#### SEGA VS. NINTENDO ... U.S. VS. JAPAN

I see that Sega and Nintendo are back at each other's throats again. What is it this time? The rating system. It is interesting to sit back and watch the two companies fight over the most trivial of things. But there is a more important point to this battle. It is the fact that both companies are about equal in the video game wars and any time either can get one up on the other, it could translate into increased market share. And since each claims to have more systems sold than the other, the battle is very intense. Actually, I have no problem in calling it a tie ... at least for now. This coming Christmas, there will be a definite leader though, and both companies have already started to set up their holiday season battle plans.

For hardware, Nintendo is putting their bucks behind a Game Boy to Super NES adapter. Not a bad idea, but hardly revolutionary. A couple of years ago when the Game Boy market was much stronger, this would have been an important peripheral. But now, the hot items are 32- and 64-Bit systems, not playing 8-Bit colorized black

and white games on a 16-Bit system. Sega knows this and as we predicted last month, their big Christmas item will be a mini, cart-based, 32-Bit Saturn module called the Genesis 32-X which will plug into the Genesis. Now that is news! Couple that with a price of only \$150 and Sega could just unequivocally become the U.S. video game leader going into 1995.

But that's only the U.S. market. This week I'm over in Japan attending a Consumer Software Group trade show and things are very different here. With no game rating system, there is no Sega / Nintendo war. In fact, things are so one-sided that there isn't even a battle. Nintendo is easily number one in both hardware and software sales, and Sega is a distant third. Business is really bad for Sega here. New system sales, despite a \$70 Mega Drive price, are almost down to zero, while Nintendo's Super Famicom still commands, and gets, a \$140 price, without a cart. Also, there is so little Sega news that several of the all-Sega magazines have gone under due to lack of player interest. Regarding games, the 'Top 30' charts are all Nintendo games and with Final Fantasy VI coming out this week, Nintendo couldn't be looking better. But the economy could. Everybody is hurting over here. Games just aren't selling as well as they used to. Super Metroid came out last week and, in better times, would have sold out the very first day. Not only are there tons of carts in the stores, but less than a week after its introduction, the price has been slashed over 30 percent. Both Super Metroid and Sega's Virtua Racing are already selling for under \$60. Still, games are a best buy. They haven't changed significantly in price over the years I've been coming here. Everything else has, though. A glass of fresh orange juice at my hotel is \$12; a cab ride starts at \$6, and even the bare bones McDonald's hamburger is over \$2. With prices like that there isn't a lot left for games.

The year-end holiday season will be different too. Sega plans on having the CDbased Saturn in the stores, but it will be competing with the 32-Bit Sony PS-X and the new NEC machine. Here, Nintendo can afford to take a slower pace as all of these new machines combined won't make a dent in their market. Things in Japan are look-

ing very good for Nintendo. But has being number one for so long built up an over confidence at Nintendo? I would sure hate to be Nintendo's U.S. President when he reports back to Japan why

they may be slipping in America. The war isn't over though, and already we are seeing changes at Nintendo of America. The year is still early and, who knows, perhaps Nintendo just might bring out a surprise this Christmas which will turn things around. One thing's for sure, Nintendo certainly knows how to make good software. Super Metroid is unbelievable! This I can attest to—when my staff tells me to bring 10 copies of Super Metroid back with me, it has to be great! When I asked them if they wanted Virtua Racing, Streets of Rage 3, or Sonic Drift, they said thanks, but no thanks. Oh well, sorry Sega.

#### IN THIS CORNER, DATA EAST...

March 17, 1994-Judge William H. Orrick of the Federal District Court in the Northern District of California denied Capcom U.S.A., Inc.'s motion for a preliminary injunction enjoining Data East's marketing and distrib ution of Data East's video game "Fighter's History" and any newer versions of that game. Capcom claimed that Fighter's History infringed Capcom's audio visual copyright for its Street Fighter II family of video fight games. Capcom also claimed that Data East had copied the "total concept and feel" of Street Fighter II in addition to copying certain fight characters and special moves

Judge Orrick held that "Data East has not captured in Fighter's History the 'total concept and feel' of the protectable expression in Street Fighter II. Rather, the similarities that result between the two games stem from Data East's emulation of the unprotectable, commonplace features of Street Fighter II, such as its stereotypical fight characters and its reliance on unoriginal fighting techniques derived from the martial arts." The court further held that "Capcom cannot now withdraw from the public domain ideas and standardized expression ... To do so would be commensurate to awarding Capcom a monopoly over a range of characters and moves it did not create. It would also allow Capcom to lay proprietary claim to all reality based fight games featuring human characters. Copyright law affords no such protection.

"We have always believed that Capcom's allegations of infringement had no legal or factual merit, and the Court's ruling has vindicated our position," said Mr. Tetsuo Fukuda, President of Data East. "Data East believes Capcom was attempting to obtain a monopoly over all one-on-one fight games. The Court's ruling ensures that healthy competition may continue in this industry," Mr. Fukuda said

...AND IN THIS CORNER, CAPCOM

March 23, 1994-After filing suit last September against Data East Corporation and Data East USA, Inc. for infringement of its Street Fighter II copyright, Capcom was denied a preliminary injunction last week that would have prevented the sale of Data East's game, Fighter's History while the case proceeded. However, with a trial date set for Oct. 31, 1994, the recent decision by Judge William H. Orrick of the Federal District Court for the Northern district of California is not the Court's final decision on infringement of Capcom's copyright. While declining to enter a preliminary injunction, the Court has indicated that if Capcom prevails at trial, it could recover damages for Data East's continuing sales

"Judge Orrick's decision is not completely surprising considering that no formal discovery has been conducted and that the information and evidence available to the Court was limited as a result," states lan Rose, Capcom's general counsel. "The denial of our injunction request in no way assures Data East's final victory and we remain convinced that Data East has unlawfully infringed our copyright. Once all the facts are known, we're confident that the Court

and jury will agree. In his decision, Judge Orrick found that Data East did not "refute the strong evidence that Data East set out to copy Street Fighter II's success and that Data East's developers spent hours studying Capcom's game to see how this goal might be accomplished." Judge Orrick also found that certain characters and character moves in Fighter's History were similar to characters and moves found in Street Fighter II that are protected by copyright. The Court was "disturbed" by certain "coincidences" in special move control sequences and, for example, found Data East's selection of a female Chinese character like Street Fighter II's

Chun Li, "troublesome."

Furthermore, refuting Data East's suggestions that Capcom might be trying to "obtain a monopoly" over one-on-one fight games, Rose stated, "Capcom has no desire to exclude healthy competition in the video game industry. Instead, we hope that the outcome of this litigation will create an added incentive for the development of truly original and creative games rather than formulaic emulations of existing product. To the extent that the Court takes a narrow view of the applicability of copyright law to protect creative expression in video games, we believe the industry as a whole could be weakened and that the creative and original work of software publishers would be inadequately rewarded." Capcom also continues to aggressively pursue parallel litigation against Data East in Japan.

(Ed. To cut through all the legal jargon, this whole lawsuit boils down to the issue of copying. Capcom felt it was necessary to bring up a lawsuit, since they felt the characters and special moves in Fighter's History were a direct copy of the well-known Street Fighter II family. Take a look at the two-page Special Feature on Fighter's History and judge for yourself. Now that both sides have spoken and although the Court hasn't ruled a decisive victor, it looks as if you, the consumer, will be a different kind of judge. When both games hit the store shelves, which game are you going to rush out and buy, Fighter's History or Super Street Fighter II? Is this a case of the little guys beating the giants? Only sales will tell. The bottom line is that while they're under litigation, Data East will be bringing out Fighter's History and the choice will be yours.)

THINK AGAIN!

I read in your February EGM that Sega awa debuting the new Genesis CD-X. I think the system is going to be great. I mean, after all, you will get to play from hundreds of games and CDs. Question: Whats wrong with the system? Answer. No Screen! I think Sega has just committed a very serious crime. A portable system with no screen is a big mistake! Here's some advice for Sega: Think again Sure if s great that you can use all the games on it. Another thing that bugs me is the price. I mean, 400 bucks is ruts. Sega, don't think you're going to see the unit as fast as Sonic. Think again.

Raul Mendiola San Antonio, TX

Will the Sega CD-X revolutionize the way we play games? Only time will tell.

(Ed. We're in complete agreement with you on this one. Raul. We were disappointed when Sega never developed a portable Genesis system and hearing rumors of a portable Sega CD seemed cool. However, the absence of a screen seems rather futile. Granted, the addition of a nice LCD screen will have added weight, size, and most notably cost, many consumers would be happy to fork out some extra cash to get a portable Genesis and Sega CD. As it seems now, the CD-X looks like it will end up being a high-tech toy for those who don't own a Genesis or a Sega CD. While it is nice that it can be used as a portable CD player, who would want to lug around a \$400 compact disc system, especially when you can buy a portable CD player for less than 100 bucks nowadays. The biggest question on a lot of minds out there must be if Sega will introduce a way to hook the CD-X to the Game Gear so you can picture. It sounds like a great idea and it will be interesting to see what turns up.)

# LETTER OF THE MONTH

If you think you have what it takes to contribute to society, go write to *Newsweek*. If, however, you have a thought or opinion that fellow gamers would particularly find crazy, we'd love to immortalize you with a special edition EGM T-shirt proclaiming your fondness of and psychosis to video games.

