## THE RATINGS

When a game is reviewed, we give ratings for five different criteria:

### GRAPHICS

Does the game look good? Is the scrolling smooth? Are the sprites flickery? Is the animation realistic? This mark covers all visual aspects of the game.

### SOUND

Sound and music that enhance a game are given high marks. The sound rating is low if the soundtrack or effects are inappropriate.

### VALUE

Here, we take into consideration the price of the game, the amount of entertainment it offers and the quality of the packaging. In other words - is it worth the money.

### PLAYABILITY

This tells you how addictive and enjoyable the game is - the higher the rating is, the more playable the game is.

### OVERALL

The most important rating of all. This is what we think of the game as a whole, taking into consideration all the other ratings. In short, how good the game really is.

## THE MARKS

### 85+

A C+VG HIT! An outstanding game that shouldn't be missed.

### 70-85

A very good game that missed out on a higher accolade due to minor discrepancies. Should definitely be tried, though.

### 55-69

Average to fairly good. Could still appeal to fans of the genre.

### 40-55

Below average to average. Generally a disappointment.

### 15-39

Generally a poor game that mightn't even appeal to the most ardent fans.

### 14-

Ugh! Binary sewage that's guaranteed to make your computer throw up.

# PICTURES FROM

Ever wanted to flog 32 billion dollars' worth of kit off the back of a lorry? Forget it... What you need is an interesting location, five or six exhibition halls the size of Olympia, a sales force of

piranhas, a vast video wall plus a lot of free booze. John Cook returned from the recent Chicago CES with a pictorial record (plus a stitch in his left knee)...

Nowadays, Chicago CES - as far as computer entertainment goes - means consoles. Compared to the space taken up by Nintendo, NEC and Sega, the floppy disk merchants look very small potatoes indeed. As usual, Nintendo had the biggest stand, mainly because they expect to be selling around 4 billion dollars' worth of goodies at retail this year. The bad news? They expected a drop in hardware sales in 1990 for the first time - down to only seven million Nintendo consoles. The good news was that very soon after the show, the number was revised upwards to nine million again - same as in 1989. That's a lot of consoles!

Sega were being a trifle bullish - launching the Master System in a new box (cheaper too). Don't expect it to make it to Europe in a hurry, though. The big push was on the Genesis, of which it is hoped, there will be about around one million in the hands of the US public by the end of this year. Nice video wall too.

NEC is the first to have a CD-ROM on board its console however - and doesn't it *Come From the Desert* look interesting? Expect other news on the console CD-ROM front later in the year.

# FROM AN EXHIBITION

One of the many new Nintendo games exhibited was Dr. Mario, another Tetris-style puzzle game which does have a certain addictiveness. As for Super Mario Brothers 3, guess how many of those babies they're expecting to shift. Around seven million (NB a Spectrum game is doing well to shift 50,000). Compare and contrast, as they say.

Would you pay four times the price of your original piece of hardware for an add-on to your computer? Well, Software Toolworks certainly hope you will, with the Miracle keyboard. Weighing in at \$300, it's a piano keyboard that plugs into the Nintendo, complete with teaching software. The sounds are fab, the concept is interesting. And with Dudley Moore promoting it, how can the Miracle fail? I can see the ad campaign now.... "If it makes you sound like Mozart, it's a Miracle."

There were a couple of 16 bit products that elicited a few gashes and wows, Sierra-on-Line's 256 colour, super VGA PC 3D poly-

gons game being one. Then Origin came up with a space game with on-the-wing sprite expansion and compression.

Atari didn't have a Video wall - what the hell do those guys know about marketing anyway? There was a vast range of stuff on display - PC's, tiny PC's, ST's, consoles and the Lynx. The Lynx is still acknowledged to be a fine machine - but intuition says it's playing against an atmosphere of, "if anyone can mess it up, Atari can." Prove us wrong, Mr Tramiel!

Sega software was looking good, with real 3-D running on a console for the first time in public, all the way from Realtime Games in Britain. There were also rumours of 3-D on Nintendo and Gameboy, courtesy of Argonaut, although this wasn't on public show. Just shows we Brits can still teach the world a thing or two, eh? Award for "Golly that looks just like the Amiga version" goes to Bullfrog for Populous on Genesis.

CD-TV. Sounds cute, doesn't it. That's the name of the Amiga with a CD-Rom drive, which now looks like a video recorder. Believe me, this is the start of something big.

Tetris part three was released onto a suspecting world at the CES. Called Faces, it's another arcade/puzzle from 1, he warped mind of Russian ace Pajitnov. Looks interesting.

NEC's video wall wasn't half as good as Sega's. All was not lost, though, as they had some good stuff running on the stand. The hand-held was an official display - but it's expensive... expect it to be at least 200 when it makes it over to these shores, which won't be this year in any case.

## GOOD IMPRESSIONS

Impressions have leapt on the compilation bandwagon with the release of *Power Up*, containing the rather nice *Chariots of Wrath*, *Palace's Cosmic Pirate*, and *Kenny Dalglish Soccer Manager*, all for £24.99 for the ST and Amiga.

## MISTAK

Erk! In last month's Neo Geo feature, we forgot to mention that the machine and the games were very kindly loaned to us by those lovely console people at Spectresoft, Covent Garden (call them on 071 240 1765). Thank you Spectresoft. Sorry, Spectresoft.

## SONY CD GIVES YOU THE EBJEEBIES

Forget Filofaxes and Psion Organisers - this is what the Yuppie of tomorrow will keep in his hand-tooled Moroccan leather briefcase. The new Sony EB has a flip-up high resolution dot matrix screen and a flip-up alphanumeric key-

pad, with five assignable function keys. But what makes it such an innovative and exciting gadget is the fact that it is the world's first pocket computer with a built-in CD-ROM drive! The disks which are encased in a plastic sleeve are about the size of CD single, but can store a stack of information. Sony are releasing the machine in Japan with 18 disks which range from the standard address book-type software to film review compendiums. Not only that, the machine also has the facility to double as an audio CD player so the Yuppie of tomorrow will also be able to listen to his favourite Frank Zappa singles wherever he goes. UK prices are uncertain, and a UK release date is even more uncertain, but don't be surprised if you see it in the front of Dixons' window by this time next year.

## THE OBITUARY COLUMN

This month we mourn the sad loss of two software manufacturers and one hardware manufacturer.

Geordie softco, Tynesoft, departed this life in mid June, after years of happy programming. Amongst their hits were the *Winter and Summer Olympiads*, *Superman*, *Circus Games*, *Rodeo Games* and *Beverly Hills Cop*. Their next release was to be the much publicised *Horrorsoft* title, *Elvira - Mistress of the Dark*, a game which promised to set the adventure world alight, but it's future is now uncertain.

Grandslam shuffled off this mortal coil at about the same time as Tyne-soft, after a long and, on the whole, worthwhile innings. They were the people behind such classics as the *Pa-cLand* and *PacMania* conversions, *Thunderbirds*, the original *Hunt For Red October* as well as the home micro versions of the little-known coin-op *Scramble Spirits* and the Megadrive game *Space Harrier II*.

Finally, we have (or had) Miles Gordon Technology, they who would have liked to have brought you the SAM Coupe. Unfortunately the idea of a souped-up Spectrum never really caught the imagination of a public lust-ing after Amigas, STs and consoles, and the machine was plagued with delays and problems with the ROM (which recently had to be reissued). What is particularly tragic about the SAM's demise is that software houses were just about to start producing games exclusively for it, *Enigma Variations' Defenders of the Earth* being the first.

## EEEEEEEEK!

The *Aliens*, those acid-blooded, bio-mechanical monsters and the *Predator*, the alien hunter who kills American GIs for sport, are about to collide on a computer screen near you. Activision, having previously released separate games about both movies, have agreed with Twentieth Century Fox to combine the two to produce "*Aliens vs. Predator*"! Should be one absolute hum-dinger of a battle when these creepy creatures start knocking heads!

Also, coming soon to a cinema near you are *Alien III* - *Alien World* and *Predator II* (the latter, however, not featuring Big Arnie this time, but Danny Glover of *Lethal Weapon* fame). "Will Activision be grabbing both licenses straight off?" is the question we're asking ourselves. Watch this space and be the first to know.

## CHUCK UP AGAIN

Those magnificent men (and women) at Electronic Arts have announced the arrival of Chuck Yeager's Advanced Flight Trainer for the ST and Amiga. Chuck's been around quite a while on the PC and 8-bit machines, but the new 16-bit versions feature more terrain, more aircraft (including the Space Shuttle and the F-117A Stealth Fighter - cor!), and even give you the option of formation flying with the Blue Angels or Thunderbird stunt teams! Phew! All of this should be winging (groan!) its way onto a machine near you some time very soon for just £24.99, and even comes with a training audio tape of the man himself. What more could you want?

## SOMEWHERE OVER THE RAINBOW

Rainbow Arts has been keeping busy over the last few months, and have now come out with two releases for the Amiga. Khalaan features four power-hungry caliphs in old Baghdad, and their quest to become Grand Caliph and rule over all, and Legend of Faerghail, set in an ancient land, where the elves have sold their souls to the devil, and are rampaging through the land of Faerghail, killing and maiming. Your task is to free the land from the grip of

evil, and free the elves' souls from eternal damnation. They're both out and about at this very moment priced at £24.99.

