GM,
Having recently completed *Agent Under Fire* on GameCube, I am now desperately trying to get the Gold Medals for all the levels. Can you please tell me what all the Bond Moves are for Mission 8, Fire and Water, and what you get for the Gold Reward.
Matthew Peters, Swansea

Right Matthew, here's the list of complete Bond Moves for Mission 8. Successfully achieve the all these moves and complete the mission with a credible score, then collect the 007 Tokens and you'll receive the Golden Gun upgrade for the Gold Reward.

- 1: Get crane program using Q-Remote
- 2: Use Q-Remote to drop crate from first crane
- 3: Q-Laser door lock to first crane
- 4: Q-Laser left vent after second confrontation with Bloch
- 5: Q-Laser right vent after second confrontation with Bloch
- 6: Use Q-Remote to lower second crane
- 7: Use Q-Remote to lower third crane
- 8: Use sniper rifle to remove helicopter pilot
- 9: Use Q-Claw to reach catwalk and pump arm
- 10: Use Q-Claw on large tank to reach the other
- 11: Use Q-Remote on crane to drop enemies standing on platform
- 12: Use sniper rifle to remove pilot of second helicopter
- 13: Use Q-Claw to reach top platform

Only when you've got a Gold Medal will you be able to replay that mission and collect the 007 Tokens.

GAMECUBE GOLDEN SUN

Dear GM,
The game I'm stuck on is *Golden Sun*. I would like to ask what do I do after defeating the Bandits at Vault?
Muhd Azfar, Kuala Lumpur, Malaysia via e-mail

After you've defeated the Bandits, the mayor will come and collect his stolen Urn. Ivan can find Hammet's stolen rod in one of the chests. Now climb back out of the cellar and return to the house where you found Ivan. The Mayor will give you some Water of Life. Before you leave, stop at the inn to get your HP and PP recovered.

XBOX STAR WARS: OBI-WAN

Dear GM,
I've been battling my way though *Star Wars: Obi-Wan* on the Xbox but cannot defeat Darth Maul in the final Battle Arena.
Gary Wilson, Kent

Start by moving forward as soon as the barrier shield has been lowered to avoid getting trapped by Darth. Strike him with a Super Force Attack then drop onto the ledge on the inside of the centre pit. From the ledge, use a Force Jump combined with a Sabre Throw to strike Darth above. If your sabre doesn't strike him the first time it will catch him on the way back. Continually repeat this attack and Darth will soon tumble to his death.

Defeat Darth Maul to unlock the Battle Royal Bonus Arena.

Use Combo moves to defeat multiple enemies and increase your accuracy.

PS FEAR EFFECT

Dear GM,
I'm really stuck in *Fear Effect*. I'm at the bit where Jin is strapped to the bomb. Every time I cut a wire the timer drops to around 20 seconds. How do I get past this bit?
Stephen Marks, Scotland

The sequence of the flashing lights as you leave the elevator holds the key. As soon as you use the Blue Keycard and enter the next room you only have six minutes to defeat the guards and deactivate the bomb strapped to Jin's chest. Once you've defeated the guards (without shooting Jin), collect all the weapons and ammo then approach Jin and cut the wires in the correct sequence.

▲ After the cutscene showing Jin as the King of Hell, it's up to you to choose your own fate.

PS RESIDENT EVIL 3: NEMESIS

Dear GM,
Please, please, please help! I'm seriously stuck on *Resident Evil 3: Nemesis*, and cannot work out the Transformer Puzzle to open the shutter doors in the Sub Station. I've tried various combinations to alter the voltage but cannot progress any further. Can you tell me what to do?
Stephen Coulson, Hull

▲ As you progress, Nemesis will repeatedly appear and challenge you to a fight.

Sure thing Stephen, that's why we're here. If you look on the Transformer you'll notice there are four red and four blue buttons (triangular shaped) for each stage of the voltage transformation. These are used to either increase or decrease the voltage as it moves from one stage to the next. To open the shutter doors you must use the four stages to adjust the voltage so that the final voltage figure falls within the voltage range for that particular door. Dead simple eh!

▲ There are five bonus costumes to uncover in Boutique Shop next to the Bar in Uptown, but only once you've completed the game.

N64 CLASSIC

MISSION IMPOSSIBLE

Dear GM,
I really need your help! I'm playing *Goldeneye* on the N64, and have managed to get as far as the Runway mission but keep getting shot down by the sentry gun as I head along the runway.
Ben, Dublin

Head through the door, silence the guard and then collect the mines. Go down the platform to the outside and blast the guard. Leave, then enter the small building and attack the two guards to collect the ignition key. Exit the small building and head straight for the tank. Climb in and drive down the runway while removing the guards as you go. When you reach the sentry gun, fire a tank shell to destroy and complete your second objective. Stay in the tank and dash to the plane to destroy the missile battery with a tank shell then exit and climb into the plane before you get targeted.

▲ The enemies are very smart. They'll sound alarms, roll around and jump behind object to dodge your fire, as well as throw grenades!

▲ You must silence the guards as you make your way out onto the runway. Head straight for the tank as soon as you have the ignition key.

GBA HEADHUNTER

Dear GM,
In *Headhunter* when you fight Ramirez and his acid spitting spiders, I can't seem to get the safety door open. I have tried shooting at them and then chucking them to the door but nothing happens! Please help me?
Precious Ddembe, Walthamstow

▲ Jack Wade, an amnesiac bounty hunter working for the Anti-Crime Network.

Ramirez will launch three pet spiders at a time. The tactic is to use the Spiders against the door. They can be destroyed with two shots from the Simulator, the first shot will stun the spider which will sit still before exploding. The second shot will make it explode prematurely. Now, destroy two of them, then shoot the last one once to stun it, and 'use' it to change to first-person view. Then aim it towards the door and press 'A' to send it running. Guide it towards the door then press 'A' again to make the spider jump and hit the door. If you time the jump right you can take out the door easily with less than five spiders.

▲ Gain Skill Points by riding the bike at dangerously high speeds without hitting the various objects.

GBA ORACLE OF AGES

Dear GM,
I'm really stuck on the Shadow Hag boss on *Zelda: Oracle of Ages*, for the Game Boy Colour. Please can you help me?
Anthony Fairclough, Preston

The Shadow Hag will split into four and run around the room. You dodge the shadows by jumping over them with Roc's Feather to avoid losing energy. When the shadows merge together and the butterflies have been released, Hag will appear. While facing away from Hag, bounce seed off the wall at her. Repeat this attack to defeat her.

▲ You can get items like Roc's feather that allows you to jump over holes.

REVIEWS EDITOR

We're going to see even bigger months as we build up to a console war Christmas, but for the end of summer, you really can't fault the her-ugeness of the games getting reviewed this month. *Oni 2*, *Turok* and *WWE Raw*, to name but three, could pummel pretty much any opposition in terms of long awaited largeness. Turn over to get stuck in!

THE SCORE

- 90 to 100%** Tippetty top cream of the crop. If you own the console, buy this!
- 80 to 90%** A great game. If you like the sound of it, you should get it in.
- 70 to 80%** Neat enough but a little lacking. Still, if you really must have it...
- 60 to 70%** A game scuppered by an annoying flaw or two. Shame.
- 50 to 60%** Above average but only just. Spend your cash elsewhere.
- 40 to 50%** Quite simply not very good. We played it - we didn't like it.
- 30 to 40%** Oh dear. Perhaps the programmers should play some 'games'.
- 20 to 30%** What the...! This looks awful and plays awful as well.
- 10 to 20%** Not a videogame at all but a device of mental torture.
- 0 to 10%** Like dangling your diddles in a mincing machine.

It's crunch time. Here's where you'll find the real deal for every game. Each title is rigorously assessed in three disciplines:
Graphics: What does it look like? Does it move smoothly? Enough variety?
Gameplay: Does the game work? Is it satisfying and fun to play or a pain in the cheeks?
Lifespan: Is there enough of it? Will you be playing this title for months or mere minutes?

