"What's this cube shaped package on my desk? Why it must be the new Gamecube. If it is I can sell it and get all the pies I want! It's... it's... some CDs!" Jonnie, a little disappointed and upset made Dave eat the CDs.

"It's been like all my birthdays coming at once with this Gamecube news. I love the Game Boy I love the N64 I just love Nintendo, but I have to wait ages before it comes out in the shops... so 2001 comes after 2000 right?"

Fave Games Character: Chop Chop Master Onion
Summer or Christmas?: Christmas

Hello Ollie. Let's see what the muppet is up to this month. Oh look, he's got a N64 cart. And he's got a Gamecube. I wonder what going to happen next.... Not in the least bit 'inspirational' and more that a little 'muppetational' we think you'll find.

RICH PELLEY
CUBED TO DEATH

Fave game this month: Resi 3
Worst game: Dave Mirra
Fave Games Character: Um Jammer Lammy
Summer or Christmas?: Summer

Rich demonstrates a myriad of uses for Ninty's 'cube. "It makes a great beard," he boasts before the lethal cocktail of PS2 T-shirt and Gamecube rendered the fool unconscious. "It's all a bit too much!" he wheezed.

"What do you want? I'm busy!... Oh, the Gamecube. That's pants. It doesn't even hold a fork handle to the game sensation that's sweeping my nation - Mike Reed's Pop Quiz!"

NICK JONES
HIP TO BE SQUARE

Fave game this month: Champ Manager

Fave Games Character: Myself in The Sims
Summer or Christmas?: Summer

What's that whistling sound? Ohmygod it's a strange alien space craft! It's circling around! It's coming straight for me! Unless I get out of the way very quickly I think it might... (thunk).

ALAN STANLEY CUBRIK

Fave game this month: Wipeout Fusion
Worst game: Heavy Metal FAKK
Fave Games Character: Jet Set Willy
Summer or Christmas?: Summer

Alan likes nothing more than to settle with his 1978 Hotspur annual. "Lord Scrotum and his pals are a real hoot!" he guffaws before being drawn away by the promise of a Gamecube. Albeit one made of cardboard.

GRAHAM DALZELL
CUBE GOODING SENIOR

Fave game this month: GT2000
Worst game: ATV Quad Bike
Fave Games Character: Nina Williams
Summer or Christmas?: Summer

What's wrong Graham? Is Ollie naked again? "No it's the Gamecube! It's trapped in the PC." Are you sure? "Yes follow me... Look!". Well done Skippy, it's just a picture. "How can it breathe?" It's just a picture... "Will turning the picture off kill it?" Oh forget it...

LEE HART
OXO CUBE

Fave game this month: F1 WGP
Worst game: Crossfire
Fave Games Character: Bounty Bob
Summer or Christmas?: Christmas

Lee Hart here. Number 1. Lee Hart all over your 'boink'. Oh yeah... check it out. Watch me solve this purple Rubik's Cube in jiffy. Hey it's actually a Gamecube... Y'see I met this bird on Monday, and by Wednesday...

JEZ BICKHAM
CUBIC HAIR

Fave game this month: Star Trek
Worst game: Monster Rancher
Fave Games Character: Link
Summer or Christmas?: Christmas

Jez is so happy about the Gamecube that his head has turned into a cube. Ladies and gentlemen - the basis of all comedy. I thank you.

KELVIN GAN

Fave game this month: Space Channel 5
Worst game: Matt Hoffman BMX
Fave Games Character: Sonic
Summer or Christmas?: Christmas

Et tu Neil "Gamecube! Game Schmube more like. You wanna get yourself one of these (rustles around among the Twix wrappers) - it's a GameTUBE!" (D'you see what we've done there?)

"Look at me! I'm eating it, and now it's coming out the other end! Heehee." No you're not you're just gonna squash it. Nob.

THE WILTON
LAMECUBE

Fave game this month: Digimon
Worst game: Moto Racer
Fave Games Character: The Rock
Summer or Christmas?: Christmas

Grandma Collins is feeling a bit dickie today. Perhaps he shouldn't root through the bins for his lunch. Oh look! A Gamecube in his shirt...

RANDY COLLINS
ICE CUBE

Fave game this month: ISS 2000
Worst game: Armored Core
Fave Games Character: Bub & Bob
Summer or Christmas?: Christmas

Welcome to Wilton country. See how he demonstrates the lightness and easily transportable nature of the 'cube - before breaking his brittle arms trying to lift the PS2.

X-BOX CREATORS BLAB!

» Microsoft spills beans!

▲ He's the man with the plan. J Allard is the bloke who's responsible for making X-box the world's number one console.

◀ Do you think this looks cool? Sorry, mate. The Minister of Fun from Microsoft - he says "no".

After a backstage meeting with Microsoft's Mr X-Box (and Minister of Fun) J Allard, GM can dish the dirt on the box they're calling 'X'.

Firstly, the box won't be X-shaped (despite the success of the huge chrome X, once again on display at the ECTS show). "It's not an 'X' box, but it's a box with an X on it" divulged a furtive J. It will however still be BIG. "There's a lot of hardware to go in there so it is a big case," J told us. And the price? "Competitively priced. We'll have to see what Sony do with PS2's broadband. If they bundle it all together that could effect our price." Sounds like it's £299+ rather than sub £200 then.

And what of connectivity and expansion? Can we expect a rival multi-media centre like PlayStation2? "No way" J said.

"What we want to tell people is that X-Box is all about games. This isn't a PC. We want console content. We're talking with major Japanese developers that are going to give us great new console games for X-Box. We won't be including USB or Firewire or any of that

stuff. Just four joypad ports and a network connection." And memory card slots? "No, we're going to build the ports into the joypads. We figure that once on-line gaming takes off someone might want to program in a headset and microphone and it makes a lot more sense for this stuff to plug into a port on the pad rather than back at the machine." Very true.

Could J tell us about the joypad? "I've seen some stuff and it's looking very cool. Very different from any of our current PC controllers." Ulp!

So the message is clear. X-Box is looking less and less like a stripped down PC and more like the most powerful games console the world has ever seen. So when will we see it? "Look at the logo. It's got 2001 on it. I made sure that was on there, so it's

safe to say that X-Box will ship in 2001."

With the first games at E3 next year? (May 2001). "No, there'll be plenty to see BEFORE then. The next stuff we show won't be demos - it'll be games. We'll probably have to reveal it at our own show." Rest assured GM will be there...

THE BIGGEST NEWS FIRST...THE BIGGEST NEWS FIRST...THE BIGGEST NEWS FIRST...THE BIGGEST NEWS FIRST...

GAMECUBE OFFICIAL!

» Nintendo unveil their 128-bit console!

Yup. By now you'll have noticed our Gamecube and Gameboy advance cover and perhaps sneaked off to page 38 for our in-depth look.

Yes, Nintendo's new PS2 and X-box beater is called Gamecube and, while it may not be as powerful as X-box, it does easily match PS2's power and has the promise of 128-bit versions of your all time favourite games too (See your top 100 on page 60 for more).

So when and how

much? Well Game Boy Advance will go on sale in Japan on 31st March 2001 for ¥9800 (about £65). It'll hit the UK and US soon after in July 2001.

Gamecube on the other hand is following on behind, reaching Japan in July 2001 at a price rumoured to be around ¥30,200 (about £200!) and the US in October 2001 – just in time for a head-on clash with X-box.

Unfortunately, no mention was made of a UK release but our money's on Christmas 2001. Watch this space for more info.

GRAB 'EM WHILE THEY'RE HOT!

» First PS2s almost sold out! Erk!

If you're reading this and you haven't ordered your PS2 for Christmas then the chances are you're too late.

As we write shops such as Dixons and Electronics Boutique are still taking orders but are already NOT promising a Christmas delivery. Our local shops both promised us a 'first come, first served' policy with the exact number they'll be getting still unknown. Sony themselves were similarly clueless with Chris Deering (see page 12) unable to come up with a definitive number of PS2s that'd be available on that looming November 24th launch date. Never mind the petrol crisis – give us our PS2s!

SCANDAL MONGER

HE AIN'T HEAVY...

By the time you read this, *Big Brother: The Game*, for PC, will have been rushed onto the shelves. Choose from the 10 contestants and get involved in a handful of mini-games, including catching cutlery and battling to keep the budget down, spread across four – yes, that's right, FOUR – levels. Suffice to say we're not exactly expecting great things. We'll let you know the full horror next issue.

MUFTY THE VAMPIRE SLAYER

That man Raziel makes a comeback early next year in *Soul Reaver 2* for PS2 and DC. Once again it uses that snazzy 'dual-plane' technology to morph seamlessly between the spectral and material realms, only this time it looks even better.

PS2 PREQUEL TO TOKYO HIGHWAY BATTLE IN DEVELOPMENT!

ECTS – EUROPE'S CRUDDY E3

» No surprises at Europe's biggest game show! Again!...

After the excitement of E3 (the unveiling of *MGS2*), the Tokyo Game Show (the unveiling of PS2), Spaceworld (the unveiling of Gamecube and Game Boy Advance) comes ECTS (the unveiling of the latest edutainment titles by Arsesoft™)...

The big players like Eidos, Activision, Infogrames and EA didn't even bother to show up leaving it to Konami to rule the roost with an extended *Metal Gear Solid 2* trailer, showing Solid Snake running and leaping from a bridge then activating

his invisible sneak suit to bungee jump onto the deck of the tanker featured in the original trailer!

Elsewhere Nintendo put up a good show with playable Game Boy Advances but Sony had a stand approximately half the size of last year's and Sega didn't show, choosing to put on their own pre-show show – see p.10.

Here's hoping the rumours of a move to Cannes in the south of France turn out to be true then at least we can get a tan. Until next year then...

CODIES PS2 FRENZY

Codemasters have confirmed their first PS2 titles will be *LMA Manager 2001* and *Music 3*, both due out at Easter. *LMA* continues to be the only football manager designed specifically for a console as opposed to PC while *Music 3* will utilise the power of PS2 to offer improved sound sampling features and great sounds.

NEW PS2 ACCESSORIES

Sony have announced a new range of digital cameras and a printer called the Popegg that are the first to connect to PS2 via the USB port. Future PS2 titles will allow you to create characters using digipics, while Popegg can produce A6 (postcard size) print-outs. The camera pictured is priced at a whopping ¥99,800 in Japan – equivalent to £650! – while the printer, out in Japan in November, will be a more reasonable ¥15,000 (£100).

▲ The Sony stand – giving Euro punters their first chance to taste the first PS2 games – was one of the few highlights of the show.

MOVIES GAMES & VIDEOS

» Sega take over the empire!

On 3rd September the Empire Leicester Square Cinema was packed to its tastefully lit ceiling by a gathered throng of games journalists and punters, all there for Sega's Dreamcast Premier.

Once we'd negotiated our way past several Ulala clones, an eight foot Sonic and assorted characters from *Ready 2 Rumble 2*, we finally grabbed a seat in the heaving auditorium, consumed the complimentary popcorn (salted!) and settled in for the main feature.

The hour long presentation certainly made up for Sega's non appearance at ECTS and – among the familiar titles on offer – there were a few fresh faces alongside some exciting new hardware.

Approximately 30(!) games – see box – were featured in the film including some excellent in-game

► *Sonic Shuffle* going the 2D/3D route taken by the lush looking *Jet Set Radio* and *Wacky Races*.

► The title will support up to four players and promises some truly bizarre mini games.

The third-person action adventure, *Gun Valkyrie* looked outstanding!

Phantasy Star Online's icon driven system broke international language boundaries!

footage from the likes of *Phantasy Star Online*, *Head Hunter*, *Outrigger*, *Black & White*, *Shenmue* and *Skies of Arcadia*. While newcomers *Agartha* and *Gun Valkyrie* (both third-person adventures) raised a few eyebrows, the big cheers of the evening were reserved for *Daytona USA* and *Sonic Adventure 2*.

After the curtains closed it was back to the press enclosure to have a gander at the new peripherals.

Here we found eight DCs slaved together with the outstanding *Quake 3* putting the new mouse through its paces, while in a corner the VMU Mic

An impressive display from a more mature DC, made slightly disappointing by an absence of up-and-running titles.

DINO CRISIS COMING TO DREAMCAST SOON! GRHAAAAWWW!

HERDY GURDY

» New PS2 RPG adventure!

It's been under wraps until now, but finally Core Design (the makers of some game called *Tomb Raider* or something) have revealed the eon-in-development *Herdy Gurdy* at last.

That completely crud name is there for a reason as you play a young villager called 'Gurdy' who must 'herd' things. Right...

What could have been a next-gen *One Man and His Dog* simulator is in fact a huge RPG with more akin to *Zelda* than Fred Dribble and his countryside chums. The demo we were shown featured young Gurdy (looking like a pre-school Tarzan) running through meadows and over hills occasionally disturbing strange wildlife – perhaps the focus of the much vaunted 'herding' to come later...

It's looking absolutely fantastic at the mo', like a Disney cartoon that you control. *Zelda* for PS2? We certainly hope so.

LARA NEXT-GEN

» She's not dead! Oooohhh!

The 'shock' news of the month had to be the fact that Lara Croft – trapped at the end of the *Last Revelation* and being mooned about in *Chronicles* (see page 30) – ISN'T ACTUALLY DEAD!

Oh yes! Surprise, surprise she'll be back in a NEW adventure on PC and PS2 and GM were treated to a minute-long video of IN-GAME *Tomb*

Raider: Next Generation footage.

In it we saw a dingy dungeon, with rain-dripped manacles swinging moodily, before Lara pelted down a nearby street pursued by some baddies. This odd combination was closely followed by yet more manacle swinging. It all looks very nice – exactly like the Lucozade ad – but as for gameplay?...

We'll have shots from the demo next month so you can judge for yourself.

THE BIGGEST NEWS FIRST!..THE BIGGEST NEWS FIRST!..THE BIGGEST NEWS FIRST!..THE

UNREAL TOURNAMENT

» This time it's on PS2. Honest!

You may remember that the last time we talked about *Unreal Tournament* we weren't that kind about it. After playing a version at this year's E3 that quite frankly shouldn't have been on show, we were worried.

Well we're pleased to report that if the five minute video of the game in action we've seen and these new GENUINE PS2 shots are to be believed, then *Unreal Tournament* is now bang on target! Phew.

It's fast, the action is frantic and it has all the violence of the PC original – including a four-player split-screen mode! Wanted to play UT but couldn't afford a £200 PC? Get in! More on this awesome looking game soon!

SILENT KILLER

>> Shadow of Memories heads to PlayStation2!

You're dead! No, not an empty threat from your mates on GM, you actually play a murder victim in this creepy third-person PS2 adventure from the blokes who last chilled your marrow with *Silent Hill*.

Formerly known as *The Day & Night of Walpurgis*, the spooky idea behind this game is to revisit the days leading up to your murder and work out what happened. Set in a beautifully realised German town, a go on the demo version suggests you'll spend a lot of time meeting characters from your former life and collecting clues to progress through the twisty turny plot.

Bizarrely, the puzzles are structured back-to-front and are solved by you going back in time to stop events from happening. So you'll start with a fire trapping you in a room and have to go back to the past to move the lamp that started it.

It's more of an RPG than a shotgun pumping survival horror game with the PS2's power most obviously used to create amazingly realistic looking facial expressions and flowing hair straight off a shampoo ad.

Due out in Japan this year and early next in the UK, this is *Silent Hill*'s even more twisted cousin. More details soon!

▼ Imagine *Silent Hill*'s intro but playable. This is going to be big.

TALKIN' ABOUT A REVOLUTION!

>> Rayman to star in PS2's first platformer!

One thing that was sorely lacking at PS2's Japanese launch was a decent 'loose yourself' title.

Imagine a new Nintendo machine being launched without a *Mario*!

Looks like that's been sorted for the UK PS2 launch though, with *Rayman Revolution* from Ubisoft –

yup, the return of everyone's favourite limbless wonder.

It's something of a visual stunner and faster than a ferret trying to escape a Yorkshireman's trousers. It started life as a port of the DC version of *Rayman 2*, which explains how Ubisoft have managed to bash it out so quickly – although there are

plenty of new elements this time round including different levels and less linear gameplay.

Previous *Raymans* were famed for being pretty difficult but *Revolution* is said to be the trickiest one yet! It's out at launch so if you fancy a bit of PS2 platformery, this is the one to watch...

▲ Just the ticket for the PS2 launch – a massive platform adventure to get stuck into!

NAMCO ANNOUNCE SMASH COURT TENNIS 3 FOR PLAYSTATION!

COME ON YOU REDS

>> Revolutionary shooter for PS2 & DC!

One of the most exciting games at ECTS was first-person shooter *Red Faction*, headed to PS2 and PC early next year. While on PC it's just another *Half-Life*-style romp, for a console title this is practically revolutionary.

There are, of course, multi-player modes, but with *Unreal Tournament* and *Quake 3* confirmed for PS2, this is really going to make its mark with the one-player game – a compelling action-adventure with a gripping storyline that includes subtleties that no other first-person console game can come close to rivalling.

A clever real-time geometry modification system means that the environment is totally destructible – so you'll be able to cause rock slides that will then alter the path of a lava flow right into a group of enemies, for example.

There's also a selection of land, sea and air vehicles scattered throughout the 20 levels, including a mini-sub, armoured car and hovering assault craft! It's out early next year and we'll bring you more just as soon as we get it!

► Fancy a huge, story-driven first-person shooter for your PS2? You got it.

He's new and improved!

Chris Deering[©] 2

Looks like it's not only PlayStation that's been getting a wash and brush up at Sony. UK Sony boss Chris Deering has undergone a makeover of PSone proportions himself!

Before – a little shiny and it looks as though his mum has dressed him. After – Whoa mamma! Look out Tom Cruise! Never mind the riots that are going to kick off when people can't get a PlayStation2 this Christmas – wait till the ladies catch site of our Chris! Mmmmm...

GO COMMANDO

>> Allied carpet bombing!

World War 2 might have been a sequel but it's inspired some mighty fine games - *Hidden & Dangerous*, *Medal of Honour* and now, the follow-up to Eidos' tommy gun-tastic, PC smash *Commandos* that's now also confirmed on PS2.

We've seen the PS2 version in action and it's looking fantastic with developers Pyro Studios using ultra crisp pre-rendered backdrops (like you get in *Resi*) and hi-res troops. It's like *C&C* in close up.

The whole pace of the game has gone up a notch with less watch-synchronising, pinpoint timing and more thinking on your feet. For the first time your crack squad of men will be able to enter

buildings where they'll be thrown into fire fights and there'll be vehicles to make Airfix fans cry including Panzer Tanks, Willy Jeeps and massive battleships.

Unlike the original, your chaps all share the same abilities to a greater or lesser extent so they can turn their hand to anything in an emergency but each one still has their own speciality. And you get a new commando dog character! Down boy!

Other than that, expect more of the brilliantly designed same. This could be the surprise PS2 title to keep you away from the crap telly over the Christmas hols.

The PS2 version looks the same as the brilliant PC incarnation.

SPYRO JUMPS PLATFORM

>> Dragon goes boxing!

Alright, so it's not Mario ditching Nintendo. Or Sonic storming out of Sega, swearing at the security guards. But the shock announcement that *Spyro the Dragon* is going multi-format for his fourth game leaves Sony without a cutesy platform star to call their own.

Although *Spyro*'s done his stuff exclusively on PlayStation up until now, with two huge selling games and the latest one (*Spyro 3: Enter the Dragon*) out before Christmas, don't make the mistake of thinking Sony owns the purply one. His real bosses, at Universal Interactive Studios, have decided instead to bring out *Spyro 4* on X-box, Game Boy Advance and PC as well, keeping the Sony *Spyro* massive happy with a PS2 version (all planned for Spring 2002).

We don't reckon we've seen the last of this kind of format hopping either. Expect to see plenty of the current crop of gaming stars go multi-format as publishers spread their bets on who'll win the next console war, or as the likes of Microsoft paying out to tempt characters exclusively onto their machine. Don't forget Universal Interactive also have a certain Crash Bandicoot on their books. *Crash 5* on X-box? *Spyro 8* on Gamecube? Anything is possible!

SCANDAL MONGER

PLAY MISTY FOR ME

Silent Hill is going to return next year and this time it's going to be on the PS2 - but the mist will remain. It was initially used to cover up a the PS limitations but became such a trademark that they're keeping it in, but this time it will disperse as characters pass through it. Also, it stars a new bloke called James Sunderland who returns to *Silent Hill* after receiving a letter from his dead wife... Nowt as queer as folk!

RESI EVIL ZILCH

Remember *Resident Evil: Zero*? It was going to be one about the events before the first *Resi* and it was going to be out on the N64. Well it isn't any more. Despite being quite a way into development Capcom are now shifting the whole thing to Ninty's new console, Gamecube. A similar move was done for *Onimusha* from the PS to the PS2.

FOUR SCOTSMAN TO PROMOTE GAME

Anco, makers of the highly regarded but not always solid *Player Manager* series, have pulled off a coup by drafting in Alex Ferguson - the most famous and successful footie manager in England - to be the face of *Player Manager 2001*. Finally the game should have the clout to do the business when it hits the shops next month.

SHENMUE DIRECTOR LEAVES - CHAPT 2 TO BE FINISHED BY TEAM!

WOT NO RING?

>> EA finally unveil WCW Backstage Assault!

WCW Backstage Assault? Isn't that sort of thing illegal in 20 US states? Still, it's the latest grappling outing from EA - and it's the first ever wrestling game to feature absolutely NO in-ring action! What the...?!

It's got seven different environments - including a boiler room, gym, garage and toilet (!) - each with two or three areas. So it sounds as if you're going to be spending as much time flapping about the place as you are actually fighting.

There are loads of interactive elements to each area, including rubber

tyres to bounce off, crates to clamber up and a massive selection of weapons to use.

While *WCW* doesn't boast the household names of the *WWF*, there are over 50 characters, including the gnarled likes of Sting, Goldberg, Vampiro and more recent additions to the wrestling roster such as Mike Awesome and Lance Storm.

Let's just hope it doesn't fall into the trap of being a poor man's beat-'em-up with wrestlers in it. It's out next month for PlayStation, with the N64 version apparently only being released in the US.

Rather than use a ring the new *WCW* has you fighting in the streets!

PRAISE BE TO POD

The DC is slowly getting it's online stuff sorted out. Following on from *Chu Chu Rocket* comes *POD 2* from Ubisoft. This is a follow-up PC title and is a futuristic racer set on the planet Damethra where the inhabitants have to hot tail it away from a mutating virus. They'll be 10 tracks, online multi-player leagues, team and pursuit events all featuring up to six online players. It'll be interesting to see how a fast-moving 3D game fairs on-line after the surprisingly chuggy *Chu Chu*...

THE BIGGEST NEWS FIRST!...THE BIGGEST NEWS FIRST!...THE BIGGEST NEWS

CRAZY OLLIE'S WRESTLING

Howdy, erm, partners (cough).

KING PIECE

GM'S WRESTLING EXPERT DISHES THE DIRT!

Good old Vince McMahon is often credited with being a 'creative genius' but the WWF hasn't half played host to some pathetic characters in its time. Read on...

Long before The Go(o)dfather was invented, Charles Wright was plying his trade as Papa Shango, a voodoo priest who once made black goo leak from the Ultimate Warrior. Shane Douglas, who had real-life aspirations to become a teacher, was packaged as Dean Douglas: a teacher. He was not a success.

Bull Buchanan's days as a member of the Truth Commission are fondly remembered by precisely no one. Still, who can forget Al Snow's stint as Leif Cassidy, part of the New Rockers with Marty Jannetty? Even that wasn't as bad as the Red Rooster character that was foisted upon poor old Terry Taylor though, who had to cluck on his way to the ring. At least he didn't go around licking people's heads, à la the Bushwhackers.

I could go on... Doink and Dink, the Gobbledygooker, Irwin R Shyster, Repo Man, Bastion Booger, High Energy, Giant Gonzales, Kim Chee, Saba Simba, Zeus, Aldo Montoya, Tugboat, Ludvig Borga, Tatanka, the Bodydonnas...

Makes you realise that the success of characters like The Rock and 'Stone Cold' Steve Austin - who started their WWF careers as dweeby do-gooder Rocky Maivia and the utterly forgettable Ringmaster (!) - has as much to do with the law of averages as anything. Throw enough gimmicks at an expectant audience and some of them are bound to stick.

▲ With a host of airborne and ground-based vehicles *Dropship* is the definitive PS2 RTS.

SONY DROP ONE

» Dropship touches down!

▼ The planets are ultra-realistically mapped.

▼ Fly in your dropship, deposit its cargo of men and equipment, then take them into battle. Awesome.

▼ It's not all flying. There's a fair portion of trundling too.

Screen fillingly huge future military hardware? Ah, you'll be needing one of those dropships to get that lot to the battlefield, mate.

Sony Europe's new action strategy game might have had difficulty, in it's slightly rough 50% completed form, attracting wandering eyes away from the likes of *GT2000* at ECTS but come Autumn next year you could be totally caught up in its world.

Think full-on future war with a mix of different game styles. One minute you're flying through the cannons in a fighter, the next transporting tanks in a massive lorry over the nicely detailed landscapes.

You've got control over a whole army with missions taking in stealth, surveillance and good old fashioned escorting. Particularly impressive was the welter of radio communication between you and your commanders. With a year's work left to do, *Dropship's* one to keep your eyes on.

NEW POKEMON CENTRE TO HIT LONDON IN AUTUMN 2001

CRIME PLAYS!

» Mafia coming to PS2!

It might not have the official horse head-severing license. But the latest PC epic from the *Hidden & Dangerous* coders Illusion

Softworks drew huge crowds at ECTS.

Best thought of as *Driver* meets *H&D* wearing concrete slippers, *Mafia: The City of Lost Heaven* makes *GTA's* crims look like shop lifters. Set in '30s America, this third-person action game has you rising from footsoldier to Godfather by undertaking mob hits, shootouts and car chases. The car bits were particularly impressive with over 60 period vehicles on offer. Due out Spring 2001, it's yet another hot PC title.

BUGGIN' OUT

» Starship troopers goes realtime!

Seen the film *Starship Troopers*? It was just two hours of tooled up futuristic soldiers

blasting an endless stream of giant insects.

Wicked! It was crying out to have a computer game made of it. Acclaim had a go, called it *Armorines* and it was complete pants. But this time Hasbro have

ditched the first-person shooter idea and made it all go realtime strategy - basically it's *Ground Control* with bugs.

You get to control a platoon of Terran soldiers on the Arachnid planet of Klendathu and have to point and click your way to victory. There's 15 different alien creepy

crawlies that attack from the ground and the sky... and then try and rip you to pieces.

Or you can have a go at commanding the Arachnids themselves! Definitely one to watch out for.

Imagine the world of *Starship Troopers* combined with the RTS action of *Ground Control*. This will rule bigstyle.

TOC IT TO 'EM!

Such is the appetite for fresh driving thrills, the latest TOCA has hit the ground running and slipped into pole position. Before this entry - as Coldplay would say - it was all Pokémon Yellow.

G'DAY SPORT!

The Olympics are nearly over. So do you fancy replaying the whole thing via Eidos' game? Seems that many of you do. Either way the game's done quite well picking up a bronze for third place.

GRRREAT!

It's just so life affirming how a Platinum release breaths new life into an old classic. Tony for £20 sends him hurtling back into the top 10 and number 2 is just around the corner.

MASTER BLASTER

We gave you a first look at this action stacked first-person shooter last issue and extensive play of a nearly complete version confirms what an absolute blast it is, particularly when it comes to super smooth four-player deathmatches.

The graphics flinging prowess of PS2 means, for the first time on a console, you can have crowds of polygon based enemies legging it towards you, gun muzzles flashing.

Despite being developed by an elite breakaway group from Rare's *Goldeneye* team, mission objectives don't even attempt to match Bond for sophistication. Instead, get ready for pure arcade action and kills on a scale not seen since the likes of *Doom*. There's not much in the way

...play of a nearly complete version confirms what an absolute blast it is...

of storyline, just a time travelling plot that's pretty much an excuse to shoot as many enemies as possible over nine episodes that span 100 years. Playing in different time zones also makes for a varied line up of over 30 period weapons, ranging from ratatatating Tommy Guns to plasma spitting Ray Carbines.

TimeSplitters really comes into its own in multi-player though. Hugely detailed levels get flung around on each player's corner of the TV without any slowdown to speak of, suggesting that this is one of the finest console deathmatches. Review next issue!

wearers leaping out of darkened tombs. 02 This be the houses. Most disturbing. 03 The 1970s China level is like to 2030 and it's all cyborgs, robots, aliens and ray guns.

IF I COULD TURN BACK TIME!

Probably the single most impressive thing about *TimeSplitters* is how, with a minimum of fuss, it manages to move highly detailed levels around so quickly.

49 - 252

▶ Detailed enemies move like three-year-olds on Sunny D!

▼ The sort of lighting effects you expect from Bond's backroom boys.

▶ Look around at the speed of a frozen chicken fired from a cannon.