## DRIFTING ALONG

All you PC owners who want to go crazy behind the wheel of a buggy with a scouped-up lawnmower engine can at last do so, because Power Drift has finally arrived, courtesy of Activision. Screaming around at hair-raising speeds, your aim is to thrash the opposition around 25 roller-coaster courses, including jumps, mounds and blind turns? You think you're good enough? You got £29.99? Then get round to your local software emporium, and splash that cash.

## GUESS THE FREEBIE

Here we have a picture of some promotional freebies sent to us by the very lovely marketing bods at Microprose to promote their fab train game, Railroad Tycoon. The question is, what are they? Well of course we know, because we've been playing with them all month, and jolly good fun they are too, but we thought it might be an idea if we got you to guess. The first 20 people to correctly guess what the "objects" are will get one. Put your guess on a postcard along with your name and address and send it to: I KNOW WHAT THOSE LONG WOODEN THINGS ARE COMP, C+VG, PRIORITY COURT, 30-32 FARRINGDON LANE, LONDON, EC1R 3AU.

## MICROPROSE PLANE PLANS

While we wait with bated breath for Microprose's next flight sim, Knights of the Sky (fly WW1 bi-planes over the Somme) and Andy Hollis' new space blast, Lightspeed, both of which are soon to be winging their way over from the States, news reaches us of Microprose's console plans.

The US megacorp is signing deals

with Konami for Nintendo and Sega translations of Pirates (buccaneering thrills and excitement on the high seas) and Silent Service (WW2 submarine battle-sim). Also, Microprose's US programmers are currently putting together Sega Genesis/Megadrive versions of some of their recent flight-sim hits, namely F-15 Strike Eagle II and, possibly, F-19. Hopefully all titles should be out and about on this side of The Pond by this time next year. We'll keep you posted.

BY HEWSON

▲ Select the droid library and you can access information on any inferior droid to the one currently in your possession, displaying their purpose, armament, sensors, drive type and any other information. This one is you, the Influence Device...

▲ ...And this one is a 742 bipedal battle robot. His triple laser packs quite a punch. Still, if you could get control of one...

Deck: Disembarking zone

Robots on deck: 4

Raiders on deck: 0

Robots on ship: 69

Alert status: Green

▲ The computer console also provides deck plans, showing lifts, power points and computers. There are four robots to go before this deck is shut down.

▲ As well as deck plans, a schematic of the whole ship is available. The decks are coloured according to whether or not droids are still active on them.

## ▶ AMIGA

A fleet of five freighters carrying battle robots to the besieged planet of Basmyth has run into an asteroid field. The asteroids themselves posed no threat, but from the far side of the field, alien ships were bombarding the freighters with disorienting beams which drove the crew's android servants haywire, and also activated the battle robots in the hold, sending them on a destructive rampage. The human officers were eliminated almost immediately, leaving the ship open for occupation by alien forces.

To prevent this, all the robots on each ship must be destroyed before any raiders can come aboard. A cybernetic influence device (ID) under your control has been teleported aboard the first freighter. The ID has the ability to connect itself into a robot's brain unit and take control of it. The plan is to use the weapons and mobile capabilities of each robot to eliminate as many other robots as possible, moving up the ranks from slow and unarmed servant droids to heavily armoured sentinels.

▲ Activate your transfer spark and run into the nearest robot to start the transfer process. There's an option to switch the transfer game off if you want a faster, but lower-scoring, game.

▲ The transfer game. Fire your allocated charges down the wires to light more cells in the central column with your colour than your opponent, before time runs out. Auto-pulsers, splitters, joiners, terminators and colour switchers complicate the operation.

▲ The ID has taken the controls of a shuttle in the shuttle bay. Now he can fry passing robots by activating the ship's thrusters!

**AMIGA**  
**£24.99**

Andrew Braybrook never quite matched the ingenuity or playability of his original C64 *Paradroid*, released in 1985, so it was with great excitement that I booted up this revamped Amiga version. Is there any way he could have used 16 bit power to improve the gameplay? Well of course the graphics are vastly superior to the original thanks to artist Michael Field. Each robot sprite is intricately detailed and instantly recognisable, and the way their various arms, legs, heads and gun turrets move is superb. Sound has been similarly beefed up, and as well as the stereo roborumbling and weird background effects, there's a great metallic guitar track on the title screen. Apart from one or two upgrading tweaks and apparently more intelligent enemy robots the action is pretty much the same as the C64 version, and that is by no means bad. Amiga owners have been voicing their concern over the loss of multi-directional movement, but the game certainly doesn't miss that at all, and the vertical deck scrolling is fine. Overall, then, a brilliant translation, destined to be just as much a classic as the C64 version was.

## UPDATE

An ST version (compatible with STE) is to be released at the same time as the Amiga version at the start of September. The only really noticeable differences will be the lack of a title tune and colour fades which will be a little less smooth. Gameplay is exactly the same, as is the price.

## *Quest*

Take one innocent character, Flimbo, add a very broken heart, a pinch of heroism and one delicious damsel in distress.

Sprinkle a host of cameo roles featuring a derranged professors genetic mutations and you would be mixing the ideal ingredients of a cartoon style adventure game - par excellence.

# Mail Bag

Hiya, fellow YOBs! They've let me out again, just so's I can bring you another stack of letters pulled out of my mailbag this month. If you want to tell the world about your budgie's games-playing prowess, why they don't make joystick like they used to, or who the hell Robert Swan is, drop us a line at YOB'S MAILBAG, C+VG, PRIORITY COURT, 30-32 FARRINGDON LANE, LONDON, EC1R 3AU.

## MR RUDE

Yo, YOB!

How about sending some of those goodies that you're always going on about in that fab magazine of yours down here, before I get really violent, fly up there, and kick your f\*\*\*ing head off? Cheers, Michael Lattarulo, Chloorkop, South Africa  
YOB: Oh yeah? Look at me - I'm shaking.

## MIXED PIX FIX

Dear YOB,

As a Commodore 64 owner, I'm used to looking at game packaging and seeing Amiga screenshots. I expect software houses to show the best screens of their games, but feel that they should specify the format, or show screenshots from each version (which is what Krysalis did

with Manchester Utd). I was very angry with US Gold (though they are certainly not the only guilty party) after recently buying a copy of 'Italy 1990'. On the packaging, some outstanding screenshots were shown, so I took them to be Amiga specimens, but still expected to see a 3D soccer game on the C64, even if it wasn't as good. When I loaded the game, I was astonished to see an overhead view of the pitch, and no sign of a referee or crowd. It looked like a completely different game! C.J. Willsmer, Thundersley, Essex

YOB: Good point. As you say, companies are bound to put flattering pictures of their games on the packaging to try to entice you to buy them, but putting Amiga screenshots on C64 packaging is especially smelly. Come on, software

houses, let's have some kosher pics, or at least something to say which version of the game they're taken from!

By the way, I spoke to US Gold about your problem and they say that, seeing as it's you, they'll sort something out if you drop them a line. See? software people aren't all bad.

## CURIOUSER...

Dear YOB,

I've got loadsa questions for you to answer, so I'd better get on with it:

- 1) I am considering buying Shinobi and Shadow Warriors for the C64. Are they worth getting?
  - 2) Are there any American Wrestling games for the C64?
  - 3) What are the best budget and soccer games for the Commodore?
  - 4) I enjoy reading those fab fighting fantasy books written by Steve Jackson and Ian Livingstone. I know that there were a few released on computer, but have any been released on the C64 lately?
  - 5) Are there any plans to convert any horror movies (such as Nightmare on Elm Street or Return of the Living Dead), or any disgustingly gruesome and gory games to the C64?
- And finally, why have you got such a stupid name? Now send me a C+VG T-shirt, or I'll send my big brother round to breathe on

you!

Chris Griffiths, Southall, Middx

YOB: In answer to your questions:

1. Possibly.
  2. Yes. Not many good ones though. US Gold may still have some stocks of Epyx's Championship Wrestling, which was the best of the few.
  3. Emlyn Hughes or Microprose Soccer are the top 64 footy games. There are too many good budget games to list.
  4. No.
  5. No.
- And finally! Because my parents didn't want to handicap me with a name like Chris Griffiths.

## ... AND CURIOUSER

Dear YOB,

Here are some questions, and if you don't answer them,

I'll nick one of your cool T-shirts anyway!

- 1) Have you got any cheats for Operation Thunderbolt, Ninja Warriors, Shadow of the Beast or Blood Money for the Amiga?
  - 2) Why didn't you print my other brill letter?
  - 3) What would you rate Mid-winter for the Amiga?
  - 4) Will you have any free gifts in future issues?
- Scott Watkins, Napton, Nr. Rugby

**YOB: More questions! Blimey, I should be charging a consultancy fee. Hokay, here we go:**

- 1) Why ask me? Jazza is the tipster. Oh, he says you're a dopey bum-bag because cheats for all those Amiga games have been printed over the last few months.
  - 2) Because it was crap.
  - 3) Flippin' marvellous!
  - 4) Ho, yes me old beauty.
- The lads have promised something completely splendid for you punters around Christmastime.

## FESTERIN' QUESTION

Dear YOB,

There has been a question festering at the back of my mind for some time. I am considering buying either a Neo Geo or a Megadrive, but am wondering what will happen review-wise when the machines are officially released. What I mean is, you can't review all the Megadrive games, but new official Megadrive owners will want games like "Altered Beast" and "Super Thunderblade" reviewed, these being new to them, but more than a year old to us.