Judgement

GRAPHICS Perfectly acceptable, and you certainly got the impression of being airborne.

GAMEPLAY A bit muddled, what with multi-levelled racing and unclear combat elements.

LIFESPAN If you yearn to race a plane, you'll love this, but otherwise it's all a little tame.

Onimusha

Samurai's Destiny

Pre-rendered backgrounds and prehistoric controls, some things never change in the world of *Onimusha*.

Analogue addicts can't twitch these sticks or investigate the stuff in the background because just like Raccoon City before it, this slice of feudal Japanese life comes right out of a six year old game of fixed cameras and fiddly controls.

But do we care? No! So what if *Onimusha 2* is a buffed, polished and updated version of the same old system Capcom have been using for ages, because in no other game do you get to plunge a katana through the black heart of a floored demon, give it an evil twist and absorb its soul before turning that power on his underworld's chums. Yeah, this is survival horror, but now it is the undead that are fighting for their lives.

SOULLESS

One difference that seasoned samurai will spot immediately is that this soldier isn't the kind to live life solo. Jubei Yagyu might be a wandering clan leader who finds his family, his friends and his whole damn tribe butchered by the warlord Nobunaga Oda, but it hasn't made him bitter.

Okay, so he might have sworn bloody revenge on the demon and

The Valley Of Our Souls

Thanks to a magical tattoo carved into Jubei's hand he has gained has the power to absorb the spirits of the defeated demons by sticking his mitt out and waiting for them to bob slowly into his grasp. Using their power lets this soul reaver survive the onslaught of the dark forces of Nobunaga.

▲ The smaller yellow orbs restore Jubei's health and zip straight into your hand. That way you take less of damage while you wait.

▲ Different weapons release different amounts of orbs and these purple one add to your experience which can be swapped later for upgrades.

▲ Collect six of the slowest orbs and you become Genma Onimusha, the temporarily invincible warrior who also dishes out double damage.

Presents And Correct

Not seen before in the original *Onimusha*, you need to win friends and influence people into joining your battle against the demon warlord Nobunaga. Time to whip out your charm and your wallet.

I'm here to help you.

▲ Magoichi and Ekei are both playable, the slaphead is master of the blade while our nearer hero prefers the way of the gun.

met up with a mystic madge who grants him to the ability to absorb the underworld's powers through a tattoo on his palm, but for this fighter friendships are vital.

NURTURE BOY

So as the plot unfolds we are introduced to four friends all with their own killing skills because these various vicious allies like to pop up at crucial moments to help out with battles, bosses and useful advice. Of course, like any new pals these relationships need to be nurtured with presents and protection if they are to flourish. If you cultivate your caring side and take the soppy approach loading up your betrothed with rings and things, she will fight by your side and when the character change comes, that is who you will become. But if you don't want to end your days

as a nimble but feeble female Oyuu then you should shower your affection on the superior swordsmen Ekei, sureshot Magoichi or ninja Kotaro. It is a system that might seem a bit RPG-lite at first, particularly with all the gift giving, but those extra plots and twists quickly swell the replay value to Mr Creosote proportions.

Apart from the social side, the greatest feature of *Onimusha 2* remains the core business of combat.

Killing has rarely been this much fun. Much of your time is still spent defeating hordes of demons with simple combos but slashing the steel through the skull of a lizardman never gets tiring when there is so much variety in your foes.

▲ These moving spikes look scary but the puzzle still gives you three goes at getting it right.

Location, Location, Location

Crossing between Jubei's village, through a gold rush style mining town and onto the final battle with Nobunaga, every screen is magical. It's like watching a good old-fashioned samurai movie - only this time you're in charge.

▲ Even the mud back in the village looks superb as Jubei sinks into it.

▲ This bustling town is full of little details including a market and general store.

▼ The rooms become a pain with less room and tricky camera angles.

▼ The Misty Forest lives up to its name with withering paths and plenty of fog.

▲ The mist inside the cave show how brilliantly the effects fit over the pre-rendered backgrounds.

▲ The water on Oni island has to be seen to be believed. They look more like a video of the waves rolling in.

Add in the magical moves that come with each sword and the chance to power-up your equipment with the souls you suck from the deceased and you are armed to take on every ogre between here and Toyko. Is it satisfying? Yes. What about gory? Definitely? But is it enjoyable from the first time to the fifty third? Hell, yeah!

LETTUCE PREY

Capcom's decision to stick with the fixed cameras might put off many who see the technique as retro, but like the recent *Resi* retread the result is to keep make your underground adventures feel cramped and cautious

▲ Chatting with villagers can turn up extra mini quests to recover mission melons. No, honestly.

without having to resort to constant cut-scenes to crank up the tension. Of course, the other effect is to let Capcom produce some of the most astounding backdrops ever seen.

From the rain soaked *Seven Samurai*-style mud of the first village

...stealth is never an option, dodging battles is something you can't do too often in these cramped corridors and narrow passes...

Devil's May Cry!

These bamboo hatted lizards are the foot soldiers of Nobunaga's army. They bleed pretty easily too.

You need to master that blocking move once these aggressive dead wood scissor hands step up.

After all the great demonic designs these robots are the worst looking foes we have encountered.

Armed with half a tree trunk and on a narrow bridge these ogres demand some fast footwork to stay alive.

to the perfectly rendered waves that gently lap the shore of the Oni island, they all manage a degree of beauty that no-one could argue with. Not only are the backgrounds cluttered and cramped with the kind of detail only pre-rendered worlds provide but they are embellished with some astounding lighting, mist and rain effects. Take the Misty Forest level for example, the name doesn't do it justice, not when you can feel the dank, wet, fetid forest closing in all around you.

PLAY MISTY FOR ME

With such a serious emphasis on action, *Onimusha 2* does lack a little in depth. Stealth is never an option, dodging battles isn't something you can't do too often in these cramped corridors or narrow mountain passes either, but the whole game has been designed to be logical and friendly so the puzzles that you encounter can always be completed without scratching the skull or using a cheat. Even when it comes to collecting the

Bosses are as rare as dinosaur eggs but like the boiled delicacy they do have a nasty habit of repeating on you.

▲ Twice you have to face this four legged freak until finally he turns up all twenty of his toes.

▲ As vain as she is annoying, this furry freak is Nobunaga's girlfriend but she only lives once.

▲ Gogandantes is a demonic swordsman who blocks everything you throw at him. Quick, find the fight blade.

Sabre Wolf

Clever swordplay is the secret to Jubei's survival. Triggering combos is a simple matter of hitting **○**, but for real damage he can resort to more magical moves. Bashing R1 charges his blade till it glows helping him perform fatal strikes and **△** launches its magical move.

▲ Once an enemy is down, standing over them will slam your sword down through their chests. Gory. That's a point, I fancy a kebab...

▲ Deadliest of all is the Issen move. Block and counter-strike and you will slaughter all your foes. And slaughtered foes is what you're after.

Check out the quality of the lighting on this skeleton staircase. It's enough to make your back wobble.

orbs and items needed to open up the next area there is never any need for backtracking. Instead the only time you need to retrace your steps is when you come back again to see the alternative stories of the other characters and fight with a new friend by your side.

ANALOGUE LACK

Of course there are elements of *Onimusha 2* that are less than perfect. The control system still needs that overhaul we've been begging for since Capcom first deployed it, and the lack of an analogue option is pretty disgraceful now that every game from *Metal Gear* to *Metal Slug* uses it. The camera too can still be a problem. Sure there aren't many gaps between the views for lizardman to lurk in, but sometimes in extended dust-ups with

bosses the quickly changing shots can leave you confused when you need to be sharper than ever.