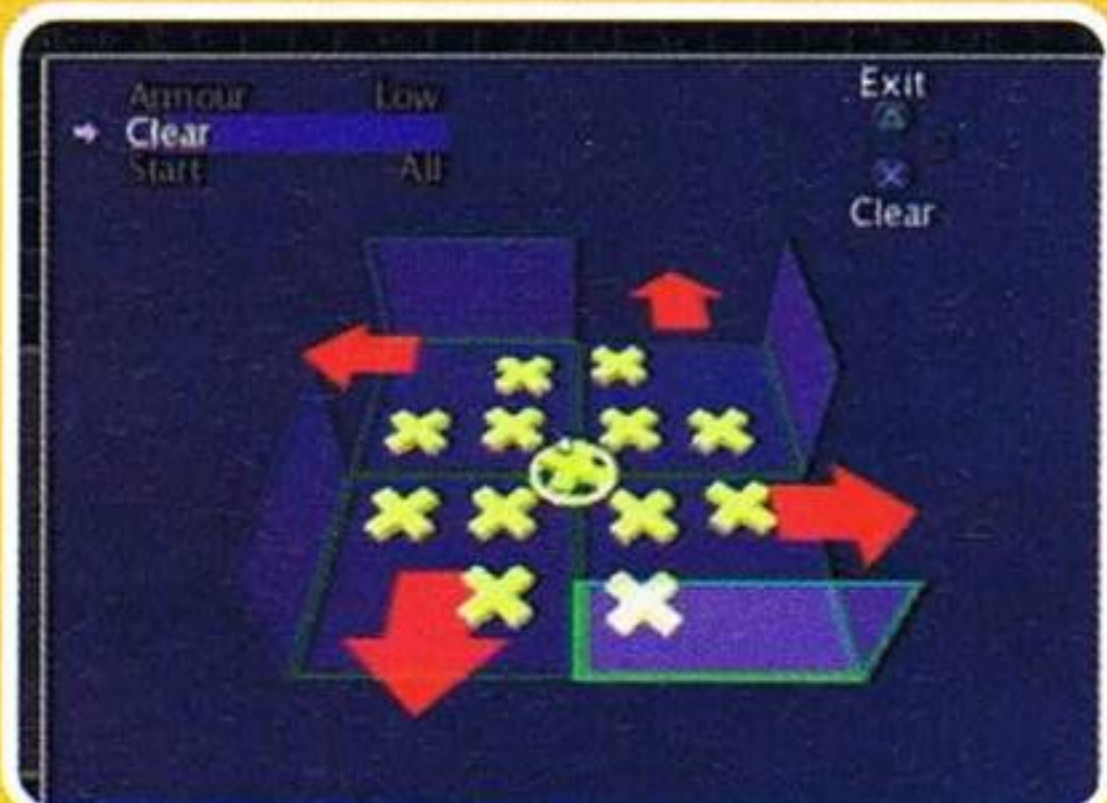

Ha ha ha, hee, hee, hee I'm the laughing copper, can't catch me!

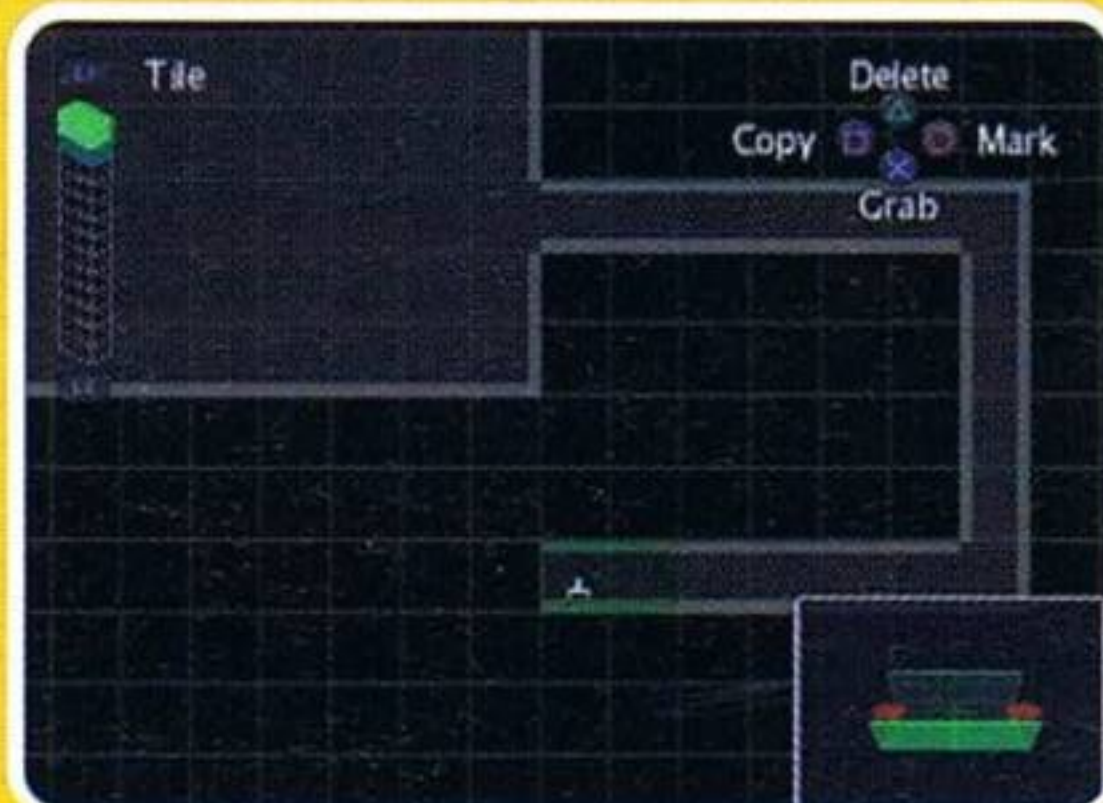

14 - 96

DEATHMATCH CONSTRUCTION KIT!

You'd expect ex-*Goldeneye* folk to give good deathmatch options but this takes the bourbon. The Level Editor's like *Doom* meets Lego. You can build an original arena from scratch using preset building blocks, chuck in weapons and bots, then (clears throat) LET THE MAYHEM COMMENCE!

▲ Choose your building blocks from a preset selection of rooms, corridors and multi-levelled arenas.

▲ Link your level together by laying it out on the main editor screen. You can have 12 floors of action!

▲ Then it's time to put in your items; armour, guns, restart points. You can even set the lighting!

▲ Now for a test run. If you don't fancy a space setting, simply change the tiles to gothic or '70s!

GUT REACTION!

There's a strange lack of gore in *Splitters*. Enemies disappear when shot and there's not a drop of blood to be seen. No blown off arms fly around the room. Weird given the huge numbers of fantasy baddies.

Eye snogging weapon effects they might be, but the decision to go gore-free is a brow furrowing one.

THEY'VE PASSED THEIR EVIL DEGREE!

There might be lots of them coming at you at once but the enemies you'll find here are far from *Doom's* thick cannon fodder. They'll roll out of your sights, hide between objects - popping up to take pot shots and crouch down to avoid a hail of lead.

OUT OF SIGHT!

Leave your silent scope at home but you will need to target your weapons to pick off high up and far away enemies.

As well as up close enemies, you'll need to pick off baddies in the distance by targeting.

SALE NOW ON AT WEAPONS WAREHOUSE!

TimeSplitters has got an arsenal to die for. Or at least be killed by. The whole time travelling theme might have been done before but there's no denying that it makes for a beautifully varied line up of period guns from 1930s blunderbusses to hi-tech alien rocket launchers.

The hi-tech rocket launcher is awesome and comes complete with a three way secondary fire missile.

▲ Primary fire on the rocket launcher means the sort of explosion that'll give you a TV tan.

▲ These antique duelling pistols from the '30s Egypt levels need all the doubling up help they can get. Check out the blunderbuss below!

▶ The superfly '70s level features the most familiar weapons.

◀ The shotgun turns up in the '70s set level. Shoot the gong to make a crash.

In case of loss of cabin pressure, please cease fire!

THRONG, TH-THRONG, THRONG, THRONG!

We can't remember seeing as many enemies to kill on the one screen since *Doom*. They attack in great big packs with no sign of slowdown even when there's 15 of them pressing their noses against the inside of your TV.

▲ Oil up your strafing fingers to take out the future hordes!

◀ Female cyborgs, cybernetic waiters and lots and lots of robots populate the 2030 levels. Let the plasma fly!

◀ Cartoon zombie police! A few blasts from your shotgun should leave them reeling.

▶ You'll need to dust off your old *Doom* multiple enemy blasting strategies.

First Impressions

Well I'll be a son of a gun!

TimeSplitters is an odd one, alright. Developed by some of the people behind *Goldeneye*, yet it's got the sort of plot you could scribble on the back of an envelope. Then there's the big emphasis on arcade action with screens jammed with enemies but... not a single drop of spilt blood.

The answer, really, is just to play it. Then you discover the bottom line is that it's good, old fashioned FUN. You get tightly designed levels crawling with hundreds of enemies and a great range of period weapons to kill 'em with. Forget *Half-Life*'s involving plot or *Goldeneye*'s clever bits, this is a real back to basics frag-fest.

Technically, it's one of the few launch games that shows what PS2's capable of. We can't imagine any current console or, for that matter many PCs, being able to handle such pin-sharp, highly detailed environments while shunting hordes of enemies around so effortlessly.

Multi-player is where it'll win through come November 26th, though. There's never been a four-player shooter that moves as fast and the Level Editor could make the time you spent playing *Goldeneye* deathmatches pale into insignificance.

SIMPLICITY ULTRA!

Forget doing anything remotely complicated, the *Splitter's* one-player Story mode involves getting an object and taking it back to where you started. And that's it!

▼ Off these vicious kung fu chefs, get your object and peg it back to the start. No story to worry you.

▲ Expect former *Goldeneye* code troops to produce some super tight levels.

CO-OP DON'T STOP!

Perfect Dark proved that teaming up with a pal can almost be as much fun as shooting them - hence the *'Splitter's* top co-op mode!

▲ There are no multiple objectives, just two people on one TV blazing away at double the enemies.

▲ Cover me! You can turn friendly fire on for bullet in the back action!

PRE-ORDER YOUR PS2 MULTITAP TODAY!

It's probably more down to technical polygon shifting prowess than anything else, but *TimeSplitters* offers damn fine four-player deathmatch play. There are stacks of ways to play including Team Game, Last Man Standing and Escort the Assassin and you can have up to 10 bots running around with you!

▲ Mix and match your weapons, characters and stages from any time period and alter every imaginable option.

▲ In classic *Goldeneye* fashion, you can play as just about any character in the game. Unlock them in one-player.

▲ Even with four players, 10 bots controlled by the PS2 and these kind of weapon effects, it's still very playable.

GOOD COP BAD COP

Couldn't run on any other console, this is an ultra-slick, heavy shooter with an ace multi-player.

No story to get involved with. Just as worrying, no blood and gore which is odd given the action on offer.

UPDATE!...LATEST SHOTS!...UPDATE!...LATEST SHOTS!...UPDATE!...LATEST SHOTS!...UPDATE!...LA

Twenty million polygons a second flying out of your TV! The greatest driving game ever screams towards PS2.

Christ in a Toyota Supra GT! Passing out travel sweets and cranking the stereo up on a one way trip to driving heaven!

An hour in a darkened backstage room with a 75% complete *GT2000* and lead producer Kazunori Yamauchi

at last month's ECTS show left GM reeling. Not only was it looking better than ever before with lush new effects but Sony used the event to pull the cloth off a new force feedback steering wheel. Kazunori reckons it's the biggest single improvement in his quest to create the ultimate racer.

way this build of *GT2000* looked, though. Some stunning new effects like a heat haze on the replay, billowing dust and cars made out of 5000 polygons

... some stunning new effects like a heat haze on the replay and billowing dust...

compared to *GT2*'s 300 left you feeling that this will be the first game to live up to PS2's pre-launch hype. The game might only have a mere (splutter) 150 cars compared to *GT2*'s 500 but they look incredibly real. Even the tiniest tweak on the tune-up screens will affect the handling

and the 15 tracks, including two new ones in Monte Carlo and Japan, are reckoned to be 50 times more detailed than on the PSone. Don't expect any online play, though. Kazanouri confirmed that you'll have to wait until the next GT. Basically, just think of one of the finest racers improved in every conceivable way and you've got *GT2000*.

WHEEL TIME

The new wheel, tidy as it was, couldn't compare with the

EXCITING ANTI-ALIASING INFO! NO, REALLY!

Gran Turismo 2000 looks to have solved the irritatingly named 'jaggie' problems that have had the Yank gaming press in a right old tizz of late. Mr Yamauchi calmly explained that by doubling the resolution of the screen so it's twice that of a normal PS2 game, the dreaded zig zag lines that beset *Ridge 5* and other launch titles have been eliminated. The videogaming world can sleep easy once again...

➤ CARS ARE THE STARS!

There might 'only' be 150 of them but, honestly, *GT2000*'s cars are some of the best ever seen on a console. Kazanouri reckons each one took two weeks to model compared to one day for *GT2*'s cars. He likened them to "miniature cars" rather than game graphics!

▶ That, my friends, is the Lancia Stratos. Not quite a Ferrari but a beautiful drive all the same.

▲ Looking beautifully shiny on the selection screen, it's a Honda S2000!

▲ The TVR Griffith shows off *GT2000*'s ultra-shiny wax jobs. No word on the Car Wash yet...

▶ The new VW Beetle makes a welcome return after *GT2*. It's certainly cooler than similar lowly powered Mum-friendly vehicles you start with.

➤ GOBSMACK!

One of the problems of being the best looking games in the world is that improvements don't show up as obviously as they would in a lesser title. Have a gander at *GT2*, then glance at *GT2000*. Having first positioned yourself by a mattress in case of fainting.

▲ Here's *GT2* in all its 32-bit glory. One of the best looking PS games ever?

▶ And here's *GT2000*. Sink to your knees and praise the Emotion Engine!

➤ VERY SPECIAL FX!

The latest version of *GT2000* sports a whole host of lush new visual effects that made one of the best looking games in the world even finer.

▲ Particle effects make for great fine dust clouds that it's almost worth spinning out to see.

▶ You'll see some fantastic weather effects from sun rise to glaring night-time street lights.

▶ That's what you call lens flare! Get your Frank Butcher yellow shades on!

▼ Realtime reflection mapping. Lovely!

➤ RE-RE-FOCUS!

One of the major enhancements, as far as Mr Yamauchi's concerned, is a new graphical effect called 're-focusing'. Used in the replays, it keeps your car pin sharp.

▶ Mimicking the way your eye works, the camera keeps your car in focus and slightly blurs rivals.

➤ DOUBLE PHYSICS!

It's hard to imagine more realistic car physics than *GT2*'s. But Kazanouri reckons it's 10 times more realistic on PS2 and you'll be able to feel the tiniest tweaks in the tuning!

▶ You can see your suspension rolling into corners on the jaw knacker replays.

▶ Tweak the tiniest screw and you'll feel it when you floor it round corners.

First Impressions

The driving beauty just got more pretty!

It's pretty much inconceivable, given Polyphony's peerless track record and what we've seen so far, that *GT2000* will be anything other than brilliant.

The detail on the two playable tracks was stunning. Hurtling through a column of trees on the Mountain Trial and seeing columns of sunlight streaming through was spine tingling. Similarly, the heat haze effect, fine dust clouds and glaring lens flare made it a joy to behold.

Any feeling that the handling was even better than *GT2*'s was beautifully confirmed on the replays which showed cars rolling on their suspension. Although there'll be no visible damage to annoy uppity vehicle manufacturers, Kazanouri assured us that you'll be able to flip cars over and that any damage will affect your car even if you can't see it.

Not sure about the steering wheel, though. We haven't seen so many people skidding around on the gravel since *Driving Emotion Type-S*. It'll take plenty of practise to really feel its benefits.

With only 25% left to be completed, we don't feel too rash saying that *GT2000* will be the PS2 game that finally lives up to Sony's pre-launch Emotion Engine hype.

GOOD COP ➤ BAD COP

It's *Gran Turismo* on PlayStation2. Only a massive natural disaster could make it fail.

No visible car damage, network play or super-charged Ferraris. Can't have everything s'pose.

Don't expect to get this sort of easy shot often. You'll usually have to pick off sentries from miles away.

Gory as a butcher's bin, is *Wolfenstein*. You'll be glad to hear you can shoot the limbs off corpses, sickos!

Realtime lighting effects help make for some back wibbling levels to shoot your way through. You always feel like there's something lurking in the corners.

The detail from the *Quake 3* engine is magnifying glass sharp. That skull's better looking than most game's heroes!

Return to Castle Wolfenstein

NEW GAME!...FIRST SHOTS!...NEW GAME!...FIRST SHOTS!...NEW GAME!...FIRST SHOTS!...NEW

Springtime for Hitler and Chermanny? Not at Castle Wolfenstein where it's winter all year round!

Nazi As They Wanna Be!

From a humble guard to hideous genetic experiment, *Wolfenstein's* full of shocking Nazi evil!

Hallo! Das friend or das foe? You can't help but be impressed by the detail on the Nazi scum!

You'll only want to get this close to the Third Reich's foot soldiers by looking down the barrel of a sniper rifle.

Because it's more comic book than realistic WW2, you get Nazi zombies, Nazi mutants and Nazi skinless freaks!

Go b-b-back? For anyone old and gnarled enough to remember *Wolfenstein 3-D* from 1991 (on the PC), the prospect of scuffing the Nazi castle's welcome mat once again will send the Frozen Peas of Fear right down your back.

The original might look primitive now but it introduced us to the kind of sweaty brow, shotgun gripping first-person blasting that creators id went on to develop so devastatingly in *Doom* and *Quake*. Landmark stuff games-wise.

And you should see the old place now it's running on the *Quake 3 Arena* engine on

a top end PC. Id's decision to entrust this remake to the folk behind super swearsy, ultra violent *Kingpin* looks to have paid off handsomely. The levels are eye blitzkriegingly lush to look at with incredibly real-looking textures and they're crawling with Seig-Heil!-tastic enemies. It's quite simply one of the best looking first-person shooters we've ever seen.

REICH MINDED

The whole Nazi occult setting pushes up excitement levels further. Forget the authentic WW2 atmosphere of *Medal of Honor* or *Commandos* and enter instead the creepy world of Himmler's twisted Nazi war machine. It might start off like a classic war flick with you sniping sentries and mowing down whole battalions of Nazis. But things

... enter the creepy world of Himmler's twisted Nazi war machine...

get troublingly bizarre very soon when you start encountering zombie SS divisions, leather catsuited Nazi ninja women and monstrous genetic experiments. It's hard to imagine better things to blast turning up in any other first-person shooter and some of your weapons – the flame-thrower and chain gun-style MP-40 machine gun for example – are a joy to hold.

SMARTSTER RACE

Nazi AI is also very impressive. Chuck one of

your stick grenades and, if they think they've got time, the guards will pick it up and lob it back! You'll also see them dive for cover and try outflanking manoeuvres.

Some of the set pieces we saw suggest the developers have been watching a lot of classic war films. The start of the game sees you storm Castle Wolfenstein and then have to mow down a whole army of replacement troops with the Nazis' own window mounted machine guns. We also can't wait to leg it along the roof of a train being chased by the SS.

Add *Half-Life*-style plot involvement and a new kick move that lets you hoof doors off their hinges for proper Hollywood entrances and you can't help but drool at the prospect of returning to one of gaming's true classics.

CRY WOLF!

Wolfenstein's ace looking levels take in the imposing Castle Wolfenstein itself, secret Nazi installations and research labs, plenty of crypts and catacombs plus a whole snow covered Village of the Damned. Nicely! As well as being able to shoot all the furniture you can also throw chairs at guards and kick open doors!

This cable car looks likely to be your only escape route from the Nazis' mountain top fortress.

GOOD COP BAD COP

Fantastic looking shooting in a spine wibbling Nazi setting with decent level design and shocking enemies.

It's not looking to completely redefine first-person shooting just be, er, really good. That'll do!

WHERE IT'S AT

Still in the early stages, but it's already looking great for a Spring release next year.

▲ We don't really need to tell you how good this game is, do we?

Championship Manager 2000/01

Peep goes the whistle, thwack goes the ball and squeak goes David Beckham at the start of a new season!

It's big, it's clever. You would expect *Champ Manager* to be strutting round in a really tight pair of Speedos shouting about how good it is.

But it doesn't because, for all it's mighty power, it's a humble game that doesn't talk up the huge mountain of information it contains. Instead it presents it in a clear matter-of-fact way - which is

all you would expect from a management game, isn't it? It doesn't even have any flash football action, just text updates that become addictive watching. Everyone knows this is the best you

can get and *Season '00/'01* is (as the name suggests) a data update. But even a few new introductions (like the ability to complain about the referees) makes this a handy annual purchase.

▲ Not much has changed on the surface since the last *Championship Manager*.

GOOD COP BAD COP

It's the best management game you can get on any format. Perfect for filling in the time between football weekends.

It's basically a data update and as the info gets muddled as the game progresses it's not a vital purchase.

C-12

Thought the **Sinclair C-5** was cool? Wait till you see Sony's **C-12** in action!

One of Sony's more low-key games at ECTS was **C-12**, an action adventurer from the team behind *Medevil*.

The premise is the usual nonsense: the Earth has been invaded by aliens who are determined to wipe out every last trace of humanity, with unfortunate prisoners being transformed, via the mysterious process of droning, into cyborg slaves and warriors. Yikes.

But - phew! - worry not, for one Lieutenant (Johnny?) Vaughan, one of the last remaining members of the resistance, is around to save the day. As you'd imagine, the gameplay is far from complex but it *does* offer supreme shooting fun, with a side helping of exploration for good measure.

The game is mission-based, with the level we saw at ECTS being set in a post-apocalyptic environment of

wastelands, abandoned warehouses and dark alleys. **C-12** is only 40% complete, but it isn't due out till March so there's still plenty of time to tidy it up. At this stage, it's looking far from ground-breaking but should still be fun.

GOOD COP BAD COP

The relentless cyborg-shootin' action, with a decent selection of powerful weapons, should prove a laff.

It's not exactly original and, as the focus shifts from PSone to PS2, hardly seems to be a 'must-have' title.

Front of the head, back of the head either way they're going to wake up dead, but it's so much sexier when they don't know it's coming. To help you in this sexiness you've got one or two groovy moves, including the standard 'stomach cramp' stealth walk and the peep-around-the-corner bob 'n' weave.

▲ But without the shield the game can be over in a moment as you die quickly.

BAD TO THE BONO!

It's 2037 and we've still got terrorists. They might have a righteous cause but you don't have to worry about that as you get to shoot them in the head. You don't want to know their beef. It's just kill, kill, kill...

◀ It's boss time. They usually have greater fire power and a height advantage.

▲ The auto aim makes sure that you can whiz through some levels without too much trouble.

PRETTY!

While the 3D action territory is all pretty familiar, there's a whole new world of graphics to be impressed by. It looks like a cross between a *Duke Nukem New Bad Future* and a big dull warehouse full of sports lockers. But beware of the haphazard aliasing that jars the eyes occasionally.

▲ There's cutscene's every time you hit a switch and enter a lift. Very nice.

▲ It's still a bit glitchy, watch how your team manage to walk on water.

FOUR HEADS ARE BETTER THAN ONE!

Things get a little crowded when you've got three trained killers traipsing in your shadow so it's best to keep them busy. You can give them separate orders to do all the hard work or just let them get on with their own thing.

▲ You can position your teammates with the help of these handy arrows so you can set up guards and cover.

First Impressions

All fired up and nowhere to go!

A word about the controls, as it's thumb those knobs time. Your left analogue stick looks after all the moving about, while the right-hand one controls the camera and cross hair aiming. This is a bit on the awkward side as the camera is far too close to your character and every movement needs loads of adjusting to keep everything in frame. But once you get your fiddling just right, it's the familiar plod around shooting stuff. The game really gets going when your opponents grow in numbers and start to attack from different angles. Using the handy (if occasionally erratic) auto aim it all goes gangbusters as you sprint into a room and send bad guys for an early shower. All the animation is top draw stuff as EA have worked their motion capture magic once again. As for the four team strategy, in the early stages it just seems a bit of a novelty. Only when the levels become more intricate is it necessary to give it much thought. It's great to see a PlayStation2 game attempting to do something different with gameplay instead of just tweaking the graphics, but we'll have to wait and see if the results are really worth all the effort.

GOOD COP BAD COP

It's your standard 3D shoot-'em-up but with extra tactical goodness and a four member team.

It's been beaten left, right and centre with the glitch stick and the controls are a tad awkward.

Garurumon like all good dog things, decides to get friendly and sniffs your arse. You gotta love him!

This beardy weirdy is just one of the many non player characters that you'll encounter on his travels.

▲ Tokomon hangs back and lets you deal with the difficult tasks, like reading, and opening doors. Dullard.

▲ The fishing mini game can produce some interesting additions to your Digimon collection depending on which kind of bait you decide to use.

Digimon World

NEW GAME!...FIRST SHOTS!...NEW GAME!...FIRST SHOTS!...NEW GAME!...FIRST SHOTS!...NEW

Cute to begin with, but beastly once they get mutating, meet the monstrous Poké-a-likes who love to poo!

It's not all fun you know. No, looking after a digital monster is a serious business as you'll find out in this evolutionary RPG.

You see they demand food, they demand love and, yes, they also need somewhere secluded to move their bowels.

Basically, this is looking a lot like *Pokémon* on GB but

with less emphasis on tactics and more on training up your little pets correctly.

COME HOME

The plot has you trying to lure Digimon back to File City (the little dears have suffered severe memory loss, bless) but, of course, before you can make friends you'll have to fight them. In Battle your options are pretty primitive, as you egg your pal on, chuck it special power items or tell it when to use its special attack. This makes bringing up a healthy little horror all the more important.

While it won't cause your retinas to revolve, *Digimon World* is smart enough to look at with some lush renderage scrolling by and plenty to investigate. It's neat the way the view changes from a slanted overhead to a side-on perspective at specific points so that you can see what you're doing (say, fishing)

... the title's smart enough to look at with some lush renders scrolling by!

properly. Even more enjoyable is when your monster digivolves into a bigger beast as you're treated to a flashy cutscene before the new mutant appears on the standard game screen.

Wisely, Nintendo ensured that both *Pokémon Snap* and *Pokémon Stadium* were significantly different from their GB cousins. The real question mark hanging over *Digimon World* is whether a game simple enough to be crammed onto a handheld (albeit with scaled down and simplified graphics) has got the depth to hook PlayStation players?

THRILLING MONSTER-ON-MONSTER ACTION!

Normally digimon are friendly critters but, since they've had their memory nodes wiped by the evil Black Gears, they're a whole lot feistier. So you'll need to defeat the beasts with your own roster of monsters before they can be successfully befriended and brought to their senses.

Eight cans of VO5 and I still can't do anything with it!

▲ The icon driven communication system allows you to tempt the Digimon. Here Agumon trots over to join you.

I, Metal Greymon, give you my amazing nipple beasts!

Agumon starts off cute, but soon turns into a taloned killing machine!

DIGIVOLVE!

Digimon World is all about caring for your monsters and sharing with them any food or other items you pick up on your travels (digimushrooms make good eating apparently). Treat your pet correctly and it'll evolve from a wee ghostie fella into something much more exciting. Cue the special effects!

▲ No, this isn't a secret level in *Vib Ribbon*, but the creation of a digital monster. Mind yourself there!

▲ It's Tokomon in all his little limbed glory! He's one of the first Digimon you'll find in the adventure.

GOOD COP BAD COP

☺ Lots of marvellous monsters. The chance to see them evolve. Interesting RPG elements.

☹ The battles are pretty simple. Much of the dialogue is dull. Pay to see monsters poo?

▲ Some RPGers may find the combat system a bit of a pain.

▲ Expect loads of the usual pyrotechnics when spells detonate against foes.

This has taken three years to finish – so let's hope it's worth the wait!

Nice to see the developers aren't shy of including as many RPG clichés as possible.

I... I can't blink! Perhaps this headband's too tight?

Legend Of Dragoon

Three years in the making... Sony's latest RPG looks good, but how does it play?

While the *Final Fantasy* series is the undisputed king of the PlayStation RPG – with the highly anticipated *FF9* expected in time for Christmas – there's no shortage of contenders.

The first thing that strikes you about *LOD* is that, even compared to the *Final*

Fantasies, it's no slouch in the eye-candy department. But if you're going to stick with a game through *four* discs, good looks alone aren't going to be enough to keep you gripped – although the selection of movie sequences throughout the game are admittedly superb.

Unfortunately, from what we've seen of this so far, the

gameplay can't keep up the high standard of the visuals, with a potentially cumbersome combat system, the traditional random battles and a narrative that tends towards the plodding at times. Still, it took three years to develop so dedicated fans of the RPG genre are bound to find themselves immersed in this anyway!

GOOD COP BAD COP

Mat Hoffman's Pro BMX

Christ on a bike! It's Tony Hawk's on two wheels with a new extreme sports star!