Finally, you say that UK Megadrive games will not work with Japanese ones, but tell me this: why do UK 8 bit games work perfectly on the Japanese Megadrive via the 8 bit converter?

Hugo Bourcier, London SW3  
**YOB: Because, Hugo, me old mate, the source of the incompatibility lies in the shape of the Megadrive's cartridge locking gate which, surprisingly enough, doesn't affect Master System cartridges**

plugged into a completely different slot. We won't be re-reviewing games, but maybe we'll do some kind of round-up for new owners when the official software finally hits the shelves.

## PSYCHO FOXED

Dear YOB!

I am the proud owner of a Sega Master System, and have recently brought Psycho Fox. Within only five days of purchase, I have completed the game. On the ending screen it shows Psycho Fox clapping his hands and stomping his feet on the ground. Then the word DO-SUCCEED comes from the top of the screen. What does it mean?

Adrian Fenwick, Marcham, Nr. Abingdon, Oxon

**YOB: It is actually the Japanese for "Blimey, you're a smartass aren't you?" Remember gang, if you've got any interesting queries which are bothering the hell out of you, just ask your old mate the YOB.**

## DESPERATE FEMALE

Dearest YOB,

I have been a fan of yours for as long as I care to remember, and have to say that I think you are the most wonderful, intelligent, good looking hunk I've ever seen.

Please, make my wisdest dreams come true and reply to me on your lovely letters page. Thanks for taking the time to read my humble little letter, my love.

Andrea Walton, Romford, Essex

**YOB: See! See! Now here's a woman with taste! And my tongue can't wait to find out what that taste is (hur hur), (merely a fanciful jest on YOB's part, of course! - ED)**

## THE LOST NINJA

Dear YOB,

You are the coolest dude ever to hit the face of the

## BOGGED DOWN

Dear YOB,

What's all this about Kilroy and Dallas simulators? If you want a real game, read on. If not, get lost! It's called "Super Advanced Bionic Nylon Skiddy Y-Fronts Simulator", and here's the design: Level 1: You play Lazy Y-Fronts, and have to get to the toilet before it happens. Enemies on this level include the Great White Man-Eating Toilet Roll, Killer Vindaloos and flying toilet seats.

Level 2: In this level, you are sat on the toilet and must fend off the Mad Air Freshener until you are finished. Level 3: Here you are sucked down the lav, and must trudge through the remains of peoples' doings, killing giant

rats as you go along. Bonus Level. Here you must shoot as many killer toilets as possible in a set time limit.

Level 5: This is the final level, where you must confront the evil Baddyloo. If you don't kill him, he blows up your toilet and you will never be able to go again.

Brill, eh? What do you mean, no? Oh, go away then. Simon "Y-fronts" Barlow, Warrington, Cheshire

**YOB: Oh God! Please! No more toilet games! Unless one of you can think of some new angle on this game design business I'm going to close this line of correspondence and get you to start writing in about the amount of fresh air you get in crisp bags, or why bar code readers never work, or the state of British Rail. Or software piracy. Ha! That's got you worried.**

earth, and the only person who can help me. I started buying C+VG nearly two years ago, and the first issue I bought only had part two of the Last Ninja II map. This meant that I had missed part one, and am stuck on level 3 so please print it.

Leslie Stevens (Worshipper of the almighty YOB), Upton  
**YOB: Well, of course you're right about the coolest dude bit, but as tips person and marvellous editor, (alright YOB, put your tongue away - ED) Julian Rignall says he has far too much new stuff in his files to be able to reprint old maps. Why don't you try to order a copy of the relevant mag from the back issues ad?**

## POWER STRUGGLE

Dear YOB,

I wanna know if the Atari Lynx can run on a slightly smaller voltage. Because of its very short battery life I thought, why not use rechargeable batteries instead, but rechargeables only have 1.2 volts instead of 1.5, so would the Lynx be able to run on 7.2V instead of 9V? If so, would it affect the game in any way (such as the screen not being so bright)?

Keaton "More for the C64" Summer, Waltham Abbey, Essex

**YOB: Keeping the pixels on the screen alight is what uses up all the power, so I would say that the Lynx, like camera flash guns, etc, wouldn't go too well on 1.2V rechargeables. You do get a mains adaptor in the package, though, so don't be too put off.**

## ST OR NOT ST

Dear YOB,

I'm considering purchasing an Atari ST. Before I do, could you tell me which is better: the STFM or the STE? This would be greatly appreciated.

Darren Circuit, Malby, S. Yorks

**YOB: Blimey, what an appropriate name you've got, Darren. Yeah, anyway, here's the spiel. The STE is the newest version of the ST which has a few minor hardware modifications, namely stereo PCM sound, a 4096 colour palette, a BLITTER chip like the Amiga's and complete incompatibility with the vast majority of games released pre-1990. Obviously most software houses are now programming with STE compatibility in mind and reprogramming their older games, but unless you re-**

## AND EVEN CURIOSER!

Dear YOB,  
I just want you to answer 3 questions:

- 1) Do Game Boy games work on the Nintendo?
  - 2) Is the Nintendo 8-bit, 16-bit or neither of these?
  - 3) What are the five best games for the Nintendo?
- Matthew Keeling, Sandbach, Cheshire

YOB: Here goes,  
1) Of course not! Have you ever seen the size of a Game Boy cartridge? How would you slot that into a Nintendo?

- 2) It's 8-bit.
- 3) My top five are Super Mario Brothers, Super Mario Brothers 3, Life Force, RC Pro Am and Cobras Triangle.

## CARTRIDGE CONFUSION

Dear YOB,  
I'm getting the official Sega Megadrive when it comes to Britain, but am a bit worried that most of the "grey-im-

## THERE'S NO-ONE MEANER THAN NINA

Dear YOB,  
Anyway, here's my game design, called "Nina Myskow Simulator":

Level 1: On a talent show you see a brilliant young aspiring superstar, and, as Nina, you must find and make up as many faults with him/her in four minutes.

Level 2: Nina must make it to her car, but is hindered by all the acts from the show throwing tomatoes at her. However, she is armed to the teeth with loads of insults.

ported" games from Japan will not be made or re-written for the official machine.

Please could you answer this for me, because I don't want to go out, buy the Megadrive, then find that all the great games like D.J. Boy and Super Shinobi won't be available.

Kev Buttivant, Cheam, Surrey

YOB: Don't you worry your head about it Kev. All the current Megadrive games will eventually be released for the official British machine. Question is, though, when will it be, Virgin?

Level 3: Now in her car, Nina must get to her hide-out, but is being chased by the police, who throw banana skins under her wheels to make her skid off the road.

Level 4: In the hide-out, Nina must get to her study where she writes for her newspaper column. While 12 hijackers attempt to hinder her she must search for the study, armed only with insults. When she reaches the study, she comes face to face with Russ Abbot. You can pick up more insults and a handkerchief for extra weapons.

Mark Leftly, Boscombe East, Bournemouth

YOB: Well, sounds like a terrific game to me. Nina Myskow - a true hero for the '90s and no mistake.

## THE ROBERT SWAN QUESTION

Dear YOB,  
Ok then, who the hell is Robert Swan?  
Tim Curious, Hemel Hempstead.

YOB: I put your question to Robert (or "Rob" as we like to call him) and he says that he is in fact C-V-G's new staff writer who comes from In. He likes listening to Iron Maiden and enjoys eating Chinese spare ribs

with barbecue sauce (number 43). His ambitions are to work with the elderly and to sail around the world in a boat he's building entirely from used matchsticks. His lucky number is 6,294,344,006 and his lucky colour is vermilion. If anyone wants to know anything else about Rob, he says he's more than happy to answer any questions as long as they're not about the four hundred gold ingots stuffed under his bed.

# PLAYMASTERS

Hiya! Here's another bulging bonanza bag of cheats and tips including a map of Super Shinobi's labyrinth level. If you've got a world-beating map, tip or POKE and want to get your name in print, and possibly win yourself a stack of software, why delay? Send it in to **PLAYMASTERS**, C+VG, 30-32 FARRINGDON LANE, LONDON, EC1R 3AU.

## AMIGA KID GLOVES

Hot off the fax machine from Paul of The Computer Shop in Leeds (what a pathetic way of publicising the store - that sort of thing doesn't work with us) comes an infinite lives cheat for Millennium magic mittens game. What you have to do is buy one lot each of flames and magic in the first shop, then leave and go to the screen with the shadows and the snakey-dragon-thing. Keep killing yourself off until the lives display reads 1, then press backspace several times. The lives display should start flicking from 1 to 9. Carry on backspacing (what a great film that was) until a static 9 shows. You will now be back at the beginning, but with infinite lives.

## MANCHESTER UTD

Here's a simple cheat from Simon Williams of Wolverhampton. If the match isn't going your way, simply press the left mouse button and the game thinks the press on the mouse button was another player wanting to join the game. The opposing team will freeze making it a piece

of cake to put the ball in the old onion bag (as they say).

## STORMLORD

A nifty cheat here from D Powell of Aberlillery. Type **DRA-GONBRIDGE** on the credit screen, then start the game and press the space bar to pause it. You can now jump straight to the next level with a single press of the L key.

## BLOOD MONEY

All the way from sunny Belgium comes David Barman's tip which provides an infinite supply of lives and cash. All you have to do is pause the game, hit the **HELP** key and then when things are getting tough, stock up on ships and money by pressing 1 and 2.

