THRILL OUT

Twelve months of insane battles between soft-cos and hardware manufacturers. Survivors emerging with varying degrees of cred and cash.

Judging the scene purely on marketing success, and general acceptance, Sony are the champs. Still, honours go to Sega for maintaining a quality line-up, and knowing exactly who their fans are. Nintendo: at last you're showing us something more than castles in the sky - we're getting some grown-up action too! CVG has survived the storm by maintaining the objectivity you demand, while injecting enthusiasm we can't help (try and stop us!) when the occasion arises. We continue to present the information you need, with extras thrown in for added value. The price you pay for trusting anything less than our expert opinion is disappointment, a lesson that's hard to forget.

Remember, this party started with CVG sixteen years ago. It's going to continue in style through 1998.

PAUL

NINTENDO'S BLUE-EYED BOY

Ⓢ In Japan, Game Boys are the ultimate in cool. New styles are released regularly, and sell out instantly!

Guess what the hottest video-game system in the world is right now. Obviously you're about to discover you're wrong (anyone who voted N64, or PlayStation), since we have a huge photo of Game Boy printed next to this box. Yes the accolade of coolest console goes to Nintendo's pocket-size portable.

Game Boy. Eight years old. A monochrome green. Should be crap, but it supports the world's biggest-selling game, and is still selling more in a year than Sega's total installed base of Saturns (according to last year's sales figures). More surprising than that, Game Boy's most popular Mario title - *Mario & Yoshi* - sold almost as many copies as *Mario 64* (100,000 and 125,000 respectively). Funny figures, we should add, compared to *Pocket Monster* on Game Boy, which is selling in excess of 40,000 a week, bringing the current total to 4.5 million!

The gaming world is still sold on Game Boy. This makes us feel very happy, since it confirms our belief that the most influential players out there still love videogames.

Over three million UK players own a Game Boy. Together you account for over £1m spent on GB games each year. In 1998, THE Games plan to release at least two major games for the world's smallest console - *GoldenEye* and *Warland 2*. But you need to demand something even greater from Nintendo. You need to demand that they release *Pocket Monster* here in the UK. Because if they do, you'll be responsible for starting a craze so HUGE it will eclipse anything that has gone before it. Guaranteed fights between parents outside Toys R Us!

CVG RATING SYSTEM

5... EXCELLENT!

Pure magic, enough to make a grown man cry. Every game which hits the High Five is essential. Let there be no doubt, this is depth and vision beyond belief.

4... VERY GOOD

Usually the highest we feel confident awarding a game. Ranks among the best in its field, or surprises us with elements of well implemented originality.

3... GOOD

Something you may want to own, as opposed to renting out for a couple of days. Here is a quality, entertaining game to suit most tastes. Good, but not great.

2... PRETTY BAD

Unlikely to be especially original, or overflowing with exciting features – there are better examples available. Or else this is a clumsy attempt at a new concept.

1... VERY POOR

Almost a flat-liner, it's so lifeless. You'll be wanting to exchange this for something else straightaway. Save yourself the bother by avoiding in the first place.

WHAT YOUR JOYPAD SAYS ABOUT YOU!

E Every month CVG gets sent the latest control-pads. Many fail to grab our attention. However **Interact** have taken a novel approach with their pads, commissioning a scientist to reveal what a coloured joypad says about its owner. We thought the results might interest you.

"The sensation of colour is a primitive one," states Professor Jack Sanger. "Reaction to it, recognition of it, requires little effort of intellect or imagination. Colour conveys moods that affix themselves quite automatically to human feeling."

So to round up this flatulence, here's what Prof Sanger reckons each coloured pad says about its owner.

RED: SEXY
Red pad users are impulsive, sexy and have a strong will to win. "However it can also have a darker side. Red personalities feel invincible and others tend to think they are. They're quick-minded, who may not be well-educated but are quick with answers because they have lived the circumstances." They prefer shoot 'em ups, beat 'em ups, fast platform games and sports sims.

GREEN: HARMONY
Green joypad users are resistant to change. "The colour represents harmony, nature and radiates a

feeling of fullness. Green personalities want to help everyone". They enjoy strategy and god games. They also have a tendency towards co-operative games, and saving the world, dolphins etc.

BLUE: LOYAL

Blue pad users are calm and loyal, but tend to be sensitive. "Crying when they are happy or sad, blue choosers leave themselves open to others". They like multi-player games, especially ones with clearly defined rules.

BLACK: NO!

Those who prefer black pads are loners who reject establishment values. "Black has an association with saying no. Finding others' mistakes brings out their tenacious spirits". Black users also like god games, where the orthodoxes are overthrown via fantasy.

TRANSPARENT: TECHNOLOGY

Finally the transparent pad. Users of these are scientifically minded. They are obsessed by technology. The post-modern element also appeals to would-be designers, architects and such like.

Of course, all this effort was just to get a plug for their pads. So the PS SuperPad is available now for the PlayStation priced at £9.99, the N64 SuperPad is priced at £22.99, they come in a range of five colours. But where's yellow, eh?

- FUNKY MON STADIUM

Best Christmas Paul ever had was when he was 11. Racing bikes were the coolest thing that year (early AD), with drop-handle bars as the main attraction. Would have been enough for Paul's dad to stick said accessory onto Paul's old green bike. But no. Christmas Day was incredible because Ma and Pa Davies had bought a brand new, fiery orange racer for the lad. That'll explain the hunchback then.