I love Mortal Kombat, Mortal Kombat is my life! I love to go to the arcade and play all day long. My favorite character is Sonya because she's a girl. Once, when I was playing Mortal Kombat, I said 'Hi' to this girl. She hit me. But I got the last laugh because I popped a few zits on her fist. I used to do drugs but I don't have time for them anymore because I play Mortal Kombat now. I figured out all the fatalities myself! When the arcade closes and I go home, my mother says I should 'fatality' myself because I'm failing in high school. Ha! She doesn't even know that I quit high school so that I could play Mortal Kombat more! I weigh 55 pounds and my Mortal Kombat buddles say I should eat more but I don't have enough money because I spend it all on Mortal Kombat. I figured out this new fatality with Scorpion where he rips out your eyeballs and eats them, shoves his hand up your nose, and pulls out your brain. I have decided that when I'm older, I want to be a policeman so I can do that to people Anyway, I love your magazine. I can't say I've ever read it but the Mortal Kombat pictures are cool. Byel

Congratulations go out to Mooncricket Chernicky of Bonsall, CA, for his love of Mortal Kombat and his career in law enforcement. Your T-shirt is on its way. Just try not to sell the shirt to get arcade tokens, OK?

#### WHAT EVER HAPPENED TO ...?

Whatever happened to Mortal Kombat for the Sega CD? I've seen it in your magazine twice and I've seen it in the black and white ads in the back of the magazine. It was supposed to be released in December, but I haven't seen it in a review or on store shelves. My friend says Acclaim folded under the pressure of all the controversy and will not release it. Is this true? I am also considering the purchase of a Neo•Geo and when I see it in the black and white ads in your mag I see a 'Gold System' for about \$500.00 and a 'Silver System' for about \$350.00. Could you please tell me the difference between the two, other than 150 bucks?!

> Kevin Ferguson Warren, MI

(Ed. Kevin, Mortal Kombat for the Sega CD is alive and well and you'll find it as a Fact File in this very issue. Acclaim hasn't folded under the pressure of the media, since this one still contains all the blood and gore like the Genesis version. #### **MULTIPLE LANGUAGES**

I'm a faithful reader, although I have never written to you before. I want to refer this particular question to your review of NHL Stanley Cup (EGM #55, p.36). You wrote: "Why is there a selection for French dialogue?" Where I live, there are over 6 million French-speaking people. That means we make up for 2 percent of the North American population. It's very hard to survive in this English world and to preserve our culture. Maybe one day we'll all be assimilated to your English system. but for now, we try to resist. Try answering this question. In the history of video games, how many had the option for French dialogue in them? I think NHL Stanley Cup is the second game that does. Two out of hundreds and hundreds.

Get your pens and pencils ready! The next assignment is to draw what you think would happen if popular video game characters actually attended the hearings on video game violence. Below are the winners of the 'Holiday Photos' contest from EGM #55.

Lyle and Michael Haakenson Davenport, IA.

Chad Laubach Emmaus, PA.

Do you find that too many? Young children who don't know English yet are having fun for the first time with this game. I'm sure they're waiting for the first bilingual RPG. Many children between the ages of eight and 12 are not playing wonderful games like Zeida because they can't read the text. So stop thinking about yourcaselves gusy, you're not alone in America.

Sylvain Leroux Montreal, Quebec, CAN

NHL Stanley Cup offers a choice between the languages of English or French.

(Ed. The purpose of our statement wasn't to bash the idea of having multiple languages in video games. In fact, we think it is a terrific idea that many companies just haven't capitalized upon. The reviewer was merely surprised at the fact you could change languages, something that isn't too common in video games. A few games that we could think of did offer multiple languages, including Gaiares from Renovation and McDonald's Treasure Land from Sega. Both for the Genesis, they allow you to change from English to Japanese. Where in the World is Carmen Sandiego? and Where in Time is Carmen Sandiego? from Hi-Tech Expressions for the Super NES and Genesis offer five language choices: English, French, Dutch, Italian, and Spanish. An interesting side note is that American Softworks was planning on introducing Chavez Boxing for the Super NES with all the text and speech in Spanish! And let's not forget about the Neo•Geo. As many people already know, nearly all of the Neo-Geo games are bilinqual. Although you can't change languages through a typical options screen, if vou take an American Neo cartridge and plug it into a Japanese Neo•Geo, the language will change to Japanese, and vice versa. As you can see Sylvain, there are companies out there who understand your dilemma. When we point out something like a language change in a review or a Fact File, there's no need to take it personally, it's just something that happens to catch our attention.)

#### HANDICAPPED GAMERS

I have been in a wheelchair since the age of eight and I became an ardent video gamer at the age of 12. Because I could not play in any sport or engage in any activity requiring physical exercise, I turned to video games for entertainment. I have since become the local video game champ and advisor, and am the proud owner of several game systems, along with over 100 games. While I enjoy playing games at home. I long to play the latest arcade games and this is where my problem arises. Muscular Dystrophy, my handicapping condition, makes my arms difficult to use. Even though I can control all of my home games, arcade controls are often too high and/or poorly arranged for people like me to use. I am sick and tired of being embarrassed in public and wasting other players' time because I can't reach or move the controls. I usually start out OK but then my arms get tired. I hold my own on the home gaming front but I think I have the right to be able to play games in the arcade. Isn't there some way to make a 'handicapped accessible' arcade machine? If not, why doesn't somebody design one? I'd really appreciate any feedback or information you people could give me. Thanks for your time. Jim Lafavette

(Ed. To my knowledge, I have never seen an arcade machine that is easily accessible for handicapped persons such as yourself. I'm sure that creating such a machine wouldn't be too much of an effort for arcade manufacturers. Do you remember when Nintendo addressed the problem a long time ago? They produced a controller that you would wear on your body and use your mouth and chin along with sucking and blowing actions to move the joystick and activate the buttons. While an idea like this may not be suitable for arcades, it may just be best for designers to lower the joysticks and buttons to a height that would benefit wheelchair users. How about it? If there are any arcade manufacturers addressing this problem, or if anyone has developed a good solution that has been marketed for arcade use, drop us a line. Everyone should be able to enjoy the arcade and the thrill of these games should not only apply to non-disabled people, but handicapped people as well.)

You've learned that the kingdom of Llylgamyn is being threatened by an unnatural, magical vortex forming deep within the caves below the castle. There, forces are holding the magical Gatekeeper, who is desperately needed for the health and prosperity of the kingdom. Without him, plagues and general chaos reign.

To find the vortex, you must face many dangers and evil enemies. If you question carefully and seek advice, you'll find the leader of the Brotherhood and learn vital secrets of the Orb. If you use careful planning and strategy, you'll make it through the hazards, and find the trapped, magical prisoner. But, even if you make it that far, you must still attack the Heart of the Maelstrom, where the nexus of the forces holding the Gatekeeper reside.

#### The Flintstones Action Release: Now Levels: 70 8 Mea

Super NES

Flintstones delivers. The graphics and tunes reflect the cartoons brilliantly There's lots of stuff to find and loads of technique. The cinemas are also well done. Here's the bad news ... this cart slows down way too much! Even when only a couple enemies are on the screen it happens. Other than that, the Mode 7 races are cool, and the control is perfect. It just needs to be sped up a bit.

The Flintstones is kind of cool. Although it seems a bit strange having to roll an on-screen die to move around the map, the concept is different. The graphics are nice and cartoony while the music is very catchy. However, there are some complaints. The game really slows down at odd points in the levels and the game is very easy to beat. Other than that, The Flintstones is a decent Super NES title.

Flintstones is one of the more entertaining games to come out for the Super NES. It's a treat for the eves with super graphics that capture the look and feel of the Hanna Barbera classic. Even the sound is an excellent match to the famous theme song. The game plays as good as any game should with a lot of little techniques to learn. It's too bad that the game slows down too much. It would've gotten a higher score.

Flintstones has a fresh type of interface that resembles a board game. Each spot you land on is different which develops some strategy as you play. The action scenes are fun to play and are filled with very colorful graphics. Sounds are also up to par as is the control of your character. There are plenty of techniques to master to keep you playing and the great renditions of the classic characters keep you interested.

#### Super NES Viacom **Rocko's Modern Life**

Puzzle Release: Now Levels: N/A 12 Meg

Rocko certainly isn't a kids game. This game is a challenge for even the best of players. Sometimes too much so. The visuals and voice are directly from the show, and capture its spirit. The cinemas are among the best around. Sometimes it's a little hard to get Spunky where you want him to go. If you're looking for a game that you won't beat in one sitting, Rocko's Modern Life will come through for you.

Those who've seen the hilarious cartoon will know what to expect from this game. It's filled with all the wonderful humor and fun a game like this can offer. The puz-zles are tricky and get downright brutal in later levels. The digitized voice and catchy tunes are a real treat to listen to as well. If puzzle games are your hot ticket, then Rocko's Modern Life will certainly not disappoint you. I'll be playing this one for a while!

I'm not a regular viewer of the show, but that's not why I don't like this game. I'm just not into action games where you must complete tasks to clear a stage. I found the game tedious. Granted the graphics were very good with characters directly from the TV show. The sounds were exceptional with voices digitized as well. The challenge and difficulty is good, but they just weren't enough to get me to like it.