KEYS TO THE GRITTY

Similarly, the inventory screen still has as much style as it did six years ago because when this game is stripped to the bone the skeleton revealed is the chewed carcass of *Resident Evil*. From the glinting keys to the slight pause between locations where you half expect an opening door to appear, this is a six year old idea powering a bang up to date game. But that is really missing the point of *Onimusha 2*. It isn't going to please anyone looking for real substance, variety or depth in their fantasy world because this is a good old fashioned bloody beat'em up that wallows knee deep in its own vivid, visceral violence. It's a

▲ Jubei is meant to be based on a dead Japanese actor but he looks a lot like Jackie Chan too.

fantastically entertaining slice and dice adventure that glories in the on-screen gore. It isn't big, it isn't clever but it is polished, poised and perfect for impressing everyone with your prowess and your PS2's power. *Onimusha 2: Samurai's Destiny* isn't just a slash'em up, it's an undead abattoir.

Cut Scenes

Oni 2 doesn't rely on tons of boring cut-scenes to tell the story. There are few. But when they do appear the effect is pretty darned awesome. Just look at these...

▲ Most of the chatter between major characters uses the standard in-game engine and the outstandingly detailed character models.

▲ When the flashy pre-rendered sequences are used like here, then the effects like the water and the animation of Jubei's dive are stunning.

Judgement

GRAPHICS Sumptuous and sublime with believable motion captured characters and bags of gore.

GAMEPLAY The fixed camera combat system comes with all its glories and nasty flaws.

LIFESPAN About 15 hours of first time fighting bloated with plenty of replay value and sub stories.

Sure it's formulaic, but what a formulaic! Brutal, bloody and brilliant with a massive body count. Few can match its looks.

Umbrella Cure

Kick open the boxes that litter the ringside area and you'll uncover all sorts of weird 'n' wonderful secret items - of which there are just under 200 different ones in all. The pink broly remains a perpetual favourite, as does that devastating addition to your arsenal, the giant foam finger.

▲ Nothing can stop HHH - except the foam finger.

▲ You can't use that lamp to recreate the Jaws electrocution scene from *The Spy Who Loved Me*.

▲ Quite how they managed to get this one past the WWE censors is a mystery to us...

Xbox's first wrestling effort *finally* sees a UK release. Sadly, it wasn't exactly **worth the wait...**

WWE Raw

Where Are They Now?

The game's roster is best described as curious. We can't imagine many people remembering (or caring about) the likes of K-Kwik or Haku, even if he did have a cool afro. How many of these can you recall?

▲ K-Kwik vs Mr Charisma himself, Steve Blackman.

▲ There just aren't enough afros in wrestling.

▲ Since this was coded, Taka's gone back to Japan.

Considering the sheer volume of WWE games that they churn out these days, publishers THQ have had a pretty good run of consistently entertaining titles. But all good things must come to an end - yes, even in wrestling. *WWE Raw* marks the end of an era.

Wrestling, of course, offers an ideal spectacle for videogame translation, with its heady mix of

fighting, soap opera storylines and, er, "24 inch pythons." Yet, somehow, *WWE Raw* manages to transform something that is inherently over-the-top and a bit mad into being, well, really rather dull. It's not so much that *Raw* is a terrible game - it's perfectly passable in many respects - but it's just sooooo run-of-the-mill you begin to wonder why they bothered.

offerings. Based on this, give us kiddie any day. The controls and handling, for starters, are mighty odd, with a bizarre floaty sensation being readily apparent - so you never get the real sense of satisfaction you'd associate with pasting someone with a powerbomb or, indeed, a smack across the chops with a steel ladder.

KID'S GLOVES

As previously mentioned in GM, *Raw* was always pushed as being the more 'adult', hard-hitting strand of the WWE gaming family, compared to the (we suppose) more 'kiddie'-orientated *SmackDown!* and *WrestleMania*

NO PAL OF MINE

And if you've ever played any of the *SmackDown!* series, you'll think this game's half-finished when you take a gander at the menu screen. In lieu of the multitude of matches, modes and options associated with the mighty PlayStation games, you're here

Brawl Through The Hall

While you can brawl outside the ring, down the aisle and even in front of the giant Titantron screens, there are no backstage areas to fight in. Something of an oversight, if you ask us...

▲ Hardcore matches allow you to pin your opponent anywhere... but there's a distinct lack of *SmackDown!*-style backstage areas.

▲ One thing it does give you are small areas to the side of the entrance ramp that are laced with folding chairs and other assorted weapons.

▲ At least you've got more foreign objects than you can shake a foam finger at. But the novelty soon wears thin - there's just not much depth.

➤ Create-a-freak

The ubiquitous Create mode obviously makes an appearance. It's not as good as the one in the *SmackDowns* though.

You can either create a wrestler from scratch or make use of one of a number of templates on offer.

There are some pretty cool elements on offer but it lacks the sheer flexibility of *SmackDown's* superb Create function.

Along with appearance, you can also devise your grappler's move set and various other characteristics.

➤ The Road To Championship Glory...

There's no Career or Story mode as such. Instead, the nearest you get is the Title Match option in which you simply have to plough through a number of successive opponents. Bagging the Women's title won't prove tricky.

▲ The difficulty of each title quest depends on which belt you're going for.

▲ Obviously belts such as the Women's or Hardcore ones aren't too tricky to lift.

▼ No story elements – you just have to win a few matches in a row.

▼ The number of matches you have to win depends in which title you're after.

▲ The animations are great – even Kurt Angle's kicks have that sneaky heel element to them. Honest!

▲ Let's face it, it's not often you'll see The Rock win a match with a submission move. But there you go...

a single update or modification has been included to take account of the lag between when it was originally coded and when it will be available in UK stores. Hence, the selection of characters on the roster is absurd. There's no Hulk Hogan, Brock Lesnar or Shawn Michaels but you do get Taka Michinoku, Haku and even K-Kwik – who was in the then-WWF so long ago, even his own mum's forgotten he ever used to be a part of the whole shabang.

BUYER BEWARE

So while the US version of the game received 72% back in GM19, the PAL version deserves harsher treatment because the near-eight month delay has had the knock-on effect of making the roster look dated.

There's no doubt it looks nice with some of the power of Xbox used to animate some of the most realistic superstars we've seen. But its cause

▲ Tornado matches with your mates are a good laugh, especially when you can kick them in the 'nads.

is hardly helped by the humdrum gameplay and severe shortage of variety in the modes, especially in the light of the general high quality and wide selection on offer in most of the other WWE efforts.

In short, this is the worst WWE/WWF game since the Dreamcast/coin-op *Royal Rumble* debacle. Our advice? Hang on in there for PS2's *SmackDown! Shut Your Mouth* instead.

GRAPHICS Solid, chunky characters and impressive entrance sequences but sadly drab and lifeless.

GAMEPLAY Absolutely nothing special – depressingly workmanlike with nothing to inspire.

LIFESPAN There's not much to it and it won't exactly entice you back for that one extra go.

▶ Bottle Out

In one of those curious quirks that differentiate video games from reality you can carry around eight smouldering petrol bombs.

They're great for lobbing at baddies when you get bored of the ultra-powerful auto-aiming weaponry.

They also make short work of trucks and crates of "evidence". Even Molotov can't have anticipated it.

For the best effect, throw all eight at once and watch those blue squiggles scramble for cover.

▲ That green thing could be a hedge, but we're not sure about the brown line.

▶ The Best Bit

We're not, strictly speaking, underground, although the graphics are so grubby it often looks that way.

And, indeed, it does look like it's just been dug up from the vegetable patch...

Medal of Honor Underground

It would be asking a bit much to expect Nintendo's plucky pocket console to match the PC and PlayStation versions of *Medal of Honor* in the image-quality stakes. But we weren't quite expecting this horrid, nasty mess.

Occupied France, it seems, consists of mile after mile of sludgy brown, with occasional grey specks and some funny green bits. Every so often, if you squint really hard at the screen, you may spot little blue squiggles in the distance. These, it turns out, are enemy soldiers, so you'll need to hammer the fire button to merry heck until they die.

SMURF ACTION

The trouble is, while the full-sized versions of *MoH* actually throw you into World War 2, with Luger-toting SS-Obersturmbannführers

around every corner, here you could be anywhere. Those blue squiggles could be Smurfs for all you can tell. They do make an effort to shout at you in German, but unfortunately every time you hit them it sounds like they're saying "Feels good!"