Ooof. As if grazed knees and elbows weren't painful enough, in comes the eye streaming potential of a cold steel crossbar jammed between your legs.

When you've got such a well put together and downright successful game as *Tony Hawk's*, it makes perfect sense to use an enhanced version of the same solid engine and do the whole stunt-tastic thing again. But on bikes.

It plays similarly to *Tone* – definitely a good thing – although obviously the hundreds of tricks, combos and pro-signature moves you can pull off are different on a BMX and you get a Dirt course in addition to Vert and Street areas.

All the cool new stuff you'll find in *Tony 2* has been hauled across. There's a BMX course editor so you can create your own ramp and rail packed course on screen in realtime. There's an in-depth career mode where you have to upgrade your player and bike stats

and two-player split-screen riding's catered for the three different competitions. Most important of all though, it seems to play as well as it's board based bro' with beautifully fluid trick system that means every part of the course can be used to get, er, radical on.

GOOD COP BAD COP

It's *Tony* on a bike! Which means a tricktastic, well designed game that'll last for ages.

The young Lara in Ireland confessing her murdering and animal cruelty to an understanding priest.

Lara pulls on her familiar threads for some mad platforming malarkey in the fair city of Rome.

Tomb Raider Chronicles

NEW GAME!...FIRST SHOTS!...NEW GAME!...FIRST SHOTS!...NEW GAME!...FIRST SHOTS!...NEW

Hello stranger. As regular as a clockwork postman on a high-fibre diet. It's **time to raid those tombs again!**

Cue Wobbly Screen To Flashback!

For each different adventure we learn more about our heroine Lara and get to see a bit more of her wardrobe.

▲ Lara's adventure in Ireland has a touch of the *Scooby Doo's* about it. It's all a creepy and has weird trees...

▲ It's all snowy as Lara tackles a German U-Boat. We don't know if it's suddenly WW2 again but there you go.

▲ Then it's Catherine Zeta Jones in *Entrapment*-style wardrobe for the hi-tech challenge in a tower block.

THAT'S NEW!

It's new move time. First up you've got hand-to-hand fighting in this title, which means Lara can creep up to guards and hit them with a cosh. Also the old girl has mastered the parallel bars allowing her to swing and leap even higher than before. Finally, she's even up for a bit of tightrope walking across the odd chasm. Oh bravo madam!

▲ You must help Lara across the tight ropes continually correcting her balance as she tip toes along. Easy does it.

▲ The guards have new improved AI, which means that if they hear you coming you'll be in big trouble. Oh yeah.

Now hands up who couldn't see this one coming. *Last Revelation* – ooh, will it be Lara's final adventure? Will it my arse!

Nope, the nights are drawing in so the Old Faithful of the games world makes her annual visit, but this time, wait for it... in flashback. Sorry to spoil *The Last Revelation* for those who haven't made it to the last level, but our Lara is left trapped in a big vault. Is she alive? Is she dead? Do we care? So what we have here is her friends, all three of them, meeting up at her memorial service and reminiscing about some of her old adventures. Four in fact. First off we handle

...what we have here is her friends meeting at her memorial service!

sixteen year old Lara getting up to mischief in Ireland. Then it's a classic *TR* style jaunt around Rome, a clamber round a German U-boat and finally some *Die Hard*-style action in a hi-tech tower block. Each of the linear adventures feature new characters and some old faces such as Larson and Pierre who popped up in the very first *TR*.

FIVE ALIVE

This is the fifth helping of the *Raider* which will be launched on three formats – PlayStation, Dreamcast, and PC. PC owners will be getting the best deal as their version

includes a level editor. Gamers will be armed with the tools and systems that Core use and allowed to create their own deathtrap dungeons. Crafty.

Don't expect a great leap in graphics or gameplay, just

more of the steady progress that has been maintained through the series. Instead we'll have to wait for a PS2 appearance for anything fresh. Or is Lara really dead, and will she return? Hmm, tricky one.

She's back to prove that there's life in the old dog yet. Go get 'em Fido!

GOOD COP BAD COP

One of last century's defining games just keeps on going. We can't get enough of Lara.

Yet another sequel in a five year old series. Haven't we've really had enough of Ms Croft?

The fastest *Wipeout* ships ever make their debut in *Fusion*.

Wipeout Fusion

▲ Pilots are back – for the first time since the original game five years ago!

▲ *Wipeout Fusion* promises to pump adrenaline at a furious rate. Have no doubts it'll be the finest *Wipeout* ever!

NEW GAME!...FIRST SHOTS!...NEW GAME!...FIRST SHOTS!...NEW GAME!...FIRST SHOTS!...NEW

The fastest game not on four wheels is jetting towards PlayStation2 – just watch out for that Plasma Bolt. Doh!

It's 2150 and tearing along gritty futurescapes in hovering spacecraft is as enticing a prospect as it ever was.

So it's little surprise that, out of the early batch of PS2 titles, *Wipeout Fusion* is one of the most anticipated of the lot. We managed to sneak a peek at a demo of the game in action at the recent ECTS event in London and there's no doubt it's all looking mighty fine.

Outrageous speeds and lush visual flair aside, the

Wipeouts have always been known for their ace level design – and *Fusion* is no slouch in this department. *Fusion's* tracks are set in seven environments each with three courses which boast a variety of alternative routes. This is, indeed, smart.

AIRBORNE

Other new features include even bigger jumps and some truly gravity-defying bends, twists and even loop-the-loops. Guaranteed to give you motion sickness when played in first-person!

If that in itself isn't enough to satisfy your speed demon fantasies, there are some well snazzy new power-ups. Super Weapons are unlocked when you complete a series of challenges while the likes of

▲ There's now a lot more to each track, with plenty of alternate routes.

the Turbo Enforcer have been specifically designed for multi-player shenanigans.

The 32 ships have also been souped up, not least in

...**Fusion** is the most anticipated of the early batch of PS2 titles...

▲ Each AI pilot is now a lot more sophisticated in their handling.

that the AI pilots now react properly to other racers instead of just following a fixed route as they did in previous games.

It's a shame there's no four-player option but it is already being hinted at that the second PS2 *Wipeout* may be playable online. In the meantime, though, stare longingly at these shots and start counting down the days till next March...

SHIP WRECK!

This is the first *Wipeout* in which the ships take visible damage, as opposed to your 'energy' bar just being reduced with no actual effect on the handling. In *Fusion*, collide with other racers and the barriers, or take one too many Quake Disruptors up the tail pipe and bits of your craft will drop off. Heck!

▲ Damage means that you'll be forced into the pit lane – otherwise your ship could become uncontrollable.

▲ This is the most 'realistic' *Wipeout* yet. What will they think of next?

THERE'S MORE THAN ONE WAY TO FLY!

With more routes than you can shake a large carrier bag full of Force Walls at, you might end up needing a compass to navigate your way around *Fusion's* intestine-like tracks. There are also a number of larger areas where there isn't even a track as such, just a big old bit of space for you to find your way through. Of course you'll have to try all the different options before you discover the one that you feel is fastest. Neat-o!

▲ There are loads more features on the tracks – some of them even go upside down. Clever, huh?

▲ Certain parts of the courses offer wide open spaces – a bit like *Episode 1 Racer* did.

▲ If you've got a bit of an upset stomach, perhaps a bout of *Fusion* is not the best of ideas

GOOD COP BAD COP

Lots of updated features, new modes and weapons, and more craft and tracks than ever before.

It still fundamentally plays the same as every other version of *Wipeout* – the first of which is now five years old.

WHERE IT'S AT

It's currently 75% complete so is well on track for its proposed release date of March next year.

Star Wars: Episode 1 Starfighter

NEW GAME!...FIRST SHOTS!...NEW GAME!...FIRST SHOTS!...NEW GAME!...FIRST SHOTS!...

"Phweep-boop." "Yes R2, it looks like we've gotta take out the droid control ship all over again!"

Star Phwoars!

The ships are the real stars here. There's over 20 of 'em, all looking very similar to those from the film.

▲ Ship models are great, using PS2's power to show *Episode 1's* craft in all their twin thrusting glory.

▲ There's the Naboo Starfighter of the title. Expect an assault on the Droid Control Ship before the credits roll.

▲ As is always the way with *Star Wars* spin offs, expect to see ships you can't even remember being in the film.

PILOT-LITE!

Starfighter's plot is original though it draws plenty of inspiration from key points in the film. You actually play three different characters through the course of the game: Rhys Dallows, Vana Sage and Nym, unlikely allies all out to laser the hell out of the Trade Federation and protect Naboo.

▲ You'll switch between the three central characters for different missions. Cutscenes explain all.

Mr S. Wars himself, George Lucas, got his beard in a right old lather over the Japanese unveiling of PS2, calling it a new dawn for interactive entertainment.

So it's no surprise to see LucasArts throw their weight behind Sony's console with a PS2 specific *Episode 1* game featuring the film's best bit of kit – the Naboo Starfighter.

SOUND CHOICE

As soon as you hear the low pitched shriek of a swooping TIE Fighter, it's clear that this mission-based air combat

...this title is looking to target your Star Wars pleasure centres...

game is looking to target your *Star Wars* pleasure centres. Starting on Naboo, you tackle missions in 14 different environments over land and in space with a straight-out-of-the-film climax as you assault the Droid Control Ship.

Expect plenty of Pedigree Chum dogfights along the way. Controls don't take long to get to grips with. The Dual Shock 2's left stick does the steering, L2 and R2 control speed and the right stick sorts out pitch and yaw. Your Starfighter handles easily – putting you in mind of *Rogue Squadron*, although

LucasArts reckon overall the game's pitched between the all out arcadeness of Factor Five's N64/PC blaster and the manual consulting, full-on sim of the *X-Wing* series.

The only question mark over *Ep 1: Starfighter* is that, technically, it doesn't look

quite as impressive as we'd hoped, coming from LucasArts and running on PS2. The levels are certainly huge and there's some impressive detail, but it isn't exactly moving at a popcorn spilling pace. Hopefully there'll be time for it to improve before December.

▲ You'll be able to swoop right down until you can see the Droids' steel nose hair.

GOOD COP BAD COP

An original *Star Wars* game only on PS2 with a big emphasis on laser fuelled space combat.

Still some work to go if it's going to be in tip-top condition for a December launch.

The Mummy

NEW GAME!...FIRST SHOTS!...NEW GAME!...FIRST SHOTS!...NEW GAME!...FIRST SHOTS!...NEW

Enter a whole world of sand as Konami come up with a labyrinth of puzzles and action to unravel.

Just when you thought Konami had got carried away with the whole PS2 malarky, they return to their old friend PlayStation to deliver some thrills of the sandy kind with a game based on last year's mini-blockbuster, *The Mummy*.

Even if you're not familiar with the film, you should be familiar with this kind of

game, it's a 3D action adventure which requires you to peg it around 'raiding tombs' (wink, wink).

PLOTTING SHED

Cunningly using the film plot as the structure of the game you take control of the Brendan Fraser character (Rick O'Connell) as he has to navigate 12 different levels of high jinks and undead to save the world from bandaged evil. Slick Rick will be joined by others from the movie, Evie and her brother Jonathan, who will help and hinder your hero in equal measures.

This title is the fruit of the special relationship that Konami and Universal Studios created earlier this year and should set the benchmark for the rest of the movie licenses we'll receive over the coming 12 months.

Movie license games are a mixed bag. For every *Die Hard Trilogy* you get a *Die*

...Slick Rick is joined by others from the movie, Evie and Jonathan...

Hard Trilogy 2, but what is reassuring is that Konami, in their infinite wisdom, have used English developers Rebellion. Rebellion have already dabbled in the movie world, coming up with *Alien Vs Predator*, and promise similar nerve-shredding tension and suspense. They'd also be keen to do a good job as sequels could be in the pipeline with *The Mummy 2* already being filmed.

There was a very rough version hanging around at E3 earlier this year, but with a bit more sanding down this could prove that there's life in PlayStation yet.

IT'S A WRAP!

Whatever you thought of the movie you've got to admit that there's plenty of material in it that could be used to make a hum dinger of a game. The film's action was non-stop and featured some impressive special effects, so the game has no excuse for being dull on either the visual or gameplay front.

▲ The unmistakable face of a computer generated version of Hollywood hunk, and Californian Man, Brendan Fraser.

▲ The mix of platforming, puzzles and combat obviously borrows a lot from the *Tomb Raider* series. Truly.

SOMETHING SPHINK AROUND HERE!

Not surprisingly it's a mix 'n' match of puzzles and action as is the way of the 3D adventure. It's got a lumbering and tense feeling similar to *Silent Hill* as you must search for clues in the ancient lost city of Humanaupatra. On the way you'll be able slap around any undead until you face the final test – the Mummy himself... herself... whatever.

▲ The gameplay switches from typical 3D action adventure to special puzzle solving challenges.

The code was bit on the rough side to play at this years E3 but, given a bit a brush up, it should be here soon.

GOOD COP BAD COP

A great developer, a great publisher and an underrated film – nothing can go wrong, can it?

Just another dodgy *Tomb Raider* clone, or something even better? Only time will tell.

POKEMON PROMO CARDS

Promo cards are Pokemon cards that do not come in packs. For example, the Ancient Mew was only sold at the Movie Theatres in Japan. These are tough to get. You will find that the Pokemon promo cards have the potential to become very valuable. We sold the Happy Birthday Pikachu card for \$40 a year ago. Now it's selling for over 10 times that. A 1000% increase is much better than the stock market annual returns. No guarantee of price increases but we can say that these are hard to find. Lower supply means higher prices!!!

GAMECUBE AND GAME BOY ADVANCE

It's the next *NEXT* generation!

You wait years for a new games machine, then two come along at once! Not only have Nintendo recently coughed up a successor to the world's best-selling games machine (the Game Boy) but have unveiled their very own PS2 beater as well! We travelled to Japan to be there when the curtain was raised on the new age of Ninty gaming. Here's what happened...

Japan is a funny place. Lots of great food. Stupidly expensive socks but crazy-cheap SNES games. And the home of Nintendo, makers of the N64 and Game Boy. Both of which are a bit popular in these parts – and Ninty has just gone and replaced the pair!

With special invite in hand GM queued with the rest of the froth-mouthed world's press to squeeze into an exhibition hall the size of the Thames to witness what we assumed would be the first airing of Game Boy Advance.

We were right. Five minutes of rambling in Nintendo Vice President Atsushi Atsara reached inside his jacket pocket and popped it out.

It was tiny! Cue flash bulb madness all round. And, best of all, we were told that when he was done we could all go and play eight new GBA games on the stand next door. Wicked!

But wait! It wasn't over yet! After babbling about Nintendo's next machine formerly being known as 'Dolphin' he told us that "it would be called Dolphin no longer!" Queue a pair of rubber clad minxes mincing onto the stage with... yes... could it be... a wardrobe!?!?

But this was no ordinary wardrobe it's curtain-based front and back were quickly raised revealing its emptiness and the whole kaboodle was widdled round via the miracle of the castor. Ah, it seemed some kind of magic trick was underway. The

curtains were dropped and suddenly fireworks and lights went mental as the huge screen behind the box began to spell out the name of the new machine... You could have cut the atmosphere with a spoon!

Then with a mighty 'whamph' of light and the curtains were raised and out spilled five babes each sporting a differently coloured box-like mini ghetto-blasters. My god! That's it! 'Gamecube' the screen proudly announced.

The 'cubes were put on pedestals and tonight's star speaker appeared. Like a proud father the pixie-like Shigeru Miyamoto emerged on stage to rapturous applause! "I will now demonstrate Gamecube" he said. And he did.

GAMECUBE IN ACTION

MARIO 128

Shigeru Miyamoto, Nintendo's games design genius, demonstrates the new Gamecube joystick live in Tokyo.

Nintendo, The Upcoming Generation

▲ Look at it! Not just one but literally hundreds of Marios wandering about carrying blocks and generally having a whale of a time. It's-a-meeel!

▲ Shigsy even warped and twanged the weird Japanese Monopoly board they were standing on to send them skittering about all over the shop.

▲ When a Mario fell over he rolled down the hill, often knocking other Marios flying! Then they'd roll the fallen Marios off the edge of the board!

Nintendo SHIGSY GRABS A PAD

Atsushi Atsara of Nintendo proudly exhibits the five differently coloured 'cubes. Cor!

The Shigster popped up on stage to take us through two demos of Gamecube's power. First, he demoed the new funky looking joystick.

The screen piped up with the interior of Luigi's haunted mansion (see over there) and a spotlight illuminated a pad on the floor which then jumped up and moved close to the camera while a spooky *Ghostbusters*-style ghost floated in the background.

"Here is the joystick," Shigsy announced. "I found it in Luigi's mansion," he joked. He then proceeded

to press each button and wobble each stick, with the huge virtual pad on screen spinning around to show every nook and cranny, while the ghost on screen did funny stuff when buttons were pressed. Pressing the A button caused him to belch letter 'A's, the other buttons pinched and squeezed him and the second stick, the 'C-stick', span him around. It's worth noting that he was using the Wavebird (see elsewhere) cordless joystick for his demo and it worked a treat.

The second demo was a bit more exciting and actually showed us what Gamecube is capable of. It began with an old NES-style 2D flat Mario sliding onto the screen. This then flew down and landed on a circular Japanese *Monopoly* board. The camera zoomed in revealing that the huge Mazza shape was made up of 128 coloured crates. Then one of them lifted up revealing a *Mario 64*-style Mario! He ran about a bit, under joystick control then lifted another crate. There underneath was *another* Mario. Both Marios then proceeded to pick up crates and throw them off the edge of the board, revealing more Marios in the process! And so it went on with a counter counting the number of Marios being animated. On and on, past "Mario 64" - which Shigsy affectionately zoomed in on - and all the way to "Mario 128!"

But the demo didn't end there. Shigsy threw on another 50 or so crates (each containing another load of Marios) then turned on a series of special effects, blurring the motion and, most impressively, switching on a 2D shading effect instantly making the action look like the brilliant *Jet Set Radio*! Then he started grabbing parts of the board and pulling and stretching it to form hills and dips which the Marios stumbled and slid around! And when one fell over one of his twins would roll him off the edge to his doom, with another dropping down to replace him! Amazing.

Then finally the board became a huge pizza (!), Shigsy pulled up the centre so all the Marios slid off, and the pizza was sent spinning into the disc drive of a waiting Gamecube. Bizarre but brilliant!

Saucy bims emerging from Nintendo's magic wardrobe, each sporting a luscious new Gamecube by its handy handle.

GAMECUBE

Just look at the thing. It's tiny! So what are all those buttons and bits for?

ANALOGUE AV OUT
Connect Gamecube to your telly via this port.

JOYPAD PORTS
Like the '64 the 'cube features four ports for quick and easy multi-gaming.

DIGICARD PORTS
Gamecube has two Digicard ports which take the new Gamecube Digicards. These cards look a lot like PlayStation memory cards but feature 4Mb of storage (four times bigger than PS1 cards but half the size of PS2 cards).

RESET BUTTON
This'll reload the game currently inside the cube.

HI SPEED PORT
Hidden beneath the 'cube are three removable trapdoors each of which is groaning to be filled with hi-tech gubbins to be released later. The Hi Speed Parallel port is for lightning fast data transfer with other machines and audio/video/communication devices.

SERIAL PORT 1 AND 2
Two ports, one of which will be home to the analogue or digital broadband modem available separately allowing you to get online via PC and Dreamcast-style 56K analogue modem while you wait for your in-home broadband connection (unlike PS2...)

DIGITAL AV OUT
This is the new standard for digital TV connection. When TVs and video equipment go full-on digital you'll be able to feed them the 'cube for ultimate quality in both video and audio.

POWER BUTTON
Obvious innit. Press this to turn 'er on.

OPEN BUTTON
To open the door so you can slip in your next tiny disc.

FIVE DIFFERENT COLOURS

It's the first machine to be available in different colours from launch. The silver and black ones are our faves.

TECH SPECS

Processor: 128-bit IBM Power PC 'Gekko' 405Mhz

Graphic chip: NEC 'Flipper' 202.5Mhz

Features: Fog, anti-aliasing, alpha blending, mipmapping, bump mapping, realtime texture decompression

Sound chip: Special 16-bit DSP

System memory: 24Mb + 16Mb cache memory

Power: 6-12 million textured polygons per second

Media: 8cm Gamecube disc by Matsushita, 1.5Gb capacity

Size: 150mm wide, 110mm high, 161mm deep

GAMECUBE DISC

It's tiny too! It's just 8cm across and yet it holds a huge 1.5Gb of data. The technology for the beast was developed by industry giants Matsushita (who make Panasonic and Technics kit) and will be used in a whole host of new applications where its tiny size is useful - such as the new DVD RAM camcorders.

It's worth pointing out that these new discs only offer just over twice the capacity of existing CD ROM technology (which can store 650Mb). Compare this with DVD which (in its biggest form) can store 16Gb (16,000Mb approx). Still it's way better than the 32Mb cart they had to make do with on the likes of *Zelda* on N64!

GAME BOY ADVANCE CONNECTOR

Yes! You can even plug your Game Boy Advance into your 'cube! This gives developers the opportunity to use the Advance like a joystick with a monitor built into it. Intriguing...

GAMECUBE JOYPAD!

Every new console needs a new pad (except PS2...). Gamecube's My-First-JoyPad is straight off the Fisher Price drawing board!

L AND R TRIGGERS
These are like the Dreamcast buttons, 'Motes told us. They have a long throw on them and are (besides the sticks) the pad's only controllers. They're ideal for brakes and accelerator in driving games and their curved tops hug your fingers brilliantly too.

Z TRIGGER
Not really a trigger at all but a final button that fulfils the role created by the N64 controller's ace Z button. This Z is on the top right shoulder so you can play using both sticks and still get at an 'action' button quickly.

B, Y AND X BUTTONS
These kidney shaped buttons are within easy reach and have a similar chunky feel to the big A button.

ANALOGUE STICK
Like the existing N64 pad but better positioned slightly over to one side than on the three-prong N64 pad. Also, because it's shorter and stubbier your thumb doesn't slip off the end either.

DIGITAL PAD
The old faithful D-pad just like on Game Boy, SNES and N64

C STICK
Or 'camera' stick. This replaces the four C Buttons on the old N64 pad and, despite the 'notching' around the edge (so it slips easily into eight different positions) it's a full-on analogue stick so you can look with the left stick and move with this one.

A BUTTON
This huge thumb-sized blue button is the main 'go' button in Gamecube games. Miyamoto says that in most games all you'll need is the analogue stick and this button.

GAMECUBE GAMES!

While no code was playable, Nintendo showed off eight different demos which were produced on Gamecube hardware.

First was the successor to *Mario 64*, an unnamed game with - yes! - Luigi making a welcome return. A title of Luigi's Haunted Mansion (or some such) seems likely given the nature of this demo which featured the lanky green one sliding down banisters and having the bejeeburs frightened out of him by assorted *Ghostbuster*-like ghosts via some rendered intro quality graphics. We can't wait!

Also back for more is *Waverace*, one of the first N64 racers which now fully realises its promise of realistic water effects. Looking jaw-droppingly good this 'un.

Similarly making a welcome return was Samus from *Metroid* who cropped up in a five second long sequence during which he (or should that be she...) pegged it down a sci-fi corridor being pursued by countless robot rats - a lift straight from the *Lost in Space* movie.

Next up was a short *Zelda* scrap sequence with, again, a rendered intro where Link fought Ganondorf in a spooky medieval castle! Just stunning.

Third party titles got a look in via a short in-space *Star Wars* sequence showing a squadron of X-Wings flying past the camera on their way to deal out some interstellar mischief.

Joanna Dark dropped in and tipped a wink to the camera in one of the shortest clips and the whole thing was wrapped up by an interactive demo where Miyamoto and one of his team flew the camera around an amazing Meowth's Party demo featuring all 150 Pokémon getting down in realtime. Best of all though was Shiggy clapping and singing along with Meowth's efforts in the background! He's mad, but we love him.

A short *Banjo-Kazooie* sequence was shown elsewhere, showing the pair being pursued down a dusty valley by assorted brilliantly rendered creatures.