## ST MIDWINTER

If you're a bit worried about missile attacks while you're out for a quick ski, press S to switch to sniping mode and go to maximum zoom. If Richard Powell of Rotherham is right (and who are we to doubt his word) you should now be invulnerable.

## CRACK-DOWN

Load the game and start it up, then type in **SMURF**. You can now give yourself and your mate infinite lives by pressing F2 and F3. Dead easy, but it took Jaskiranjit Virdee of Southall to find it out.

## E-MOTION

I couldn't get this one to work on our reproduction copy, but you might as well give it a go. Type in **FRANK ZAPPA** on the title screen and you should find that a prod of F1 will move you up a level during the game, and pressing F2 puts you forward ten levels. For retrogressive types,

press F3 puts you back one level and F4 puts you back ten levels. Another Jaskiranjit Virdee tip there.

## DYNASTY WARS

Jaskiranjit Virdee comes to the rescue again with a level skipping cheat for this game. While the title screen is up, just type in CHEAT MODE and when the game is running you just have to hit F2 to advance a stage.

## GHOULS 'N' GHOSTS

Make Sir Arthur invincible by typing in DELBOY on the credits screen (not the high score table). The words 'CHEAT MODE ACTIVATED' should appear and you can start the game with a totally hard (day's) knight. Don't fall down any holes, though, or you'll have to reload the game. Yet another

Jaskiranjit Virdee cheat (is there no end to his talents?)

## IVANHOE

Apparently there is no end to Jaskiranjit Virdee's talents because he also sent in the cheat mode for this game. Press the pause key, then type in JC IS THE BEST and you should find that a press of the N key sends you on a level, DELETE kills all the monsters on the screen, gives you more lives and hitting the CONTROL key kills the monster in the bonus stage.

## C64 UNTOUCHABLES

Dalydd Gibby of Dyled says that if you type in the word TECHNIQUE once the game has loaded, then start the game, you can fully restore your energy by pressing F5

and restore the timer to nine minutes with a stab of F7.

## SUPER WONDERBOY IN MONSTERLAND

Go to the coastal town of Baraboro, then when you reach the spring that shoots you up onto a cloud, jump onto the houses and walk all the way along to the last house, but don't walk off the edge. Walk back left and you should fall down. Watch in awe as the words 'SOMETHING WONDERFUL HAS HAPPENED' appear in the status box. You are now invulnerable to everything except spikes. The timer still ticks down, but you now have ten energy hearts so finishing the game shouldn't be too much of a problem. Thanks to Richard Wytt and David Eagle of Pontycymer for that gem of info.

## AMSTRAD BARBARIAN

||

On the first screen of level one, go straight into the cave and instead of jumping the hole, just keep pushing right and you will get an extra life. Leave the way you came in then return and do it again for yet another life, and you can keep doing this until you've got more lives than a cow has stomachs (if not more,

even). This tip brought you to the Gareth Royal Amstrad Tips Company, Epping Green.

## BLOODWYCH

If you're having problems with monsters in this game, why not try The Marlyn and Barry Method (patent pending) from Marlyn Richardson and, presumably, his mate Barry. As the name suggests, this is strictly a tip for two players, in which one player goes around getting monsters to follow him. He then lures them into a room where the other player's party is waiting, then while the monsters are beating up one party, the other attacks from behind. When the monsters turn around, the other party takes over the attack. Simple, but effective.

## SPECTRUM COUNT DUCKULA

Here's a bizarre tip from someone who might well be called J Deakin, and who might well live in picturesque Paignton. What J says is if you press down all the keys on the keyboard while the opening screen is up the title changes to 'The Revenge of the Banana Milk'. Start the game as usual and the Count should now be a bottle of banana milk. The advantages of being a bottle of banana milk become clear when you pick

up one key, because you can now walk through all the doors in the game!

## MYTH

Is Nidhogg, the dragon on the Norse level getting you down? Gilles Durys of Belgium knows a way to beat him easily, and seeing as how he's such a nice fellow and everything, he's decided to let you lot in on the secret. As soon as you see Nidhogg, go back left and kill a few more monsters, then return. Nidhogg should now have a hole in his throat. Chuck a dagger at the hole and he's dead. Simple, no?

## NINTENDO GRADIUS

Here's Adam Bott of Solihull to show you where all the extra lives and stuff are in the

NES version of Nemesis. Take it away, Botty.

### LEVEL ONE

Before the two volcanoes, reverse into the diamond shaped rock just below the far right point for an extra life. Fly through the gap in the mountain for a 5,000 point bonus

### LEVEL TWO

After blasting your way through the solid wall, you should find a small cave. Reverse into it for the 1-UP.

### LEVEL THREE

The extra life in this level is just in front of the 37th statue's mouth. To get past the bosses at the end of this level just nip down to the bottom right of the screen and keep the joystick held down or down and right. If you prefer to go for the points, keep the ship moving in a curve, and of course, press the fire button like crazy.

D Cumberland of Ashington says that you can equip your ship with rapid fire by collecting six capsules so that the weapons display shows a 7. Keep shooting things until the fourth digit from the right on your score is a zero, then collect one more capsule and hold down button A to activate rapid fire.

## SUPER MARIO BROS

Adam Bott has sent in a tip to get you to the mysterious water level -1. Make sure you're powered up with a mushroom then get to the end of level 1-2 and stand on top of the horizontal section of exit pipe. Jump and break the second and third blocks from the right, leaving the far right alone. Stand on the very edge of the pipe and jump backwards into the single brick so that Mario's back hits the single brick. When you get it right, walk through the bricks to the warp zone and quickly go down the nearest tube to enter world -1!

## SEGA SHINOBI

Group all the rings on the bonus round then move as quickly as you can to the center of the screen and fire at the blue section as fast as you can. Keep firing until the magic type is displayed and

you should find you have double the normal magic powers. M Taylor of Washington sent that one in.

## ACTION FIGHTER

You probably know about the SPECIAL cheat in this game, but George Manetakis knows a code that goes one better. Enter your name as DOKI\_PEN and as well as all the benefits of the SPECIAL cheat (starting with a car, the letters A, B, C and D, and immunity while you're in the helicopter) you get three additional lives!

## MEGA- DRIVE TATSUJIN

This is one tough mutha of a shoot 'em up, but Neil Dennis of Knaresborough has a tip to help you make the most of your smart bombs when confronting the bosses. Whenever you use a smartie, press the START key to pause the game while the skull is on screen. Leave it for a moment before unpausing and your one bomb should have had a sustained effect, and destroyed the boss!

## FINAL BLOW

Jeff Lewis of Birmingham says he doesn't want anything for this cheat as long as

I print it. How can I refuse? Enter the music test by pressing **START** to get to the player select screen, then take the joypad out of port one and put it into port two. Now press **START** again and boomshanka! All those tunes are there for the tinkering.

## GHOULS 'N' GHOSTS

London's own Alex Bentley knows something about hidden treasure chests in this game that he thinks you should know.

### LEVEL ONE

At the start of this level walk to the far left of the screen and jump into the air to make the first hidden chest appear. The second chest appears when you get to the last ladder of the level, climb to the top and walk left.

### LEVEL THREE

As soon as you jump onto the first tongue, jump again and shoot to make the chest appear.

### LEVEL FOUR

When you get to the second ice slide, jump to the far right of the screen and lo! the chest!

## PC ENGINE WONDER-BOY IN MONSTERLAND

On screen seven of this dinky arcade conversion, go to the sixth door along and kill the monster inside. As a reward you will receive the Great Sword. But if you're not satisfied with that, kill yourself and do it again. This time when you kill the monster you should get Excalibur, the mightiest blade in the land. Thus spake Tom Liddell of Reading.

## ORDYNE

To get into the test mode, hold down the **RUN** button

and press **SELECT** five times. Then hold the joypad **UP** and **LEFT**, press buttons **1** and **2** and then press **RUN**. Reset five or six times and your changes (round select, autofire on/off, number of lives) should have registered.

Also, when the title screen appears, hold down button **1** for ten seconds and a message should appear by the Ordyne logo. Now start the game and see what's happened.

## STREET FIGHTER

Donn also says that you can get all sorts of extra features by entering the following in the high score table, waiting for the continue timer to run out, then pressing **LEFT**, **1**, **2**, and **SELECT**.

●**LK** - Push the joypad in the direction of your oppo-

nent and select to shoot a fireball. Press away from your opponent and select for a hurricane kick. Press diagonally down and left or right (depending on which side your opponent is standing) for an uppercut.

- AS** - After selecting your country you can select the start level.
- HU** - Gives you seven extra credits.
- SD** - Provides all of the above.

# BETRAYAL

*Your Father's been murdered,  
Your Peasants are in revolt  
and your wife's run off with your best  
friend - the Kings' brother.*

*Quite possibly the best news you've had  
for some time!*

*Betrayal.*

*From Rainbird.*

*A web of intricate possibilities - but fair  
play isn't one of them.*

MASTERS OF STRATEGY

Quiffy is in deep trouble - and it's going to get deeper. His underground residence has been overrun by Bulbous Headed Vongs, a race of mutants who have a pathological hatred of Quiffy's kind and like nothing better than dismembering them and turning their skins into fashion accessories. To make matters worse ("WORSE!?" - astonished reader) The Mysterious Taps of Wrath have joined up with the Vongs and are pouring gallons of water into the caves to drown Quiffy, who is now the last Blobbie of his kind.