SCENERY MUNCHING

Once your eyes adjust to the grubby graphics, *MoH* does get marginally more impressive. It's possible to make out that you're sneaking around occupied towns, blowing up trucks and swiping documents from German officers' desks. But too often you get tangled up in the scenery, or find yourself in a gun battle with some poor Gerry on the other side of a locked door, and you wonder whether they might have been better off sticking with the old 2D.

With the ludicrously powerful auto-aim ensuring you never miss, it's only later on, when the Germans cunningly don grey uniforms, that the Reich ever threatens to gain the upper hand. But that's only because the graphics are so roopy you can be standing right behind one and not realise he's there.

▶ Metal Gear

The menu screens and things look like they've been swiped from the PS version and reduced on the photocopier.

▲ It's got one of those confusing menu screens where the cupboard is "Options", and so on.

▲ You'll need microscopic super-eyesight to read the briefings. (We're all moans today, aren't we?)

Judgement

GRAPHICS In a word - eurch. Might look OK in the grabs, but when it's moving you can't see a thing.

GAMEPLAY Walk around and press fire when you see a blue squiggle. Very testing. Yawn!

LIFESPAN Seems to be plenty of it, but it's a doddle to romp through, so it might not stretch you.

Fails to capture the atmosphere and excitement that makes the grown-up versions so great. 2D might have worked better.

Silent Hill 2

Inner Fears

Make a Wish

Born From a Wish is the Xbox only sub game. But apart from the fact that you're playing as Maria it's pretty similar to James' adventure.

Unlike James, Maria is armed with a handgun from the off, so you can shoot down those disgusting monsters.

Michael Fish would love *Silent Hill*. Being a weather forecaster in this town must be the easiest job in the world. What's it's going to be like tomorrow, Michael? Foggy, by any chance? Some low cloud?

If only life was that simple for James Sutherland, the star of *Inner Fears*. As any *Hill*-billy will tell you, this is the closest you'll get to playing in a top class psychological thriller as

you wade through the fog finding clues about your dead wife, solving tricky puzzles, and listening out for the creepy pad rumbles warning you that some headless monster is waiting around the next corner.

There is an extra sub mission to get stuck into, but apart from that it's exactly the same as the brilliantly creepy, PS2 version. And with *Resi* signed up for *Cube*, it's the easily the best horror game on the Box.

Snoop Foggy Fog!

It might seem boring at first as you stumble in the fog getting lost. But enter the apartment block and it turns into a pant filling thriller.

Judgement

GRAPHICS Same as the PS2 version. Still the thick fog and dark add to the creepy atmosphere.

GAMEPLAY Tedious at first, but while not as hectic as, say, *Resi*, *Inner Fears* is just as thrilling.

LIFESPAN The extra sub quest will keep you going after you've completed James' story.

So creepy and sickening it's hard to play with a smile on your face. Still, it is the most disturbing horror on any console.

Happy Now?

When you're not building like some over-zealous construction engineer, you'll be wanting to keep an eye on how much your inmates - sorry, *guests* - are enjoying their hols. Because if they're not enjoying themselves then they'll start complaining and you'll start losing money. Bunch of ingrates. I mean, if it wasn't for you there'd be no food, no pool...

The thing to look at is the happiness ratings for all your holidaymakers. Yep, they seem cheerful.

Ah, but how drunk are they? Crivens! Not nearly drunk enough! I'll have to build more bars!

Holidays from hell? No use whining here, because it's all your fault...

Beach Life

We, the British, are officially the world's least welcome holidaymakers. We're rude and impatient, won't eat funny foreign nosh, we get drunk and vomit on the locals once we're fed up with punching them, and we're generally hateful scum. And then there's the Germans. Who'd run a holiday resort, eh?

But guess what? That's exactly your job in *Beach Life*. You're in charge of a (hopefully) sun-kissed holiday resort that, in true Holidays

From Hell style, isn't quite finished. So from the start you race to build attractions, pander to the moaning vacationers, keep the place clean and, natch, make pots of money.

Hey, it's *Sim City* meets *The Sims on Holiday*, and it's quite a fun encounter. You can click on individual holidaymakers and read their minds - you'd be surprised at what they're thinking. Well, maybe not. Especially if they're proper lads.

Perfect for playing on your laptop when you're on holiday, then, so you can avoid the ghastly Brits.

Want your little holidaymakers to have fun? Then build a water slide. If there's anything that's more fun than that, we don't want to know about it.

Judgement

GRAPHICS Pure old-fashioned isometric fun, with an hilariously pixelated close-up view.

GAMEPLAY More depth than the Mediterranean, hidden beneath a point and click interface.

LIFESPAN Lots of levels, plus a sandbox mode for ongoing holiday fun. Get the sun oil.

Original? Hardy Cutting-edge? Definitely not. But *Beach Life*'s still a fun little management game with the emphasis on 'fun'.

My Hero!

Since the unit limit's been reduced from the normal RTS, the incredibly hard heroes become even more important. These accrue experience points as they win victories - get enough to go up a level, and you will gain extra powers and statistics to make you even harder. Excellent people.

▲ The Human heroes. He's a Paladin and can heal and add strength to friendly troops. She's a mage and can summon people.

▲ The charismatic Thrall is the first leader you play in the campaign, and as a bear-mounted visionary is capable of throwing lightning.

▲ This Taurean fellow sides with the Orc - a giant bull-headed warrior armed with a huge axe and a bad demeanor. A decent chef too.

▲ The Ground Force team certainly had their work cut out with this unusually expansive challenge. The flesh-eating Orcs soon had their eye on Charlie...

Orcs versus humans? Humans versus orcs? It's a right royal punch up...

Warcraft 3

Reign Of Chaos

You should go to America - or Korea. Ask *them* about Blizzard. You'll probably get a ejaculatory reaction on a par with the average marriage proposal. They love Blizzard over there. Worship them. In the UK? Well, we're not so devoted. But we do think they're pretty neat.

ORCS A LAWDY

Why? Because in terms of PC developers, Blizzard are the folk to beat in terms of sheer polish. And that's more visible than ever in this follow up to their breakthrough hit *Warcraft*. It's a Real Time Strategy, yes, but a more polished RTS it's impossible to imagine. The plot's simple - or at least fairly. As the central campaign progresses, you follow an epic-world threatening

struggle, taking turns controlling each of the player factions. This is a little odd at first - one minute you're playing orcs against humans, and the next humans against orcs, but - like *Starcraft* which used a similar system - it's actually effective at telling a complicated story.

And, for videogames, it is pretty complicated. It's all presented with incredibly high construction qualities - the in-engine scenes are unparalleled in their slickness and the pre-renders are as good as anything the Japanese teams turn out.

HUMANJI

In terms of actually playing the game it's equally as polished. Imagine an RTS which a determined robot polished with a shammy leather until it ground down to dust-like tendrils: That's how seamless and slick it is. The only fault is that the mechanics can be a tad repetitive.

In short, it's another uber-perfect game from Blizzard. Lacks the stroke of genius required for worship this side of the pond, but as beautiful an RTS as you could want.

Okay! You da man. You could race before you could walk and you're more comfy in a bucket seat than an armchair. You totally own at GT3 and GT Concept provided a couple of hours diversion on a wet Saturday morning... This Ferrari lark should be a doddle! There's only one car, and it's not even the ultra-fast F50!

▲ Oyl! That's not fair! Their cars all handle better than mine! Mine keeps sliding off the track on corners! How am I supposed to win?

▲ Gnnnnn. Okay, back to the training mode... Let's see: follow the red line. Hmm... This might take longer than I thought...

▲ Racing cars around an enormous oval just doesn't do it for us. Because we're not American, probably.

It's impossible to **not look cool** in a Ferrari. Unless you're sliding **backwards across a gravel trap...**

Ferrari 355 Challenge

F355 Challenge originated in the arcades. I'll let that factoid sink in for a second, and give you a chance to imagine it as a game where you jam your foot to the floor and shunt other racers out of the way as you gleefully scream around hairpins at 200,000 mph.