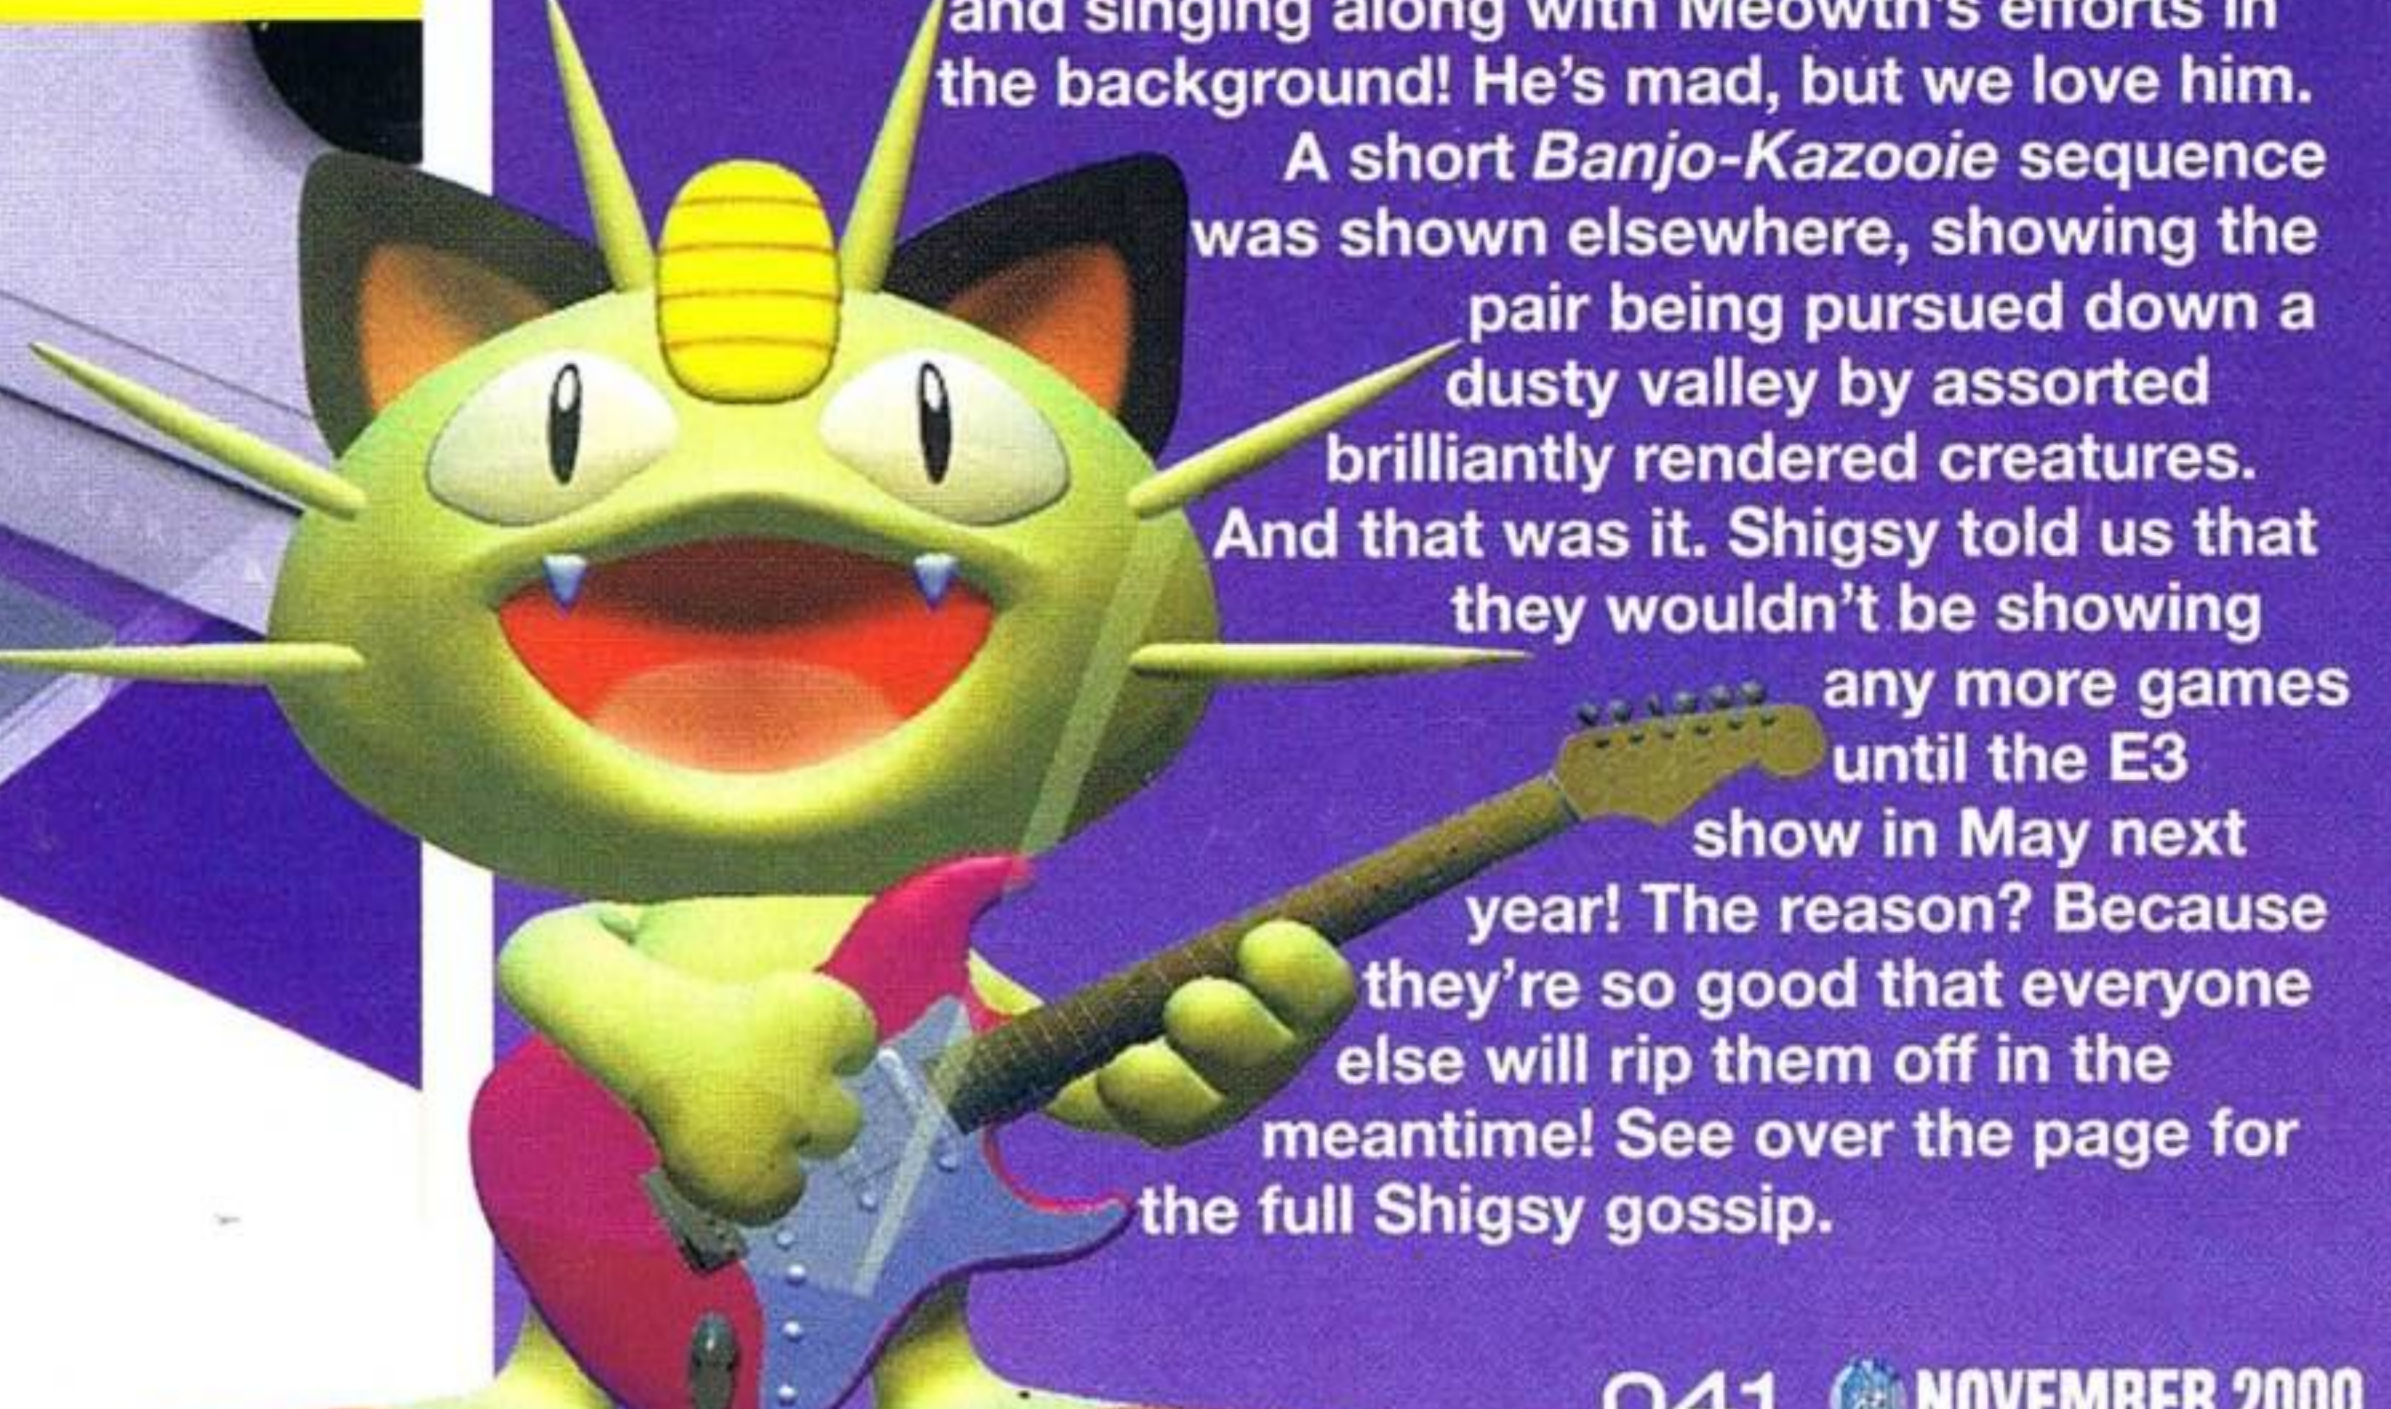

And that was it. Shiggy told us that they wouldn't be showing any more games until the E3 show in May next year! The reason? Because they're so good that everyone else will rip them off in the meantime! See over the page for the full Shiggy gossip.

WAVEBIRD CONTROLLER

The Wavebird is the cordless joystick which uses radio technology rather than infra-red (so you don't lose contact when your Gran hobbles between you and your 'cube). This is an optional extra available later. Note the channel selector on the front of the 'cube so you don't all end up driving the same car. Or something.

SD DIGICARD ADAPTOR

While the Digicards aren't exactly massive or pricey, the huge SD cards are. These postage stamp-sized beauties are currently cropping up in all kinds of tech gear such as MP3 players and digi-cameras. Not only will they give you HUGE 64Mb Gamecube storage but will allow you to quickly get sound and pictures from your gear into the 'cube for digital fun 'n' frolics.

SPECIAL

GAME BOY ADVANCE

Take a Game Boy Color, lob in more memory and a powerful 32-bit processor and you get true handheld heaven!

TWO DIFFERENT COLOURS TWO DIFFERENT MACHINES

The two differently coloured advances share the machine's silvery exterior (which is actually plastic) but have different side panels and buttons. Which will you choose? Blue or er... tangerine?

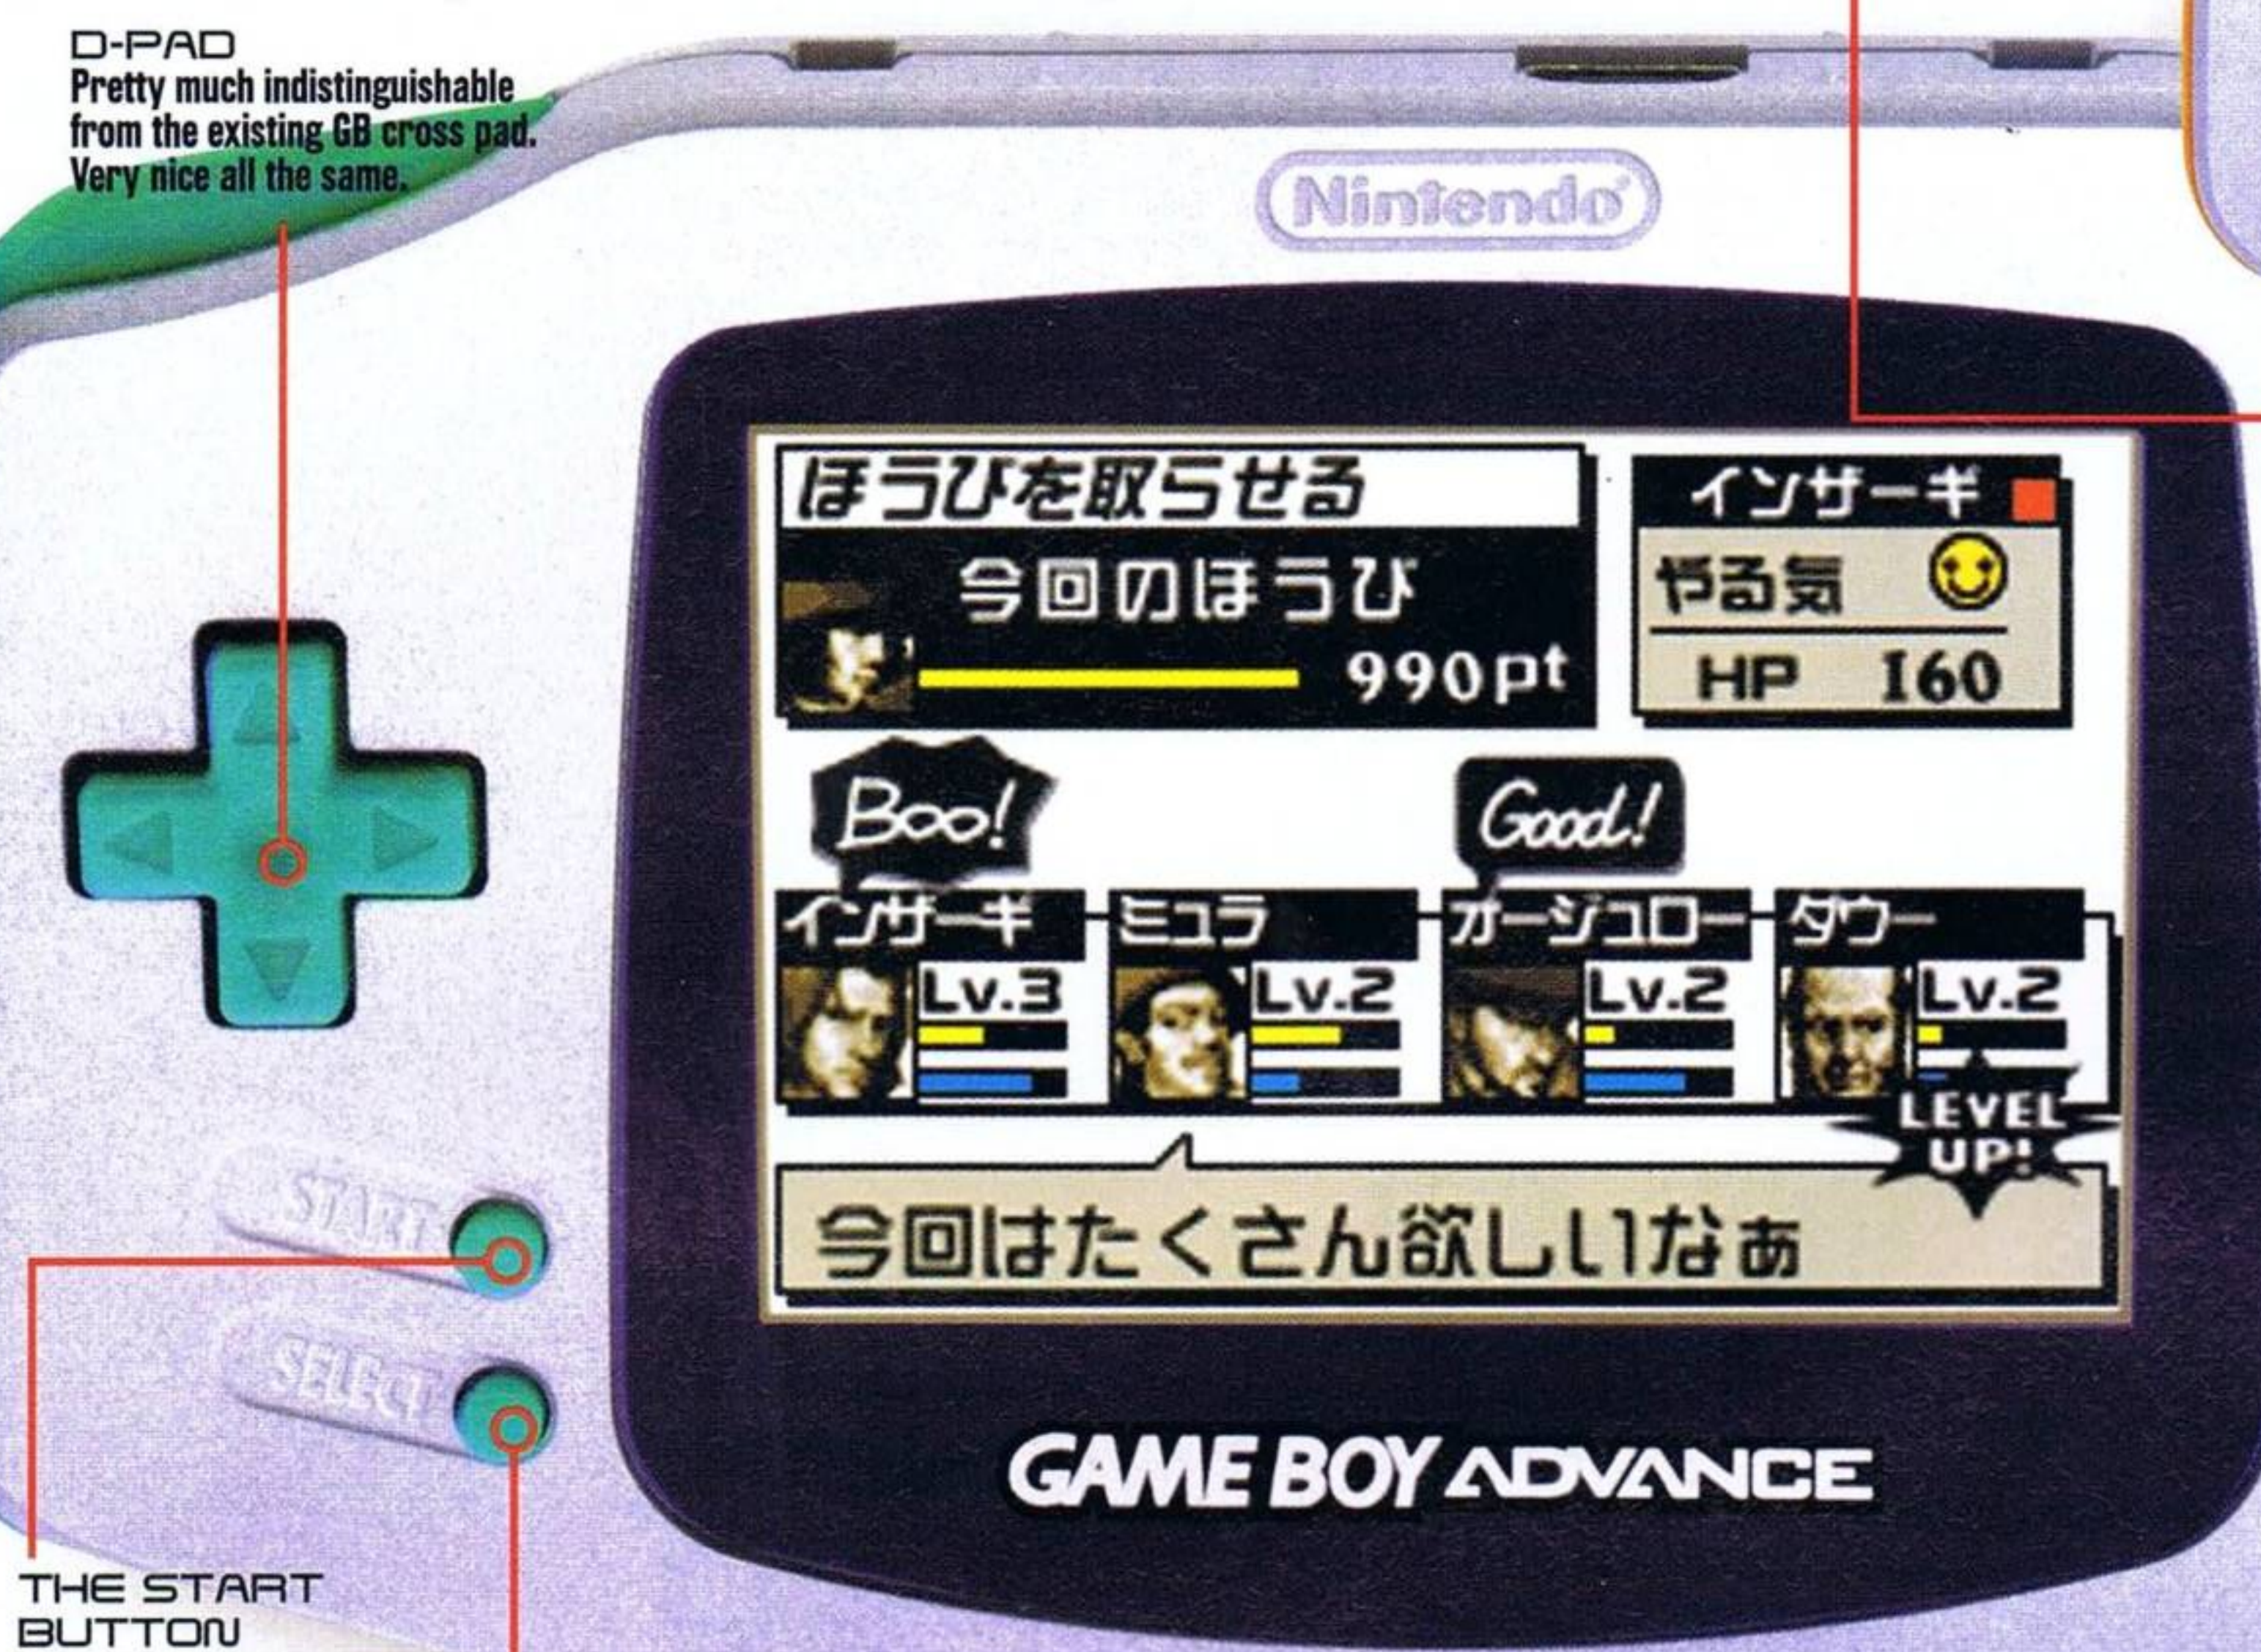

D-PAD
Pretty much indistinguishable from the existing GB cross pad. Very nice all the same.

POWER LIGHT
Glow green when it's switched on.

A AND B BUTTONS
Just like the Game Boy Color (and thus ensuring total compatibility with the world's favourite games machine), the GBA has two action buttons.

SPEAKER
GBA isn't stereo (as some of the earlier sketches suggested). The one small speaker kicks out crunchy 8-bit sound at a decent level. Much better than the shrill bleeps of the GBC.

THE START BUTTON
Press this to make things go.

THE SELECT BUTTON
Hit this to Select stuff. Get the impression that it's not that different from Game Boy Color to use?

MOBILE SYSTEM GB

The Mobile System GB is a new lead that connects not only with Game Boy Advance, but with your existing Game Boy Color too. It allows you to connect your GBs to your mobile phone and download programs from Nintendo onto your GB!

Alternatively you can upload data from your games to the Nintendo server for other users to look at or download. A full e-mail facility is promised to go along with access to other news and leisure services all popping up on your colour GBA screen!

It's all very exciting but, as is the way with these things, it's a little uncertain at the present as to what exactly you're going to be getting. The first application for the system will be *Pokémon Crystal* – a whole new Pokémon game that allows you to trade and catch new Pokémon, interacting with other users on the system while you're on the move. Lots more on this soon.

TECH SPECS

Processor: 32-bit RISC CPU

System memory: 32Kbyte WRAM + 96Kbyte VRAM in CPU

Power: 240 x 160 dots in 32,000 colours

Screen: 40.8mm x 61.2mm

Media: Compatible with Game Boy, GBC and GBA carts

Weight: 140g

Battery life: 15 hours

Size: 144.5mm wide, 82mm high, 24.5mm deep

GAMEBOY ADVANCE GAMES

MARIO KART ADVANCE.....NINTENDO

Yes! Shown in four-player form this allowed punters to choose their plumber/princess/mushroom/turtle and battle away in time honoured Kart-style! It plays more like Kart 64 than the SNES original while the totally flat terrain harks back to 16-bit days. Some smoothly animated 3D scenery keeps things looking smart though. A sure-fire winner.

KURUKURU KURIN.....NINTENDO

Barmy mad puzzle game in which a rotating bar must be slotted, side-scrolling shoot-'em-up style through an undulating set of brightly coloured caverns. A very original and VERY HARD game. Could this be the 'Advance's Tetris? Quite possibly not.

KONAMI ALL-STAR RACING.....KONAMI

A graphically excellent kart racer which (dare we say it) seems to have more about it than the mighty *Mazza Kart!* Brilliantly fast and colourful but ultimately a rip-off of the master. Come on then, which would you rather buy?

PINOBEE QUEST OF THE HEART.....HUDSON

Brightly coloured platforming action with a touch of the Yoshi's Islands about it. In the absence of the genuine article, this imaginative and slick impersonation will do nicely.

SHIGERU MIYAMOTO SPEAKS

We met the man who made Mario at the Gamecube announcement.

Earlier Gamecube was described as the "Ultimate Game Machine" and the "first of its kind." What makes Gamecube the first of its kind given that it is just another console?

Yes, we were advocating that phrase from the viewpoint of game creation. If you ask if it's the best graphic rendering machine, ever then we'll say no. But from the viewpoint of making videogames and from the standpoint of software creators who are making sounds or using the collision detection or making animation effects, in total, it is the most well-balanced game machine, that's why we say it's the ultimate game machine. Also, in terms of the cost of the chip associated with the machine, this is a revolutionary console.

This is the first machine that Nintendo has produced that uses discs instead of cartridges. Will there be any problems with loading times?

Yeah, actually you are touching on a very sore point, but I'm not concerned about it. Yes, there is a loading time problem, but as for that we have taken a variety of measures to prevent it. Also what counts here is the size of the RAM capacity, and I believe now that we have sufficient RAM to get rid of the nuisance relating to the loading time.

When we saw Mario 64 for the first time it really changed everything. Can we expect something similar with Gamecube?

I think that yes, we'll be able to provide you with new excitement like what you've experienced with N64, but the evolution from N64 to Gamecube is much greater than with the SNES to N64. I'm sure that you will still have a similar experience like when you first experienced Super Mario on N64 when you first experience Gamecube.

Now that we saw Luigi in the Gamecube footage in the ghost house, will Luigi be a predominant character in the next Mario game?

Well, actually for yesterday's video we were tentatively calling it *Luigi's Mansion* but there are many familiar faces that you will see but at this point in time we unfortunately can not tell you any further. I actually had more to show yesterday, but the PR division strictly said 'no'!

Tell us about the controller.

This Gamecube controller is the one on which I spent the longest time designing. Even a beginner who has never touched the controller can use it, your grandmother can use, or children with small hands can use it. I think it's already three years or so since I first started working on this controller design.

And the carry handle?

We wanted to promote the image that this is something that is going to be played by the whole family, and that it is not some audio/visual equipment that is going to be put somewhere and not moved.

You have said that the next Mario is going to be more mature?

Well, by that I didn't mean that Mario is going to be the game for adults, but rather the character is going to look less childish. I'm not saying that Mario is going to be like *Conker's Bad Fur Day!* You have seen Luigi's image in yesterday's footage, and I think that you would agree that Luigi is less childish now.

Is the PlayStation2 a threat to Gamecube?

I don't feel the slightest threat from the PlayStation2, and very frankly speaking, I am not too concerned about the existence of the PS2 at all, because we have created the hardware and will create the software that will become the requisite for everyone even though they already have the PS2. That is why I'm not too concerned about the PlayStation2.

Seems that with PS2, Dreamcast and Gamecube, there's a console war coming.

Well, we certainly don't have the intention to fight against anybody else, and don't think that we are cowards, but we are working on the 'weapons' which is to make fresh and exciting games. It's not like "who's winning and who's losing", and as long as 'war' or 'fighting' is concerned, please count us out. We like to go our own way.

MARIO'S SUPER COURTS! Mario Tennis

Tennis chiefs surprised the world today when they opened up their special courts for the entire world. Until now these courts were thought of as figments of the imagination but, after a strong lobby from an Italian Plumber and his brother, tennis players around the world will soon be able to play on the finest courts. In a compromise to the big chiefs a standard has been set that must be attained before players are able to use the courts. To unlock Baby Mario and the Yoshi Court you have to beat the Mushroom Cup in a singles tournament while playing as Yoshi. For the Donkey Kong court you have to win the same cup as above while playing as Donkey Kong. To play as Donkey Kong Jr just complete the Star Cup doubles tournament - you can play as any character you want. For Shy Guy win the Star Cup in singles mode. Finally, for the Super Mario Court you must use Mario while winning the Mushroom Cup in singles mode.

DOLPHIN FRIENDLY FOOTIE! Ecco The Dolphin

Of all the tips we've run since Tips Express first went to the printers, this has to be the strangest one ever. Yes, we've grown our own Chaos in *Sonic*, we've danced with secret onions in *PaRappa*, but dolphins playing football?! Come on! To try this yourself go to the Powers of Levitation level. You first have to swim to the central building (the large one underwater) and go round it until you find an Information Shard. Go into the building here and go through the tunnel until you get to an oval door. Keep going (ignore the odd see-through doors on the sides until you get to into a chamber where you'll find a Clan member along with a bubbler in the centre. Still with us? Turnaround and face the entrance. Now look for an oval shape on the wall which seems to be moving with the current and swim through it. Inside this secret room there's a Stealth power-up - take this and head right back until you find two yellow lights. Now, touch the right one with your nose and you'll be taken to Dolphin's World Championship. Congratulations, you're now sharing the oddest cheat we've found. Let us know how you get on.

SPIDER-MAN

TIPSTER

Kelvin Gan

Welcome true believers! We've jangled out spidey senses to bring you this amazing guide to Spider-Man and the location of every single one of those 32 comic covers!

COMIC NO. 1

It's the very first cover to collect, it's the very first issue of Spider-Man and it's hidden in a really clever location.

Just take a look at the Fantastic Four's Freedom Plaza. Magnificent isn't it? Well let's swing on over there!

Now check it out! Here it is, in all its glory. This first cover features the Fantastic Four themselves when Spidey first met 'em.

COMIC NO. 2

This cover is to a story that pretty much made Spider-Man the hero he is today. The moment he learned who killed his Uncle Ben.

And it's hidden in the bank of the Hostage Situation level, near the first vent under a chair in a cubicle. Sneaky, huh?

COMIC NO. 3

Poor Spidey, there's been so many deaths in his life. It's amazing how he always manages to crack a joke these days. Bless 'im.

In your quest to Stop the Bomb, take out all the thugs first and make sure that the innocent hostages get away safely.

Then head back into the corridor where there were just two thugs. There's your cover. Now chuck the bomb into the safe.

COMIC NO. 4

The first ever appearance of Peter Parker's wife, Mary Jane. Aunt May tries to fix 'em up even though Pete's with someone else.

Anyway, it's on your Race to the Bugle, after Scorpion's made his loud threat, just on the left column of buildings. Not hard to find!

COMIC NO. 5

Look at that tacky costume for the Scorpion. Well, that's the Sixties for you. The fool made himself into a monster to kill Spidey!

But Spider-Man's a tough nut himself. To get the comic, you've got to destroy all the furniture in the first room.

There it is in the middle of the room. Now get back to fighting Scorpion before he kills your charming boss J. Jonah Jameson.

He'll hit you after you crack him three times, so make a jump and use your Web Spikes. Remember to use the remaining furniture.

COMIC NO. 6

Spidey and Daredevil are good pals who know each other well these days. Their first encounter was truly momentous!

As the police chopper chases you find the box on the right-hand back corner of the last building. There's your comic!

COMIC NO.7

Most probably Spider-Man's true arch-nemesis, the Green Goblin is extremely deadly and totally insane. The rascal!

As you're Chased across the Building Tops, there's a crane graffitied with a pumpkin. Enter, if you dare! Ooooh... Creepy!

Spidey will say, "Hey, I wonder who lives here?" Well it's obvious it's the Green Goblin. Who else would have pumpkins?

COMIC NO.8

Not so long ago, Peter Parker lost the first woman he ever loved - his Aunt May. But it turned out that it wasn't her. What gives?!

Before you Scale the Girders, go down the side of the building to the ledge, and retrieve your prized comic book cover fan boy!

COMIC NO.9

The original Green Goblin had a son, who went a bit loopy himself. This comic is the first ever appearance by the lad.

Evading the police, let the men of the law shoot the skylights for you and then drop down. How helpful of them, those nice cops.

Use your L1 targeting to find which section turns the sights purple, then fire away to reveal a hidden room. How secretive!