I can understand the appeal of the characters but I never got into them like Ren and Stimpy. The game has some very challenging puzzles, but they often become frustrating be you can get control over your little buddy. I enjoy puzzle games but this one was a bit taxing rather than being enjoyable. The graphics and sounds are good but unless you really enjoy the characters, you might just want to give up.

#### **Libertu or Death** Strategu Release: Now

16 Meg

Levels: N/A

This type of game normally appeals to me, but Liberty or Death seems to play quite slow. I don't get the feeling of being in control and the events don't seem all that connected. The graphics are very good and I really liked being able to play as the British. The strategy part of the game is very well done and if this is your type of cart, you better plan to set a lot of time aside for it because once you start you won't stop!

Koei has never been one to let me down when I wanted a good strategy game and Liberty or Death is another heavy hitter. While the story doesn't really excite me, this one will definitely keep you glued to the TV set for hours on end You get total control over the troops, money allocation, and territory control. This is a great time warp back to the early days of American history. It's worth a look.

I dread the time when I have to review these types of games, because they are just not the kind I get into. Like most of the games that are like this. I found Liberty or Death to be a slow-paced war simulation. The graphics could have been be ter as well as the ound. On the plus music at side, this game comes out on the positive as an aid to a student's history lesson, but overall, it's just not my type.

War simulations are made for a very particular type of person and, unfortunately, I'm not that type. Granted there is a lot to do and plenty of strategy, but the category as a whole doesn't catch This one in particular my eve. tries to give you a forced history lesson. can see it appealing to fans of the genre, however the graphics aren't anything special and the particular options don't seem to interest me.

NBA Showdown has all the ingredients of a promising title, however, the action is very choppy, robbing this one of the fluidity and game play. Still, everybody's favorite team is here and sports fans will probably enjoy it.

#### GameTek / Genesis

Another good game show adaptation by GameTek (like the earli er Family Feud). However, unless you are a big sports fan, this game probably won't appeal to you because that is what all the questions are about.

Double Dribble is an interesting entry into the basketball genre. but the game play lacks control and the game needs more fine tuning. The Password Option is good, but overall, the game just ends up average.

### **Asterix The Gaul**

A colorful, but incredibly frustrating side-scroller where you can pick from two characters. The control is less-than-precise, making those precision jumps very

maddening. However, the Password Option helps.

Genesis **Grind Stormer** Shooter Release: Now Levels: 6 8 Mea

This reminds me of the Golden Age of the Genesis shooters. This game would easily be the cream of the crop a few years back, and by today's standards, rates right up there. Unlike a lot of shooters, this one gives you a constant challenge from begin-ning to end. The graphics are topnotch, with power-ups that are really helpful. The sound of your shots is extremely annoying, but it's a minor flaw.

Shooters are pretty rare these days so it's nice to be able to review one. Grind Stormer doesn't offer anything new in terms of weaponry or enemies, but the game does offer a challenge with its fast-paced game play and hard difficulty. The music and soun effects get old really quick and the game flickers a lot when the screen is filled with enemies. At best, Grind Stormer is above average.

It's too bad that this game didn't come out a few years back. This is the type of shooter that would have won shooter of the year, but the problem is that there are too many weapons that we all have seen already, like a wide weapon attack and a homing weapon. Yes, they are cool and powerful weapons to have, but are not anywhere near original. Aside from this, it's a good shooter that can stand on its own merit.

Here is a good shooter that has all the standard types on weapons and power-ups, but doesn't really have any new gimmicks to catch your eye. This is not to say that the game isn't good. As a shooter, the graphics are very good and it plays as well as any other. Any shooter fan would be glad to add this to their collection. I hope shooters start to make a comeback among all these fighting carts.

#### Genesis IIS Gold The Incredible Hulk

| Action    | Release: July |  |  |  |  |
|-----------|---------------|--|--|--|--|
| Levels: 5 | 16 Meg        |  |  |  |  |

The Incredible Hulk is very cool to look at, but the play control needs to be better. You almost get hit by everything the enemies throw at you. Tr<del>ving to pic</del>k up items quickly can get aggravating. The sounds are nice, and the graphics of the Hulk himself look like they're from the comic series. If you are a hard-core gamer, you might like this one but the difficult control will probably give even experienced gamers a problem.

What we have here is a game with great graphics, animation and sound plagued by difficult control, plus way too many cheap hits. Since the Hulkster has no defensive moves like blocking. you end up inching your way toward enemies just to hit them.
All the different attacks Hulk can perform on enemies are great. The problem is that they're so hard to execute, you end up getting frustrated in the long run.

If you're expecting a game loaded with decent graphics, good sound effects, and some very cool moves from the Hulk, you've come to the right place. But if you are looking for a game with good game play, you might as well move on because this title is definitely lacking in this department. You get hit so easily during each stage. The enemies shoot almost a steady stream of bullets that you can't avoid. Unfair.

I'm surprised they didn't do more with the Hulk. There seemed to be a lot of moves on later levels. but at first, the game is frustrating and only has a simple punch and ne could use a few throw. The gan more type of enemies and more types of weapons or power-ups to interact with. The Incredible Hulk has a lot of possibilities, but they weren't fully exploited. The graphics were decent but it needs more game play to help out.

| A THE RES   |              |  |

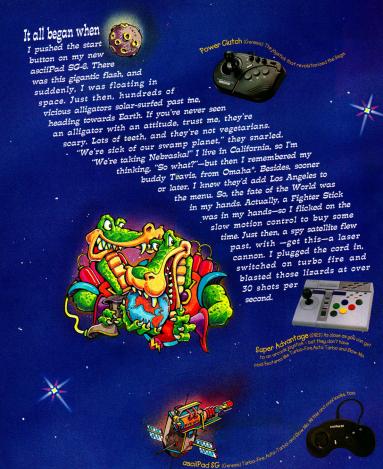

Tomcat Alley isn't what you'd quite expect. You really don't fly your plane. Instead you operate things like the firing mechanisms and chaff dispensers. The access time is carefully masked, so even the most careful eve will probably miss it. The graphics are really well done, and for once, you see the whole screen. If you don't mind the play mechanics, you'll probably enjoy Tomcat Alley. It's different but good.

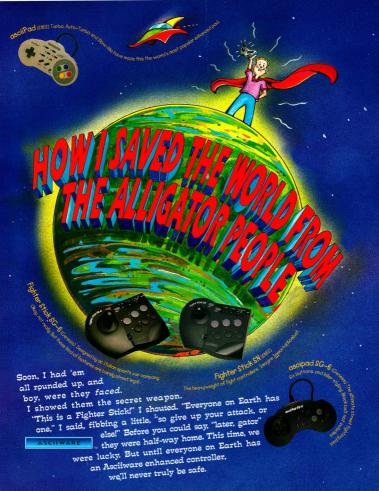

Aaargh, another full-motion video game! If you've played Night Trap or Double Switch, then you've played Tomcat Alley, Seriously though, this game is pretty cool. The first thing you'll notice is that the video is full-screen, a Sega CD first. However this makes the video very blocky and often hard to see. There are tons of video clips so it's rare that you'll see the same one over and over. Overall, this game is more of the same.

Tomcat Alley is nothing I would run out to buy at first sight. At a glance, you are treated to a long cinema, a la Top Gun. After that, it's pretty much downhill. You never really get into a self-flying mode since it's not as interactive as one may think. All you do is move a cursor on the screen. The graphics are okay but the sound is poor for a CD game. About the only thing I like is that it uses the entire TV screen.

Instead of a flight sim, this is more of a live-action game. There are tons of scenes with decent digitized action, but you mainly control a point-and-shoot type of game rather than fly around. The game hides its access time really well by showing a scene to keep your mind off-of it ... nice trick! Also there are multiple scenes for explosions to prevent it from getting tired. A good attempt, but not my style.

I never thought that I'd like a fishing game, much less one on the Game Boy. The lures don't really seem at least fishing in from one another, but reading the fish in is a real treat. The sorting when you reel the fish in so good scaling (no pun introduct). The sounds are simply warings. Surprisingly this gam gar ye well, and your line only snaps once in a while. This is the type of game that grows on you.

I'm no top fisherman but what we have here is a cool game that is just getting old. The original versions from a tow years back were fabulous for their time. Although it's on the Game Eoy, there's no burning but east will be the time of the cool of the other options region and region are region.

### John Madden Football Electronic Arts / 300

The eye-popping visuals are the highlights of this one. The control and execution of plays take practice to master, but the complete run-throughs of the teams (with excellent cinemas) make this a winner.

### Chase HQ 2 Taito / Game Bou

For a driving game, this one comes off rather well. The cops vs. robbers theme at high speeds was always an innovative one, and the title is done justice here. Things can get a little slow at times, but overall it's pretty good.

Before Super Metroid.

After Super Metroid.

It happens so fast. One minute you're a cute, fuzzy-faced little thing. The next minute you're served up on a platter with a side of mint jelly.

Such is the intensity of new Super Metroid® for the Super NES.® Six new worlds of wilder weapons, weirder weirdos and those ever-lovable life-sucking Metroid hatchlings. All waiting to turn you into so much dead meat.

Luckily you're Samus Aran,

IF THINGS GET HAIRY, USE THE SPEED BOOSTER TO OUTRUN ENEMIES. OR SNAG A GRAPPLING BEAM. OR PRAY.

so you've got more than good looks and a charming personality going for you. Like ice beams. Power bombs. Super missiles. Screw attacks. And other new

implements of destruction.