L - PLATES

But forget its arcade heritage. *F355 Challenge* is first and foremost a driving simulator. Yes, it has an arcade mode, but it's all about getting behind the wheel of a near-as-dammit perfectly-simulated Ferrari F355, learning to drive it at high speeds without making a complete spectacle of yourself, and covering yourself in sweet glory as you best a trackful of *F355*s piloted by most able AI drivers. Challenge will initially make you feel like an inept, bunny-hopping learner. You might laugh at all the assist modes, figuring they're strictly for absolute novices. Two minutes later you'll be turning them all back on after a humiliating exit from the track followed by a sideways cruise into the tyre wall. Your only option: learn. Understand. *Feel*. Develop a psychic link with every part of your virtual car. Only then will you be ready to stand a chance of triumph in the Champ mode and the new Great Driver Challenge, where you score points for overtaking, sliding and - yoinks - gentlemanly driving. Stopping for old ladies, that kind of thing.

LET'S RAWK!

Comically, *F355 Challenge* looks almost identical to its DC counterpart and, horrifyingly, features the same ghastly RAWWWWK soundtrack. The new mode is fun, but otherwise this is just a workmanlike remake of a two-year-old game. If you're after an exacting driving simulation it's worth a butcher's. Fast thrill-seekers should look elsewhere.

Dreamcastastic!

You might have noticed a distinct similarity between *F355 Challenge* and its Dreamcast incarnation. But it's not exactly the same! Look:

There's a new mode, the Japlish Great Driver Challenge. You drive gentlemanly! Score Great Driver Point!

And the replays look a little nicer, lack the mournful guitar track of the DC version, and you can save them for later enjoyment.

And...Um... Nope, sorry, that's it. But if you sold your DC to buy a PS2, it might just bring a wistful smile to your face.

The Best Bit

Fancy being a Ferrari test driver? No chance, but you can take a spin on the Ferrari test track.

▲ With Armour King, Craig is one of the only characters that can match King in terms of strength and grappling skills. Fancy a cuddle?

Finally the UK get its **Iron Fist** and perhaps it's **time for a rethink...**

Tekken 4

The Best Bit

Alright, let's take a cab.

▲ Paul gets a girlfriend! Which should finally stop all those rumours. Or will it?

Those with a sharp eye and a keen memory will realise that this is the second time we have reviewed *Tekken 4*.

The point of this is make sure UK gamers haven't been shafted with the PAL version but also it provides a rare chance to offer a reappraisal and reassess just how good it is.

TREE BATTER

Perhaps we got carried away when we reviewed the Japanese version earlier this year. *Tekken* hadn't been around for a while, we had missed it, we got excited by the flashy lights and Jun's hooded top and gave it a 90+ score. It just felt so good to slip into those old combos, the familiar rhythm of the fights and mash some old faces but

these are all old thrills that could be relived playing *Tekken Tag*. So where's the new hotness?

DON'T MEDDLE

The biggest change to the gameplay concerns the introduction of environmental furniture. Each arena now has pillars, stairs, slopes or trees that can be used to trap your opponent and batter them into it, increasing the damage inflicted. This new feature does not overwhelm the gameplay so it doesn't descend into fighters shuffling around trying to keep their backs off the wall. What it does do is add another layer to tactics and punishes those who aren't that spatially aware.

And that's about it for fresh ideas.

▲ Complete the game on Story Mode and you'll be able to save the end of bouts replays and save for posterity.

▲ Steve maybe a very top heavy fighter but he's got some useful grappling chains to mix things up.

▲ You could say he was up for the Craig! Ho, ho! Xiaoyu has got one of the worst endings. Where's action?

Naturally Namco don't want to mess with what is the best fighting system around, but this is the first time *Tekken* feels like an ordinary sequel rather than a real step forward. *Tekken 2* trounced the original in terms of character depth options and playability. Then number 3 not only added the sidestep and some great

Cheap And Attacky!

Where *Tekken* has always excelled is with character design but the sports casual look of some doesn't feel right. Jin looks more like a townie than a tormented loner and Xiaoyu is dressed courtesy of JJB.

graphics demo than a game, *Virtua Fighter 4*, for all it's subtlety and neat ideas still lacks charm and *Tekken* seems to have fallen into a bit of rut. rubbish Xbox game. Karma's a right bitch, man. Them's the breaks. In their infinite wisdom, developers Ronin have turned *Bruce Lee* into a scrolling beat 'em up. A bad-looking beat 'em up, at that, and one with some of the messiest controls available. Bruce has an ever-increasing range of punishing moves in his repertoire, but it's unlikely that you'll ever get to unleash them with

▲ "Life kid suck the box. Drink. Yeah. Bruce Lee." - Underworld, 1999. Crazy popsters that they are.

...the stop-start nature of the game becomes tedious in ooh, minutes...

Grasshopper!

Just in case you're a little too organised to just jump into the game and start lashing out randomly, *Quest of the Dragon* has a brace of training modes to try out your moves. Course, once you get into the game proper you won't be able to use half the moves until you've paid for 'em.

any sense of purpose. The controls are so unresponsive that you'll end up randomly stabbing the A and B buttons in combat. Skill doesn't come into it, but it seems to work.

BROTHER LEE LOVE

Ronin have tried to innovate by enabling you to target specific enemies with a yank on the L trigger, but seeing as every horde you come across is incredibly polite, each assailant patiently waiting his turn to attack you, it's not particularly useful.

Still, Bruce's attacks are quite good, and the game's chock-full of his trademark whoops and screeches. On the other hand the stop-start nature of the game - fight, pause, move on, repeat - becomes tedious in, ooh, minutes, and not even the occasional, 'they wouldn't have allowed this a couple of years ago' nunchaku scrap can save it. Bruce must be spinning in his grave - possibly working up to a ghostly roundhouse attack on the coders.

▲ "Howay! Did you spill my pint? Stich this!" We can't really imagine Bruce Lee in an unsightly pub brawl.

Brucie Bonus!

Just because you're ultra-hardcore Jeet Kune Do creator Bruce Lee, doesn't mean you have a full repertoire of moves instantly available to you. You have to earn them. With coins.

▲ Collect coins in combat and then between levels you can buy extra skills and move up a belt level.

▲ Collecting dragon coins sees Bruce goes mental with his fists of flame. Have some!

Judgement

GRAPHICS Virtual Bruce kind of looks like real Bruce, complete with pudding bowl barnet.

GAMEPLAY Waggle stick. Stab A and B randomly. It's a little more involved than that, but not much.

LIFESPAN Grit your teeth and persevere and you'll find many and varied levels and enemies.

➤ Kick-Off!

Obviously the Special Forces go into Iraq because they've been told to. But hey, this time it's personal, too! Those rotten Iraqis have gone too far this time. Now where's that Saddam...

▲ Night-time, and the Iraqis go into action. They're just bursting with war and eager to spread it about. Lawks!

▲ But hurrah! Here come our valiant boys to give them a good talking-to. A good talking-to with rather large guns, naturally.

▲ What's this, though? The Iraqis win? This can't be right. Quick, rewrite history! Let's hope they don't take your chums hostage...

Go back in time eleven years and fight the **original Gulf War** - just in time for the sequel...

Conflict: Desert Storm

➤ Rescue!

Guess what? The Iraqis have taken your chum hostage. You'd better get him back...

▲ You won't get confused about your mission; your objectives are clearly set out.

▲ Odd. There's no-one guarding this checkpoint. But only because I've shot 'em all.

▲ The third-person view auto-aims for you, but there's a first-person view for precise shooting.

The Gulf War, as I'm certain you're aware, marked an important moment in the way wars are fought. It was fought almost entirely in the air, the majority of allied attacks coming in the form of air-to-ground assaults, not forgetting smart missiles so smart that if they forgot where they were going, they'd be able to stop and ask for directions in perfect Arabic.

Softography

These guys have also made...