And there it is, your comic. Just how on Earth did all these comics get into all these places? Somebody must be mad to hide 'em.

COMIC NO.10

Yikes! It's big mean old Rhino! He's a real tough boy but, unsurprisingly, oh so stupid. Experimentation made him this powerful.

When Rhino makes the third stroke of his foot, he's about to charge, so jump out and let him smash into all the barrels.

Once they're all destroyed, the comic appears. Now make him smack into all the pylons repeatedly until they're gone.

COMIC NO.11

Spider-Man and the Fantastic Four's Human Torch are best buds too. They've been good for each other over the years. You guys!

Chase Venom up into the building under construction and head left. Hey presto! It's right in the corner with a Spidey-Armour.

COMIC NO.12

Black Cat was once Spider-Man's special lover. She was someone who could understand the crazy world of superheroes.

Follow Venom after the sequence in the building. The second building he jumps to has a comic on the right hand side.

COMIC NO.13

Spidey came into contact with the alien suit on Galactus' ship during the mini-series, Secret Wars. It's totally funky, but a bit evil.

When you're in your fight with the current wearer of the alien costume, Venom, head over to the car and pick it up.

The comic's here. To deal with Venom, use your Web Balls and keep Web Spikes on when you have fisticuffs. He's not tough!

COMIC NO.14

The first appearance of Peter's clone, Ben Reilly, the Scarlet Spider. Ben thought himself to be the original Pete until he died.

Run through the tunnel of the Sewer Entrance until you get to the big cavern and trek back to where the Lizard Men were.

COMIC NO.15

Probably the most beautiful Spider-Man comic cover, with the special silver metallic ink for the webs. It's a real modern classic.

After Spidey's hinted to use his L1 targeting system, swing over to the waterfall in the distance as there's a secret room behind.

The L1 target will determine whether there is something behind the water, so make sure it's the right one to get the goodies from.

COMIC NO.16

Spider-Man's relaunched recently, going from issue numbers well into the hundreds back to number one again. How lame!

In the Sewer Plant level, head down the corridor then take a left. Take care of those nasty Lizard Men on your way.

The comic is nicely placed behind a big box thingy, with a Web Cartridge for you to have. Isn't this game just really ace?

COMIC NO.17

Another of those recent numbered ones, looking pretty cool. In the Hidden Switches level, you've got a bit of work to do...

Once you've pressed the fourth switch, swing on back over to the third switch and it's right there in front of you.

COMIC NO.18

There was a time when Spidey was accidentally endowed with super-cosmic powers that made him near omnipotent. Wo.

In the Tunnel Crawl level, flick the switch on the first box and make sure you don't fall. There's a Lizard Man here as well.

Jump back to behind the second switch box and take a look. It's the comic book cover! There should be a pick up too.

COMIC NO.19

Doc Connors has been a great friend of Pete's but, unfortunately, he's also the dodgy-in-the-head Lizard.

When you're crawling around in the Lizard's lair, take the first available right, cross the stream and handle Venom first.

Have your chat with Mr Lizard then just turn around. Wow! It just popped out of nowhere! Take Lizard's instructions now.

COMIC NO.20

'Face it Tiger, you just hit the jackpot' were Mary Jane's first words to Peter Parker. Wow, what a doll! Now go rescue her!

This comic's in the ventilation shaft near a hostage on the Symbiotes Infest the Bugle level. They're so slimey!

COMIC NO.21

This here's the hundredth issue of the Amazing Spider-Man, a very rare classic. It's still quite old though. What a gem!

Down the elevator shaft. Before you get into the door that lets you into the next level, the opening on the left has the comic.

It also has a few of those nasty Symbiotes making a nuisance of themselves. Splodge the mothers and get the comic. Now run!

COMIC NO.22

Peter decides to give up being Spider-Man as people mistreat him. This issue's also the first appearance of the all powerful Kingpin.

Inside the Stop the Presses printing warehouse, next to the third generator is a stack of rolled paper. Just pick it up.

There's your comic, amid a horde of nasty alien Symbiotes for you to get rid of. Take out the generators first as they spawn.

COMIC NO.23

Mysterio's an old has-been special effects expert with delusions of grandeur. He's so silly, he decided to turn to crime. Tsk!

Where there are four pipes after the generator room that're leaking, hit all of them when the target turns purple.

After they're all gone, you're left with a secret section where your comic is and a Flame Web Cartridge. Shoot the symbiotes!

It's time for a showdown with Mysterio. Start from the bottom, keep running right and never let him catch you.

You have to destroy all those sentries on his joints. Each takes about three hits before he goes for you. He's the toughest boss there is.

COMIC NO.24

Drop down to the bottom ledge and get your comic. Take out just one of Mysterio's lasers first and stay on that side to get the other.

COMIC NO.25

AMAZING SPIDER-MAN
25 OF 32
BACK

The Punisher, a crazy vigilante who doesn't like anybody who's even just slightly bad. He's a bit nice to Spidey in the game though.

In the Waterfront Warehouse level, just head over to the second room and there you will find your comic.

COMIC NO.26

AMAZING SPIDER-MAN
26 OF 32
BACK

Kraven was another nutter who fancied himself as the ultimate hunter. He tried to hunt Spidey down for a laugh.

Before jumping down the hole to get to the next level at the very end, pop across and open the door to the secret room.

There'll be some extra health, a Web Cartridge and your special comic book cover. Now jump into the hole.

COMIC NO.27

AMAZING SPIDER-MAN
27 OF 32
BACK

Here's one with the old man Vulture, who later makes himself young again. What a bird brain though. Look at this guy!

Swing over the crazy Underwater Trench level to the second machine room. You'll find a switch there to press.

Hit the switch and head back to the start of this level. Make sure you make a run before zipping a line to get across.

Pick up your goodies, then continue on to the end of the level. It's nearly time to face the enemy behind all these capers.

COMIC NO.28

AMAZING SPIDER-MAN
28 OF 32
BACK

Spider-Man of 2099 was a real tough nut. He had loads of super senses in his eyes, claws and web came from his actual hands!

In the Stop the Fog level, climb down that central column and enter the secret room. Now get your comic and rescue Black Cat.

COMIC NO.29

AMAZING SPIDER-MAN
29 OF 32
BACK

Dr Octavius himself was one of Peter Parker's science lecturers, but he went a bit nuts like people do in this crazy world.

Run around, avoid Dr Octopus' hits and when a switch drops down, flick it with a Web Line. A yellow light appears when it drops.

Run in when his shields are down with your Web Spikes and after the shield regenerates quickly look around you.

You'll briefly see the comic so be quick to get it or you'll have to start all over again. Keep attacking Dr Octopus until he falls.

COMIC NO.30

AMAZING SPIDER-MAN
30 OF 32
BACK

Now's the time to fight Carnage, who is himself a spawn of Venom's alien costume. Eeew! These things breed like bugs!

This character really is a complete psycho, so be careful when you fight him. Wear Web Spikes and punch him into the centre.

In the middle of the room is the comic as well. Be careful not to get hit by the sonics yourself when you go for it.

COMIC NO.31

AMAZING SPIDER-MAN
31 OF 32
BACK

The classic first ever Spider-Man cover with his funky black costume on. This was a real treat for the 80s kids.

Carnage has been defeated and the alien scarpers off. Cassidy, the nut job, is all that's left but where's the alien gone to?

It's bonded with Dr Octopus to create Monster-Ock! It's time to get running for your final level. Run boy, run!

Don't run away from Doc Ock, as jumping's faster and better. The comic's by the first bend in the pipe.

The very last comic is by the corner of the second level, three quarters of the way to the end. It's tough to get when being chased.

Get to the end, and you're lucky to escape the radioactive explosion. Wow, what a hero Spider-Man is! But he's not the only one...

... as he ends the day with a nice, relaxing game of cards with his superhero pals. Hurray for the Amazing Spider-Man!

TIP OF THE MONTH

Resident Evil Code: Veronica

Deal With Tyrant
To kill Tyrant without taking any damage, fire 24 gunpowder arrows at him with the bow gun. Turn around and fire at the release mechanism and Tyrant will fall out of the aircraft.

Items For Chris
When playing as Claire on the first disc make sure you save some items in the military training facility and the airport. You may also have to save some items in the Antarctic as Chris will have to go to these places and will need equipment.

Dealing With Papa Ashford
Before fighting Father Ashford, make sure you put some guns and ammo in an item box along with some gunpowder arrows in case you run out of sniper bullets.

Extra Grenades
Before rescuing Claire as Chris, put your shotgun in an item box. When control returns to Claire, put it on the hooks in the first room to get some grenades.

Bat Trouble
There are three ways of getting past the bats. You

can shoot them all (wasting tons of ammo), walk through the area as they only wake up when you run, or equip the lighter - you see, they hate fire.

Draw Combinations
To open the brown draw in the room full of different coloured draws, use this combination: Red, Green, Blue and finally Brown.

PERFECT DARK (N64)

Complete All Challenges

Go to Two-player mode. Set up some easy settings (eg, Meat Sim on your favourite arena with first one to three points) and then save. Now get player two to go to the load screen, but DON'T actually load the setting yet. Instead get player one to choose the challenge which you wish to complete but DON'T start the challenge as yet. Leave everything at the 'Quick Go' options screen. Player two now loads the settings and then immediately drops out. Player one now starts the challenge.

You should find that the easy setting you put in has been retained, but that the new Challenge is instantly completed. Neat eh?

COMMAND & CONQUER: TIBERIAN SUN (PC)

Harvester Death

There is a splendid way to wipe out part of a base using harvesters. Fill the harvester with Blue Tiberian and then take it to the enemy's base using a carryall. Park it next to an important structure and wait for the enemy to blow it up. As soon as it detonates it takes out a large chunk of the building's defences.

Unit Combinations

Another way to destroy most of an enemy base effectively is to build one ghost stalker, two medics, one amphibious APC, one mammoth tank, two disrupters and four carryalls to transport your

task force. Drop this little lot in the middle of a base and their attacks and efforts of self preservation will ensure you destroy numerous buildings before dying.

EMP Madness

Build a MCV and EMP unit. Once the EMP is charged, fire it into the base and then move in your units. By this time most of the enemy units won't be working, including their radar. Pick off all the confused units and take out the base, but note that this attack is rather expensive.

ALIEN TRIOLOGY

Okay, this is one of the best cheats we've seen as it's so easy to remember. For the ultimate cheat, which gives you all weapons, unlimited firepower, invincibility and opens every level in the game enter the password '1GOTP1NK8C1DBOOTSON' - see, we said it was a weird one. If this cheat is too much for you, here's a very useful Level Skip. At the password screen enter 'G0lv1 XX' where XX is the level number you want to skip to. For example if you're jumping to level 12 you would type 'G0lv12'. If the words 'Cheats Enabled' appear on the screen you've got it right. If not, try it again.

1080° SNOWBOARDING

Dear GM

After buying *Perfect Dark* I've kind of rediscovered my N64. One of my favourite games was *1080°*. Can you remind me how to get the extras for the game please as I've forgotten.

Simon Wandering, Bristol

What a game! Like you, we'd forgotten just how wonderful this title really is - can you imagine it on Gamecube! Okay, so here's how to open the Bonus Courses. In the Match Race beat the six courses on Expert mode to unlock the Deadly Falls course. If you only beat five courses on Hard mode you'll unlock the Dragon Cave course.

To unlock the extra snowboarders you have to follow these procedures exactly:

For the Golden Snowboarder you have to finish the Match Race in expert level using the Crystal Snowboarder. After you've done this, go to the player selection screen and choose Kensuke Kimachi. As you confirm your choice remember to press C-Up and A. To try the Panda Boarder you have to finish a match race in Expert level, come first on all courses in the Trick Attack mode then get all three first places in Contest mode. Now go to the player selection screen and pick Rob Haywood and confirm the choice by pressing C-Right and A. To play as the Iceman win a Match Race on Expert level and beat all the EAD score on Trick Attack and Time Attack modes then press the C-left button and then the A button as you choose boarder Akairi Hayami.

LMA MANAGER

Dear GM

Now, winning the game as Manchester United or Liverpool is pretty easy so I've decided to try as one of the lower league teams... Swindon. Just in case it's too hard can you tell me any tips?

John Morris, Leicester

We see why you might want some help. It's so easy to play as one of the bigger teams, but you really have set yourself a challenge here. Hopefully these cheats should make your path to glory that bit easier. To activate them go to the Create Player option and enter the cheats below as the player name.

- Build Stadium Faster.....quick dry cement
- Quicker Healing.....witch doctor

THE place to get your games. On 0845 201 0444.

It's your compilation so settle down for the best of the best. No skipping to the end now...

Finally, after a thousand man-hours of vote sorting here are the Top 100 Games according to YOU, our beloved readers.

We've added up all your votes and one of you will be walking away with Gameplay's prize of 100 games of their choice! But first let the games begin. In reverse order, of course...

100 GOLDEN AXE

Gilius the dwarf, Ax the bloke and Tyrus the lady, ride dragons and smack up goblins in this classic scrolling beat-'em-up that was a MegaDrive essential.

95 DONKEY KONG 64

Rare's ape odyssey was the Christmas hit of '99. A game so big that it needed the expansion pak and the whole Kong family to play it. Big, beautiful, bananas.

90 C&C TIBERIAN SUN

It's a bit of a newy but has proved so cunning, so clever and so involving that you felt you just had to have it here. A glimpse of the future for realtime strategy.

85 CHRONO TRIGGER

Early gaming excellence from Square. Time travelling adventure with Chrono and his cronies. Recognised as the best RPG on the SNES.

80 MICRO MACHINES 2

Tiny cars in a big world. Crazy idea, brilliant game. The MegaDrive sequel proved more popular than any of the 3D follow ups. Sheer mini-mightiness.

75 COMMAND & CONQUER

As influential on PC gaming as Quake. This realtime strategy diamond defined the shape of point 'n' click mayhem that's still being copied today.

99 LEMMINGS

The most successful anti-rodent euthanasia game ever. Simple concept - stop the lemmings from popping their corks. DMA's classic was pure gameplay.

94 JEDI KNIGHT DARK FORCES

Enjoy this first-person Jedi adventure you will. Lamp people with your light saber you must. Action, adventure, and big fights these things a Jedi craves not... not!

89 FINAL FIGHT

Like an angry Ken Livingstone, you take Mayor Mike Haggar, and two other fellas, and smack folk about till they don't move no more in this 2D scroller.

84 TOCA WORLD TOURING CARS

It's only just come out, but its earth shattering brilliance moved enough copies to sneak it into the top 100. One of the Codies brightest moments.

79 JET SET WILLY

A classic from a time when the games world was a much simpler place. This sequel to Manic Miner was written by Matthew Smith in his bedroom.

74 SYNDICATE

From the days when Peter Molyneux released games and didn't just talk about them. A bionic assassin kill frenzy, this multi-formats itself into the Top 100.

98 ALEX KID IN MIRACLE WORLD

The Master System's answer to Mario. Save Radactium city from the evil Janken by leaping on platforms. An '86 hit, a cool retro vote. Well done.

93 SIM CITY 3000

Govern the little people. Watch as their city grows. Nurture them... then send natural disasters to kill them all for you are a vengeful God! Oh, yes!

88 SONIC ADVENTURE

The first DC game in the 100. Not the Mario 64 beater it hoped to be, but still the centrepiece of the DC launch. He just can't get enough of those rings!

83 SUPER MARIO BROS

Mario's scrollin' debut that shifted quite a few NESs. Laid the foundations of the gameplay that has made Mario's the world's favourite games character.

78 KUNG FU MASTER

Scrollin', scrollin' scrollin' keep your fighting scrollin'. Batter midgets, knife throwers and vases just to get to the elevator in this surprise retro entry. Hiya!

73 RAINBOW ISLAND

The story of Bub and Bob, two dinosaurs (who turned up in Bubble Bobble) with the power of the rainbow at their side. Cutesy puzzling Amiga magic.

97 TOMB RAIDER 2

Lara's second coming came in winter 1997. No longer just a games character, now a cultural icon. More tombs, more raiding, mo' money.

92 DIE HARD TRILOGY

A victory of gameplay over movie license. This three-in-one package was the hit of '97. Run around, shoot people then hit them with a car. Yippee kay aye!

87 NEW ZELAND STORY

2D platformer starring an arrow shooting Kiwi rescuing his friends from an evil walrus. They don't make them like this any more... they really don't.

82 BREATH OF FIRE 3

Not an obvious choice for the Top 100, but this Capcom RPG about a bloke called Ryu who can transform himself into a dragon is still a favourite.

77 AGES OF EMPIRE 2

When two tribes go to war... it's the one that points and clicks in a more clever way that wins in this life absorbing, Empire ruling strategy game.

72 RESIDENT EVIL

Big scary house full of zombies with only your wits and a little ammo to rely on. And who can forget the classic dog through window bit. A true Capcom classic.

96 BOMBERMAN

Bomberman's first appearance on the SNES. A bit of a dog as a one-player game but was the dog's as a multi-player experience. Explosive stuff!

91 MIDTOWN MADNESS

Putting a little fun into the Scotsman-tight world of the driving game. Bounce around a city hurting other cars with your own. It's not serious, but it's good.

86 GRAN TURISMO

When this came out in '97 no other driving game came anywhere near. Became the benchmark by which all over driving sims were judged. Perfection.

81 ELITE

This free roaming, space trading, combat adventure is one of the most influential games ever. Non-linear, beautifully crafted and bigger than Jesus.

76 ECCO THE DOLPHIN

One of the MegaDrive's defining titles. Wet and weirdly wonderful action adventure with a mammal in a big pool of sharks, tuna nets and alien life forms.

71 NIGHTS

Mid '90s offering from the Sonic Team. As a mental acrobat you must save the world of dreams from evil by flying through rings. Freakily unique...

70 ISS PRO '98

Konami's N64 soccer classic. Seen by many as the best football game ever. Combines fast and furious footie with sophisticated AI and detail. Lives slightly in the shadow of its PlayStation cousin, but is a legend in its own playtime.

69 FLASH BACK

The third Amiga representative in the top 100. It's sci-fi conspiracy time with this alien battling adventure. Broke new ground with its motion captured animation and its heavily detailed interactive environment. Top stuff.

68 ALIEN VS PREDATOR

One of the scariest videogames about. Play as a tooled up Marine, the invisible Predator or lightening quick Alien. Rebellion created an absorbing movie feel and combined it with some major dynamic gameplay.

67 UNREAL TOURNAMENT

The only game that can match Quake 3's electric paced deathmatch action. The mission-based one-player challenges are inspired, but it's the multi-player fun that really shines. So good that a whole TV show is being based on it.

66 SENSIBLE WORLD OF SOCCER

The second football title in the countdown and a legendary title. Not the sexiest looking game in the world but it had a great personality. This top-down beauty is reason alone to not bother with the PS2 or DC and go and find an Amiga.

65 DEUS EX

A fairly recent addition to the first-person shooter world. A blessing of stealthiness, a touch of the RPGee-bies plus you get to shoot people in the face! Time will tell if this is an enduring classic but for now it's more than welcome.

64 GAUNTLET

There was an elf, a barbarian, a butch lass... and an old man in a pub. Only kidding! They all teamed up to kick serious ghost and goblin butt. A star coin-op conversion when leg warmers were a serious fashion option.

63 G-POLICE

Not the sexiest game to look at and it showed the PS's limitations quite early on, but it tried to be different and we all appreciate a trier. Capture flying pirates in your airborne squad car. Early magic from Psygnosis.

62 BLAST CORPS

It's Rare again proving how deft and how flexible they are at making games. Get big trucks and then destroy bigger buildings with them. Simple idea again, but devastatingly effective. A bit short on lifespan but you've kindly overlooked that.

61 TOMB RAIDER

The game that created the marketing beast that is Lara Croft. But it was the intricate level design, the superb animation and thigh slapping gameplay that made this such a hit with PlayStation owners. The pretty lady helped though.

60 SUPER METROID

One of the best platformers on the SNES and proof that good games don't die, they only get mentioned in retro round ups. You're the sparky lass Samus as she takes on the evil Zebes to kill the mother brain. Obviously.

59 SUPER MARIOLAND 2: SIX GOLDEN COINS

Mario on Game Boy, what a great idea. This 1992 smash was the nearest you could get to having Super Mario World in your pocket. This is also a substantially meatier Mario trying to compensate for the GB's titchy screen. Bless.

58 SONIC THE HEDGEHOG 3

It's pleasing to see a healthy Sonic showing in the Top 100, this being one of four entries. More ring collecting, sound barrier breaking fun from the blue one as the series peaked before all going a little gimmicky. Phat and frantic.

57 ROLLERCOASTER TYCOON

The best of the fun-park sims. Design your own vomit inducing ride and reap all the rewards. Live the dream! Pure, compelling gameplay with neat graphics to match. Very daft, very addictive and very nearly number 56, but not quite.

56 MEDAL OF HONOUR

EA's WW2 shoot-'em-up may have looked a little iffy on paper, but you don't play games on paper do you. The PS struggles to make it look smart but it's rich atmosphere makes up for it. Who'd have thought war could be so much fun?

55 POKEMON STADIUM

The recent N64 smash Pokés into the Top 100. It looks nice, it's easy and it's got loads of Pokémon in it. However, this owes its respectable placing to the recent Pokémania rather than any enduring quality. Oooh, how cynical.

54 MORTAL KOMBAT 2

It's the MegaDrive version of the nasty smack-about that gets a nod in the top 100. The series was tainted by the endless streams of specials, but this had more punch than Judy - and still has more shoulder pads than Dynasty.

53 CIVILIZATION 2

The God of all god-sims. Guaranteed to swallow up your life whole and rip you away from your friends and loved ones as you attempt to create a civilisation and destroy others. As de-tailed as a Manx cat. Oh yes.

52 KING OF FIGHTER '96

SNK's 2D scrapper gets a mention in its '96 vintage. Not many of us got the hulking NeoGeo console to play it on so it was down to the Arcade to hammer on this tag team, international beat-'em-up. It doesn't look that pretty, but it was top.

51 ZERO TOLERANCE

It's amazing what ancient gems get dragged up for these types of votes. This MegaDrive first-person adventure has you killing lots of aliens because you don't like them that much. It's definitely not great, but it's there.

50 WORMS

The multi-player game that really brought out the worst in everyone. Tiny teams of worms, angry at the world, get guns and attack each other. Doesn't sound that great but it's another simple idea that was deadly addictive.

49 VAGRANT STORY

More turn based fighting joy from Square, the masters the RPG. It's dragon worrying time in a game that, although quite linear, draws you in with its realtime action. Another PlayStation classic in the Autumn of its illustrious life.

48 THE SIMS

Carve out an existence for a virtual person and spend hours organising it as your own life slowly falls apart. More absorbing than Pamper and Huggy sponge cake. Another EA entry and, please note, none of them are sports related.

47 SOUTH PARK RALLY

Okay... interesting. South Park Rally makes the top 50 games. A very different choice, but it's tickled the fancies of enough Cartman, Stan, Kenny and Eric fans to claw its way in. You guys are crazy! What we mean is you're mental.

46 SEGA RALLY

Many driving games have surpassed it in terms of quality, but the memory of Saturn's finest still lives on! It actually manages to keep out the DC follow up. Stood on its own as the best driving game around for a lengthy time.

45 KID ICARUS

Another NES game that still gets respect. You handled the winged Kid as he tried to save a Princess from Medusa. One of the first platformers to scroll vertically, not just horizontally. They were simpler times...

44 BANJO KAZOOIE

A bear and his bird simulator from uber-N64 coders Rare. It was the UK developer's attempt to do a *Mario 64*. It never reached those heights despite its technical tightness, but is still very welcome in here in the top 50.

43 TONY HAWK'S PRO SKATER

The first extreme sports game to capture the adrenaline-fuelled thrill of defying gravity on some wood. Neversoft have created a game that will have many imitators but not many real challengers. And number two is even better!

42 SOUL REAVER

A real dark gem of a game that didn't sell as well as expected but richly deserves its top 50 positioning. More bite than Mario and more soul than Trevor Nelson's record collection. Oh so dark...

41 RESIDENT EVIL 2

Capcom's follow up to the genre defining survival horror classic. Claire and Leon face the terrors of Raccoon city as the Umbrella storyline starts to gain momentum with action doubles from the ammo starved original. Chillin'.

40 GRAND THEFT AUTO

It's oh so good to be bad, and this is so bad it's good. The sequel obviously didn't go far enough to beat this crim sim which proves that graphics can be as simple as owt as long the gameplay is something you'd kill for.

39 DEAD OR ALIVE 2

The only real contender to *Tekken's* 3D fighter crown and it's the DC version that really counts, with its superior performance. Big bouncing baps, bombastic beatings and barmy barnets. Simply a thing of booti.

38 LEGEND OF ZELDA: LINK'S AWAKENING

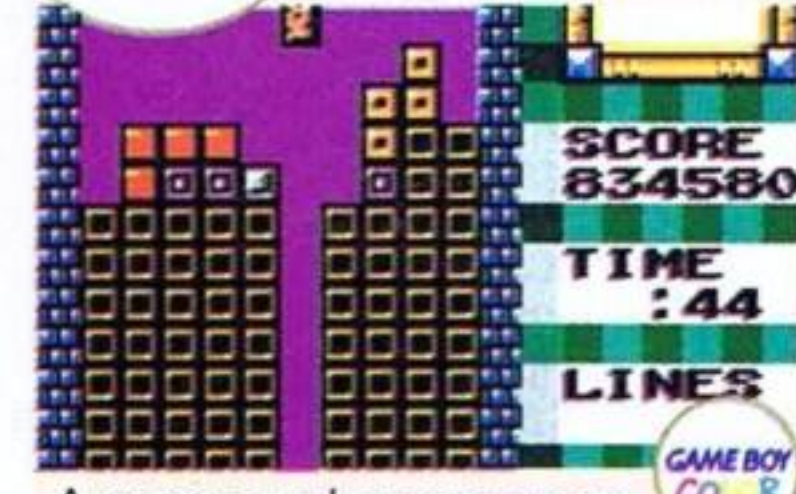

It may have been black and white and squeezed on a tiny GameBoy cart but it still had that Shigy magic in spades full. Gets in the top 50 despite being seven-years-old and needing a family sized bucket load of AA batteries to finish it.

37 YOSHI'S ADVENTURE

More Mario magic from the SNES. It's the most radically different of all the Mario 2D adventures but it still retained the bizarre imagination and killer platformer fun. The egg aiming took a bit to get used to but, hey, we'll let it off.

36 TETRIS

A games phenomenon. Even its digital ditty received chart success. Blocks tumble down and you have to stack them neatly to make them disappear. It wasn't that complicated but could only be played in 18 hour sittings.

35 SUPER SMASH BROS

A pure slice of Ninty weirdness that somehow is incredibly hard to put down. Another game that is taken to another level with the multi-player option. Hey, we've all wanted to smack Mario in the face and here is a very rare opportunity.

34 SUPER MARIO BROS 3

This 1990 classic is the biggest selling videogame of all time. The true follow-up to the first *Super Mario Bros*. This is a mammoth of a title stuffed with secrets, characters and action. A game only the Miyamoto can make.

33 COLIN MCRAE 2

Another recent release that has already managed to cement itself into gaming history and another inspired driver from those Fun-Bobbies at Codemasters. Deeply detailed it's a ferocious ride through deep grime.

32 CHAMPIONSHIP MANAGER 2

The king of the management sim that appears in its most popular of forms - the number 2. Crammed with enough stats to send Motty spare and immensely addictive, this proves that the true home of the bo selectah is the PC.

31 RESIDENT EVIL 3

The pinnacle of the *Resident Evil* series in terms of gamplay. Capcom crammed a Hammer House full of horror and action into 20 hours of compelling gameplay that rewards replay after replay. And Jill has never looked sexier.

30 SONIC THE HEDGEHOG

The first outing on the MegaDrive for the most famous blue hedgehog in the world. It brought supersonic speed to plodding platforming and gave us new respect for those tyre loving bread and milk-munching balls of fun.

29 DRIVER

A 1999 triumph for Reflections. More bad-boy racing action that captures the atmosphere of the '70s movie obsession with car chases, soggy suspension and fuel guzzling motorised mayhem. A driving game with soul.

28 CRAZY TAXI

Aha! Yes we like this. Driving a car like a mentalist and then getting people to pay for the pleasure. The most successful of the mighty range of Sega's perfect Arcade to Dreamcast conversions. Sublimely daft.

27 PACMAN

While it's probably not the game we rush home to play everyday, it's been namechecked enough in acknowledgement of its once greatness. A incomplete pie-chart eating dots and avoiding ghosts in a maze... it couldn't fail!

26 WWF WRESTLEMANIA 2000

While it may not be able to compete with *Tekken* in terms of sophistication, this more than satisfied the thirst of N64 grapple fans. You can't beat a good wrestler! Well you can actually, with a ladder for instance...

25 QUAKE 3: ARENA

The only *Quake* to reach the 100 club. Distilled from Deathmatch purity it's the sleekest and most cold-blooded first-person shoot-'em-up ever. This beats the numerous imitators with its unique atmosphere and heritage.