In fact. with 24 meas of stuff, it's

RIDLEY. METROIDS. THE GIANT LIZARD KRAID. AND YOU THOUGHT YOU'D NEVER LOOK FORHARD TO GETTING BEAT UP AFTER SCHOOL.

not just the biggest Metroid game ever. It's Nintendo's biggest game ever.

But don't even think about playing it unless you've got a Super NES. Oh, and it wouldn't hurt to have a little of that mint jelly on hand either.

SEGA SCOOPS INITENDO WITH ADD-AN VIRGIN UNCOVERS 3DD DEVELOPMENT CAPPOND BETS K.D.'d IN COURT FIGHT NEW SF GAME TO LAUNCH WITH MOVIE ULTRAVERSE VIDEO GAMES GO TO SONY ACCLAIM WORKS TO KEEP MIDWAY SONY SYSTEM GAINS MOMENTUM

...Hey kids, it's time to get wacky with the Quartermann, your one-stop shop for the very latest in gossip and insider dirt! Yours truly has put in extra hours this month, my Q-Fans, to deliver some of the best scoops from inside and out the gaming industry! So plug in for the best rumors in the galaxy ... First this month, the Q tips his hat once again to the white shirts at Sega, who have once again bested the Nintendites in a peripheral for console upgrades. Actually, Nintendo's move is entered a system downgrade, letting their B&W titles from the G-Boy play on the big screen. The Sega add-on, meanwhile, delivers of a system downgrade, letting their B&W titles from the G-Boy play on the big screen. The Sega add-on, meanwhile, delivers after super-charger that could best be described as a Saturn Jr. Although the Q hears it won't come with all the chips and other goodies that its big brother will boast, the 32X is sure to attract more biz with the lower price tag. You have to wonder, however, how does the 32X fit into things and will the Saturn have a cart port to play the 32X games?...

...In other news from the high-lech front, the Quartermann hears that Virgin has uncovered a nifty way to make their 3DO titles play in both the normal video as well as the MPEG-1 formats. This little discovery will come as a bonus surprise to those 3DO nuts who invest in the add-on cartridge. The Q-Mann predicts that Virgin's discovery will be accepted industry-wide, solving the current problems some chains are having in trying to decide whether or not to carry two versions of the same game. .. Have you ever noticed that one of Shannon Doherty's eyes is higher than the other? ... From the courts, roving reporter Duy Lewellen tells the Q that Capcom has struck out in the fight for a preliminary injunction against Data East's Fighter's History game ... While we're talking Capcom, which of course means Street Fighter 2, the company plans to have a new SF coin-op on the streets to coincide with the release of the big-budget movie that just snared Jean-Claude Van Damme in its tractor beam to play Guile (Van Damme plays the American'?). Could this new game, which will supposedly get some heavy promos at the beginning of the movie, be the long-awaited Street Fighter 3' The Q-Mann isn't telling...

...Comics are becoming big biz in the gaming world! Although THO bailed on their exclusive to do Ultraverse games (bad move Hans, clidn't you hear that there's an Ultraverse TV show in development??), Malibu Interactive had no trouble getting a real gaming power-house, Sony, to pick up the license. Look for the first titles, including Prime and FireArm late in the year ... Also at Sony, one of the premiere comics of the '90s is set to debut in the third quarter. Todd McFarlane's Spawn game is under way and could hit with an original comic attached ... Also from the Image Comics camp. Jim Valentino's Shadowhawk character will hit in time for Christmas with an original comic attached ... Add in the Marvel and DC titles (look for a new Batman game from Sunsoft), and comic book superheroes have become the hottest theme since Pac-Man clones. ...Hey, Nintendol When a you going to do a 16-Bit update to Donkey Kong'? The Q was only half-right that you were doing a DK update, but what yours truly really wants to see is an original title with the DK style and some super graphics. Mark my works: It would be a SMASH...

From the Far East, Terry Aki tells me that the 3DO is mustering up some interest, with a new magazine devoted entirely to Trip's hardware. ... Also new from the Land of the Rising Sun is word that the Sony PS-X could be a MAJOR leap forward in game system development. Yours truly has spoken with a number of developers who are hardly able to contain themselves. Also, Sony is doing their launch the right way by tying up a variety of high-powered licensees, but from what the Q has heard it's still a tightly kint club—in other words it's not a 3DO and only the best are being given access to the hardware. .. On the other side of the U.S. meanwhile, the Q-Mann hears that games are hitting the skids, with a number of developers and publishers consolidating their skills to get leaner and meaner ... Also on the other side of the Quartermann hears that the gaming mags are folding for cover now that EGM UK has the green light to go...

...Looks like Acclaim has scored the rights to what may be one of the hottest licenses of the summer, the Kurr Russell sci-fi extravaganza called Stargate. The big 'A' is also rumored to be working on a game based on the Monster Wars-monster truck concept and, of course, MK2. Speaking of the Acclaim-Midway relationship, the Q hears that stocks moved for both companies on rumors that Midway was about to pull their exclusive license to the home game producer which expires in March of '95. Although things got edgy, the Q hears that both sides are still knee-deep in negotiations ... That rounds out this action-packed issue of the Quartermann report. EGM subscribers should check out this month's Q-Letter for the beginning of a very special series of tip sheets for some of the hottest games. This month you get an easy reference guide to MK2 with all the moves and more - ready to clip and take to the arcadel Stay tuned for Virtua Fighting moves next ish...

# THE SUPER GAME BOY IS HERE!

Ever since it came out, Game Boy owners have been wanting a way to play their games in A) color and B) on their TV. Well, now they can.

Nintendo is planning on releasing

their Super Game Boy. This is essentially a Super NES cartridge with a Game Boy adapter built in.

How will you have color? Well, normal Game Boy games have four shades of gray. The Super Game Boy will allow you to assign color values to these shades. Future Game Boy games will have the ability to display up to 256 colors when connected to the Super Game Boy. Your games will also have stereo-symphonic sound as well. Its release date is scheduled for June 6, and the price is to retail for \$59.99. It's just the thing for you Game Boy lovers. No more blurrind!

The Super Game Boy lets you play your games on TV and even in color!

# Turn your genesis into a saturn!

On March 14, Sega of America announced that it would provide a way for Genesis owners to upgrade their current 16-Bit system to a real 32-Bit machine. The system is called the Genesis Super 32X. At one-thrid the cost of the most technologically advanced systems on the market, the Super 32X will be able to give the players a taske of what to expect in the future from the Sature.

What makes this system so special? Well for starters, it is the first product from Sega to use the Hitachi SH2 RISC chips destined for Saturn. The two SH2 chips will complement a newly designed VDP (video digital processor) hip. This will give your Genesis a faster processing speed, high-color definition, texture-mapping, enhanced scaling and rotation, not to mention improved polygon graphics, a true 3-D perspective, software motion video, and CD quality sound.

The 32X can display 32,000 colors

via special cables and it will come with its own power supply.

Most importantly, the 32X will also bring up the color palette and graphics of the Sega CD!

Right now Sega has more than 30 titles under development, but the actual names and specifics are being kept under wraps. You might be wondering about the licensees. Sega expects them to have a similar number of titles ready for the worldwide introduction of the system this fall. Best of all, this technology is going to put you back only about \$149. It's a small price to pay for so much machine.

It will be the next logical step up to the Saturn, while you can still play all of your old Genesis and Sega CD titles as well. Sega apparently wants to keep the compatibility going.

"Here's another example of how your investment (in your Genesis) is protected," stated Bill White of Sega. It hasn't been determined yet whether or not the 32X will be compatible with the upcoming Saturn. With the 2XX in the stores, Sega might just now decide not to put a cartridge port on their Saturn system. However, based on Sega's strong history of making their systems backwardly compatible, one would think that they wouldn't walk away from the cartridge industry, but Sega isn't talking yet.

It is also unknown whether or not the Japanese carts will be able to work on the 32X.

The games will be priced around the same as the average Genesis cart, and it is not certain yet whether or not a game will be packed in with the 32X, but Virtua Fighters is the logical choice. In addition, with Sega's strong presence in the coin-op industry it is probable that most of their other popular arcade titles will be made into 32X games. Perhaps we'll see the Sonic arcade game along with some of their other current arcade hits.

Well into the future. the world's only hope is a weapon from the past.

# NEW AUDIO TECHNOLOGY REDEFINES SOUND AS WE KNOW IT...

A newly formed company called NuReality has developed a product called the VIVID 3-D. This sound enhancement system connects to any mono- or stereo-based game to create dynamic three-dimensional sound. By retrieving ambient sound information hidden in the game's audio track, the VIVID 3-D system adds a new dimension to the sounds and music. This will work for not only PC-based systems, but for cartridge-based games as well, like the Nitherdor, and the Genesis

Via a strategic partnership with SRS labs, the VIVID 3-D system incorporates patented SRS technology to create three-dimensional sound from just two speakers. This technology was created as part of 10-year, multi-million dollar research, with development help from the Hughes Aircraft Corporation.

Based on the Hughes Sound Retrieval System, Model AK-100, the NuReality system is a sized-down version made specifically to have optimal effects with the video game systems. This will make it cheaper for the

It's hard to describe the effect on paper, except that it is true 3-D sound, unlike anything short of a mega-expensive system elsewhere. Since it's supposed to be compatible with existing systems, the games do not need to be encoded with any special

source material. The VIVID 3-D system can be used with any audio system to create a true-to-life sound image. It doesn't even matter whether the signal is mono or stereo.