Escape is Quiffy's plan, but before he can teleport to the next of the 42 caverns he has to trudge about, climb the walls and swim through murky pools to collect up all the bits of rubbish that are lying about. Meanwhile, the Vongs and their peons who

are making things difficult by marching about the place as conquerors do.

Luckily, the Blobbies, being the far-sighted creatures they were, stashed weapons throughout the cave system in preparation for just such a situation. Though the Vongs are tough mothers who can nuke a Blobbie at a touch, they're no match for Quiffy's hand grenades, time bombs, boomerangs, shurikens or flame thrower.

As well as weapons, there are other objects lying about for Quiffy to collect. Most of them are drinks which have varied effects on either Quiffy or the Vongs, but there are also switches which open up secret passages and rooms, balloons to carry Quiffy about and parachutes to save him from a potentially disastrous tumble.

AMIGA  
£24.99

The programmers at Bullfrog are never ones to disappoint, but this release is quite a departure from their former hits *Populous* and *Dragon's Breath*. *Flood* might be a much more straightforward game than these two, but it's no less challenging or playable. In fact I'd go as far as saying it's the most enjoyable game I've played this month! It's apparent cuteness hides a truly vicious game, with thunderous explosions going off all around, vast tongues of flame vapourising the Vongs, and even the sounds of distant laser fire in the background. The sampled sounds, like the clangs of bouncing grenades and the tick of time bombs contribute a lot to the game's appeal and its sense of humour. Just when you're getting cocky with your flame thrower, you can press the fire button only to be greeted by a clucking sound as Quiffy draws out a completely innocuous rubber chicken! There are also some spectacular traps, such as the vast number of nuclear missiles which launch from a side wall if you inadvertently collect a certain icon! This game is loaded with surprises, packed with action and lathered up with laffs. If you're not a complete bum-bag you'll go out and buy it, pronto.

▲ Beware the Psycho Teddies!

▲ At last! The teleport out of the bizarre level three.

## UPDATE

Hang out the flags you ST owners, because *Flood* is out now for your jolly machine. Single-sided drive owners miss out on the loading music and intro sequence, but that aside the game is the same as the Amiga version, and is also out at this moment.

▼ Ahh, isn't he cute?

▲ Don't get too close to exploding grenades!

If you thought messing about underwater was just for unsuccessful wind surfers, Electronic Arts new game Flood will prove to you that drowning can be fun.

To coincide with the release of this marly title, EA are going to give three C+VG readers a superbaffariffic Sony Sports Walkman WMF20 which would normally retail for about 150 English quids!

You'd think that any personal stereo at that price must be pretty special, and this one is. It's equipped with a digital tuner with 14 station presets, autoreverse tape deck, it's yellow AND in-keeping with the underwater Flood-type theme, it's completely 100% splash-proof, so you can wear it in the strongest British weather and your Big Fun tapes won't get any wetter than they are already.

For ten runners-up, EA are also supplying some stuffed-to-the-point-of-bursting goody bags, packed with posters, T-shirts, badges and other yummy stuff.

Now that we've got you all dabbling in that disgusting manner, here's how to enter. On this page you should see (unless you're very short sighted) four outrageously espy questions on the subject of water and music. All you have to do is write the four answers on the back of a postcard or sealed envelope then slap on a stamp and send it to:

WATER, WATER, EVERYWHERE BUT AT LEAST I'VE GOT A STYLISH WALKMAN TO TAKE MY MIND OFF DROWNING COMPO, C+VG, PRIORY COURT, 30-32 FARINGTON LANE, LONDON, EC4A 3AU

And get 'em in by September 1st (or else).

# WIN A WATERY WALKMAN

1. Which German classical composer wrote Handel's Water Music?
2. Which band did Scottish rocker Fish once belong to?
3. Who's the French muso behind the recently released album, Waiting For Cousteau, and who is this Cousteau fellah anyway?
4. And what's the name of the musical twosome whose recent debut album was actually entitled Flood?

**Find out its limits.  
Look in the mirror.**

**Introducing the powerful new Atari 1040 STE. With such an awesome machine, we're convinced the only limits you'll come across are your own.**

Based on the incredibly successful 1040 STFM, the 1040 STE itself goes beyond the limits of its predecessor.

The 'E', by the way, stands for 'Enhanced'. But once you've discovered its amazing array of features, you may consider 'Enhanced' to be the understatement of the decade.

Perhaps the most outstanding feature of the 1040 STE is its graphics. Its palette contains over 4000 colours (all right, 4096 to be exact).

To ensure precise and realistic images, the STE features 'hardware scrolling', enabling smooth scrolling in any direction and split-screen effects. And, with the SM124 monitor, you'll get razor sharp black-out-of-white text that's as clear as the type on this page.

To complete the picture, it is able to 'phase-lock' its video output to an external video source, permitting direct linking to a Genlocking device.

The 1040 won't just have your eyes swivelling in their sockets. Your eardrums will also take a pounding from the 8-bit PCM stereo sound.

The new PCM (Pulse Coded Modulation) sound system's two chips allow the 1040 STE to replay high-quality sampled sounds, in stereo, without burdening the CPU. Or, for even more of an earblasting, just add a couple of RCA output jacks and power the sounds through your own stereo.

Of course we mustn't forget memory. One megabyte of RAM comes as standard. If that's not enough, the 1040 STE provides four SIMM sockets. Simply plug in some SIMM (Single In-line Memory Module) boards and boost the RAM up to four megabytes.

To help you handle all this technology, we've added even more: a Blitter chip, capable of shifting data at high speeds independent of the CPU, and a new version of TOS.

The TOS 1.6 (operating system) has an enhanced file selector with drive-change buttons, improved desktop with file move, MS-DOS compatible disk formatting, and better application installation and auto-booting facilities.

As you'd expect, there's a huge range of peripherals including hard disks, floppy disks, laser printers, colour monitors and even Megafile 44, Atari's unique 44-megabyte removable hard disk.

As well as all this hardware, there are hundreds of software programmes for the 1040 STE - we're even throwing in the ST-Series Productivity and Leisure bundles free.

The Productivity bundle features a database, spreadsheet, word processor and business graphics package, and there's S.T.A.C., FirST BASIC, Hyperpaint and Prince in the Leisure bundle.

If you're itching to get your hands on the controls, there are two 15-pin analogue controller ports (which accept paddles, light-guns and light-pens) and a 9 pin mouse port and joystick port.

With adaptors, up to six people can use the 1040 at one time. Just in case it's too much for one person to handle.

At £499.99 it certainly won't be too much for one person to afford.

The ideal computer at the ideal price, you may think. We think so, too. But there remains only one potential problem: not whether you'll make impossible demands of the 1040, but whether the 1040 will make impossible demands of you.

Please send me further details of the 1040 STE and other Atari products.

# EMLYN HUGHES INTERNATIONAL SOCCER

### BY AUDIOGENIC

**E**eeh, I know it, I know it! Yes, indeed, that man Emlyn is back again (is there no escaping him?), this time with the long-awaited 16-bit versions of Emlyn Hughes International Soccer.

Your aim is to take your team to the pinnacle of football greatness by playing friendly matches, or taking part in international tournaments, cup or league matches. After choosing your team (country, kit type and colour, strengths and weaknesses), and selecting options such as length of match and skill levels, the match begins.

The matches are played in horizontally scrolling 3D, with the selected player indicated by an arrow over his head. The usual rules apply, with relevant info appearing on a screen behind the pitch. Well, what are you waiting for, lads? Get out there, and show 'em what you're made of!

### UPDATE

*Emlyn Hughes has been kicking around on 8-bits for some time now, but the C64 version is still the best game of its type on that machine.*

▼ "C'mon the oranges!" or something...

▲ "To me! To me, Harry!"

### AMIGA £24.95

*The Amiga game is virtually the same as the ST, so the same criticisms apply. However, kit design is more limited than on the ST, strangely enough! Again, Kick Off 2 is better and cheaper.*

**OVERALL 65%**

◀ The 'keeper trips over a blade of grass, but fortuitously saves a certain goal!

### ST £24.95

*The World Cup might be over, but the deluge of footy games continues. Emlyn Hughes International Soccer, unfortunately, is not so much international - more like third division quality. The misleading instructions make getting started difficult and when you overcome the hurdle of actually putting yourself in control of a side, you discover that the game itself isn't much cop. The graphics are colourful (you can design your own strip if you want to), but the poorly-animated players amble about the pitch at a snail's pace. The programmers have put inertia on the players so joystick control seems slow and unresponsive. The management section is okay, but it doesn't add a hell of a lot to what is already a fairly weak game. Manchester Utd provided the same features with much more style, but if you just want to play straight soccer Kick Off 2 is the definitive game (and it's five quid cheaper).*

# KICK

In the beginning, there was Kick Off, and it was the greatest of all foody games. From this, Kick Off Extra Time and Player Manager were spawned, but the hungry crowds, who wanted that bit more, looked toward the creator, Dino Dini, and waited in hope for Kick Off 2. And verily, did Dino say unto them, worry not, for what you wish for is on the way. And the crowds waited with baited breath.