24 ZELDA 3: LINK TO THE PAST

Boy you lot just love the Linkster! The SNES incarnation of the pointy eared one didn't have the biggest map, but was still spilling over with hidden areas and secrets that kept you rivetted till the oh so satisfying climax. A classic!

23 TEKKEN 3

One of the finest 3D beat-'em-ups. Graced with instinctive controls, spanking visuals and lovable characters. Sadly fails to make the top 20, but is a deeply loved companion that was the gaming highlight of 1998. Roll on *Tekken 4*.

22 SUPER MARIO WORLD

The game that shifted millions of SNESs. It's that hairy plumber once again and this time he's riding Yoshi like a pony. The '90s have come and gone since this came out, but there's no beating gameplay that touches on perfection.

21 LMA MANAGER

I never though I'd see the day when a console management game would be seen as an all time classic, but such is the quality of the Dalai-LMA. It deserves your love and your money. Those Codeys must have magic fingers... and toes.

20 DOOM

Nice call people. The daddy of all first-person shoot-'em-ups. Where would PC gaming be without this? Forget about the plot if, there ever was one, this was just about slaying as much spawn of satan as possible before they caught up with you and gave you a good kicking. id's eye for the gratuitously violent has kept many people happy on numerous formats, but it's the PC that owes the biggest debt.

17 STREETS OF RAGE 2

Never has the scrolling beat-'em-up been done so sweetly. Sure, it was completely predictable but it was the pinnacle of the shuffling and shoeing genre that has since died with the 16-bit console. Mr X has kidnapped Adam - one of the heroes of the original - and it's up to his buddies Axel (the all rounder), Blaze (the quick woman), Max (the meat head) and Skates (the useless one) to rescue him.

14 SOUL CALIBUR

The next generation cousin of *Soul Blade* (which sadly doesn't get a mention). No other beat-'em-up, not even PS2's *Tekken Tag*, can match the brutal beauty of this game. It's fighting, right, but with big, sharp, nasty weapons and a range of pyrotechnic armed assaults that put the 'punch and kick' of the others to shame. Distinctive characters, stunning visuals and responsive slapping make this a truly something special.

11 MARIO 64

We all thought that this would race to the top five and even take the top spot, but it hasn't even manage to make the top 10! It's a wonderful title, one that changed games for ever and revealed the true potential of N64. Nintendo delayed the launch of the new console just so Miyamoto could finish this. No one will ever forget seeing Mario potter around in 3D for the first time. Breathtaking.

8 HALF-LIFE

Taking *Quake 2*'s engine Valve set about creating what charts here as the finest PC game ever made. The action takes place in a research facility where a portal to another dimension has been opened. Bugger. No other first-person title has ever grabbed gamers so firmly and not let them go till you were left with shredded nerves. A game that spilled over with tension, intelligence and memorable set pieces. Genius.

19 RESIDENT EVIL CODE: VERONICA

Asurprisingly high position for the DC *Resi Evil* representative. The gameplay has none of explosiveness of *Resi 3* and its a return to the monster slaying/leg work of number 2. But where it meets and beats all expectations is with it's stunning visuals. The *Resi* games always looked good, but with the 128-bit might of DC pumping through the evil, it's a joy to behold. Spiced up with a touch of the sniper rifles.

16 MARIO KART 64

The younger but stronger of the *Mario Kart* brothers. Equally as simple as it's predecessor but had the power to process four-way action which made it an irresistible multi-player option. Thousands of GamesMaster work hours have disappeared thanks to this game. So frustratingly addictive it crawls under you skin, possesses the mind and turns brother against brother, friend against friend, writer against writer...

13 ISS PRO EVOLUTION

This, my friends, is football. While other games may have the licenses and even the looks, nothing has come close to replicating the game of football closer than *Evolution*. The fact that it managed to better it's own predecessor was an achievement in itself, but its balance, poise and grace is something that must be cherished, loved and protected. The commentary is mind numbingly terrible, but this is indeed *the* beautiful game.

10 FINAL FANTASY 8

After the monster hit of *Final Fantasy 7*, this was under pressure to match its brilliance. And it didn't disappoint. The story of the surly Squall gathered its own relentless momentum and swallowed helpless gamers whole. With a much more mature look from the big-headed number 7, the sumptuous graphics blended with eye-cracking FMV sequences. No one makes games quite like Square. No one.

7 POKEMON

We did the 'mon a favour here, grouping *Red*, *Blue* and *Yellow* together. But, even if we counted them separately, they would have all still made the top 20! *Pokemon* is the gaming phenomenon of the last year and hasn't left the top 20 of the sales charts yet. It's turn-based battles and exploring aren't ground breaking stuff, but the sheer desire to 'catch 'em all' borders on the obsessional. Scary.

18 MARIO KART

It's the 16-bit version that we're talking about here. The one and only true original mini-kart racer that has spawned a sickly number of copy cat titles. It's a painfully simple premise of Mario and his closest buddies/worst enemies battling round a series of courses in buggys, grabbing power-ups to hurt each other with. Its bubbly gameplay still holds up today and is fondly remembered as the mother of all cutesy racers.

15 SONIC THE HEDGEHOG 2

Well, look at who's still amazingly popular after all these years. Yep it's the second of Sonic's MegaDrive excursions and one that touches the hearts of the GM community. Many complained that it didn't take too long to complete but for those who like to savour their special games, this was the Sonic of all Sonics. With *Sonic Adventure* peaking at 88, perhaps ol' prickly should make a 2D return.

12 GRAN TURISMO 2

Awelcome return of everybody's favourite *Gran*. It was pretty hard to better the near perfection of the original, but Sony pulled out the stops, stripped the engine, put in some new upholstery and created a masterpiece. It didn't arrive without a struggle though, as problems with the dirt track handling continually pushed back the release date but, early this year, we finally received and we were thankful. Amen.

9 WWF SMACKDOWN

Smackdown is one of the few grapplers that managed to match your love of those big men with 'awesome' gameplay. You could smell what THQ was cooking and it smelled very nice. Wrestling games usually have been as dynamic as watching two slugs hugging, but this gem perfectly captured the grace, nobility and beauty of smacking the Rock in the face with a metal chair. This truly layeths the smacketh down.

6 STREET FIGHTER 2

It's the cool original flavour of Capcom's master beater that has found a special place in our hearts and minds. This 2D combo-happy spectacular has inspired numerous *Turbo*'s, *Zeros* and *Ex*'s, a feature film and nearly every beat-'em-up since. The exploits of Ryu, Ken, Chun-Li and pals made the SNES an irresistible purchase and soon each special move became etched into your withered thumb. Nothing has bettered its intensity.

5 METAL GEAR SOLID

For many PlayStation owners this is the best game of all time. A testament to *MGS* is that it managed to live up to the huge expectations that had built up before its 1999 release. It managed to combine suspense, drama, action and humour with unique gameplay all wrapped in a tasty plot. Everything worked and made sense from hiding in boxes to smearing yourself in ketchup. A blessing from Saint Hideo.

4 FINAL FANTASY 7

This was the first time that an RPG really gripped the UK. Sure we had RPGs before but nothing prepared us for the majesty of Cloud's adventure. The game was interwoven with sub-plots, mini-games and an intricate story line that tugged the heart strings from the start. Throughout the whole journey you felt you were part of a living and breathing, vibrant universe of which you were a small but vital part. Proved that us Brits can handle any Jap madness.

3 GOLDENEYE

Goldeneye proved that it was possible to make a good game from a movie license. Well, not just a good game, a masterpiece. It's the first-person shooting adventure of the 007 film which keeps faithful to plot. Bond was great - you had the music and the gadgets - but as soon as you tried the sniper rifle for the first time or shot the guard in the toilet from the air vent, you knew this was extra special. The multi-player options were top notch and the whole thing was riddled with

secrets. Over 90% of N64 owners have bought this game and are still amazed despite it being three years old.

2 PERFECT DARK

Not only is this number 2, but this also managed to beat *Goldeneye*! Rare's follow-up to their Bond classic really took its time coming. It tested the patience somewhat but it was worth the wait. Is it really better than *Goldeneye* or is it just that you're still playing it at the moment? Anyway, enough about you, this is one humdinger of game that has is riddled with features and pushes Ninty's console to the limits.

1 LEGEND OF ZELDA: OCARINA OF TIME

Well, here we are... The greatest game ever made, ever. And it completes an all N64 top three! This would have been the christmas hit of '98 but the shops ran out of copies such was the demand. Knowing the quality of the earlier *Zelda* titles we all knew it was going to be good but nothing really prepared us for the sheer scale and beauty of the game. Miyamoto had always envisaged Link's adventures in a huge 3D world, but this was the first time he had a console that could fulfil his dreams. And he really went to town. The best game in the world from the best games maker in the world. Cheers Shiggsy!

WINNER!

I suppose you want to know who has won 100 game courtesy of those lovely people at Gameplay? Well a lucky chappy by the name of Simon Witt from Suffolk will be the one smiling when he reads this and here and his top 10.

GLOBAL LAUNCH!

Dear GamesMaster
It's happening all over again isn't it? No sooner do we all get settled in with our PlayStations, N64s, Dreamcasts and PCs than a whole new format war starts again.

So GM which should I buy? Should I get a PlayStation2 in November or hang about for X-Box a year later? And what about Dolphin? Is that going to be any good? We haven't got all the money in the world you know! When will console makers realise that we've only a certain amount of money and can only buy one machine really.

David Froman,
Carlisle

Yup, you're right. The warz are kicking off once more and once again you're going to have to choose which machine suits you best. X-Box, PS2 and Gamecube (formerly known as Dolphin) will all be great machines. The way to decide which to buy is see which plays the game you want. Of course, the only way to get all

the good games is to get them all... Not to worry though GM will be keeping you on the case as to each's games to help you choose which gets your cash.

DEAD HANDY

Dear GamesMaster
I think Sega had handheld gaming sorted about four years ago with their Gamegear which was a mix of Game Boy Color and Neo Geo. I have a both a Gamegear and a Game Boy Color, and while my GB is easier to hold, the other console is far superior. I'm not sure why it failed. If they released it now it would be great. Why don't Sega try their hand at producing a next-gen handheld to rival GBA?

Matt Cox, Manchester

It would be great if Sega got involved with handhelds again but they're having enough problems with the DC to start bringing out new hardware. Also the Neo Geo didn't last too long against the mighty GB, so it might not be worth the risk.

BOXED IN

Dear GamesMaster
To me the X-Box sounds pretty pointless. From what I have heard it will run PC games but, the thing is, this

can already be done, surprise, surprise... on a PC! It sounds like the X-Box is just a bunch of PC components in a... box. This worries me because PCs need to be constantly upgraded to run games. So the X-Box will be out-of-date in a few months as they probably won't be upgradable. I don't know if there will be games specifically designed for X-Box and, if there are, will they also be able to run on a PC? PC games need a certain amount of information to be stored on the hard drive which will no doubt be a problem when space runs out!

Michael Strepenson, Elmtree
The X-Box exists to go head-to-head with the PS2 so Microsoft won't risk constant upgrades as it gets us gamers in a strop. Have some faith in Bill Gates' boys. They may not be fun, but they're not stupid.

INNOVATIONS

Dear GamesMaster
You would think, with all the new talent coming into the industry, there would be some innovative ideas around. It seems that the

majority of adventure games still involve the 'hero' attempting to 'save the world' from yet another 'supremely evil' antagonist! Every advance for consoles seems to be driven by a desire to match the graphics of PCs without the same level of attention being paid to plot or gameplay. All I want to see is a rise in the quality of games on our consoles.

Sean Hegarty, Moston

There are still some great games coming out at the moment but you get the feeling we need another classic - a MGS or Mario 64 to set new benchmarks for other developers to aim for. Something fresh on a next-gen console perhaps?

LINE 'EM UP, KNOCK 'EM DOWN

Dear GamesMaster
Currently the console world is excited by the prospect of online gaming. People expect to be able to play *Final Fantasy 11* and *Metal Gear Solid 2* on the net. Well this ain't gonna happen. Look at the standard of these games. Any experienced PC gamer knows that they will not run smoothly, if at all. The data which needs to be transferred between consoles is far too high for a 56k modem, let alone a 33k like the one inside DC.

My mate's got *Chu Chu Rocket* and I was amazed at the lag, and it's only a puzzle game. Now imagine *Sega Rally* to see what I mean.

I would advise that no-one get their hopes up about online gaming for quite a few years. Even if Sony, Sega and Nintendo do supply direct, broadband transmission, the cost will still be too great for your average gamer. I think that console manufactures should leave online gaming alone and concentrate on making excellent multi-player titles for one to four players! Leave net gaming to the PCs.

Tom Gardham, York

Tom, Tom, Tom. Lets keep a little cheery. All the next-gen

consoles are gearing themselves for online gaming. As far as console manufacturers are concerned it's the future. And why is broadband going to be expensive? As more and more get online the connection fees will get lower...

gonna be lost in its physical form? And will we not be able to get our monthly dose of gaming madness from the local newsagent? Are we instead destined to plug ourselves into a phone line via a modem to get it? I'm all for the internet, but I'd hate to see GM on the web alone. I mean what would I read on the bus or bog? So please don't lose the GM we all know and love!

Tom Smith, Enfield

➤ Gabriel Knight 3

PRICE: £30 PUBLISHER: SIERRA

REVIEWER

Peter Lumley

Undoubtedly the best adventure game since *Grim Fandango* has to be *Gabriel Knight 3*. Although many people probably haven't even heard of this game, I feel I have to tell you all how great it is.

The plot basically involves yourself playing the parts of Gabriel Knight, and his assistant Grace, in pursuit of a kidnapped child from a remote French village. Sounds boring? Absolutely not! As the game progresses you find a story involving a search for the holy grail and vampire assassins.

Unlike many point 'n' click adventures, this one's completely in 3D as you move around some glorious locations. Be warned though, this needs a monster PC to run smoothly. The environment also moves from night to day and the music has to be heard to be believed with a classical score that perfectly sets the tone for the storyline.

Any PC owner should buy this game. It's fantastic and the only one I haven't felt tempted to sell in a long time!

Fashion tip. When hunting vampires, a white T-shirt is always a bad choice.

➤ Sonic The Hedgehog

PRICE: £10 PUBLISHER: SEGA

REVIEWER

James Hopkins

Although I now own *Sonic Adventure* on Dreamcast, I have recently set up my good old MegaDrive to experience, once again, the delights of the original *Sonic* game. For it's time, *Sonic* was a graphical achievement and is still recognised as a landmark in videogaming history. This was the first game I ever played on my uncle's MD, and I absolutely loved it. The graphics were colourful and a lot more detailed than any other platform game at the time.

The plot involved two objectives: collect the six Chaos Emeralds and defeat Dr Robotnik, the evil scientist who has turned all the animals into robots. The six levels were greatly varied, ranging from the countryside of Green Hill, to the ancient tombs of the Marble Zone. This game had me jumping over spikes, onto springs and bumpers, diving into water and crashing through rocks. Fond gaming memories indeed!

▲ A massive chunk of colourful fun and aerial thrills thanks to Sega and the first outing of their high-speed bush pig.

➤ Indiana Jones and the Infernal Machine

PRICE: £35 PUBLISHER: LUCASARTS

REVIEWER

Ben Jackson

Dust off your hat and whip because Indy's back in a brand new adventure. *Indiana Jones and the Infernal Machine* is a *Tomb Raider*-style romp starring the great man himself.

The game is set during the Cold War and you have to search 17 locations to find all the parts of the Infernal Machine, a device that could spell victory for the Russians.

Indy's up against an assortment of enemies in his quest including Russian soldiers, ancient robots and of course snakes. Not to worry though as Indy manages to carry a large arsenal inside his leather jacket including a machine gun, a bazooka and his trusty pistol and whip.

The main difference between this and *TR* is that there's a greater emphasis on the puzzles which gives your brain a bit more of a challenge. Unfortunately, the game does have a lot of bugs which does spoil the fun. All-in-all, though, this really is too good to miss.

Indy takes time out from adventuring to brush up on his German.

THE SCORE

90 to 100% Tippetty top cream of the crop. If you own the console, buy this!

80 to 90% A great game. If you like the sound of it you should get it in.

70 to 80% Neat enough but a little lacking. Still, if you really must have it...

60 to 70% A game scuppered by an annoying flaw or two. Shame.

50 to 60% Above average but only just. Spend your cash elsewhere.

40 to 50% Quite simply not very good. We played it - we didn't like it.

30 to 40% Oh dear. Perhaps the programmers should play some 'games'.

20 to 30% What the...?! This looks awful and plays awful as well.

10 to 20% Not a videogame at all but a device of mental torture.

Graphics: What does it look like? Does it move smoothly? Enough variety?
Gameplay: Does the game work? Is it satisfying and fun to play or a pain in the cheeks?
Lifespan: Is there enough of it? Will you be playing this title for months or mere minutes?

Judgement

GRAPHICS Perfectly acceptable, and you certainly get the impression of being airborne.

GAMEPLAY A bit muddled, what with multi-levelled racing and unclear combat elements.

LIFESPAN If you yearn to race a plane, you'll love this, but otherwise it's all a little tame.

❖ Bleeding Knees!

If you don't like the sight of your own ketchup, *Tony 2* may well be a little too much for you to handle. Whenever things go the shape of the pear, the red stuff is splattered everywhere!

▲ One of the multitude of ways this improves over the original is in the really NASTY looking knocks you can end up taking!

▲ Amazingly, even after being run over by a taxi, our boy Tone always bounces back for more.

▲ Happens to the best of us... you're just about to pull off the best trick of your career and an insane cabbie spoils it for you.

Tony and his hawk are back for more skatey action – and it's grindingly good!

Tony Hawk's Pro Skater 2

Videogames never disappoint in managing to throw up some quite improbable scenarios.

A bloke with an 80's called Solid Snake the star of the Best PlayStation Game Ever™? Nintendo's Mario series based around a short-arsed plumber with a dodgy 'tache? One of the most compelling games ever based around moves like the 540 Crossbone with locations such as Mullet Falls, Montana? Yep, they're all strange... but oh so true.

So – *Tony Hawk's*: a licence based around a bloke that no one had actually heard of beforehand charging around like some crazy-assed dude on a plank of wood on wheels. Funny thing is, *Pro Skater* was load of fun and offered addictive extreme sports madness that quickly turned people into adrenaline junkies who only lived for ridiculous high scores and the next outrageous trick.

MORE GOODNESS

Whether you're already addicted to *Tony Hawk's* mark one or have yet to discover the joys of virtual skating, *Tony 2* won't disappoint. There's no

messing about with this: just the flippin' best skater around.

If you've played the original, it all looks reassuringly familiar and, with the control system mirroring that of its predecessor, you'll be pulling off unlikely-looking combos in no time at

❖ Options Galore!

Once you've mastered the Career mode you'll still have the cool two-player games to go back to. Along with the Trick Attack, Graffiti and Horse options of the original, there's also a Tag mode!

▲ Even once you've got the hang of the Career mode, it'll take ages before you tire of the cool two-player games.

▲ Practise your best combos in Free Skate and then unleash them on your unsuspecting opponent to devastating effect!

▲ Burn baby burn! Once again there's a suitably punk rawk soundtrack but, sadly, no Dead Kennedys this time around!

Create-a-skate!

For the first time, you can create your own skater, altering everything from appearance to combos and abilities. We were particularly pleased with our choice of a 400lb five-year-old.

▲ The first step is to choose a name for your four-wheeled freak. Ours is called Mad Dog 'cos we just love rabid canines.

▲ Then you move on to a wrestling game-style create bit where you can make your blokey look as odd as you want.

▲ Pick a deck and you're away! Once you've earned some dosh from the Career mode you can upgrade your equipment.

The Best Bit

all. But while enough elements of *Tony* one have been retained to allow veterans to instantly feel at home, those forward-thinking folk at Neversoft haven't rested on their laurels, oh no.

Once you've torn the cellophane off the packaging, fired up yer old PlayStation and sent your mum out the room to fetch you a large plate of crisps and other assorted savoury snacks, you'll be wanting to get stuck into the Career Mode, which works in much the same way as it did in the first game. You begin with a measly one course to skate around in and, by achieving a certain number of points

and fulfilling certain criteria (a check list of goals appears before you start each level), you're rewarded with hard cash. Each successive level requires a certain amount of cash to unlock it – with a total of eight skate parks (ranging from Marseille to a Mexican bull ring) and some very tricky criteria to fulfil, this is something that will tax even the finest Hawk-meisters.

Yet another complexity that's new to this is that, rather than just being able to use your moolah to open up new circuits, you can also use it to purchase new tricks, improved stats and new boards. While this obviously means that in the short-term you've got further to go to making it to the next level, it gives you the potential for pulling off better moves, scoring more points

▲ There's loads of scope for creativity – virtually any object can be used to do a trick off. The question is, can you link them all together for a massive bonus?!

and, ultimately, winning more money. Strategy in an extreme sports title? Who'd a thunk it?!

HARD MAN

For while it is significantly harder to unlock everything in the game, its longevity for the single player is greatly improved. This is a true sequel in the sense that anyone who has mastered the first game, far from

... by achieving a certain number of points and fulfilling certain stunt criteria, you're skater is rewarded with hard cash...

BMX it!

▲ Head into the Options menu and you'll uncover a demo level of *Mat Hoffman's Pro BMX*!

▲ It's basically *Tony Hawk's* on two wheels instead of four but it still looks good fun.

▲ There's a different range of tricks you can execute. Remember the Bunny Hop? No?

Over Lander!

How you land tricks affects your score, with bonus points for a 'perfect' and deductions for 'sloppy'.

▲ You can earn extra bonuses for landing a trick perfectly. Easier said than done, though.

▲ You need to pull off each move as smoothly as possible and land firmly on all four wheels!

▲ Erk, it's all gone a bit wrong here. A 'Sloppy' means you're lucky to have stayed on your board.

Rampin' It Up Yourself!

Fret no more disgruntled skate park designers, here's your chance to come up with the course of your dreams – or nightmares! The option to include pits with large spikes in them does seem to be an overly sadistic element on the part of the developers.

▲ You begin with a bare shell of a room – but you'll soon sort that out.

▲ You can stick on as many stupid and crazy obstacles as you like.

▼ Try it out and you can fiddle with anything you want to change.

▼ We really don't like the idea of being impaled on any of those spikes.

Hmmm, nice. You can do a massive jump off that ramp straight into the post ahead of you.

You can adjust pretty much everything, even the starting points for two-player games such as Horse.

Stunt School!

The best way to approach the more tricky aspects of the game is to master the basics first and then build on them.

The trick is to be able to combine loads of stunts one after the other in order to make one really big one that rocks!

To earn really huge scores, you can combine tricks by linking them with Grinds – side sliding the board across rails etc.

New to *Tony Hawk's 2*, you can also link tricks using Manuals, which see you flipping the board onto one set of wheels.

mode though – as it is, it's just a matter of putting in the time in the Free Skate mode so that, after grasping the basics, you gradually build up the necessary skills. Which does make sense in a way – it's just how you'd have to learn to skate in real life, just with a significantly lower risk of breaking limbs.

Secret Skate!

Each level has its very own secret area to discover. Many of them can be opened up in some truly inventive ways...

Grind along the blades of that chopper and it'll launch itself skywards – taking a massive chunk of the wall with it!

... Which cunningly reveals an extra outside area. How cool is that! Isn't that what skateboarders say, eh?

Collecting tapes is one of the many tasks you have to complete in the Career mode, so keep an eye out for 'em as you skate.

▲ You'll quickly develop a special relationship with your plank that's stronger than any human one.

being able to waltz in and complete this in next to no time, will be faced with a whole load of new challenges.

While the handful of tasks for each level in the first game were fairly obvious – collecting tapes, collecting or breaking a number of objects – there are a lot more for each stage in *Tony 2* and they tend to be a lot more abstract, seeing you having to do very specific tricks on a particular obstacle – part of the task being to figure out where the obstacle is in the first place. Plenty to be getting on with.

How you land tricks is now as important as how impressive the trick is itself – so if you only just manage to land you'll be chastised for being 'sloppy' and docked points

▲ It's no good getting a really big air if you don't land it. You might as well stick your hand into a vat of acid.

accordingly. Pull off the much sought-after 'perfect' though and you'll end up with a tasty points bonus!

So while the learning curve is steeper for shy first-timers, it will last you longer than *Tony 1*. It would have benefited from some sort of tutorial

...the tasks for each level in the first game were fairly obvious, but now there are a load more which are a lot more abstract...

Makin' A Road Pizza!

Be-very-ware of the risk of being run over, whether it be by crazed cabbies or, erm, golf buggies!

▲ You wouldn't think people who drive golf buggies would be such sadists... or would you?

▲ Those yellow cabs have a habit of suddenly appearing from out of nowhere, rather unhelpfully.

▲ Ouch, now this really IS going to hurt. Get knocked off the track and there's a massive drop!

Air Today!

There are some massive drops that only the most hardcore should attempt – land wrong and you end up as a pitiful heap of blood-splattered limbs. They do give you loads of hang time though which means that you can perform some impressive tricks.

▲ It's vital that you land properly when doing tricks off big drops otherwise you'll crash 'n' burn in a rather unpleasant manner.

▲ You get bonuses for leaping over blind ledges – combine this with another trick as well for even more points!

▲ If you get bored of skating you can always copy this chap and start dancing like a spaz.

Spins A Web Any Size!

There are some really cool FMV clips to unlock – look out for the Hawkster dressed as Spider-Man!

▲ Seeing these clips makes you realise that some crazy fools really can do the tricks in the game!

▲ We reckon they'd be much better off filling that with water and turning it into a giant jacuzzi.

▲ Yes, that really is someone leaping between two tower blocks... on a skateboard.

screen Free Skate. Trick Attack is a straight head-to-head with the winner being the skater with the most points within a time limit. Graffiti is even more frantic with objects being tagged according to the

person who did the best trick off them. Horse is a variation on this in which you take it in turns instead of competing

simultaneously, with the loser being told in no uncertain terms, "You are a horse." The word 'horse' can, of course, be modified to read anything you like. Just be careful it's nothing too rude as your mum is liable to reappear with that tray of snacks at any moment.

SAME EYE PIECE

Looks-wise, there's no significant improvement though, and it's still prone to the occasional bout of glitching and pop-up – especially in the two-player split-screen games. Nothing you won't be able to handle though as you'll likely be so enraptured with the game itself.

Like all sequels should do – and, as a rule, don't – this

▲ The Tonester in all his glory. There are 13 characters to choose from in all.

takes its core from a classic predecessor, keeps all the best bits and then adds loads of cool extra stuff that wasn't there first time round. The end result being a compelling and, get this, value for money game that not only supersedes the original but complements it perfectly. Just don't expect it to be easy!

Danger Money!

One of the slightly easier ways to earn cash in the Career mode is by collecting (or knocking over) objects such as trash cans or, bizarrely, bronze wings. Each time you flatten one, your credits clock up allowing you to purchase new togs and better boards.

▲ Some of the items are located in rather obscure positions that take some work to get to!

Born Free!

The Free Skate mode is the place to figure out the gnarliest tricks and combos, search for secret areas and practise Manuals.

▲ Ooooh, that's a sneaky little number. Grinds are great for linking loads of tricks together – just don't lose your balance!

▲ Looks like he's got a nasty pane. Don't try stunts like this one at home readers. Patio doors are rather expensive to replace, or so we've heard.

Judgement

GRAPHICS Smooth and detailed with only the very occasional minor glitch to spoil things.

GAMEPLAY The controls are as intuitive as those of the original but with loads more tricks.

LIFESPAN Thought *Tony 1's* Career mode was too easy? The same certainly can't be said of this.

With a better Career mode, course and character editor plus new tricks, this is a big improvement on *Tony 1*.

Single-player Characters	2
Multi-player Characters	17
Multi-player Modes	8
Multi-player Arenas	25

Third time around for our old pal Turok, and he's got a lot of catching up to do...

Turok 3

Shadow Of Oblivion

Urban Chaos!

A lot of *Turok 3*'s sprawling levels are set in a darkly futuristic urban setting. Good thing too, as jungles and dodgy castles were beginning to look a little weak.

▲ Oooh, spook! This fella's behind glass at the moment, but we're going to have to go in and administer some swift justice very soon indeed!

▲ This lovely open city area is swarming with a load of particularly unco-operative zombies. Coupla shots and they're down, though.

▲ Right at the beginning this bridge blows up just before you're about to walk across it. Shocking moments like this are few and far between...

Girly Friend!

▲ Don't mess with the rozzers, however tempting it might seem. They're incredibly hard and will have no qualms about shooting you down.

▲ They're no match for crazy zombie deviants, though. This fella reminds us of Slimer in the old *Ghostbusters* cartoon. Nice one, Acclaim!

With *Perfect Dark* swaggering around Main Street at high noon, a lone challenger had to crawl out of the woodwork to face off against Jo at some point. It's a dirty job, but if anyone can do it, Turok can.