These systems, unlike others, have no "sweet spot," so you can enjoy the 3-D effects no matter where you are in the room.

NuReality can also be used in conjunction with other audio systems, like Dolby Surround Sound or QSound, even enhancing their effects.

It's user friendly tool On the NuReality (VIVID 3-D there are three knobs you can turn. The first knob is called the "center." It can adjust the music to bring out the vocals, sound effects, or increase the music. The second knob is for "space" so you can increase the sound stage, making things more realistic. The third one, "level," adjusts the overall volume.

NuReality is striving to develop the technology as audio enhancement for game applications, among other things.

What's really nice is that the price is going to be roughly \$69. It's release will be sometime in April.

Enough about specs, what we really care about is how it sounds. From the demo we got at their studio, all we can say is wow! There has never been any audio enhancement that even comes close to what we were able to hear with the VIVID 3-D. It is quite safe to say that this system is an improvement over stereo as stereo was over mono!

For more info or to place orders you can call: SRS Labs at 1-800-2HEAR3D. For the \$99 VIVID 3-D you can call 1-800-501-8086. We'll be back with a full update soon!

This is the chip that makes the 3-D sound possible in the NuReality system.

This NuReality system connects to any game system and adds a new dimension to audio!

The full-blown Model AK-100 Sound Retrieval System is available from SRS Labs for about \$299 and provides audio enhancement to all forms of music ranging from old mono records to laser discs!

# JURASSIC PARK by Sega

Welcome back to another month of wonderful Arcade Action—the only column which can ask the burning question, "Is that a roll of tokens in your pants or are you just glad to see me?" Nasty innuendos aside, let's get down to business.

From the you-knew-it-was-comingso-shut-yer-yap department, Sega is planning on releasing the Jurassic Park™ arcade game within the next month.

Based on last summer's blockbuster movie, this two-player shooting game looks more like an amusement park

How much is that Raptor in the window? Watch out for these, they're really fast!

ride than a video game. The game realistically responds to dinosaur attacks and course movements, giving the player a feeling of actually being in the world's most notorious theme park!

The object of the game is simple:
Use your tranquilizer guns to knock out

the dinosaurs, and then reinstall the island's security system. Along the way, you'll encounter flying lizards, Raptors, and, of course, the infamous Tyrannosaurus Rex!

Great action and impressive graphics highlight this impressive effort by Sega! This is one of those games that you don't want to miss! Grow!!!!

These enormous flying lizards will do a lot of damage if you don't shoot quickly!

Nice teeth! Get ready for the ultimate battle with the king of the lizards.

# SUZUKA 8 HOURS 2 by Namco

Use your body (literally) to throw your bike into some heavy-duty turns!

Namco has enjoyed great success in the past with its motorcycle racing game, Suzuka 8 Hours. Now Namco has once again made waves in the arcade arena with the sequel to this outstanding coin-muncher. Get ready to shift gears, and throttle-up with Suzuka 8

Hours 2.
Featuring three new racing circuits to challenge racers, Sizurka 8 Hours 2 will obviously be big on replay value. The first of the new circuits, Green Hill Circuit, is a great test of your high-speed driving. The second, The Bay Side Raceway, requires a semi-high degree of technical racing expertise. Finally, there's Devil's Carpyon which requires a high degree of the challength of the properties. Finally, there's Devil's Carpyon which requires a high degree of

technical knowledge.

Although visibility is decreased, driving at night isn't as tough as you may think.

In addition to the new racing circuits, players will also be treated to improved graphics and sounds. The motorcycle graphics have also been tweaked for increased realism. The controls remain

the same as the original: You sit on a replica racing bike and maneuver by

Konami of Japan has released a new arcade Parodius. For those of you who don't know about Parodius, (Shame on you!) here's a brief rundown of its history.

Intended as a parody of the Gradius series (Parodyl-Gradius= Parodius), Parodius first surfaced in Japan as kind of a joke. It appeared first on the old 8-Bit Famicom. Later, after picking-up popularity among shooter fans, it

migrated to the Game Boy and then to the PC Engine. Finally, a couple of years ago, Konami released it for the Super Famicom. Parodius is now

There's a lot of news from the Land of the Rising Sun, and this measly little space in the mag isn't big enough to hold it all

First off, it seems as though the Street Fighter 2 anime may be delayed in Japan. Why? I don't know, but I'll be looking out for more info.

More big news is that World Heroes 2 is on its way to the Super Famicom. Mud Man beware!

Did you hear that the Chinese Communist Party's newspaper (People's Journal) wants to condemn games as "electronic cocaine?" Sounds just like the U.S.

Also of note, Bandai has signed on with Sega of Japan and is working on a Dragon Ball Z game that combines elements of the two SFC fighting carts. See a picture of it below.

Ah well, on with the show!

Mega Drive Action April '94

Unknown Price

Looks like Sega has a hot new action hero on the way. Spark is one shocking customer who can convert electrical energy into weapons, such as a powerful Beam sword. He can also charge up and zip around as an invincible thunderbolt. (While he's doing this, Spark basically turns into a metallic pinball with no control over where he's going.) Spark also has a nifty dash move that also provides a short period of invincibility. But watch out for water, because Spark's energy level drops way down if you touch it.

The looks of this 16 Meg game is very cartoony and filled with a lot of bright, fantastic color combos. The backgrounds look particularly impressive when Spark has to tap into a computer system to physically weed out bugs.

Despite having an uncanny resemblance to Sonic the Hedgehog, Spark is completely separate from the series. With a little luck, it might reach the States. Definitely a good action game for the Mega Drive.

Run through a TV studio dodging enemies while trying to find a way out.

Streak down the city-scape in search of computer bugs to destroy.

# CAN YOU PASS THE MIZ QUIZ?

**GAME GEAR** 

Have you ever wondered why balloons came before supersonic jets? It's simple. Hot air is easier to make. When it comes to 16-bit video games, the hot air coming out of Sega's marketing department could inflate a giant Macy's Thanksgiving Day hedgehog—well, almost. Before you make a choice between 16-bit systems, you should get the cold, hard facts.

### A BLAST OF HOT AIR

This "Blast Processing" you've heard about is said to speed up Genesis games, but what is Blast Processing? When we called Sega, they said it was just a marketing buzz-word. And according to programmers we talked to who design games for the Genesis, Blast Processing doesn't exist except in the minds of Sega's marketing department. There's no Blast Processing hardware. There's no Blast Processing technology. There's no super "Blast" boost of any kind. So what about Sonic's speed? The truth is that you could put Sonic or any character on the Super NES and have it race across the screen just as fast. You could also easily scale him so large that you'd see each individual hedgehog hair (not a pretty sight) and you could rotate his background until he really turned

blue. So why don't Genesis games have special effects like that? Because they don't have the custom graphics processors that are used in the Super NES, and because Blast Processing isn't worth a hedgehog's hair when it comes to real gaming advantages.

The truth is that you could put Sonic on the Super NSS and have him race across the screen just as fast!

Comparing speed on the two systems is like comparing apples to oranges. Processing speed can be measured in several ways including CPU clock speed and memory cycle time. For instance, the Super NES has a slower clock speed but a faster memory cycle

time. Even so, according to game programmers, processing power is not just a matter of CPU speed. In fact, CPU speed is only one of many factors. The only real way to judge speed is by playing the games. It is important in games like F-Zero and Street Fighter II Turbo, because the element of speed adds to the challenge. On the highest speed settings of SF II Turbo (at ten stars), only a real master can react quickly enough to throw a winning combination. On either the Super NES or Genesis you could have characters move so fast that you literally couldn't see them, but what's the fun in that? So what is this myth about Blast Processing? That's simple. Clever ads from Sega's marketing department. If you've been taken in by this myth, don't feel bad. You're not alone.

# TRUE POWER PROCESSING

When the Super NES debuted, critics said that Nintendo had waited too to a new level with long before entering the 16-bit market. What Nintendo had been doing, and NIN Stanley Conserved the Nintendo had been doing the Nintendo had been designed for generalized computing functions, not video games. The Super NES doe been designed for generalized computing functions, not video games. But the Super NES incorporated six customized chips and a CPU with specialized, Direct Memory Access high-speed functions and two advanced PPUs or video processing units. The video processors are alonged by designed to provide graphic effects like the eight independent background mode functions including the rotation and scaling effects of Vin Section 18 and 18 an

to a new level with in-your-face perspectives like that of NCAA Basketball and MHL Stanley Cup. This is true Power Pracessing. It's wived in. And the Super NES does more than manipulate graphics—It also gives you better graphics from the start with more than 32,000 colors to choose from while Genesis has 256. The Super NES can display 256 colors at one time while the Genesis can only show 64. While 128 sprites can appear on the screen on Super NES game, only 80 appear on the Genesis. Put a Super NES game like Street Fighter II, Alien\*, The Lost Vikings, or Nigel Mansell's World Championship Racing next to its Genesis equivalent and you'll see the difference: the Genesis, presents a flat, pale reflection of the Super NES. It's like comparing fresh oranges to Tang. The Genesis just ain't got the juice.