Well, punters, you can breathe again now, for Kick Off 2 is here, with more options than you can shake your Fulchester United scarf at. Basically, it's the same as the original Kick Off, but KO2 allows up to four players at once, and has a vast range of options including choice of pitch (normal, wet, soggy, plastic), wind speed, extra time, a sudden-death penalty shoot out, aftertouch (which allows you to control the ball

▼ What! Come on ref, he slipped on the wet pitch!

for a split-second after its been kicked, allowing for some hair-raising bananas shots), is kit designer, so you can play in your fave team's colours, action replays and the ability to save your best goals onto a Golden Shots disc, so you can show off to all your friends.

There's a choice of referees, which range from very short-sighted to a complete Nazi who can reduce the match to a game of five-a-side if you're not careful.

© J. REYNOLDS

▲ "Yellow card! With respect ref, you're a right b..."

Well, what can I say, Brian? The boy Dino's gone out there with fire in his heart, and he's played an absolute blinder. After Kick Off, Extra Time and Player Manager, I didn't think the lad could pull it off, but he's knuckled down and come out with a cracker. There're just so many options that even your wildest footballing fantasies can become a reality. You can be battling up a plastic pitch in an attempt to bend a shot past Arsenal's 'keeper on a plastic pitch if you really want to. They say it's not over till it's over, but after this, I reckon the rest of the league might as well take an early bath. The competition must be feeling as sick as a parrot, Brian, but this has left me absolutely over the moon. Championship-winning material all round.

Incredible! Fantasy World Dizzy is no longer at number one! It took a strong epidemic of soccermania and US Gold's Italy 1990 to do it, though. Strange that in spite of the football mania, Code Masters Pro Boxing has come from no-

where to take the number three position. Budget software seems to be even more in evidence than usual, and even Ocean can only manage to get Chase HQ and Rainbow Islands into 19th and 20th positions.

There's no messing about for US Gold's new soccer game. The Italy 1990 package goes straight to the top of the chart. It's good to see the superb Klax conversion in the chart, but what's it doing at number 15? It should be in the top five at least!

### PG'S TIP FOR THE TOP

**KICK OFF 2:** There's no doubt about it. You could bet your life savings on the fact that this is going to be next month's number one.

As in nearly all the other charts US Gold's World Cup Soccer game rides straight to the top of the C64 top 20. Apart from that there's not much worth remarking upon in this chart.

### PG'S TIP FOR THE TOP

**INTERNATIONAL 3D TENNIS:** After the World Cup comes Wimbledon, so expect Palace's brilliant tennis game to hit the top once the football thing has died down a bit.

It must be the World Cup that's induced football fever in ST owners - there are seven soccer games in the top 20 compared with three last month. Rainbow Islands rules the roost for the third month, but where is Planet of the Robot Monsters?

## PG'S TIP FOR THE TOP

**KICK OFF 2:** Domark's Klax conversion is superb, but I'd say Anco's revamped footy classic is a more likely candidate for next month's top spot.

It's the same story here as in the C64, Amiga and All Formats charts. US Gold's World Cup 1990 has gone straight to number one, kicking even the previously unassailable Fantasy World Dizzy off his perch.

## PG'S TIP FOR THE TOP

**INTERNATIONAL 3D TENNIS:** State of the art tennis action which should hit the big time once Wimbledon replaces the World Cup.

## SUPER-TRUX ENCORE

What's big, well 'ard and weighs 30 tons? A truck. What can you do with a truck? Well, you could always hurl it around nine European cities in order to win that most coveted of awards, the Supertrux Trophy. Just think, racing around the streets of Europe, and er, well, that's just about it, really. As driving games go, this re-release is a tad behind the rest of the pack. Driving around is a bit simplistic (wot, no gear change?), and the graphics overall look a bit dull. However, if you are absolutely desperate for a racer, and you don't have the wonga for a full-price game, you could do a heck of a lot worse than take a peek at this.

This budget re-release of a crumbly Tecmo coin-op features a guy by the name of Jack, who has this thing about collecting bombs (funny fellow). Unfortunately, these particular bombs that Jack's set his heart on have been planted by a bunch of aliens who want to blow up the Earth. So, thinks Jack, I can collect some bombs and save the Earth at the same time. Brill, eh? Erm, unfortunately, no. The arcade original was no great shakes but these 16-bit conversions are absolute crud. Gameplay is just limited and repetitive (just jump about, collect bombs and avoid nasties), graphics

Question of Sport is another in Encore's long line of budget re-releases, this being a conversion of the popular TV sports quiz hosted by David "Remarkable" Coleman. Ian "Headbutt" Botham and Bill "Bill" Beaumont captain two guest teams through six rounds of quick-fire questions, with points being awarded for correct answers. Unfortunately,

this simple sport trivia game didn't exactly cause a storm when it was first released, and at budget price it still falls into the "yawn" category due to the question-answer process that remains the same all the way through. Plunder and save the day. Well, battle isn't really the right word - more like, run so far along a horizontally scrolling screen and either chop or fire at oncoming enemies. Inadequate weapons, lack of agility and merciless collision detection mean the bad guys get you first, and progress grinds to a halt. This becomes annoying in the extreme after numerous attempts, and average graphics and sound don't help to improve matters any. A re-release that's definitely showing its age.

## BLOOD MONEY PSYGNOSIS

If you thought Code Masters went overboard on their blurbs, here's what Psynosis have to say about this game. "Makes all the other games you've played seem prehistoric", it gushes. "Simply the best arcade game you've ever seen," they rave. Hmm, well, Blood Money is good, but not that good. It's a multi-weapons

shoot 'em up which casts you and a friend (in two player mode) as heroic pilots chugging through the scrolling caverns of four planets. Naturally, the place is heaving with alien life forms just queuing up to become cannon fodder, and every one blasted leaves behind coins ("Blood Money", see?) for you to snap up and spend in any weapons shops you come across. It's nicely programmed and pretty good fun, especially in the highly competitive two-player mode,

but there are better, similar games on the C64 scene, so Blood Money doesn't really live up to the promises on the packaging.

## CECCO'S COLLECTION HEWSON

The Cecco of the title is none other than programmer extraordinaire Raffaele Cecco, and this compilation comprises four of his 8 bit hits, namely Exolon, Cybernoid, Cybernoid II and Stormlord. Exolon is a walk-a-long platform blast, which is stylishly done, but is a little lacking in the action department. Cybernoid is a great megablasty shoot 'em up with loads of extra weapons to col-

## F-29 RETALIATOR OCEAN

Ocean's much-vaunted future flight simulation finally makes it to the ST - and it's worth the wait? Um, we-e-ell... Nearly. You'll be glad to hear that the 3D graphics are as spectacular as they were on the Amiga (and the introductory screens are just as rough - what an ugly pilot!), but judging by the clumsy presentation and bizarre gameplay idiosyncrasies, it seems the game was rushed through the final stages of production. By idiosyncrasies I mean enemy planes destroying you three seconds into the mission (be-

fore you've even taken off), particularly delicate landing gear and wheel brakes, and very vague collision detection (fly within 20 feet of a structure and you're dead). The manuals and presentation screens are woefully inadequate and compare badly with the likes of LHX Attack Chopper or any recent Microprose flight sims.

## KLAX DOMARK

Connecting lines of coloured tiles is the idea behind Domark's conversion of the Tengen puzzler coin-op.

*A superb conversion of the arcade puzzle game that rivals Tetris for sheer addictiveness.*

The tiles roll out of the screen at increasing speed on a conveyor belt and the idea is to catch them on a block at the end of the belt then drop them into a grid to make patterns of like-coloured blocks. The more exotic your pattern,

## TURRICAN RAINBOW ARTS

Get this. A demon with three heads is giving everybody bad dreams, so you have to get down to his place and use a vast array of laser armament to "persuade" him to take the next bus out of town. Alas, being a security conscious sort of demon he's surrounded his gaff with all sorts of monstrous guardians and spiky platforms which can do you no end of damage, even with your heavy-duty armour on.

**AMIGA**  
£24.99

*A treat of blasting mayhem from the makers of Demaris.*

**OVERALL 94%**

The massive amount of firepower at your disposal makes this a terrifically satisfying blast, and what makes it even better are the game's great graphics and music - the sample-packed title track is particularly impressive. Like I said, get this.

the more points you score, and making certain patterns on certain levels earns you bonus points or level warps. When it comes down to it, it's a pretty simple arcade game and the Amstrad version recreates the feel of the arcade

game brilliantly (the only thing missing is the arcade game's two-player mode). The display is colourful and the jingles are lively. If you thought puzzle games were dull Klax could be the one that changes your mind.

# UNREAL

Eons ago, the mighty Sleeper sent his faithful servant Fragor to bring life to a new world, the planet Unreal. Taking with him life-giving eggs, the four elements of earth, air, fire and water and two powerful guardians, Fragor travelled to the lifeless world, but upon landing, his ship was destroyed when it collided with a massive comet. The resulting explosion scattered his cargo across the face of the planet, and the guardians, without Fragor's supervision, began fighting for control. Before long, they were soon powerful enough to transform themselves into the very elements Fragor had brought with him. However, one of the eggs, having escaped the attentions of the guardians, came to rest in a peaceful valley and hatched into a copper dragon.

Years later, the dragon came across a young couple, Artaban and Isolde, who befriended him. The dragon visited them on many occasions, but one day, he failed to arrive. Isolde, in her

BY UBISOFT

anxiety, called for the dragon from the highest hill, so loud as to catch the attention of a servant of the Supreme Guardian, who captured her and took her to the Lord of Darkness. The evil one, captivated by her beauty, offered her a choice; marry him, or he would destroy the valley. Isolde agreed to the marriage, if only to save her people.