This is Pivotal's first game

SMART!

Anyway, the point is: how can you do a ground-based Gulf War game when so much of it was fought in the skies? And the answer is that Special Forces were there at ground level, clearing the way and undertaking missions that not even the smartest smart missile - the type that could attend a top brass military dinner and not embarrass itself by using a fish knife for the cheese course - could accomplish.

And you get to be not one, not even two or three, but four of these

Special Forces fellows. Yep, this is squad-based combat hitting the PS2, but fear not; it's not as intimidating as it sounds. Okay, it's a little intimidating when you, as squad leader, first get to grips with issuing orders. It's all done with bizarre combinations of buttons, and there's no quick and easy way to learn; you just have to get used to it.

GO! GO! GO!

Thankfully there are only a few basic commands so it won't that long to master. Once you have mastered it, the fun really starts.

➤ Crash, Bang, Wallop!

Not all your missions are meticulously-planned surgical procedures. This one starts when your transport chopper gets shot down. Your job: survive an Iraqi onslaught until you get rescued.

▲ Doh! I told you that bloke wasn't waving at us! He was aiming a rocket launcher! What are we going to do now?!"

▲ Those Iraqis don't mess about. Trouble is, you're not going to take out a tank with a rifle. Get your demolitions guy to blast it.

▲ If all else fails, hit the ground. Lying down improves your aim and makes you harder to spot. Don't shoot till you see the whites of their eyes.

Skillage!

Night missions giving you gyp? Switch on your night vision and it'll all become clear as day. A rather fuzzy green day.

If your men get shot down they're not dead. Run up to them with a medikit and heal them. They'll soon feel better.

Your demolitions guy loves his C4 and his rocket launcher. Hint - Always aim for the back of a tank. Less armour there.

Sometimes it's too much even for your squad, and you have to bring an expert along. He's clever, but useless in combat.

STEALTH FIGHTER

You have a wealth of missions - mostly inspired by actual operations - to complete, and you'll be needing a cunning combination of stealth, strategy and extreme violence. You're led into the whole thing nice and gently with a single-handed rescue

mission: sneak into the Iraqi base, neutralise (ie. kill) the bad guys and retrieve one of your team mates. Get him out of his cell and you'll find that you can take control of him, either by ordering him around, or just taking over his body. That's when you first appreciate the different characters that you're in charge of. Your man here's a sniper by profession, and your escape's helped much by his ability to pick off Iraqi bad guys who are but a speck on the horizon.

Training Day

There's a lot to get the hang of in *Conflict: Desert Storm*, so don't skip over the tutorial section. It'll learn ya loads of useful stuff, while humiliating you like some fresh-faced recruit. Are you sitting comfortably?

▲ "Get on your face and give me twenty, soldier!"

▲ This is where you learn to shoot a gun. Aim and fire. Easy.

▼ Sometimes you get to jump into gun emplacements. That'll do nicely.

▼ Rocket launcher training. You're given real tanks to destroy. Nice.

Drive the M995 Truck along the road to the next training area.

▲ A crash course in driving. "Left! Left! The other left!"

Go into Aim Mode (R3 button), move the crosshair over the target, then call in the strike (Q button).

▼ If it all becomes too much, call in an airstrike. Fiery death from above is easy to arrange.

Your man here's a sniper by profession, and your escape's helped much by his ability to pick off Iraqi bad guys who are but a speck on the horizon.

TASTY CAKE

Each of your four-man squad's a specialist, and as you complete missions you'll hopefully earn experience points that'll make them even better at their jobs. A little incentive to be as stealthy and successful as possible, that.

The controls, as I've hinted, are a little daunting at first but the basics of moving around and shooting people

▲ Who the devil left a banana skin lying on the ground in the middle of downtown Baghdad, eh?

are a piece of cake. And the looks are tremendous - swathes of parched-looking desert, detailed soldiers, realistic cities and a beautiful sense of time as day fades slowly to night.

Best of all, *Desert Storm* isn't as unforgivingly tough as PC squad-based games. None of this 'one shot and you're dead' malarkey - despite its realism, *Conflict: Desert Storm*'s still a game. And a damn good one at that.

Riding Spirits

Riding spirits would be **stupid** - bikes make **much more sense**...

▲ This track's called Queen's Backyard. Sounds like a euphemism to us, if not high treason.

▲ Stay off the grass! It kills your speed, even though it looks nicely manicured. Just like real life really.

This, apparently, is the motorbike alternative to *GT3*. And hey, it has the credentials. *Riding Spirits* is crammed with 150 real motorbikes and 16 tracks.

In *GT3* style you take part in championships, earn money as you go and pile it all up so that you can do a big, Evel Knievel-style jump off it. Probably. And of course, you can get down and dirty with your hog and tweak its settings for maximum performance. Sounds great, no?

Well... Full marks for thoroughness, but the rest of the game just isn't that

Thrills?

It's the *RS* Championship! You've bought your first bike, leathers and skid lid. So let's jump in for that all-important first race! Yeah!

And we're off! Hope the sound of hairdryers excites you, because that's pretty much what this bike sounds like.

Hmm. Interesting track. Long boring straight bits, followed by long boring corners. Must... stay... awake!

And then *Riding Spirits* gets really brilliant! Oh, nope. I fell asleep and dreamed that bit. I've crashed.

good. The handling's stiff and doesn't allow for fancy tricks like wheelies - and if it's so real then why can't you operate your front and rear brakes independently?

DIRTY HOG

Other riders regularly rear-end you for no good reason, and the whole thing's low on excitement and big on frustration. You might find some head-to-head thrills, but there are many better racers available. Just 'cause it has bikes in it, doesn't make *Riding Spirits* special.

Judgement

GRAPHICS Some nice tracks (and ugly ones too) and decent bikes, straddled by wooden riders.

GAMEPLAY Loads a depth for bike freaks, but not much fun for your average racing junkie.

LIFESPAN Collecting all 150 bikes will take ages. But will you want to? We certainly don't.

We never realised that tearing around on a motorbike could be such a non-thrilling experience. We feel kind of deflated by it.

Lethal Skies

Threat Warning! Average flying game at two o'clock! Go weapons!

▲ When in range, the Circular Tracking Indicator appears, depicting the trajectory of your gunfire.

▲ The Threat Warning indicator lets you know when the enemy has an active lock - best you flee.

Birds of prey are quite impressive beasts - especially when they're the metal kind that fly at Mach 2 and spit fire. So strap into Sammy's new airborne shooter and get ready for take off.

Virtual pilots will be happy to see F14, F15 and F/A18s, as well as Russian MiG 29s and Sukhoi Su-27s. A variety of cockpit views and intuitive controls for heading, thrust, flaps, ordinance and RADAR makes flying and lining-up targets dead easy. That said, there's a certain realistic heaviness to the 'planes which is more sim than arcade. Get the vector wrong and you'll do a Buddy Holly, so make sure you use the training option. Once you're off in the blue yonder, it's typical stuff. Air-

to-air, strafing, search-and-destroy, etc. Save those replays for watching your greatest kills or go for a quick dogfight if you fancy it. It's certainly plethoric, with unlockable aircraft and different pilots/weapons combos all over the place.

Unfortunately, *Lethal Skies* lacks a certain edge in both graphics and gameplay, trailing third place against the twin thrills of *Ace Combat 4* and *Airforce Delta Storm*. Seems it's tougher than ever to be Top Gun. And that's a flyin' shame.

Judgement

GRAPHICS Certainly acceptable, but the PS2 is capable of so much more. Nice lighting FX, as usual.

GAMEPLAY Fun for a while, but ultimately misses the rush of flying a modern fighter jet.

LIFESPAN Tons of sorties to fly, planes to discover and tactics to try. Gets a bit samey though.

If you're a total fly boy, you'll probably get some air mileage, but most gamers will be looking for the ejector cord.

Overall **65%**

▲ Keeping your eye on all the on-screen readouts is no small feat, but you'll need it all to become an ace pilot.

It's Turok!