### SUPERior NES

Unlike over here, in Japan, comic books are read by almost everybody from preschoolers, to housewives, to businessmen. Just for teenage boys alone, there are several dozen books ranging from weeklies to monthlies. Once manga magazines for girls, women, and businessmen factor in, the number of comic books swells to over a hundred. (And that doesn't even include the vast number of fanzines!)

Out of all the manga magazines published, Shueisha's Shonen Jump is by far the most popular with circulation reaching six million. Amazingly, it is published once a week, which must be murder on the artists. A typical issue of Jump is close to 400 pages printed on cheap news stock jampacked with about 20 stories. Initially DQ's sales were sluggish as RPGs were entirely new at the time. Jump turned the tide by heavily promoting the game with strategy guides and other coverage. Thanks to Jump's support, DQ went on to sell close to 1.5 million units. The entire series of games has posted sales of over 12 million

Buichi Terasawa (the former Jump manga artist best known for Cobra) has chosen 3DO as the full-motion canvas for Takeru, a manga about a futuristic thief. This point-and-click digital comic is beautifully drawn with digitized illustrations ported over from a Mac (on which Terasawa does much of his work).

There are 15 episodes so it looks like a pretty good deal. Although this isn't really a game, it certainly does suggest new possibilities for new multimedia software for the 32-Bit generation systems.

If you are a fan of Terasawa's work, this "DC" is something to consider.

Awesome! It's Shodown for the GameBoy! Takara will be bringing this Neo sword fighter out as a companion game for GB's Fatal Fury 2. Despite losing over 100-Meg, none of the characters have been sacrificed, so all you Nakoruru fans can breathe easy. All the moves of the characters have been recreated, although some fancy finger work will be required because of the shortage of buttons.

A dream come true for those of you who need your SNK fix wherever you go. It's totally hot.

ecause of the success of the first two Super Famicom titles, Ranma will be coming to the shores of Japan for its third appearance on the Super Famicom! Plenty of the best characters have been retained, with the addition of five new ones! Since we've seen the other characters from the last game (and are limited to two pages), we've detailed the newer characters as well as sneaked in many other characters for a few surprises. Several new features exist in this ver-

sion, like the choice of four different colors for your character. There is also a great new Battle Mode that lets you choose two characters and battle it out in a Tag Team arena! There are other differences, like the button config made up of

two types of punches and kicks (a button each), and also the ability to taunt-which will build your up for a super special attack!

### Tag Team Mode

Here's a nifty addition! In this Two-player Mode, call a second character in so that you can recover on the side!

### Member switching?

The way this works is if a player is damaged, he/she can switch places with the other and recover lost health!

The action takes place in an arena. Does anyone in the audience look familiar?

### THE GOOD

# NEW SOFT NEWS

There are more games to be had than ever before. Look for lots of new systems, not to mention software. Pretty soon it will be too hard to keep up with the flow.

A lot of the really cool news can be learned in the Special Feature section, where you can see games like Daze Before Christmas and Speedy Gonzales.

TecMagik, who made the terrific Sylvester & Tweety game for the Genesis is planning on releasing a special CD version, with an additional level for the fans. Sounds cool

The big news of the month is the announcement of Double Dragon V Fans of the series should be thrilled

by the new type of fighting action.
The Jaguar has been ominously quiet, but not to worry. Lots of cool games, like Doom, are scheduled to appear for it.

appear for it.
Sega seems to be riding high, with
a whole bunch of projects for the
Genesis and beyond. Makes you
wonder where the next level will take
us, doesn't it?

Here it is, the Next Wave section you all know and love. (I hope!!?!)

# Tradewest Double Dragon V

SNES. Jag. Gen.

n. Fighting

The next in the famed Double Dragon fighting series is here. Entitled The Shadow Falls, this new game features 12 fighters, including Jimmy and Billy Lee. Many of the new characters were created especially for this game, while others are based on characters from the animated series.

You will be able to select several modes of play, including the Quest, Versus, Tournament, and Battle Modes. Every player has at least three special moves, and a

"Knockout" blow to finish off a foe. Believe it or not, Double Dragon V: The Shadow Falls is not only for the Super NES and the Genesis, but also for the Atari Jaquar!

If you're a fan of the series, be sure to check this fighting cart out.

The long-awaited fifth game in the Double Dragon series is here!

In all, there are 12 fearless characters you can play as in this game. Wow!

Sekka is armed to the teeth with a series of deadly kicks and strikes.

Revolting characters like Jawbreaker are loaded with special moves.

If you liked the Super NES or Genesis versions of Cool Spot, you'll love this portable version of the same game. Save your friends and explore huge levels.

Like before, there are a lot of dangers, from pinching crabs to killer mice. What's a Spot to do?

Cool Spot is action-packed and portable.

Watch out for the crabs. They like to pinch.

### Steven Seagal: the Final Option

Super NES **Fighting** 

No it's not a movie, but it's pretty dam close to one. You play as Steven Seagal, out to take on the forces of crime as a one-man army. As you brave the many levels, you must master moves which will keep you from an early grave. And when fists aren't enough, you have your blades and your gun.

Steven himself was an active participant in this game. All the characters are digitized and rotoscoped for a new level in realism. The time has come for the Final Option.

Seagal must take on the forces trying to destroy him in Final Option.

Begin the war at the very heart of corruption itself. Take no prisoners.

Avoid the crushing beams, and pummel the criminal scum.

### Godzilla

Duo

**Fighting** 

The king of monsters is back. Godzilla is coming to the Duo, and he's got lots of fighting action in store for you.

Take on a great deal of rubber monsters from his past films, like Gigan, Mechagodzilla, Biolante, King Ghidra, and Mecha Ghidra, Being a CD game. you can bet on rockin' tunes and roars straight from the films.

No rubber monster fan should go without seeing this one. The graphics are great, complete with fiery backgrounds and charring tanks. This game allows you to play as Godzilla himself, or one of his many adversaries for one giant battle.

The Duo is making a comeback with this terrific fighting cart that brings out the beast in you.

Godzilla and the others have special attacks that you've seen in the movies.

or even as the other monsters!

### Capcom

### **Soccer Shootout**

Super NES Sports

Soccer is fast becoming the most popular sport in the world. Capcom's latest soccer title takes advantage of this trend, and makes a highly playable game as well. Choose from six modes, and play with multiple players. What's cool is that you can practice all the moves that will lead you to victory.

There's both indoor and outdoor fields, and each has its own play mechanics. The players have a lot of moves, ranging from heading the ball to bicycle kicks.

If you are a sports nut, you'll find that Soccer Shootout has everything you want from a soccer game.

Use a wide variety of techniques to get to your opponent's goal.

In the case of a tie, you can have a shootout to decide the winner.

Play indoors for a few new dimensions in game play. Rebound the ball!

Fighting

Ballz is a fighting game like no other. Your characters are made up of a number of balls of different colors. They have been arranged in various recognizable patterns to make up the fighters. Some of these range from a kangaroo to a ballerina.

The visual effects are really cool, as each character has several moves, and you can now move on a three-

dimensional plane. This adds tremendously to the amount of technique

involved.

There aren't that many 3DO fighting games out there, and Ballz really stands out. This is worth seeing because it's so different from others of its kind.

To add some interesting features. Ballz has a three-dimensional plane that you can use to plot out your battles. This adds to the game.

Using the plane gives you many strategies, from a game of keep away, to aggressive attacks from the side. Overall. it's really cool.

Super NES Adventure

Take to the seven seas with Uncharted Waters: New Horizons. Engage in trading and exploration, while defending yourself from pirates.

Closer to an RPG, this sequel is involving. It utilizes hundreds of items for trade. Anything you can think of is here. You play as the son of the hero from

the first game. Embark in the family tradition and make your fortune.
With more lands and features than

With more lands and features than the original, adventure fans should clamor for this one.

This is one of the heroes of Uncharted Waters: New Horizons.

Trading goods with other lands is how you earn your money.

Set out from the docks and prepare yourself for an epic journey.

The shops and taverns in town are great places to pick up information.

Bungee jump into the urban warzone of Los Angeles, guns blazing.

Storm the museum to get to the elusive madman Simon Phoenix.

# Virgin Demolition Man

Genesis Action

Virgin comes through again with an

awesome movie translation of Sylvester Stallone's Demolition Man. You are John Spartan, a cop who is cryogenically frozen for a bust gone bad. The insane killer you put on ice, Simon Phoenix, has escaped after years of imprisonment.

In the far future, you are awakened to catch Phoenix before he kills any more people.

With astounding graphics and nonstop action, Demolition Man should please movie buffs and hard-core gamers. This is one of the closest movie conversions around. Are you ready to take on Phoenix?

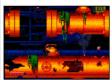

The floor drops out from beneath your feet and you must battle in the ruins.

Take a trip into the underworld, and try to protect Egar Friendly from Phoenix.

Follow Phoenix through the sewers while you blast his compatriots.

### **Battle Fantasu**

Sega CD

**Fighting** New for the Sega CD is Battle Fantasy. This fighting CD has a large number of colorful fighters who battle it out in a fantasy (of course ... duh!) setting.

Each warrior has their own moves, and you can be anvthing from a werewolf to a robotic mech man. The graphics and sounds use the Sega CD's power extensively, and the overall effect is really outstanding.

If you have to have every fighting game, this one is sure to catch your interest and find a place in your collection. There aren't many great fighting games for the Sega CD.