The copper dragon came to hear of this, and at once told Artaban. The dragon, feeling responsible, swore to

help defeat the dark lord, so Artaban and the dragon set out to destroy the four elements giving evil its power, and find the 'changing blade', a magical sword that recharged with crystals from the comet, and rescue Isolde from a fate worse than death.....

UPDATE

The game makes heavy use of the Amiga's specialised graphics and sound hardware so Ubisoft aren't planning to re-release versions for any other machines.

▼ While the dragon dodges dinosaurs, Artaban fends off monsters with his fiery blade.

AMIGA  
£24.99

Unreal is another of those games along the lines of Shadow of the Beast, with pretty graphics and atmospheric sound, but which is rather lacking in the gameplay department. The 'flying around on your dragon' 3D section is very impressive, and the screen update is quick, but the overall effect is spoiled by text messages, such as the inane "You hit something". The main combat sections in which you control Artaban are the real (unreal?) let-down in the game, just walking or jumping from left to right and prodding monsters with your sword gets pretty boring after a while. Being able to dip your sword in fire for a temporary fire-blade is nice, but it doesn't seem to have much effect, and the levels (dragon, Artaban, dragon etc.) become repetitious after several plays. Overall, to coin a phrase, it's good, but not that good.

# VENUS

BY GREMLIN

**C+VG  
HIT!**

▼ Hey! A secret treasure room! Get all the power-ups!

Well, mankind's really gone and screwed up this time. Through overuse of industrial pesticides and chemicals, they've only gone and killed off the Earth's entire insect population, thereby throwing the planet's ecology into complete and utter chaos.

To try to redress the balance, man tried to create his own species on insects, but

somewhere along the line, a mutant virus got into the DNA makeup, resulting not in a new breed of small, harmless bugs, but a species of rogue killers. Now, though, the bol-fins reckon they've got it right, and they've created a super-fly, codenamed Venus, which is capable of seeking out and eliminating all of the mutants.

This is where you come in, guiding Venus through ten different horizontally scrolling worlds, each consisting of five levels, and all played against the clock. Venus has a built-in energy cannon, capable of 6 types of shot, ranging from a wimpy standard pea-shooter to a juicy 4-way megablast! Thing is, you don't have it all your own way because energy is depleted by contact with an enemy in-

sect or laser bolt, and when the bar reaches zero, bang goes one of your three lives.

There are five types of icon scattered around, such as gravity reversal, which flips the fly upside down and reverses joystick controls, time loss, super jump, continuous jump, and stunt, which stops Venus jumping altogether. Larger insects drop power-ups, that, when shot, give things like extra lives, energy boosters, shields and the like. If all five levels are completed, you move onto a bonus level, giving you the chance to boost your firepower and reclaim much-needed energy.

**AMIGA**

**ST**  
**£19.99**

*Bzzzz! This game is brilliant! A game about insects doesn't sound like a whole lot of fun, and I approach with some trepidation. But I can safely say that this is one of the best 16 bit blasters going. The graphics are large, bright, colourful, well defined and fit in to the game perfectly, and the tune that plays along is one of the best I've heard on the ST, and really suits the game. Control of the fly is simple enough, but when the joystick controls get reversed, the stuff really hits the fan. The bonus level bears a remarkable resemblance to P-47, but after blasting away like nobody's business and amassing yourself a bulging armoury of weapons, you feel hard enough to take on the world, never mind the next level. The terrific visuals, the super-tough armaments and the possibility of finding hidden bonus screens at any moment will have you glued to your screen longer than that mouldy blue-bottle's been glued to the flypaper hanging in the lavvy.*

▲ Flippin' tough - and this is just a training level!

There was once a mighty warrior by the name of Hercules, who was the offspring of Zeus himself, lord of all the Greek gods. He was given twelve tasks to perform to prove his worth. Now, many years hence, his daughter Yolanda has been cursed by the death goddess Hera to be shunned by all mankind. To lift the curse she must re-enact the twelve tasks of Hercules, and that's where you come in.

Controlling Yolanda, you must jump around fifty levels of relentless action, climbing vines, jumping on platforms and avoiding demons and beasties to reach a portal at the end. Once the portal is entered, you move on to another level.

After playing this for some period of time, there's only one thing left to say - arrrrgh! This must be the most gut-wrenchingly difficult game since Steve Bak's original C64 classic, Hercules, of which it's a copy. The difficulty isn't all that's been converted across - the graphics are small, the scenery is roughly drawn and the sound is enough to make you smash your fist through the screen after two minutes. But while the game admits to being difficult, and at first play seems totally impossible, it isn't, and you gradually learn which platforms or vines are likely to burst into flame or disappear when you step on them. It drives you mad, definitely, but what makes things worse is the fact that it also keeps you coming back for more so by the end of half an hour, your loved ones will be doing up the straps on the strait jacket and hiding all the steak knives. Not for the faint-hearted, but if you want a real challenge - and I mean a REAL challenge - buy it.

The time: the future. The place: Earth, weak and unprotected. The situation: the evil King Crimson, despicable despot and one-time ruler of our world, has returned, not to spread peace and love, but to conquer, crush and generally make a nuisance of himself. He uses telepathy to hold sway over a massive bio-mechanical army, with which he has levelled most of Earth's major cities, and a few not-so-major ones just for good measure.

However, a few brave souls have stood up to the menace, forming the Midnight Resistance, but one by one they have been cut down, shot and blown away by Crim-

son's relentless forces (everybody still with me?)

Two brothers have managed to survive this onslaught, and have headed north to face and defeat the onrushing cyborg armies. What all this really means is one heck of an excuse for some serious shootin' fun, with one or two players running and leaping along nine levels of horizontal and vertical scrolling action, blasting the bad guys and collecting the keys that they drop. At the end of each level these can be traded in for more health, bigger and better weapons and more ammo, before moving on to confront the next band of death-dealing psychos, and eventually the chief scumbag, King Crimson himself.

## UPDATE

*Midnight Resistance will be blasting onto the ST at £19.99, C64, Spectrum and Amstrad at £9.99 pretty soon. Keep your eyes on the Updates section for further developments.*

## AMIGA £24.99

*I quite enjoyed the original Data East coin-op, and was quite looking forward to the conversion, but wondered how the coin-op's gun rotation control would be transferred to joystick. Unfortunately, my fears have been confirmed and the twist-stick control doesn't really work on a joystick, making control overly difficult, and so playability suffers. For example, when you want to fire up, you end up jumping into the path of an enemy bullet, and after several such "accidents", you feel like feeding the joystick to the goldfish. The graphics are good, and capture the feel of the arcade machine, and the music and sound effects are good, but the pan-pipe tune doesn't quite fit the game somehow. But in spite of its flaws, Midnight Resistance has that little bit of extra oomph to put it above many similar shoot 'em ups. Overall, a nice game that would definitely appeal to fans of the coin-op, but falls at the last hurdle due to the rather unforgiving controls.*

# SMASH

From the makers of NARC comes one of the best arcade games I've played in years. Smash TV is a simple idea based around the old Robotron 2084 theme.

One or two players take the roles of contestants in a futuristic game show, and the name of the game is survival. Two joysticks are used to control your man, one to move him, and one to fire his powerful machine gun in any direction.

Each level is set in a different TV studio. Baddies pour out of doors at the edge of in the screens and instantly attack. You've simply got to waste them all (with the help of amazingly powerful extra weapons if you can pick them up) and move onto the next screen.

At first the sheer number of baddies seems over-

whelming, with literally hundreds of baseball bat-wielding men running after you at the same time, but once you get used to the controls you find yourself running through crowds blasting all and sundry - carnage city!!!

As you progress through the game the baddies get more and more aggressive, and eventually you have to tackle waves of android buffaloes, laser spitting hoverdroids, tanks, exploding soldiers and hundreds of snakes which pour out of mouths at the top of the screen. There are also four giant Studio guardians to defeat, and they're amongst the toughest characters I've met in any video game!

Smash TV is simply brilliant. The straightforward objective coupled with ex-

cellent graphics, tough, but amazingly addictive action, and some superb touches like the game show host who pops up every few screens and says amusing comments like "I'd buy that or a dollar!" makes this one of the most potent coin-gobblers I've ever played. Grab a handful of cash and seek this one out as quickly as possible.

# RACING HERO

GRAPHICS	94%
SOUND	91%
VALUE	90%
PLAYABILITY	95%
<b>OVERALL</b>	<b>92%</b>

Sega's newest addition to their vast range of 3D coin-ops is Racing Hero, a cross between Super Hang-On and Out-run. The object is very simple - ride your powerful racing bike down a traffic-packed road and reach the next checkpoint within the allotted time limit, whereupon you can choose which track you'd like to tackle next from a choice of two.

At each checkpoint there is a similar choice of two tracks, eventually leading to four separate finish posts.

The graphics, as you'd expect from Sega, are excellent. Each track has its own international theme, with, for example, cottages, red buses and the houses of Parliament on the English track, and deserts and Pyramids in Egypt.

Being a motorbike freak, I thoroughly enjoyed playing Racing Hero. The bike is highly flickable, and racing down the twisting roads between cars and lorries is adrenaline-surging stuff. Check it out if you're a speed demon.