Except in the intro cutscene we see Joshua hanging up his Tek bow for the final time as he bites the bullet. Bugger. In steps the young guns, Joseph and Danielle. You select one of these hotshot rookies at the beginning, and follow their story through to the final showdown with the big man himself. Joseph and Danielle have different approaches to combat – one's a sneakster with

▲ 'Tagged', eh? Looks like five seconds without touching the ground wouldn't help this fella.

Nightvision, whereas the other's a high-jumping, showy scrapper armed to the teeth. The whole area of first-person shooters is gagging for this type of originality, but you have to get a few things down for certain first.

NASTY NASTIES

You've got to have good enemies for a start. *Turok 3* has a sparse dusting of weedy foes, and you'd be pretty lucky to see more than two of them on the screen at the same time. They mostly spit unavoidable laser death at you every so often, but they rarely get the chance to do so, as they're easily offed with one shot for the most part.

▲ Whoop, whoop! It's the sound of the police! Shame you can't get in their *Bladerunner*-style cars. Ah well.

The exception to that should be the big, bug-eyed bosses you come across every so often. Big, netherworldly horrors worthy of the previous *Turok* games. However, they're just as easy to see off.

BIG SPACES

Decent levels are also essential. Right from the off you're left in no doubt that you're immersed in a deeply scary urban nightmare. Crackling electric wires swing around (tut tut) inside bombed-out wrecks of buildings, and in the distance is the ever-present threat of the police. And they shoot on sight. Dreamcast or PC

▲ Our man Josh prepares to face the trials ahead. He isn't as hard as Joseph, but packs a mean Vampire Gun.

➤ Rub This On My Bot!

Perfect Dark introduced mind-bogglingly intelligent bots to whup your righteous ass. See how *Turok 3*'s compare...

▲ Not so intelligent, eh? The red arrow functions like a radar – it points to the enemy if you can't see him.

▲ Dino danger time, as *Turok 3* wisely keeps the different abilities of the multi-player characters.

▼ Er, yes. If you ever see anyone doing this in real life, we seriously recommend you see a doctor. Now.

▼ Still, if you're unfortunate enough not to own *Perfect Dark*, there's still a few laffs to be had here.

➤ The Best Bit

owners might recognise a lot of *Half-Life* all over the place, right down to the titles given to the seamless levels. It's a good thing these settings are so special, since that's about all you'll ever see. Believe it or not, an enemy comes as a blessed relief after miles

...*Turok 3* has a sparse dusting of weedy foes, and you'd be lucky to see more than two of them on screen at the same time...

of endless trudging around looking for something to point your gun at.

No such worries in the multi-player, of course. Simple, packed *Quake*-style arenas and a typical array of different characters on offer. You can still suck your mates' brains out with the Cerebral Bore, or alternatively their blood with the new Vampire Gun. Mmm, tasty. That, plus a bit of swimming, makes the deathmatches pretty entertaining, but this is still no *Perfect Dark* beater.

JO'S ON TOP

Being fair, *Turok 3* never really had a chance against Rare's stupendous shooter. It's a shame, since a year ago we'd be drooling into our breakfasts over this one. There are big, beautiful levels, some pretty scary baddies and the trademark hilarious guns. The only thing is, it's all been done a lot better somewhere else. No prizes for guessing where...

➤ Best Mates!

Some of the multi-player levels are pretty damn interesting in their design. This one should be ace fun, yeah?

Monkey Tag has had a rubbish change of rules. These pads are where the monkeying around happens.

Gameplay remains pretty fluid when it's all kicking off, but it's a shame everything looks so very, very boring.

This foolish bot will soon learn better than to turn his back on us! Ha! Eat my shotgun, stupid police fool! Er, yes. Good, eh?

➤ Another Level!

Let's have a gander at where the whole thing kicks off...

▲ Still early days, and we haven't got anything better than the faithful old chopper. Yet...

▲ Those crazy yellow diamonds are back! They kind of spoil the whole urban thing.

▲ Yum! *Turok*'s trademark gore hasn't been toned down for his third outing.

Judgement

GRAPHICS Some tasty locations, but the baddies pale into insignificance next to *Perfect Dark*'s.

GAMEPLAY Oh dear. Way too few enemies make each level feel horribly empty.

LIFESPAN It's a bit easy, to be honest and you won't be coming back to the single-player.

Turok is dead, in more ways than one. This is – sadly – pure, snivelling pants when set aside Her Royal Highness Joanna Dark.

➤ Rubbish!

There are some moments in *Turok 3* that should be causing major embarrassment over at Acclaim HQ...

▲ The police are pretty damn unfair, and just make you angry. Nice mid-game cutscenes, though...

▲ This guy looks great, but it takes repeated circle-strafing and little else to see him off. Damn shame!

▲ Oh, come on. You'll try shooting this fool at least once, but we're sad to report it just won't work.

▲ A Chinese restaurant? On Mars?! Nice to see the terraformers got their priorities right.

▲ The rendered locations vary in quality, but some, like this ventilation shaft, are pretty tasty.

Martian Gothic: Unification

The **red planet** just got slightly redder thanks to **your innards!**

Survival Horror, as in the *Resi Evil* games, has a lot to answer for... nail-biting tension, enthralling adventure, and the liberal papping of keks.

Martian Gothic: Unification offers none of these pleasures. It's essentially a *Resi*-style game set on Mars, and revolves around a colony who the folks on Earth have lost contact with. Three specialists are sent up to find out what the dickens is going on, and you take it from there. It's an interesting idea, as you have three characters to use, and

you have to switch between them as they work through the colony, each helping the others through by opening doors and using items.

MEMBERS

In the end though, it's just another mildly tiresome zombie-hunt, with a big old dose of key-hunting and item using thrown in, as well as some truly gimpish voice-acting. The consolation is that it's only a tenner, but don't let that fool you into thinking it's worth the splash.

Mars Muppets!

There's plenty to see and do while hanging around the colony, but the fact remains that you've seen it and done it all before in other games of this genre. It's like a trip down bad-memory lane with shamblers lurking at every turn.

▲ Aha, a dead colonist turned shambling zombie ming-pot. Ring any bells?

▲ It's the usual case of saving your ammo until you really have no other option but to shoot!

▲ No food and no TV make Homer something, something... Looks like the staff canteen's been hit by zombie graffiti artists.

Judgement

GRAPHICS Nice backgrounds, but the characters are awfully blocky and simplistic.

GAMEPLAY Borders on the tedious. It's all about key-hunting and door opening and little else.

LIFESPAN It's long enough but, chances are, you'll put it down before you finish it.

If you liked the *Resi* games, you may find some diversion here, but don't make the mistake of hoping that it's anywhere near as good.

Forget the thrills of Skateboarding. Here's a BMX game that's [cough] wheelie, wheelie good!

Dave Mirra

Mirra Freestyle BMX

Like flared trousers and skateboarding, BMXing is a trend that fails to ever really go away.

The specifications of the bikes and the names of the tricks may have changed since *GamesMaster* were kids but, even so, with no gears and a seat post high enough to send you into orbit, BMXing still rules.

STUN-TASTIC

Riding as Mirra, or nine other top current pros, *Freestyle BMX* is very much *Thrasher: Skate and Destroy*, but with bigger wheels. Starting with basic tricks assigned to the symbol buttons, new moves can be created using the modifiers allowing you to mix and match your stunts. There are no set tracks to follow, giving you the freedom to explore at your leisure, and the 12 levels focus on Vert (ie, ramps), Dirt and Street riding. They also include various famous

BMX ports of call, such as the San Jose Ramp Club and Camp Woodward's Lot 8.

SKY BIKE

Graphically, things are a real treat, but the major pulling-power of *Dave Mirra* is in gambling your finger dexterity for bigger and better tricks – the more you play, the more skills you acquire, the better it gets.

Share the screen with a like-minded pal and, to say that it's not fun from the word go, is like assuming your mum will find it perfectly reasonable when she discovers you trying to unbuckle your wheel by putting it in the chest freezer.

ACES

Four wheels and a plank of wood (in *Tony Hawk's* and *Thrasher: Skate and Destroy*) may have been fun, but two wheels and a crash helmet is even better. Get this in now!

The Best Bit

Press pause mid-trick and, as you hang motionless in the air, the camera pans round 360° – just like in *The Matrix*!

▲ Dave who? Here's Mr Mirra, sans helmet and body armour, in all his full, smug glory.

 Bombing along in a mean machine at trouser-ripping speeds is enough to put a smile on anybody's face and *San Francisco Rush 2048* certainly scores big in that area.

FAST SHOW

Jumping in our rocket-powered ride, it's pretty obvious that *San Francisco Rush 2048* is a *Speed Devils* clone, but a tasty one all the same. The power of Dreamcast brings a new graphical quality to the proceedings, with some bright colours and changing landscapes; tall skyscrapers and busy streets giving way to green parks and lakeside forests. Atari have bunged in loads of shortcuts and alternate routes that take you underground, overground (Wombling free?)

and through areas you never even knew existed. Finding these hidden paths often lets you jump ahead of the pack, even if you're in last place! All good things come to those that cheat, eh?!

Interlagos looks greener than ever. The red arrow fades and it's up to you to time the first corner before the pack.

That famous ol' Monaco tunnel. Slick lighting effects and no glitching as it zips by. This feel more realistic than ever before.

Spa: You could fit a bus through a gap that large. At least one with traction control, and maximum downforce.

From the comfort of the replay, goggle at the view back down to Spa's most infamous corner. See ya flip side!

Custom Options!

▲ All the options are more tweakable so you can have no, partial or full failures.

▲ Pick the 'Real' weather setting and you could encounter different conditions for every day of the race weekend.

There's only one F1... Okay, there are three F1 games on the way, but this is the only Sony one, see?

Formula One 2000

The Best Bit

Adjust to the sensitive handling and smooth over-taking becomes 101% pure joy.

Monaco, Spa, Interlagos. We'd still recognise the names but would the thought of their horrid hairpins, evil chicanes and uphill curves really send the same shiver down our spines if we hadn't attacked them in four previous *Formula Ones*?

It's the recreation of these classic circuits that separates an F1 champ from an F1 chump and it's something that the original *Formula One* and the follow-ups '97 (not the uger-lee '98), '99 and now 2000 manage in style.

▲ The new front-end menus may look posh but they're clunky and slow to use.

Get the look and feel of Monaco's tunnel/marina, Spa's bus stop and the opening left-hander at Interlagos right and 75% of F1 gamers will punch a fist in the air in celebration and buckle down to mastering the 17 tracks in Grand Prix mode.

SUPER SUCKS

All these peeps want to hear is that the scenery is more colourful, whips by more smoothly and that there's more realistic damage, weather and driver behaviour. Sorted.

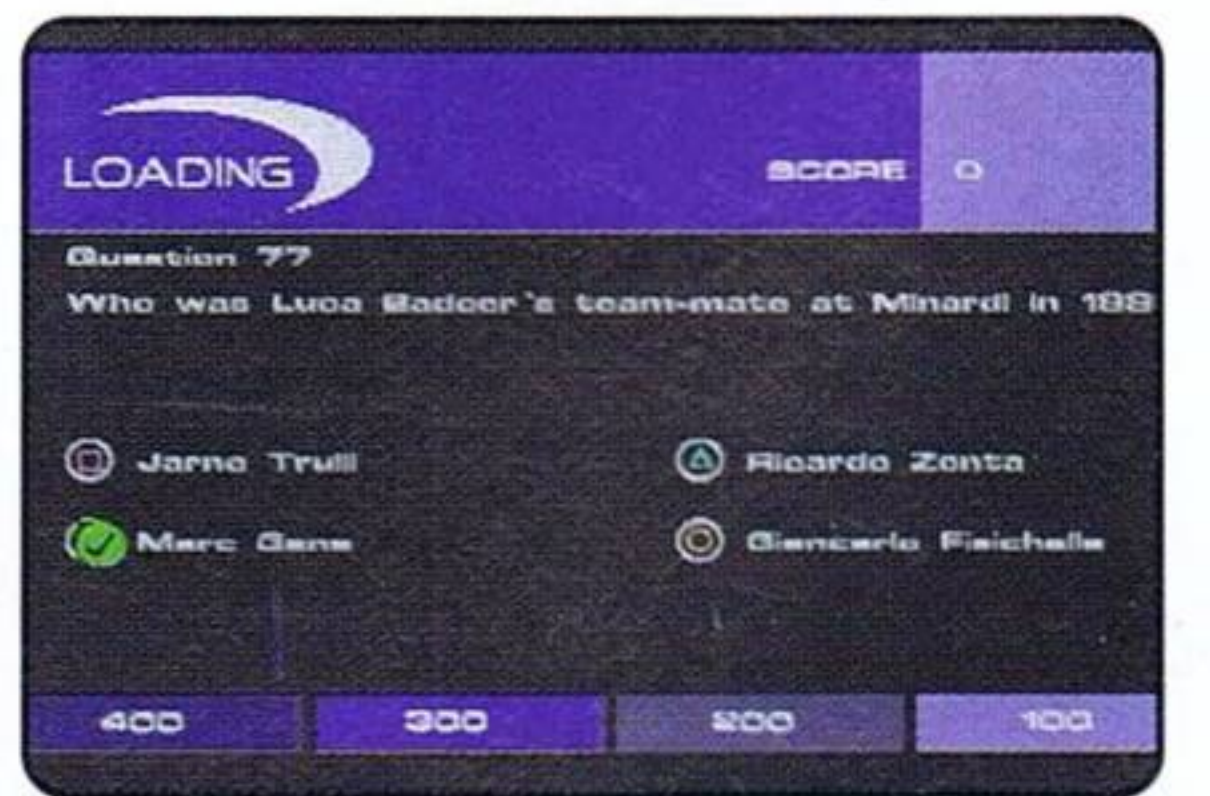

▲ When you've got rain hammering down it's even harder to see from this view.

Review over? Well no because there are still 25% of you who buy F1 games with some other goal in mind than caning it round a wet Nurburgring with Schuey up your exhaust. We'd guess that most of the rest are, perhaps, after a decent two-player race once in a while.

FRIENDLY

▲ The loading time quiz is BRILLIANT. This'll test the knowledge of even an F1 nut!

You Versus The World!

For the first time in any F1 game you can have a two-player race against a full pack of rivals! Even though you don't get all the options of a one-player game this is still a fabulous achievement.

▲ A subtle but effective number two points out where player, er... two is on the track. Hunt him down!

▲ A ghost car? Nope, each player can choose their own view – anything but the animated cockpit.

▲ As in the one-player the replay is one thing that disappoints – very jerky with the split-screen.

completely empty circuit anyone? Didn't think so...

Pop your corks then for version 2000 offers you and the mate the chance to race against a full grid of wily old timers and gung-ho youngsters. Here two-player racers as much as the one-player fraternity will boggle at the smarts of the other drivers who don't just block you at every turn (as in '99) but vary in tactics with less aggressive types giving way and first-seasoners making mistakes. There are

disappointments with some slow-down in the chaos of the first corner and disabled set-up options. Frankly, however, as it's taken over five years just to get other drivers on the track this is to be expected and is a lot to do with the limitations of PS. If you want two-player deluxe then, regrettably, you'll probably have to invest in a PS2.

simulated grand prix with a fun two-player thrown in. At least that's what we suspect given Studio 33's re-vamp of the arcade mode – a sort of *Ridge Racer Lite* in which you race through checkpoints, unlock cars and tracks and aim to earn trophies. But if arcade action is what you want why are you buying an F1 game? It's a brave attempt to please all the people all of the time but you can't help thinking that a 'novice' mode in which you compete against, say, test drivers would have been worthwhile. Still, when the dust settles (and with one eye on Eutechnyx's *F1 2000*) this is likely to be the last great F1 game on PS.

Collision Warning!

Having learnt new tricks from stablemate *Destruction Derby Raw* there's even more motorised carnage!

▲ Go for a spin and your tyres go to pieces. Look, there are the bits spread all over the ruddy track!

▲ Try to rejoin the track and shuntage like this can occur. Watch the sparks fly!

▲ Oh dear. Turn failures to 'full' and a much smaller shunt than this will signal the end of your race.

Arcade-style!

▲ In an unholy union of *Ridge* and F1 tracks, cars must be unlocked in batches.

▲ That big '42 is how many seconds you've got left to make it to the next checkpoint. Hurry!

▲ Stray onto the grass for a short cut and you'll be docked five vital seconds. Harshness.

Judgement

GRAPHICS Disappointing replays, but this still looks great, if not a huge improvement on '99.

GAMEPLAY Like all F1 games this takes ages to master. Rewarding, but still no novice mode.

LIFESPAN Full championship with realtime races anyone? We'll have to wait for a PS2 title.

Apart from the full grid two-player this is more of a revamp than a giant step forward. Even so it pushes PS to the limit.

Match Maker!

Anarchy Rulz includes a sprinkling of brand new types of matches – some of which have never actually taken place in ECW.

As far as we can remember, the classic Dumpster match was actually invented by the WWF! So why's it here?

The use of tables in wrestling was popularised by Sabu in ECW but everyone seems to do it now. Hardly original.

Ah yes, the ol' flying butt bump – New Jack demonstrates scientific wrestling at its best. Lou Thesz must be proud.

Outside Now!

The Backlot Brawl is exactly what you'd expect – a big old punch up in a gritty urban setting. Kind of like *Fighting Force* but without the guns. Unfortunately, there's no network of backstage areas like the ones in *Smackdown*.

Once you've picked an area you've got to stick to it as there's nowhere else to go.

There are loads of weapons around but they mysteriously disappear once used.

Those bad boys of the ring are back – except the whole thing's a bit familiar.

ECW Anarchy Rulz

When Acclaim lost the WWF license and instead picked up the far more obscure ECW brand, you would have thought they'd attempt to make up for the lack of name value by producing the best games.

Sadly, the first ECW outing – *Hardcore Revolution* – was simply *WWF Attitude* with different characters. *ECW Anarchy Rulz*, meanwhile, is an even more blatant rehash of *Hardcore Revolution*.

NO BRAINER

Anarchy Rulz is so cynical and unimaginative that if *Revolution* saw the former undisputed kings of wrestling videogames take one step closer to the gutter, then this sees them falling into it face-first.

Okay, there are some differences. The roster of characters has been updated – so there's no Sabu or Lance Storm this time around but you do get the likes of Kid Kash and 'The American Dream' Dusty Rhodes

instead. The 'create' section has been tweaked so you can now come up with an entire stable of wrestle-fiends, with the create-a-freak mode offering a couple of extra options including a random generator and the choice to give your character diseased skin. Nice.

INACCURACY

There's also a slightly wider variety of matches available. These include a not-as-good-as-it-sounds Table match; a Brimstone match in which the ring is surrounded by what appears to be lava (no, me neither) and Rage in the Cage – matches take place in a UFC-style... cage! This, despite the fact that ECW has never presented such a match in its entire history. So no extra marks there for attention to detail.

A huge disappointment that, in comparison to *WWF Smackdown*, leaves ECW looking like the second-tier promotion it's so desperately trying not to be.

Rage in the Cage allows you to fight in a UFC-style cage. ECW, incidentally, have never held a match in such an environment. Well done Acclaim.

You'd have thought the people who made *WWF Attitude* would have come up with something new 'n' improved by now. But they haven't.

❖ We Are Borg!

If you've seen the TV show then you'll know that the Borg are a pretty fearsome foe, especially once they've adapted their shields!

Here they are piled up in their racks, sleeping like a gang of cuddly babies. Look harmless in this state don't they?

Uh-oh, someone at the back of your team made a comedy fart noise. Aggh! "Resistance is futile!" Here we go!

You're able to get a few shots off, but then they adapt their shields to the same frequency as your phasers. Run!

Being the queen of a collective has its moments.

▲ Mullet and beard. Yep, must be Star Trek.

A half decent Star Trek game? Using the **Quake 3 engine?! Surely **that's illogical captain!****

Star Trek

Voyager: Elite Force

At last, a title that does the *Star Trek* license some justice. This is a game that takes you into the universe of warp drives, "set phasers to stun" and that gobbledegook that passes for *Star Trek* science – and we tell you what – it's great.

You play a character called Munroe, a member of Voyager's Elite Force, a team that specialises in dangerous away missions. Don't worry though, you get to meet all of your favourite *Voyager* characters in this epic first-person shooter.

SCRAP CHALLENGE

The game starts with Voyager in a typically sticky situation. The ship is caught in some kind of force field coming from an alien vessel. All around them are the remnants of a thousand spaceships, each one having been plundered by the Scavengers – a group made up from

humans and Klingons also trapped in this graveyard. It's only a matter of time before they attack Voyager so you have to get out of there.

JANEWAY AWAY

What the game breaks down to is a series of away missions where you have to achieve various goals. Typically for a *Star Trek* mission things don't always go to plan – missions and objectives keep changing. There's a lot of shooting in *Elite Force* but also a lot of puzzle solving and 'scene setting'. It plays just as if you were in an episode of the TV series. All of the main *Voyager* characters come into the game at some point – some just hanging around the ship while others such as Tuvok and Seven will accompany you and your team on away missions.

All-in-all this is what you trekkies have been waiting for all these years. A fast, action-packed *Star Trek* game that makes you feel like you're actually part of the star ship's crew. *Elite Force* boldly goes where no *Trek* game has gone before. Warp factor 9, captain!

❖ Holomatch!

Because *Elite Force* uses the *Quake 3* engine, you get this fantastic deathmatch thrown in for good measure.

▲ The level materialises in the holodeck so you can have any setting you want.

▲ Tried and trusted *Quake* deathmatch but with added *Star Trek*. Cool.

Judgement

GRAPHICS Brilliantly reproduces many of the classic *Voyager* locations. Looks great.

GAMEPLAY Tried and trusted first-person stuff with a real feel of the TV programme.

LIFESPAN Loads of intricate levels and a great multi-player game thrown in as well.

Just about the best *Star Trek* game ever made. Not a patch on *Deus Ex* but fans of the TV series will lap it up big-style!

Overall
82%

Elite Force is just like playing an episode of *Voyager*. You get to do all the things you've dreamed of like teleporting, fighting Borg, and using the holodeck. Cool.

There are some tremendously pretty – and powerful – weapons in the game. The rocket launcher ain't exactly original, but it's certainly good for demolishing clouds of pesky bugs.

With the kind of scenery that'll make you jump for joy, you can tell that a whole lot of love has gone into the construction of this game.

When you stop in town, why not pop in for a cuppa with the vicar? He's an extremely friendly, if slightly manic, chap.

The Town Square seems pretty empty. Hang around a bit though, and it'll be packed with nasties queuing up for a dose.

Much of the town is residential, but this is no Bovis-home estate. The architecture is gorgeous to look at.

Ooh dear God no. This makes Atari's original *Pole Position* look positively cutting-edge. The graphics are old-fashioned, the steering's jerky and the handling's so unrealistic you can take chicanes at 200mph without even brushing the kerb or bruising your tyres.

It might have all this year's cars and teams, but they all look identical out on the track – brownish, and twitchily animated. Basketball maybe doesn't make the most gripping videogame in the long-run, so perhaps this could've done with some *NBA Jam*-style special moves and things to spice it up but, as a serious sim, it has no rival on the GB.

Fencing is the Event of Gentlemen and, for a test of rhythm, there's the swimming. Even though the formula hasn't changed for decades it's still surprisingly compulsive trying to crack the 10-second barrier

You could count the number of decent GB beat-'em-ups on the fingers of one mitten. So hurrah for *X-Men*, which puts 11 of the top Marvel heroes and villains head-to-head.

And it looks the part too, with colourful characters and tidy backgrounds. But, sadly, it's missing the character and pizzazz of fighters on the late, lamented (sniff) NeoGeo Pocket – ones like *King of Fighters* and *SNK vs Capcom*. The moves are the usual bunch of fireballs and things, there's little sense of fists impacting with jaws, and, disappointingly, even on Hard mode you can win most fights simply by crouching down and hammering Punch every time your opponent comes near.

This is indeed a very odd little title, so pay close attention. It's a puzzley platform game where you've got to liberate Mudokons from Glukkons oppression.

The Mukodons can help you by pulling levers and opening doors, and you can also 'possess' Sligs, Glukkons, Scrabs and Paramites, as well as turning invisible and, ahem, farting. See? Odd. But luckily it's great fun. You control Mudokons by speaking to them, and it's impossible to tire of saying "Follow me!" and hearing them reply "Okay!" Hurrah! *Alfred's Adventure* is more or less a straight conversion of *Alfred Chicken*, an obscure Super Nintendo platform game that sank without a trace in the early '90s.

Presumably it's been exhumed because chickens are 'in' at the moment. The thing is, *Alfred Chicken* was actually great, and so's *Alfred's Adventure*. The googly-eyed Alfred is a top-grade character, with a repertoire of moves that includes a sort of semi glide and a beak-first power dive that's ideal for puncturing baddies. The N64 has remained faithful to the original *ISS* vibe and has stuffed itself with menus and options. Even the bouncy faces return – good or bad news... you choose.

▲ As the through-ball isn't as effective in the N64 game as it is in *Evolution* you can go with a flat back four and try to protect your flanks.

▲ If you're unsure of the what all the technical terms mean you get a little demonstration of what each position will do to the formation.

▲ It's the bouncing faces. Aahh Veiri is feeling a little blue – what a shame. Well he can buck his ideas up and stop acting like spoilt baby... yeah!

LIQUID SKILL

The good news is that it's almost as good. It seems much more fluid than the PS version – where the players seemed to be on rails and the formations were very rigid, making for a very tight, manicured match.

On N64, however, there's seems to be much more space on the field, mainly because the defences tend to sit very deep. Also, the game allows you to be quite loose with the passes as they go straight to the feet of your target player which means you can ping the ball around very swiftly if you want to. But, because of this added space, there's also the option to run.

CHOICES

You see, what the game is doing is supplying you with options and offering you enough assistance to execute what you're attempting. Games like *FIFA* don't even give you the options. Instead they bully you into a very one-dimensional 'kick and run' style of play.

The one move you tend to become dependent on is the through ball – which isn't too helpful when playing down the middle, but becomes deadly when playing your wingers in behind the opposing full backs. You won't always score when you reach the byline, but if you put in enough

Vibrant Touch!

While many football games overload on unnecessary but elegant detail, *ISS* just gets on with the game. Not even the action replays can make it look pretty, but it's got more life than a butchers dog.

▲ The replays just serve to emphasise the overall flossiness of the graphics and some of the less impressive elements of the animation.

▲ The graphics aren't that crisp, but there's always loads going on and the screen is bright and full of colour. Look! Arrows and David Beckham!

▲ For those more accustomed to the PlayStation game, this takes a bit of getting used to especially when using the fiddly C-buttons. Bummer.

Too many developers attempt to recreate the televised experience, forgetting that gamers don't want to watch virtual football, they want to play it. Hammer-right!

Alongside the basic mission structure – that any veteran of the original title will be familiar with – there's also a challenge ladder to test your metal against. You start off at the bottom of the league and have to fight your way up to the number one slot. As you climb the cash prizes increase, allowing for better weapons.

▲ Early rivals don't pose to much of a challenge, although they're still pretty smart and have a habit of popping a shot then scurrying for cover.

▲ The further you climb up the league the harder and smarter your adversaries become. Buying the right kit for the job quickly becomes vital.

▲ Numero uno, the grand fromage, the big Labowski... Jeez, just take a look at the size of that gun. Beat him and you get oodles of cash!

▲ Environmental effects change the appearance of the levels as the missions progress. It was a nice sunny day when we started!

A Mars mission a day helps you work, rest and keep your metal trousered war machine in brass!

Armored Core 2

Three long years. Three long, dull years since we last climbed into the acceleration couch of the original, with only *Front Mission 3* to satisfy our mech cravings.

Well hanker no more as *Armored Core* returns and, this time, goes next-gen! Oh the sheer potential – PS2, big weapon-laden robots, vast rolling levels... this should be massive in every sense of the word. Sadly it's isn't.

MISSION BASED

The gameplay has remained pretty much unchanged since the 1997 title, with only a challenge ladder, link option and improved graphics to distinguish it from its predecessor.

It does, however, look about a hundred times as impressive visually with the kind of background animations and pyrotechnics that will leave track lines across your retinas.

The Best Bit

Running out of ammo for both your primary and secondary weapon systems, having only a sliver of armour left and finishing the job off using just your wrist blade!

Dual Shot!

It takes two to empty a magazine of depleted uranium tipped bullets, and *Armored Core 2* happily caters for this in a range of arenas.

Chose the level, set up your MT and select the parameters of the contest. Once you're happy, go head-to-head.

DEAD RED PLANET

The location has altered as well with the action now taking place on Mars. But, instead of the huge arenas of red soil that we might have hoped for, everything feels a bit limited, a bit claustrophobic and cramped.

The missions themselves are devilishly hard. Gone is the gentle learning curve of the original and instead you find yourself carefully counting credits between missions.

The MT league does offer some extra interest, but the initial prizes are so pitiful that it takes an age before you feel you can truly experiment with your MT's construction. When you do though, the game comes into its own and you soon find yourself lost in the detailed set-up screens.