### ReadySoft Space Ace

Sega CD

Space Ace is on its way to the Sega CD. Based on the classic coin-op, this game is a great translation. You are Dexter, a hero who has the ability to transform

into Space Ace. It seems that the bad guy, Borf, has developed the Infanto Ray, making him a threat to the entire universe. But most importantly, he has kidnapped Kimmie, your girlfriend.

The interactive footage is great, without too much access time. If you were a fan of the arcade version. you're sure to like this one.

You have to save Kimmie from the evil Borf.

Watch out for giant-sized space creatures.

Gridders are geometric 3-D automotons. Your job is to find your way to the basement of an eerie factory to turn them on, and discover their mystical powers.

Gridders is a puzzle game of sorts, requiring you to interact with the strange polygons and use the items you find.

If you like puzzles combined with a bit of action, Gridders should prove to be most pleasing. The graphics are good, and there's lots to explore. What exactly are these things?

Watch out for the traps strewn about the many levels of the factory.

### Sega **Dark Wizard**

### Sega CD RPG/ War Sim.

An evil god has been set free from the Jewel of Darkness. The last stand for the forces of Light is the Kingdom of Quentin. You must gather your forces and take on the evil first hand.

Dark Wizard is sort of a cross between a fantasy RP, and a military simulation. Sort of like Shining Force, but with CD effects.

I highly recommend this game, if not for the fact that there are pitifully few games of this type. Dark Wizard has all that you'd expect, with great cinemas and awesome music.

Beautiful cinemas really put you into the plot of the game.

The evil forces are planning on destroving everything good.

The battle scenes are played out in a fashion similar to Fire Emblem.

This game of pool plays surprisingly well, and the balls are easy to see. Aside from the normal game, there also is a mini game of trick shots. where you must test your skill.

This is a great translation of the 16-Bit versions. The layout is the same, and even most of the graphics are recreated here.

How Data East has managed to squeeze this game onto the Game Gear is beyond me. If you want a nice relaxing game of pool on the go, Side Pocket is for you. It's a bit different from all the regular games.

Fighter's History **▼ Street Fighter II** 

The Federal District Court in the Northern District of California denied Capcom USA, Inc.'s motion for a preliminary injunction enjoining Data East's marketing and distribution of Data East's video fight game "Fighter's History" and any newer versions of that game. Capcom claimed that Fighter's History Infringed Capcom's audio visual copyright for its Street Fighter II family of video fight games. Capcom also claimed that Data East had copied the "total concept and feel" of Street Fighter II in addition to copying certain fighter characters and special moves. The court held that "Data East has not captured in Fighter's History the "total concept and feel" of Street Fighter II. Rather, the similarities that result between the two games stem from Data East's emulation of the unprotectable, commonplace features of Street Fighter II, such as its stereotypical fight characters and its reliance on unoriginal fighting techniques derived from martial arts. The court further held that "Capcom cannot now withdraw from the public domain ideas and standardized expression ... To do so would be commensurate to awarding Capcom a monopoly over a range of characters and moves that it did not create. It would also allow Capcom to lay proprietary claim to all reality based fight games featuring human characters. Copyright law affords no such protection'

# FUTURISTIC GIANT MECH BLASTING

One of the most well-known companies in this industry (ever since the Amiga was perfected) is Core Producing many classics like Chuck Rock, Son of Chuck, and other titles for Virgin games, Sony Imagesoft, Tengen, and countless others, Core will soon be re-entering the Sega CD platform with more stellar hits!

Core's first CD title ever produced for the system was the JVC cutesy cuddly Wonderdog, which contained some of the most vibrant graphics at that time. Now having dabbled further with what the system is actually capable of, the gallant design team is now producing some incredible pieces of CD software, all of which contain plenty of Mode 7 scaling (a Sega CD option that has rarely been touched). The first is an incredible mech simulation game entitled Battle Corps. In the vein of AH-3 Attack Chopper by JVC, this title puts you behind a seemingly real mecha that is loaded with all kinds of weapons. Blast other enemy combat units. while watching your back and also where you walk. The second piece is Should Star, a title that combines all of the greatest ideas of the Galaxy Force genre of games into one super soft. Finally, there is a racing title being produced. Entitled Chuck Rally, this game will provide racing fans with a new twist to what racing is all about. Being one of the leaders in software developing. Core will definitely have a happy '94 filled with nothing but outstanding titles! Keep it up, guys!

Entering a genre of game titles that is growing in vast numbers is the giant mech simulation of Battle Corps. Similar to the style of AH-3 by JVC, Core has created a firstperson viewpoint from within the cockpit of a futuristic mech. Your targeting is centered with the crosshairs that stay stationary throughout the game, and with this guide your aim will be at the most effective. The weapon selection contains several nifty items of desecration, however most have only limited rounds. You must also be careful should you be a trigger-happy little player, because the gun barrels will overheat and your vehicle will be damaged. The actual game environment is very clear and is in a 3-D environment providing the top-notch feeling of piloting a giant mecha. Even the cockpit bumps up and down with the thunderous footsteps of your mighty machine. Presently, Core only has the volcanic level complete, but there will be more on this as it comes to us!

of this great looking CD! Filled with plenty of scaling and rotating objects, the minds at Core will have a superb game ready that combines all of the major shooters of this genre. You'll have to zoom straight across actual landscapes to blast them up. Several space scenes feature dozens of ships attacking from all angles with levels that give you full 360° control of where you travel on the landscape. Within these stages, you can search and destroy specific objects and also try to locate the exit. With those options at this point in the development, this should be a treat to shooter fans everywhere!

Malibu Comics is delving into the video game market again with three new titles for various systems! This transition from comics to video games is not uncommon with Malibu. They have done some earlier titles such as The Ex-Mutants and Dinosaurs for Hire. With all of these new games coming from the Ultraverse comic series, they are sure to give superhero fanatics a taste of pure power! Take on the villains with these video game translations of three popular comics in the series!

Prime may be a genetic experiment but he's also the protector of the innocent and the exposer of the guilty, who is ready at a moment's notice to fight evil. If he's not withstanding damage from missiles, he's battling demons that take on the form of Saturday morning cartoon characters! This is one teenager that has more muscles than the whole senior class put together!

Firearm is an English private detective whose gun does more of the talking when the going gets tough. His real name is Alexander Swan, and he gets hired to crack some of the toughest cases. Most of them require the use of explosives to get him out of trouble. The Ultras are always after him. Can

you keep him alive for his next case? The Strangers are a group of people who gained super powers by a freak accident with lightning. Each one is now learning his/her capabilities and powers and what to do with them. All six of them find out that they have something in common. The morning before the accident, they had nothing in common, but

While going through the game, you will be attacked by surprise missiles. Look out!

If you want action, you've got it! Prime is on the move to the Super NES, Genesis, and Game Gear systems. As the superhero Prime, initiate your Prime Directive to all of the villains and scum of the earth that get in your way. This sidescrolling fighting game will have you combing the streets for wrongdoers and, using your super strength, taking them out by pile-driving them onto the ground, bashing heads, picking up cars, and throwing them, plus much more. Tons of enemies and explosive action await you! Your job is to protect the innocent and expose the guilty. Can you succeed? Play the game and find out.

While bashing heads and delivering super attacks to your enemies, you will find yourself getting hit by the villains of the game.

Another title in the Ultraverse Series. Firearm (for the Super NES and Genesis) lets his powerful weaponry take care of his problems and this game features a lot of it. Everything from homing shots to plastic explosives is here. You'll find yourself in an untamed mix of action and destruction as you seek out those who are bent on killing you.

Firearm takes place in a variety of locations. At the time these pictures were taken, only two levels were complete enough to be shown. The level in the sewers features enemies that smell almost as bad as the flowing, green sewage you see everywhere. The next level was a rooftops level that was very incomplete but has plenty of enemies scurrying about.

This second game in the Ultraverse lineup shows exactly what these games are all about: Reliving the comic series in a way that's both fun and offers action that rivals the comics themselves

his is a very interesting twist on normal puzzle games. There are eight different pieces to use and they throw so many at you that you are constantly getting confused. You must take these pieces and place them on the playing field (one by one) to create continuous loops-or loopz. And as if that isn't hard enough, you have a limited amount of time to use each piece. The higher your difficulty level, the less time you have to use each piece. If you don't use a piece in the given time, it blows up and you lose a life. That makes this game very tough until you become familiar with the speed and game play. The levels are neat and the little animations behind the playing area are cute. The Head-to-Head Two-player options are great for constant competitions with your friends

In this two-player game, you and your friend work together to complete each level. It makes the game extremely tough because you don't always know what the other is thinking. See how far you think you can get.

In this awesome puzzle game, there are three different bonus games. You can get to the first bonus level by clearing the entire board. The second bonus level is reached

by having 50 or more tiles on the board when you win. The third comes when you complete a box with 15 or more corners.

### **Always a Different Game!**

Each level in the game gets increasingly difficult the higher up you go. Every third level you get to a new scene. For example, the jungle is the first three levels. The water scene is levels four through six. The cheese is levels seven through nine.