Life as a Thunderforce pilot is a busy one. Fresh back from your alien-destroying exploits in Thunderforce II, you're told that there's trouble at Myll, a six-planet system on the Eastern spiral arm of our galaxy - and it's your job

to sort it out. Pausing only to fit some new weapons system onto your battle-damaged Thunderforce fighter, off you go to war.

The battle is waged over six different planets, represented by six, long horizon-

tally scrolling levels. Each one is populated by a variety of loony aliens all hell bent on your destruction, and there's the usual whopper end of level baddie to blow up.

Supply craft occasionally fly by, and if destroyed, they add a useful extra weapon to your armament of forward

and rear-firing lasers, such as beam lasers, homing missiles and a pair of two drones

which spin around your ship and protect it to a certain extent.

So now you know the score - go in there an kick ass.

I'm a great fan of Thunderforce II and have been waiting for this sequel with much anticipation. Is it as good as its predecessor? You bet your boots, matey! The graphics are simply stunning, with superb parallax scrolling backdrops (the incredible flame effect on planet two has to be seen to be believed), fleets of amazing alien craft to blast and some of the best end-of-level baddies seen in ages, especially the fire breathing robo-Godzilla, which caused much eyeball-popping around the office. As well as looking great, it sounds great too, with an ear-pumping array of cracks, crunches and explosions enhancing the action perfectly. This audio/visual feast wouldn't be worth anything if the gameplay was poor, but thankfully Thunderforce III has it in abundance. Six planets might not sound much, but they're tough and completing them all takes plenty of practice. And even if you do manage to finish the game, there are three more difficulty levels to maintain the challenge. Thunderforce III is the state of the art in shoot 'em up technology and is easily one of the best console games yet seen.

# AERIAL ASSAULT

BY SEGA

Now the doo-doo's really hit the fan. A mysterious marauding military militia (phew!) has launched a devastating attack on your homeland, destroying all but

one of your nation's top hi-tech fighter aircraft. You, being the coolest pilot around (so cool that Tom Cruise looks like a wet halibut in comparison), must fly this amazing beast into the heart of the enemy's defences, and

blow the crap out of everything in sight!

Flying from left to right along horizontally scrolling landscapes, you destroy enemy aircraft and ground bunkers and knock out spinning jets, which leave behind a myriad of power-ups, including three, five and seven-way fire, bombs, shrapnel bombs, extra lives and the like.

Reach the end of the level, and a big, nasty-looking end-of-level transport will do its utmost to blow you out of the sky before you do the same to it. Destroy it, and you move on to the next level, to face even more death-dealing disasters and dish out more devastating destruction (try saying that after a few pints of Old Scrote's Best Brew).

SEGA  
£24.99

*Another horizontally scrolling shoot-em-up? Well, actually, this is no bad thing, as the Sega is surprisingly short of games of this ilk and Aerial Assault fills the gap rather well. Bearing a remarkable resemblance to P-47 in many respects (the second sunset level is a very similar, Aerial Assault looks at first to be a rather naff clone, but behind the small, peculiar-looking graphics and annoying tune lies a game of surprising addictiveness, something that few blast-em games seem to achieve. The difficulty seems to be set just right, so experienced and novice blasters alike can dive straight into the action. Thankfully, losing a life (and therefore losing all the extra weapons you've picked up) doesn't necessarily mean 'game over', as building up firepower again is not as arduous a task as with many similar games. If you liked P-47, and want an enjoyable blast on your Sega, you could do a whole lot worse than take a look at this. Recommended.*

Once again, you have been mysteriously summoned to the realm of Britannia, this time to follow the Quest for the Avatar, a search for a new vision and

If folk you come across are on a level with your beliefs, you can ask them to join your party of up to eight adventurers. These brave souls will be loyal to you as long as you keep to your beliefs, but betray them, and

these Free Companions will leave you to your fate alone. Buying and trading is possible in one of Britannia's many towns, as well as staying in inns (a lot less hazardous than sleeping under the stars, open to all sorts of attacks). You can also cast spells, if you have the right

ingredients, but these have to be mixed together first before the spell can be cast.

All of Britannia, it's inhabitants and towns are stored on a four-megabit cartridge, with battery-backed RAM so you can save your party to the cart at any time, and believe me, you'll need to.

*I was expecting Ultima IV to be somewhat of a let-down as a Sega title, but fortunately my fears have been well and truly quashed. Okay, the graphics and sound are a bit simplistic, but this doesn't detract from the strong story which grabs you by the throat and refuses to let go. The introduction is very pretty, but once the game gets underway, the screen switches to the familiar top-down view. Wandering around finding villages and towns is fun, but it drags slightly if you're stuck in a wood and can't quite find your way, and it's an all-too-familiar sight to end up back in Lord British's castle after being jumped by an attacking skeleton warrior. The battery-backed RAM is essential for saving your location every once in a while, and it means you don't have to sit in front of your Sega round the clock for about three weeks on end to complete it. Role players, check it out.*

## FORMULA 1 3D SIMULMONDO

This driving game from Italy bears more than a passing resemblance to Namco's Winning Run coin-op, don't you think? But of course that's no bad thing. It's a 3D polygon-based racer looks rather interesting, and if it turns out to play as good as it looks, Simulmondo could have a real winner on their hands. What with a five-

speed gearbox, all the Formula 1 cars and drivers reproduced in full detail and a driver's-eye perspective, Formula 1 3D could take the chequered flag. As soon as we get in the driver's seat, we'll be revving it up and taking it for a road-test.

Using his weapon (har har), he's got to burst them all, but once a big bubble is burst, it splits into two smaller ones, then four and so on. Bit like "Asteroids meets Bubble Bobble", really! Anyway, the coin-op was one big bundle of fun, and if this

## UMS II RAINBIRD

The sequel to the Universal Military Simulator is nearly here, and boy it's big. Not just "cor!" big, we're talking "blinkin' flip, how big?" here. Unlike the original, which was two adversaries on one battlefield, UMS II is set on a whole (remappable) planet, can cope with 127 players (computer or human controlled, with up to 16,000 units per side!) and can simultaneously control 525 provinces and 32,000 individual troop units in one humungous ding-dong battle for global domination. You don't just get infantry and cavalry to command, either. In this game you get land, sea and air forces, as well as orbital space weapons and ICBMs. The destructive capabilities of all of them can be set up by the player so you can simulate any conflict from the Franco-Prussian war to the battle of Hoth from The Empire Strikes back. We've already had a sneaky peek at UMS II in action, and although the 3D view has been replaced by a flat view, it's gonna be more than enough to keep strategy freaks going for eons (and that's no exaggeration).

## SPECIAL CRIMINAL INVESTIGATIONS

### OCEAN

Anyone who's been in an arcade of late will have probably clapped eyes on this, the sequel to that well-loved cops 'n' robbers racer, Chase Y. This time round, though, the guys have the ability to lean out of the car and blast the vil-

lains with all sorts of weapons (yeah, this is what we want!). Ocean have called in Turbo Out Run conversion house Probe Software to program the C64 version, and the other Out Run conversion house, ICE, to produce the other versions. What we've seen of the Amiga version

(pictured) looks pretty decent, and the graphics look true to the arcade original. But there's still a lot of work to be done, so don't hold your breath (well, you can, but you'd better have pretty big lungs). **ST AMIGA 8 BIT VERSIONS, END OF AUGUST** **AMIGA** £24.99, **ST** £19.99, **8 BITS** £9.99

Now here's a real weird 'un, and no mistake. Ocean France did the job on this almost-unknown Taito coin-op, and believe me, it may look sickeningly cute, but it's addictive as heck, and a real brain-twister to boot! Your little blob has to throw a block with a logo against a block with the same logo in order to knock down the stack of bricks on the other side of the screen. And it's all played against the clock. Confused? Good! All will be revealed (squawk!) at a later date. **RELEASE:** ST AMIGA, **SEPTEMBER** **PRICES:** TBA (PROBABLY ST £19.99, AMIGA £24.99)

# HIDEOUS MUTANT LIFE FORMS LURK AROUND EVERY CORNER

## FEDERATION QUEST 1 B.S.S. JANE SEYMOUR

A fleet of huge biological survey ships has been immersed in deadly radiation, with many alien life-forms roaming its rooms. Your mission is to penetrate the ships, locate and repair the damaged systems, capture the aliens and finally, steer the fleet back home. This mammoth strategy role playing game encompasses more than 4,000 rooms spread across 20 ships.

# POWER UP OR PULL OUT!

# MIDNIGHT RESISTANCE

**DATA EAST**

THE "POWER UP" COIN-OP HIT FROM DATA EAST BRINGS SUPER-ACTION TO YOUR MICRO SCREEN.

*"Graphics are very impressive...all sprites and backgrounds are beautifully detailed...more playable than its arcade parent. Brilliant!"*

Join the resistance fighters in their crusade against the awesome powers of KING CRIMSON - the manic scientist, and his Crimson Corps - mere earthlings transmuted into treacherous fighting machines... giant armoured tanks, lethal circular saws, airborne fighters, mechanized snakes and many more. Each level throws you into confrontation with an enemy even more terrifying than the last. If you have the skill you can locate the weapons of your predecessors' failed missions - if you have the courage you can fight to reach **YOUR ULTIMATE GOAL - THE DESTRUCTION OF KING CRIMSON HIMSELF!** SO, POWER UP AND TAKE ON THE MECHANOID WORLD OF MAYHEM AND ITS LEADER - KING CRIMSON.