You know the *Turok* drill by now. Lots of wildlife to shoot, some of it friendly, some utterly, totally, nasty...

...plenty of heavily armed, bad tempered lizard men just asking for you to kill them in a variety of messy, painful ways...

...horrible jumping bits that'll make you very angry indeed as you cock them for the 50th time...

...oh, and dinosaurs. Don't forget the dinosaurs. And try not to hunt all of them. They're endangered.

Friend Or Foe?

▲ "Aiee! Please don't shoot me! Look, I've dropped my gun like a big klutz! I surrender!"

▲ Yeah, like I'm going to fall for *that* one. Eat hot bullet, you scaly freak, and be grateful that I don't kill you twice. I *hate* lizard men.

Is *Turok* about to evolve then? I'll swap him for a *Riachu*!

Turok Evolution

The Best Bit

Take to the skies and shoot down a fleeing transport jet. Makes a nice change from shooting lizardoids in the head, doesn't it?

How do you get to be a dinosaur hunter, exactly? I've been scanning the job ads for the last few years, and not once have I seen anything along the lines of, "Wanted: Dinosaur Hunter. No experience necessary, own bow and arrows desirable. Please call..." So for now I'm stuck with reviewing games. Games in which I occasionally get to pretend to be a dinosaur hunter. Well, if it isn't old *Turok* himself. Always a bit of a triumph of style over content, is *Turok*. The original was

quite entertaining, the sequel was an overblown mess, the third was some kind of multiplayer extravaganza, and there must have been another that I paid no attention to, because now we're up to version five.

MR LIZARD

This game is not subtle, it's not clever. It's really gory, silly, messy. The *Evolution*, I suppose, must be something to do with *Turok* now being on a next-gen console, because the

gameplay's virtually identical to the days of the N64. Evil lizard men vie to have arrows shot through their heads, you spend an inordinate amount of time staring through a sniper scope, and sudden death awaits you far too much of the time. Annoyingly, the default setting for auto-aim is 'off'. You might think me wet for complaining about this, but trust me:

▲ Flap around above ancient cities on the back of a friendly Pteradon. At least, we hope it's friendly...

▲ It wouldn't be *Turok* without a lung-busting swim through over-long underwater tunnels. This is it.

▲ Perhaps the sensible thing to do would be to talk to the lizard men. Work things out. Maybe not. Bang!

Turok's Nature Watch

Along with all the gun-toting lizard men and angry animals with teeth as big as... really big teeth, or something, Turok Evolution features a host of harmless wildlife. Let's take a look, shall we?

▲ Look! Up in the tree! Unless we're very much mistaken, it's a rare macaw! And about to become even rarer...

▲ You kids today, with your Buffy The Vampire Slayer. In my day it was Animal Magic, and Dotty The Ring-Tailed Lemur...

▲ Aww! A cute deer! Look at it, with its enormous dewy eyes. Now, what do you reckon: normal, explosive or poison arrow?

▲ A deer contemplates switching to a different, carnivorous rung on the evolutionary ladder. Stop it!

▲ Never interrupt a dinosaur while it's having lunch. Especially if the lunch is an even larger dinosaur.

you're going to need auto-aim. Especially when the game looses a horde of angry baboons at you. With auto-aim you can just about deal with them. Without it, expect death by baboon every single time. And if you're one of those people who likes a nice range of control methods you'll be disappointed. *Turok* has just two, the only difference being that the control sticks are swapped around. Graphically it's quite terrifyingly similar to *Turok 2*, except without the plodding frame rate. It's definitely not

Gratuity!

One thing the Turok series has always been mad for is blood. Lots and lots of blood.

▲ You'll never tire of scoped headshots. You'd better not, because you'll spend a lot of time doing them.

▲ Yikes! Baboon attack! No, don't laugh; the little sods are lethal. Be prepared to spill lots of primate juice.

▲ And once you tire of messing up computer enemies, invite some mates round and do the nasty to them.

▲ The only way to deal with Velociraptors is from a safe distance, with a sniper scope. Prepare to die...

what you'd expect from the mighty Xbox. Far too many angles for my liking. It's pleasant to see enormous dinosaurs and to do combat with gigantic airships, but it's hardly *Halo*.

On the plus side, it's not all first-person shooting. In an unexpected twist, the second chapter sees *Turok* turn into *Panzer Dragoon*, setting you astride a Pteradon for a session of air combat and ground assaults. Makes for an interesting diversion, but as to

how it sits in the game as a whole...well It doesn't, really. Why do it? Was there a point? If you're a developer and you're happy with your first-person shooter, don't shoe-horn in an entirely different style into the equation. Makes things lumpy.

If you've played any of the previous *Turok* titles you know what to expect. More of the same, a few new guns, irritating jumping puzzles (yep, afraid so) and gallons of blood. Oh, and quite a few dinosaurs as well. You may have heard. Not a patch on *Halo*, although it does have some very cute ring-tailed lemurs...

It's Pturok!

▲ Flying? A Pteradon? In an FPS? It starts off easy so you won't have many problems.

▲ Things get a bit hairy when a rockfall happens right in front of you. Quick reactions needed.

▲ Now, this is cool. Take down the airship while prehistoric flying machines swarm around you.

Judgement

GRAPHICS Reasonably detailed with the inevitable buckets of blood, but the Xbox can do far better.

GAMEPLAY Simple shooting 'n' sniping, plus a *Panzer Dragoon* tribute that's a little out of place.

LIFESPAN You'll romp through it - but the multiplayer action could keep you blasting for some time.

Yet another okay Xbox title to add to the growing pile. *Turok*'s a not-bad blast, but that there *Halo*'s still aeons ahead.

▶ Matt's So Crazy

Being cool is hard when you're an aged BMX biker. But Matt has gathered together some spunky young dudes to let us know just what a great guy he is. Watch in hilarity as each level is introduced by fellow bikers on the tour bus and wonder no more about why these men have no fear. They have no brains!

▲ Howdy folks, I'm Matt Hoffman. All this bike riding can lead to chaffing so I'm waiting for a bus to take me to the chemist for some cream.

▲ This extreme chap thinks Matt is a great guy. He's ideally suited to a bus road trip as he only washes once a week.

▲ After a six-hour bus journey, what better way to relax than heading to the nearest diner to satisfy your hungry pack of biker dudes.

▲ The in-game camera can be irritating at times and you'll need to flick the right analogue stick to correct it. But once you've got the hang of it it's just dandy.

11 men, 1 bus and 8 cities. It's not the Man Utd tour bus, it's Matt Hoffman and his crusty BMX mates...

Matt Hoffman's Pro BMX 2

While Mr Hawk is limbering up for his fourth adventure, BMX crash test dummy Matt Hoffman has just landed on PS2. The city-hopping main career mode is based around a 'crazy' road trip where Matt and pals get on a bus and tour the USA. Sound exciting? Well, no, but it gives gamers a excuse to ride around 8 cities including Boston, Los Angeles and New Orleans.

GET ON THE BUS!

FMV clips lead you into each level and Matt's 10 playable mates each have something to say about the man. The first clip you see is a crusty 'dude' who explains what a great guy Matt is - apart from when he forgets to bring his credit card to a restaurant. Luckily, the in-game action is more exciting. Using the familiar *Tony Hawk's* control method to grind, jump and spin, controlling Matt is a piece of cake. The tasks for each level are divided into amateur, semi pro, pro and 'secret' goals. In total, there's a whopping 96 challenges.

PRESSURE DROP

After winning enough points to reach the next level, you can choose which city to unlock via the road trip map. A level editor helps vary things but the main downer is the lack of new gameplay. *Tony Hawk's* has dropped time-based levels in favour of skill-based tasks and expanded trick combos, but has added free-roaming streets with mini games. Matt Hoffman is lagging way behind his more popular extreme sports brother and you won't see any massive changes to the original formula.

▶ The Best Bit

▲ Jump across a large gap, hit left and circle and you'll perform Rocket Air. Should you jump from a really high point, you'll be snapped by a photographer.