If you like your combat big and bold and share the Japanese infatuation with large robots, you'll get your metallic kicks here.

The aircraft carrier makes for a tricky arena. One false move and you can easily do a punctured submarine impression.

The sluice gate lets you play king of the castle, but the boundaries continually keep you from exploring tactics. Bah!

Judgement

GRAPHICS Phat explosions, highly animated backdrops and all round eye goodness.

GAMEPLAY Pretty much unchanged, but still a compelling formula of planning and action.

LIFESPAN Tricky levels, a two-player option and extra modes of play create longevity.

Some fast-paced metallic mayhem with serious good looks. Keep an eye on the other MT-based titles coming up on PS2, though.

The muppets get evil and start ripping each other apart and eating the bits... Not really, just an idea...

Muppet Monster Adventure

Got The Power!

On the first level you've got to give Robin a helping hand by adding some sorely needed abilities to the web footed one.

The Miss Piggy power-up give you the ability to attack statues with a deadly karate chop. Never mess with the pig.

The Wokka Wokka Werebear Power give you claws so you can clamber up certain surfaces. Just like Fozzy!

The Muppets move on from their recent *Race Mania* and have a stab at the other cutesy gaming standard – the 3D platformer.

Falling somewhere between *Croc* and *40 Winks* we have Kermit's young nephew Robin burdened with the task of ridding the world of an evil force that has transformed the other Muppets into monsters. The evil can

be found in convenient star shaped icons and you must collect these along with a myriad of other pick-ups to open levels and progress. It's all quite predictable puzzle solving, platforming, jumping stuff which, unfortunately, is too linear to really excite. It also suffers, as most games of this ilk do, with 'dodgy-camera' which can be a bit swingy when active. Oh so okay.

Easy Glover!

▲ Frogs aren't usually the fiercest creatures in the world, but our Robin comes armed with a magic glove!

Judgement

GRAPHICS Keeps everything all very cartoony, simple and cheap and cheerful.

GAMEPLAY Predictable, and you get a bit fed up of collecting stuff after a while.

LIFESPAN There's plenty of levels that need completing, full of loads of niggly searching.

Looks nice, plays okay but is all a bit too simple and fiddly to really stir emotions. Definitely not inspirational or muppetational.

RC De Go takes you right into the action as a remote control enthusiast on the international racing circuit – yeah baby, live the dream!

It doesn't really sound too exciting does it? That's because it isn't. This is not too say this is a bad game. It's a simple racer that doesn't tax the brain but tries to draw you into the game

with its hypnotic, repetitive lapping. But so simple is the gameplay that it rapidly becomes tedious and you're too sleepy to care if these RC cars behave as fidgety as the real ones.

That said, the graphics are still quite sweet. What also goes against it is that the noises on the Name Entry screen are irritating and the commentary is in a really prickly voice.

▲ To liven things up a little there are various stunt bits where your fragile car is thrown into the air to avoid some bumpy bits of the road. Exciting.

Judgement

GRAPHICS Pleasant enough, but the cars get a bit Weetabix when they go into the distance.

GAMEPLAY Very simple and easy to pick up, but a bit too easy to put down as well.

Shoot To Thrill!

Not only will you have to out-dance the aliens that have invaded the Space Station, you'll have to gun 'em down, too!

Except you won't be using the triggers. When the aliens shout 'Chu', tap the A button and you'll zap 'em good.

If you do this to the beat – and get your aim right by following the commands of the aliens – the tentacled ones will disappear.

Once you've zapped all the odd-looking beasts with your trusty ray gun you'll be free to carry on your bizarre quest.

Dancin' Team!

▲ Save enough hostages and they'll join your dancing troupe, falling in line behind you.

▲ Look at 'em go! Our favourites are the tourists in their space suits, who are so snap-happy they'll take photos as they dance.

Forget who sells the most games, or who's going to win the console war, **Sega just want to dance!**

Space Channel 5

Let Mr Pygmy have his say then I'll get to you.

With a load of people behind you, all dancing to the same rhythm, *Space Channel 5* suddenly becomes the grooviest game ever.

It's a commonly held belief that the Japanese are all barking. Crazy as loons. Mad as large bipedal fishes.

They're not, of course, they're just like you or I – it's just that they're a whole lot more inventive than us when it comes to making videogames. For every dull *Tomb Raider* there's a *Crazy Taxi*, for every

tedious realtime strategy snorefest a *Samba De Amigo*. And you know what? Here comes *Space Channel 5* to brighten up your life and generally make the world a happier place. Hurrah for Sega, and the kerr-aazy developers that made the game possible.

RHYTHM KING

Space Channel 5 is a rhythm action game in the vein of *PaRappa the*

Rapper, *Beatmania* and the rest, but it's twice as lovely to look at and about three times as 'cool'. As in all these games, the key to success lies in tapping buttons in time with the rhythm – but whereas other titles have pop-up, on-screen instructions, the only things you have to go by are what the enemy says and your own sense of timing. Confused? Don't be. You see, the story behind the game is a little like this – aliens have infiltrated a space station, and it's up to you, as

▲ As your dancing entourage grows, each scene takes on a big budget musical feel.

▲ The aliens seem more concerned with dancing than dying and gyrate right up to the point you zap 'em.

▲ A few slips can be overlooked early on but, as the battle for ratings heats up, only perfection will do!

Sink The Pink!

Bosses. Love the challenge or hate their hard-to-kill hides, no self-respecting videogame would be without them. And *Space Channel 5* is no exception. Set ray guns to kill!

▲ At one point in the game, you'll come across this large, pink alien boss. He's no pushover – not if you want to keep your ratings.

▲ As per usual, follow the dancing instructions the boss does out. He gets quicker and quicker, so it's not too easy at all.

▲ After a while, the pink beast's belly will open and he'll spew out plenty of one-eyed yellow aliens. You've got to shoot 'em all!

Succeed in this and viewing ratings for your channel (called – yup – *Space Channel Five*) go up as more people watch your show. And you have to get a good viewer rating to proceed – the minimum figure is 15%.

THE WORKS

But back to the game mechanics. When you encounter a group of aliens, they'll dance, and shout out instructions (such as 'up, left, right' and so on). Once they're done, it's your go, and as well as remembering the directions, you'll have to do it in time to the music. As such, it's a bit more challenging than other games in the genre, and a whole lot funkier too. The animation is quite amazing, as Ulala and everyone groove and gyrate their way through the proceedings. And, by saving hostages who join you, you can easily end up with a

chorus not dissimilar to the start of *Austin Powers*. Great! And you also get a chance to shoot the aliens, too! So, as far as rhythm games go, this is tops. But there are problems. While it's brilliant fun, it's very short-lived, and the novelty wears off pretty quickly (especially once you're accustomed to the game and are getting high scores). Rival Schools!

▲ As well as big ol' bosses to fight, you'll get rival *Space Channel* reporters popping up.

▲ What do you have to do? Dance, dance, dance! The quickest fingers will win you the day.

▲ But this saucy wench can eventually be beaten which makes for quite a spectacle!

Judgement

- GAMEPLAY** Incredibly simple, and ultimately repetitive, but also a lot of fun while it lasts.
- LIFESPAN** While this is an immense pile of fun, it's also very short indeed.

You can't fault this game for fun. But like *Crazy Taxi*, the novelty does wear off after a while, and the game is just way too short.

Stat Attack!

Gallery is a neat feature providing info on your favourite F1 team, from the car and the drivers to the background of the team itself.

Scroll around all the hi-res car models and get the tech specs on all the parts and dimensions. Anorak heaven.

Driver Information

Swat up on the personal details and career records of the team drivers and examine their form. Stalker heaven.

Finally, stats can learn about the history of each team. Ferrari's first race was at Monaco in 1950, don't ya know?

TV To DC!

For total F1 obsessives there's a, frankly bizarre, option to view all the races from the 1999 season in videogame form. This option employs interactive camera angles based on those used in the actual TV broadcasts.

▲ At Monaco you can switch angles to see the famous tunnel and harbour from different views.

▲ The race unfolds exactly as it did in reality with Hakkinen holding off Schumacher to claim victory.

Fasten your safety belt and **hit those revs** because it's... **Go! Go! Go!** For another Formula 1 simulation.

Formula 1 World Grand Prix 2

Unless some bright spark comes up with a Formula One game that lets you partake in activities off the track – larking it on yachts, gadding about in helicopters, sharing jacuzzis with pneumatic supermodels – it seems F1 games are stuck in something of a rut.

The template was set a long time ago: detailed vehicles, accurate tracks and environments, options to tune all the car's settings, an Arcade mode for rash and crash racing and a Simulation mode for the realistic Grand Prix experience. The problem is, with all of these factors in place, there's nothing really new or exciting that can be added to the F1 genre.

SIMILAR

Formula 1 World Grand Prix 2 covers all of the above features and covers them very well, but we still found it hard to be enthusiastic about the game because, once you've seen one F1 game, you've seen them all.

On a more positive note, though, if you don't yet own a Formula 1 game then *F1WGP2* is as good a place to enter the grid as any. Boasting the best visuals of any F1 console game, an Arcade mode for speed freaks and a far more difficult Simulation mode for enthusiasts, this is an impressive racer that captures the thrills and spills of being inside a Formula One beast better than any of its Dreamcast competitors.

DISPLAY VROOM

Despite the quality of the game, we'd still guard against actually buying it. If you must own an F1 game then this is the best one to go for. But if you're simply after an exciting racer then you'd be much better off spending your cash on *Metropolis Street Racer* or the hardcore simulation of *F355 Challenge* – games that really do take the driving genre to a new level.

The Best Bit

▲ Inflicting GBH on state-of-the-art F1 machinery is a great laugh. Whack Damage up to maximum, ram everything in sight and watch those wheels drop off!

▲ With the damage controls turned off, a glancing blow at 108kph can effectively mean the end of the race for you. Back to the pits to face the wrath of Eddie Jordan.

❖ Cornering!

Taking a corner properly at high speed is an art in itself. But when you get it right, it's a beautiful thing to behold...

Make sure you brake before you hit the corner - scrubbing off speed mid-bend is a recipe for disaster.

Now, as you hit the apex of the turn, lay down the power and pull yourself around in a nice and tidy fashion.

Power off down the straight and you're home free. Now cut inside an opponent's racing line and you'll ace it!

▲ Fall too far behind the field or miss a checkpoint and it's the end of the race for your rider.

Clad thyself in leather, and let rip on the dirt tracks and arenas of our fair land. (Cue 'skid mark' joke...)

Moto Racer World Tour

Ooh, beastly game! Beastly! *Moto Racer World Tour* tantalises you with its motorised loveliness.

It serenades you with its fantastic graphics and slick handling. And then, just when you're falling in love with it, you realise it's so damned hard that, if you put it in a room with Steve Austin and Wolverine, it would leave them both tied up in knots blubbing for their mums. Beastly!

NEW BOY

The first time you get it running, you'll see what we mean. Graphically, it's about as hi-res a game as you'll ever see on PlayStation, and happily nicks off with the title of best looking bike game ever. The machines, the riders, the tracks, the scenery... everything blends perfectly together and looks simply sumptuous.

The bikes also handle in an incredibly smooth and usable way. The game has two modes, Racing and Motorcross and, although the vehicles for each handle in entirely different ways, both feel great. Whether you're screwing it 'round a berm or snaking through a chicane, you'll think you've died and gone to biker heaven.

GRAVEL RASH

Sadly, it's let down by its own level of difficulty. Even in beginner mode, you'll need to read the tracks like a pro (and have the reactions to match) to do well. For those that like a challenge, there's plenty to be found here, and the weighty mechanical options help to lengthen its lifespan. But if it's short-term kicks you're after, you may end up feeling a bit frustrated. *Moto Racer World Tour* demands commitment to be enjoyable, but we reckon it's worth it.

❖ Mud Larks!

The Motorcross mode is an entire game in its own right, and you need to learn a whole new set of riding skills to tackle it.

▲ Hit a bump at full revs, and you'll fly like Mary Poppins after a large morning sherry.

▲ Cornering is all about hanging the back end out and wheel-spinning to turn the bike.

Hang on! An update of the **ultra-violent, futuristic** ball-game from the early nineties? **Let us at it!**

Speedball 2100

▶ Nineties Time!
Speedball first came out in 1990 on the Atari ST and Amiga, with the graphically-enhanced *Speedball 2* following two years later.

Even the set up screen hasn't changed much from the 1990 original. You'll want to head straight for the two player game, though.

Things have been jazzed up for *Speedball 2100* but it's still exactly the same game underneath, and no mistake.

REVIEWER: Rich Peiley

It's either with fond memories or utter bafflement that you'll greet this PlayStation update of *Speedball*. It's a ball game where the screen scrolls vertically between goals, and horizontally between edges. The ball is passed from hand to hand, like a giant game of catch/meets football/meets basket ball. But where *Speedball* comes into its own is with the futuristic-based extras. As

well as scoring for goals, you get points for lighting stars at the side of the pitch. There's also a teleporter and power-ups appear randomly as the match progresses, doing things like electrifying the ball. But is there any need? Sure, *Speedball 2100* looks smarter, but it doesn't play as well!

▶ Ring Ma Bell!

▲ Sneaky *Speedball* players don't go for the goals, but for the stars shown here. Chuck the ball, light them all up and romp to victory!

Judgement

GRAPHICS Colourful – in an accident in a paint factory way – but still retaining the metallic feel.

GAMEPLAY Score more goals than your opponent. It's not brain science and it's not *ISS Pro*.

LIFESPAN Like a Chinese meal – you'll enjoy it, but only in small portions.

Technically fine, but – bar a few unnecessary new features – just an update that doesn't actually seem to have much point to it.

 This time round Jill's equipped with a handy side-step manoeuvre that allows for some sneaky zombie-dodging. No one ever said the undead were particularly clever and, like most videogames baddies, they're a bit confused by strafing. That, said they can still turn up in numbers that test even the most nimble.

▲ The aiming system, although clumsy at times, does allow for some tasty head shots.

▲ The whole town's on fire and you can bet that Umbrella have got the matches.

Watch yourself, it's just moved into the house next door. Yes, this evil is now resident!

Resident Evil 3: Nemesis

Resident Evil... y'know, the one with the zombies.
 Still, negotiating your way past legions of the undead is rarely as much fun as it is in the long-running *Resi* series. So, what's the difference between this and the PS version then? Well, in a word, nothing. Which isn't a particularly *bad* thing, considering that back in our December '99 issue,

Nemesis scored a humongous 94%. That's six per cent from perfection! Unfortunately, the control system doesn't translate brilliantly to the PC – and there's nothing more frustrating than being torn apart by a zombie because of clumsy controls. The sense of fear is as great as ever though and, if you're after a perfect conversion of the PS original, you can't really argue.

▲ Jill, Jill, Jill. You should know better than to wander past corpses. Even when they're down these fellas have still got some bite left in 'em!

Judgement

GRAPHICS Sharper than those on the PlayStation version, obviously, but still a tad pixellated.

GAMEPLAY Same *Resi* gameplay as always, although the control system is not exactly ideal.

LIFESPAN Not particularly long but different areas and routes allow for more replay value.

More of the same but it's the scariest *Resi* yet and that *Nemesis* character is one nasty piece of work, mark my words...

▲ New wrestlers enter faster than you can eliminate them, so things tend to get pretty hectic very quickly indeed!

▲ The novelty is that it can display up to nine characters at the same time. Not that it does you a great deal of good...

Those **beefy WWF types** barge onto DC for another new grappling game, but it's **no Smackdown-beater!**

WWF Royal Rumble

Ever get the feeling you've been cheated? Dreamcasters have been eagerly anticipating the first WWF effort from THQ for months.

It really wasn't worth the wait. Imagine, if you will, the wide variety of modes on offer in *WWF Smackdown*. *Royal Rumble* has none of these, and less. For starters, there's a distinct lack of characters – 19 in all. All the really huge stars are in there – and no one's going to miss the likes of Mideon or Bull Buchanan – but, with no Chyna, Eddie Guerrero, Chris Benoit, Christian, Dudley Boyz (I could go on), there are an awful lot of WWF 'superstars' who should have been included.

BEAM ME UP

The game itself is split into three (count 'em) modes: Versus, Exhibition

The Best Bit

There are some really nice looking moves in the game and the whole thing is fast and smooth. Sadly, this doesn't make up for the shallow and unengaging gameplay.

Abducted!

There you are in the middle of a wrestling match, minding your own business, not doing no harm to any one (except your opponent)...

... when the lights dim. "Cor blimey guv'nor, what the bleedin' hell is going on 'ere then?" you may well ask.

What is, in fact, going on is that the developers couldn't figure out how to get you from the ring to another fighting area.

So they came up with the foolish concept of alien abduction. It's not exactly as if wrestling isn't silly enough, is it?

Judgement

GRAPHICS The most impressive aspect, but sweet visuals alone do not a good game make.

GAMEPLAY Simplistic controls, some really stupid ideas (alien abduction) and a lack of depth.

LIFESPAN There's a basic multi-player, but none of the modes associated with *Smackdown*.

After the grappling classic that was *Smackdown*, playing this is more than enough reason to have a right Royal Grumble.

ATV Quad Power Racing

Bikes with four wheels? Then surely they must be cars?

Life is too short for games like this. You can see it coming a mile off. It's games making by numbers – find a mode of transport that isn't a car ('cos that's been done before) chuck in a few options like a Championship and time trial, get a couple chimps to draw something that looks like a quad-bike and go home for the afternoon.

QUAD DAMAGE

Selecting an anonymous quad rider you must compete in several tension free races on snow, sand or mud. If you win you feel empty. If you lose you feel empty. During the race

Ice, snow and a couple of pinheads out for a jolly. Snowmobiles would have been a better option.

you get a slightly queasy sensation thanks to the constant bumping, and then become slightly amused at the thinness of your driver's head.

Slowly, however, you become distracted by the thought of doing more exciting things, like counting dust particles or styling your toe hair.

Listen up. If your parents go out and buy you this game for your birthday, they really don't love you any more.

Judgement

GRAPHICS It's like watching a match astride a foot stool rolling down a gutter.

GAMEPLAY You can just about drag the four wheeled bike round the track.

LIFESPAN If you can be bothered there are plenty of tracks to be unlocked and a two-player too.

A truly sub-standard bike-type racer that doesn't require you to expend any of your valuable, time attention or money.

Who Wants to be a Millionaire

You want this game? You're sure? That's your final answer?

Most of the time games of TV shows are more like spin-offs than truly faithful recreations.

The Dukes of Hazzard, *The X-Files*, *Star Trek* – all have been smoozed into a format designed to attract full-blooded gamers but this is where *Who Wants to be a Millionaire* begs to differ.

Millionaire isn't just like the TV show, it is the TV show which is both

its main strength and a major cause for complaint. Answer 15 increasingly difficult questions correctly and you'll (virtually) win a million. Compete against some mates and you'll be judged on whether you managed to get over the £1000, £32,000 or

Nobody Home!

It might look like a mistake, but it's true that all the chairs in the virtual studio are empty! There are no video clips of cheering/gasping punters to gee you on during your Q&A, which really puts a dampener on the famously tense atmosphere of the show. And Tarrent's faceless voice only adds to the sense of isolation.

Ask the audience and watch their ghostly statistics appear. It's like a seance!

The questions themselves follow a familiar pattern from *Catchphrase* dimness to *University Challenge* hardness.

Be A Millionaire?

▲ Oil Where's my glass of water? Being four grand better off can't hide the fact that there's no one there to share your success.

£1,000,000 threshold. And that's it. Apart from working as a team there are no other game modes to get busy with and without some kind of promotional code-based give-away (a missed opportunity, surely?) you only ever get the satisfaction of a few numbers on a digitised cheque.

Still tempted? Well you might not be after hearing that although Tarrant's adenoidal charms accompany you throughout the game whining "are you sure?" at every turn, he's actually nowhere to be seen. Instead you're confronted by two

empty rendered chairs! Even if the absence of his face might not be such a bad thing, the lack of any visible audience is even more off-putting. In short, it's exactly like the TV show... If nobody turned up.

To be fair *Millionaire* is only £20 but then there are other, better, budget games – like *Medal of Honor*. In comparison this is just a skimpy cash-in.

...answer 15 increasingly difficult questions and you'll (virtually) win a million...

Judgement

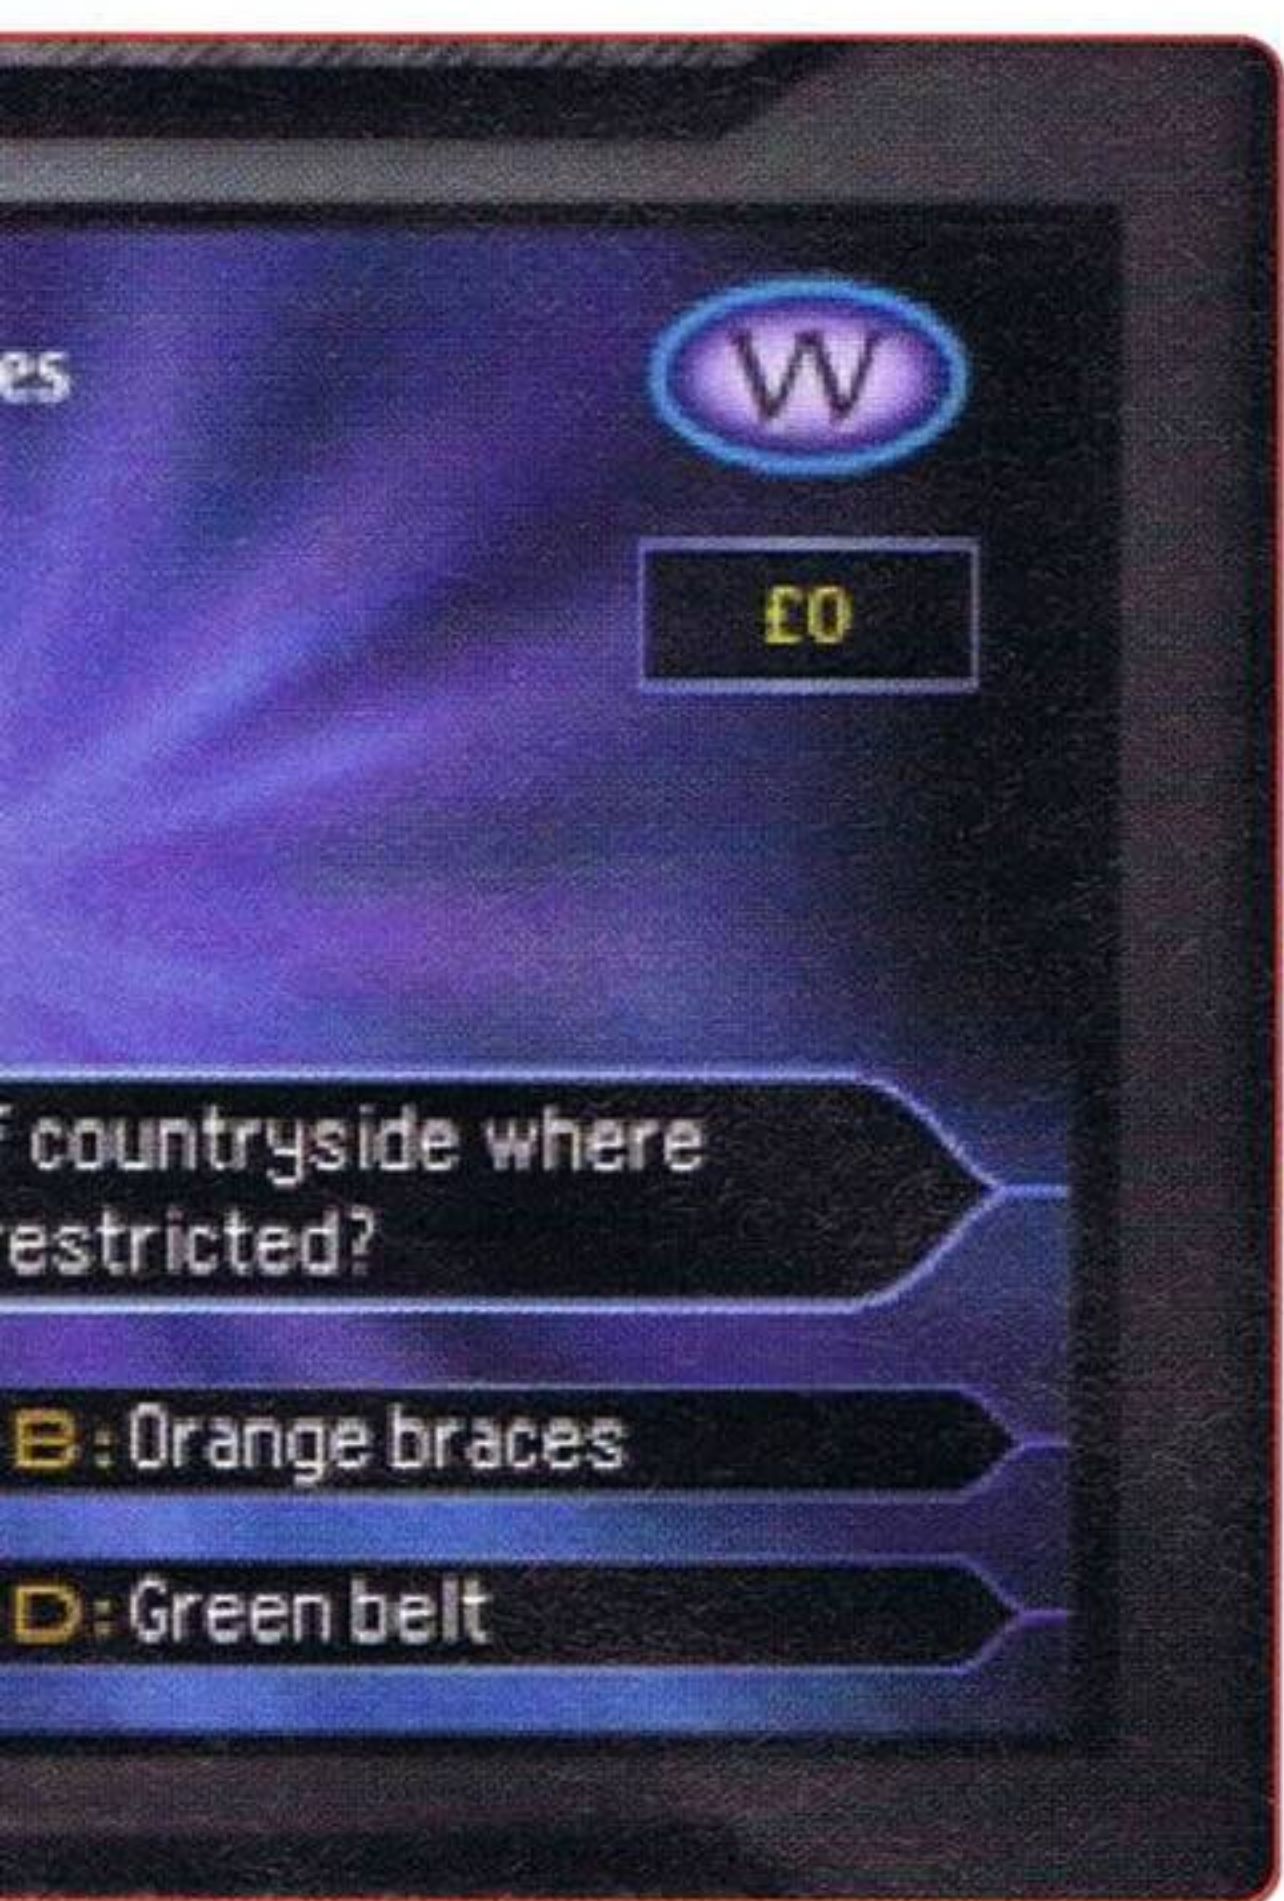

GRAPHICS Very little to stimulate your eyeballs here except a load of empty seats...

GAMEPLAY Just answer questions, use up your lifelines and either win or lose.

LIFESPAN The 1000 questions will keep you busy for a while but only if you play alone.

So who really wants to be a millionaire? Eidos do by selling a lifeless tie-in for £20 to sad people obsessed with the game show!

OFFICIAL JORDAN WHEEL
 Doesn't bother with that whole 'round wheel' vibe and instead goes for the F1 authenticity. It's always a pleasure to review DC wheels as there are so many games that really benefit from using a wheel. Not as great as the Thrustmaster Ferrari, but still very decent.

URBAN CHAOS™

“Combining incredible looks with an impressive logical adventure styling and plenty of face-slapping, head crushing action, Urban Chaos certainly looks like a winner”

DREAMCAST MAGAZINE

Urban Chaos throws you into the heart of a modern urban jungle at the turn of the millennium. To succeed you'll need a lethal combination of stealth, physical agility and martial art skills as you interact with the city around you. Complete freedom to explore every area is granted and this freedom extends to gameplay - the future is in your hands as you are drawn into an underlying plot featuring a mysterious cult, who are intent on evil at this unpredictable and potentially menacing millennium period.

DREAMCAST RELEASE 29th SEPTEMBER