This is the challenge level where you go head-to-head with your friend. Compete to get more points.

ortal Kombat CD shows what a the difference a CD game delivers over a cartridge. Since this version is directly transated from the arcade MK all the terrific sounds, voices, and music tracks missing on the cart are now present! The game sports other features such as animated backgrounds, full

motion animated character bio's, and smoother and faster game play due to the additional frames of animation added. As if this weren't enough, you get a full two minute full motion introduction and five techno audio tracks as a bonus with the CD. You just can't get any closer to the arcade on a home system than this!

eart of the Alien, the sequel to the smash hit Out of This World, will soon be making its debut on the Sega CD. This is by far one of the most awaited sequels, since the ending of the original cart left the player with many unanswered questions, such as whether or not they had truly succeeded in making it out of the desolate world they accidentally slipped into, or the whereabouts of the strange alien friend (without him, you wouldn't have lasted five minutes.) All these questions and many more will be answered in this new CD, which not only comes with Heart of the Alien, but also the original Out of This World, both on one disk, both with crystal clear CD sound effects and excellent graphics.

### THE GOOD

The first game was great, but the second is nothing short of excellent. Great tie-in with the first one!

### THE BAD

The only bad thing about this game is that it might not be out for a couple of months. I can't wait!

### THE UGLY

The big black beasts that keep knocking me down on the ground. Why can't I run faster?

In Out of This World, you are thrust into an unknown world when an electrical storm interferes with your experiment at the lab. Getting out alive will not be easy-unless you find someone to help you.

# OUT OF THIS WORLD PART 2

The introduction in the beginning reveals the whole story of you and your friend. Many things take place before the first game begins that will answer a lot of your questions. Here are just a few of the incidents that will occur.

You start your adventure in room #1. Where's the scientist? Walk to the left, into room #2. When you see the beast, run as fast as you can back into room #3, and climb the rock to safety in room #4. Run back, and leap the first chasm in room #5, and use the second hole to drop down to the lower level.

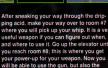

Watch out for the many enemies, pitfalls, and traps in

where you will pick up your whip. It is a very useful weapon if you can figure out when, and where to use it. Go up the elevator until you reach room #8; this is where you get your power-up for your weapon. Now you will be able to use the gun, but also the shield. Go through the door, and you'll end up in room #9, the prison area. Keep your shield up at all times when fighting the guards. At room #10, you need to be very quick in order to dodge the lasers. When you reach room #11, you need to whip the hanging fixture from the ceiling, and knock the guard into the hole. At room #12, take the elevator down but watch your step.

When you reach the area where Lester is in the air duct, it may be a lot easier to take on two guys with a little help from your friend. Use your head!

If you plan on making it through the intense levels, it's going to take a lot more brains than it is brawn. Try cooperating as much as you can with your friend.

ataank is the first first-person pointof-view pinball game ever made Using amazing hard edge 3-D graphics, speed, video, neo-techno music, and stereo sound effects. Pataank delivers the exhilaration of an amusement park ride with the challenge of an actionpacked pinball game. Up to four players can challenge each other through level after level and miles of hair-raising tunnels and chutes. Novice players can jump right in and take a wild ride as they learn the game, while advanced players will go for skill shots, earning specials, jackpots, and access to more challenging levels.

#### THE GOOD

Pataank has great graphics and sound effects, but the main attraction is definitely the game play.

#### THE BAD

Initially players may have difficulty getting accustomed to the controls, but only for a short while.

#### THE UGLY

Play the game enough and you get the uncontrollable urge to watch the Who's Tommy video over and over!

To advance to other levels or to enter bonus rooms, you may have to break through a few barriers. Knock all three barriers over to open the gate. It may be tricky to knock them over, but keep trying

Finally, after a few attempts, the passage to the bonus room is clear Enter to rack up some extra points

At the center of each level is a central core or target that you must take out. It will take several hits to destroy these targets. Since you are the pinball, it takes some skill to maneuver yourself into the proper position to hit the surfaces on the target.

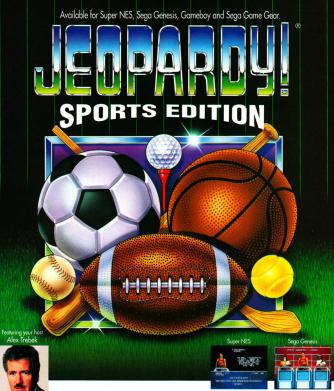

The levels are filled with bumpers, ramps, shoots, drains, dingers, drop targets, and magnetos just like a real pinball game. The walls are filled with these targets so bounce off them to earn bigger bonuses and increase your score

Guide your pataank through the tunnel to the next area after successfully completing the last level.

The first-person point-of-view is intense with fast and furious action, but it can get confusing after a while. Just shift to an overhead view and get a birdseye look at your surroundings to see where you are headed.

Listen up, sports fans! Here's your chance to prove that armchair athletes have the most fun. If you're a sports thivia bult, or you just love the challenge of a good contest, then this edition of Jeopardyle's is just for you. # OF PLAYERS

#### THE GOOD

The graphics are exceptional and the control is great. Games like this prove the NES isn't dead.

#### THE BAD

Some levels get frustrating, but once you find everything, it runs smoothly.

#### THE UGLY

Your controller turns pretty ugly when you beat the tar out of it in frustration.

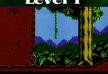

You have three different difficulty settings, a music test, and you can turn the music on or off.

### THE GOOD

The action in this game is intense Once you start playing, you won't want to stop.

#### THE BAD

This game is very hard. It takes a long time to get use to the control.

#### THE UGLY

After you hit the raccoon, just think about what it looks like.

ports Illustrated for kids is a unique game. Unique in the fashion that most sports games don't jive you a choice of sports to compete in, but this one does. The raphics are great for GameBoy and there isn't too much bluring of the screen in this game, you can choose what kind of sport you want to participate in, whether it is snowboarding, skating, or bisycling. You can even choose a triatition which allows you to compete in all three categories and all six events. Each category has two different events and all are different.

# FORME REFORM

ac-Attack is another game in the long line of Tetris-like puzzle games. It adds a semi-new twist because you use Pac-Man to eat the ghosts. Ghosts pollute your blocks and get in the way of destroying lines of bricks. You have to use Pac-Man to eat the ghosts and then complete the lines. Ghosts fall

with your blocks, making it even more difficult to complete whole lines. In the Puzzle Mode, there is a prearranged setup of ghosts and bricks. You must get rid of all the ghosts using a limited number of Pac-Men. To make it more difficult, ghosts also fall with your bricks and Pac-Men. There are 100 levels in the Puzzle Mode and they increase in difficulty each level you go up. You can also try your luck with two players in Throat-to-Throat Mode where you compete to see who can get the most lines and ghosts. This game is tough but extremely addicting.

This nifty little game keeps track of the top 10 scores throughout the game.

HORMAL MODE You have three options to choose from at this menu.

In Normal Mode you get to choose what speed you want to start out on. Try Hyper Mode!

In Normal Mode, the objective is to keep the screen as clear of ghosts and bricks as possible. Use Pac-Man to eat the ghosts and line up the bricks in horizontal lines to clear them out. Try to keep the ghosts lined up horizontally and vertically to allow Pac-Man to reach all of the ghosts. The higher the level, the faster and sometimes even slower, the pieces fall

When all the ghosts are blue, Pac-Man is on his way to gobble up the ghosts and

clean up

ghosts increase.

chance of a row

so does your

being cleared.

## Puzzie Mo

This mode gives you a limited number of Pac-Men to use. You must eat all of the ghosts on the screen before you run out of Pac-Men. Doesn't that sound easy? I don't think so. The setup of the ghosts gets trickier and trickier the higher up you go. So go ahead and give it a whirl to see what you can do with it. This mode will definitely give you a run for your money

Here is an ideal layout for the blocks since Pac-Man can eat more ahosts

This layout. however, can make gobbling ghosts really difficult at higher levels of play.

## THE GOOD

It offers a brand new twist on the Tetris-type games. The Pac-Man element is cute.

#### THE BAD

It offers a brand new twist on the Tetris-type games. It is too much like Tetris

#### THE UGLY

Knowing that Pac-Man is still popular after all this time.

The fairy pops up every so often in the Normal Mode. She can be used to give you a great advantage.

When you use her, she destroys all the ghosts within a certain area. She can help when your column is full.

This is the very first part of Level One. There are two more sections and a Boss, Level One is fairly easy and is where you are going to learn how to control your character. There are different types of magic throughout the level and all can be used to your advantage. The magics consist of the windmill-throwing star, fire dragon balls, fire wheel, vacuum wave, and invincible fire wheel. Each has advantages so you need to experiment with all of them to find your personal favorite.

### **HERE'S HOW IT WORKS:**

Call us with a list of your games in alphabetical order. We'll give you a price for each game or a package price for all. Keep in mind that you will be paid more for your games if you have the instruction book and the box for each. You'll get an authorization number over the phone which guarantees our quote for seven days. Pack up the games and send them to us right away by registered mail or U.P.S. with the authorization number on the label. We'll send you a check on the same day we receive your games. That's lit

### Super advantage.

The asciPac Devestation in the palm of your hand

That "it's not whether you win or lose, it's how you play the game" stuff is a bunch of garbage.

That's why we've got two ways ASCIIWARE to keep you winning: the

Super Advantage and asciiPad,™ both for the Super NES.® They've got the kind of enhancements you need for today's fiercest games-features like TURBO-FIRE (up to 32 shots

per second), hands-free AUTO TURBO and SLOW-MOTION CONTROL. With all these killer features and cool styling,

IT'S HOW TO WIN.