▶ Camera Shy

Perform a high scoring stunt or jump across the highest gap in a level and you'll be snapped by a sneaky member of the paparazzi.

Like Tony Hawk, you can perform different types of grind but you can't switch mid grind, sadly.

Break out of a high grind and photographers will snap you, saving your achievement straight to memory card.

When you take another look at your photo, you can zoom in and rotate the pic to see just how good your stunt was. Ace!

Judgement

GRAPHICS Good animation and clear free roaming cities look good but leave you in a frenzy.

GAMEPLAY Basically the same as before, with solid controls but little variation to stunts.

LIFESPAN Veterans will be bored after a fortnight but newcomers will be more excitable.

While Hawk pulls ahead, Hoffman shows little originality compared to the original. Only hardcore bike fans need apply.

Klonoa Beach Volleyball

Get sand in your fur with this year's biggest summer craze...

▲ This is the only arena where the sand really flies. Keep an eye out for the local pondlife too.

▲ Good heavens, they've beheaded that Zippy thing off Rainbow and they're kicking his head about. Neat!

It's the summer of beach volleyball apparently, and all manner of skimpily clad ladies are a-spiking and a-feinting right across the release schedules. Skimpily clad ladies and small furry beasts that is.

Oh yes, Namco, in their quest to kickstart a cuddly cartoon-led franchise, have forgone the bikini birds and instead pointed their unspecific little hairy creature at their take on the sand-fuelled ball-bouncing genre instead.

SANDY BALLS

Although obviously aimed at the more youthful gamers (indeed, there

are Kids and Baby modes for those less dextrous among us), it's still a bit tricky to get your thumbs around the controls, and it's use of big chunky characters and giant pink dinosaurs belies its steep learning curve. But once you're used to the controls it can actually be quite a giggle.

There are ten character options, and there's even the chance to play four-player with two game pads - which can lead to much hectic confusion and wiry entanglement.

While it may not have the long-term playability of the more 'serious' beach ballers, it's still an entertaining and frequently confounding way to spend a good few hours on the beach.

Smack Attack!

There's a bunch of special attack moves where the sky goes dark and everything gets all slow and psychedelic. Heck they're nasty.

Your power grid lights up, you hit the right buttons, and kablooeey, everything goes all weird, blue and electricky.

If you don't get the ball back over the net all sorts of sparks fly free. It's like taking your school jumper off in the dark.

But worse than that, they get mucho extra points and you end up frazzled to a smoking crisp. And that's not terribly polite!

Judgement

GRAPHICS You'll need to sit well back from the telly, cos everything on screen is huge!

GAMEPLAY Fiddly at first, but once you get the hang of it, it turns into a bit of a button munch.

LIFESPAN Not one for frequent daily play, more the occasional fun-heavy, no brainer session.

It looks like Klonoa and smells like Super Smash Bros, but despite the kiddie look, it's not a bad pop at the genre.

Who Wants to be a Millionaire?

We're not sure if Zoo are being tight but the GBA version of *Millionaire* doesn't include a mini-Chris. (Probably for the best, eh?)

Although all the jingles are faithfully reproduced, true *WWTBAM* buffs will spot that the music from £1,000 onwards should, strictly speaking, only be used for the million-pound question.

Apart from that, this works just fine - even if they haven't put more than a few seconds' original thought into the project. (Some sort of High Score facility might have been nice). But it is what it is and at that it's quite good.

Advance: Kintaro's Revenge

Considering that we're a bit vague on why Kintaro is feeling aggrieved, or for that matter who Kintaro is, and the fact that it looks Japanese but comes from Italy, this is surprisingly good.

It's a scrolling beat-'em-up in the *Final Fight* mould, with delicious graphics and baddies who actually take a bit of thought to deal with. Better still, there's more to it than walking from left to right and hitting people. You can also enter rooms, clamber up ladders, dodge bats, and collect keys and power-ups - you can even walk from right to left. There's adventurousness too, in the form of characters you can chat to o-n-e-l-e-t-t-e-r-a-t-a-t-i-m-e. Smart!

A highly engrossing beat-'em-up adventure. **86%**

Pinball Challenge Deluxe

Surely a pinball game should have an option to turn your GBA on its side and view the whole table at once. That's what we'd've done.

All the same, this is a spot-on conversion of *Pinball Dreams* and *Pinball Fantasies*, a couple of games that had the whole of Amiga Power engrossed throughout the '90s. You get eight tables altogether, all clearly designed by true pinball devotees, along with a ball that rattles around beautifully. It really is an excellent package. (No two-player mode or battery back-up, though. Tsk.)

Continuing the Challenge theme, the Swedish developers of the Amiga original went on to do *Rallsport Challenge* for the Xbox.

Eight superbly designed pinball tables made tiny. **90%**

Pro Tennis WTA Tour

Men are officially banned from the WTA Tour, even if they turn up in little white skirts, so Konami's pocket tennis offering features an all-girl line-up.

Which works brilliantly - the player select screen even has little manga-style versions of all your favourite stars. Apart from Anna Kournikova, chiz.

Less brilliant are the in-game graphics, which don't look much better than a GB Color game. But the least brilliant thing of all is the way it plays. At their best - *Mario Tennis* or *Pocket Tennis* on the NGPC - tennis games are fantastic fun. But here the ball's too easy to return, the CPU players are too easy to outwit. You just don't get much feeling of being in control.

If they really looked like this we'd watch Wimbledon more often. **63%**

Superficially good, but we'd wait for Mario. **63%**

Pulling off a special move is enormously satisfying – until you remember that a lobotomised chimp could have done it, too.

Capcom Vs SNK 2EO

Violence is golden as the classic combo lands on the Cube...

Don't rub your eyes – you have seen *Capcom Vs. SNK 2* before, namely for DC and PS2. And it were wicked. But hang on a mo.

See that 'EO' in the game name? It stands for 'Easy Operation'. Which is Capcom admitting that the GC pad isn't up to all their special moves. So how does one pull off, say, a fireball? By pushing the C-Stick in the appropriate direction. What about a mid-air reversal? Move the stick in another direction. It still

plays top, looks top and has that elusive Capcom/SNK feel, but holding the C-Stick in one direction for an entire bout robs the game of its essence. And that makes it the pop tart of the series. A good kicking looms...

Judgement

GRAPHICS You can't slaver over an SNK or Capcom brawler for too long. It's art, is what it is.

GAMEPLAY Lukewarm, diluted and remedial. The moves are there, but getting them is child's play.

LIFESPAN There's still stacks of replay value and a 2D beat-'em-up from this family is timeless.

It'll probably introduce new gamers to the genre, but you may as well have have cruise control for Colin McRae.

Get lucky and you'll win a Gamecube, a 28" widescreen television, a copy of *Rogue Leader* and a 4Gamers Cube Sound System. Even better, we've also got a 4Gamers flight stick, so you can get the full on X-Wing experience when you're screaming through the Death Star.

But that's not all. We've also got our hands on 4gamers 5.6 inch Game Screen. It clips on the top of your Cube so you can play *Rogue Leader* anywhere. We've also thrown in a GameCube carry bag, Racing Wheel, an 8 Mb memory card and a Controller. To win all this great gear, all you have to do is answer the simple question below, fill in (or copy) the form on the right and send it to us by 3 October. Good luck!

What do you have to blow up in the first mission of *Rogue Leader*?

- a) The Life Star
- b) The Death Star
- c) The Death Moon

Future Publishing is part of The Future Network plc. The Future Network produces carefully targeted specialist magazines and websites for groups of people who share a passion. We aim to satisfy their passion by creating titles that offer superb value for money, trustworthy information, multiple ways to save time and money, and are a pleasure to read or visit. This simple strategy has helped create one of the fastest growing media companies in the world: today we publish more than 100 magazines, over 45 magazine websites and networks from offices in six countries. The company also licenses 30 of its titles resulting in over 100 local editions in 30 other countries. The Future Network plc is a public company quoted on the London Stock Exchange (symbol: FNET).