Alex's favourite ever Christmas present was the Millennium Falcon he got as a kid. As the gripping tale goes, it was what he wanted more than anything in the world, but after opening all his presents it wasn't there. However his folks had hidden it until last, so he did get it after all. In fact, we often find him sitting inside it, beside the hologram chessboard, eating half a pea, one crumb and a drop of lemonade.

JAIME SMITH

Jaime describes his favourite ever Christmas present as sad. Sad as in pathetic. It was *Pac-Man* on the Atari VCS. And the reason it was great was because it was his only VCS game. Except *Combat*, which you got free. And so this simple gesture of festive generosity pushed Jaime into the heady world of videogaming. He also modelled himself on his gaming hero, as you can see from this photo.

F or Tony there can only be only one top Christmas present – his hoard collection of Atka. Actually that's a lie, but we're just trying to ruin his image. You see, Tony's a man with cool clothes, the latest DC shoes, he can skate and he likes The Designers Republic. There's just too big to be something embarrassing in his past, like a perm or marble-wash jeans. Something. Anything!

NEWS

NINTENDO'S MONSTER INVASION FOR 1998!

Nintendo are preparing their hottest games line-up ever! The earth-shattering software was revealed in force at the Tokyo Spaceworld '97 show just as this issue was going to press. And the hottest title of the lot was an N64 virtual pet game based on the Game Boy *Pocket Monster* series. What made *Pikachu Genki De Chu* (its temporary working name) stand out beyond the likes of even *Zelda 64* or *FZero*, was the sheer innovation of it. Players wear a microphone to interact with an on-screen creature.

GROUND-BREAKING VIRTUAL PET GAME FOR N64

Plugging it into the Nintendo 64 via a controller port, you activate the mike via a button on a joypad. Demonstrations were held at the show, with kids taking turns to shout at the screen. Even different types of voice didn't seem to affect its understanding. Responses witnessed, are as follows:

Say 'Pikachu' (its name) and the creature giggles back. Say 'Konichiwa' (hello) and it bows politely, and smiles. Say 'Ka-wai' (you're cute) and it blushes, acts shy and scratches its nose. Call it stupid and it sulks, running away. To get Pikachu to come back, you then have apologise saying 'Gomenasai' profusely.

The early show version only had one play area for Pikachu, a forest glade. What other areas will feature, and what you'll fully be able to do, are still a mystery. However, in the stage shown, you could throw a ball at the creature (using a joypad), teach him right and wrong (eat mushrooms, don't eat flowers), and tell him

➤ **Pikachu is the cutest Pocket Monster.**

to go to bed. You could also shout 'Fight!' to get him excited.

We'll be bringing you a full report on *Pikachu* next month, when Paul returns with first-hand details. His impressions of the game though, as he reported the information fresh for seeing it, are that this game is one of the most amazing things he's ever seen. There's only one blow, it isn't out in Japan until Autumn '98!

➤ **The mike icon means it's on!**

ON-SCREEN CREATURE REACTS TO YOUR VOICE!

[YET MORE BEASTS!]

The biggest game of last year wasn't *Final Fantasy VII*. Incredible as it may seem over here, it was a Game Boy title called *Pocket Monster*, which singularly revived the machine's popularity in Japan. Now the *Pocket Monster* series is headed for Nintendo 64. Tipped to be the biggest-selling games of 1998.

Two *Pocket Monster* games are lined up. *Pokemon Snap* is set for an autumn '98 release. In Paul's own words, you "travel around a safari park, taking snaps of monsters doing their thing. If they won't do their thing, throw rocks at them. Then they move. It's better than I'm making it seem. In fact it's gonna be brilliant! Show your pictures to the professor afterwards... Stop laughing."

The second title, *Pokemon Stadium*, is set for release on Nintendo's new 64DD disk drive in June. Plug your Game Boy *Pocket Monster* cart into a special controller pak and download your monster collection onto 64DD. They are converted into awesome 3D polygon versions, and up to four players can battle against each other on-screen. It looks fantastic!

Of course, the problem is, we haven't seen Game Boy *Pocket Monsters* in the UK. With the machine having sold three million here, it's clearly popular. So CVG have decided to start a *Pocket Monster '98* campaign. Call Nintendo distributor, THE Games (01703 653377) and demand a UK release. We wanted *Pocket Monsters* in Britain!

➤ **The Game Boy to N64 converter pak.**

N64 GETS THE WORLD'S TOP-SELLING GAME!

NINTENDO'S SECRET WEAPON: POCKET MONSTERS!!

NEWS

[NINTENDO RED-HOT RELEASES!]

Here's a quick rundown of the other major Nintendo titles seen at Spaceworld. In-depth report next month!

MARIO ARTIST

The sequel to Super Nintendo *Mario Paint*, is coming to N64 in July. There are three types. *Talent Master* lets you texture your face onto a model. You can then make it dance. *Picture Maker* is like old *Mario Paint*, with an extra cool 3D animation section. In *Polygon Maker* you can make stunning polygon models, fully texture-mapped. All three are fully interchangeable, so the possibilities, such as making a 3D cartoon starring yourself, are endless.

Use your face as a texture. Here they picked an ugly bloke.

Now make your 'creature' dance. What a sick vision.

IT DOESN'T STOP...

Mario RPG 2 is set for a Winter '98 release. It features PaRappa-style thin characters. *Mother 3* is an RPG that looks better than *FFVII*. You can scan in your face and your friends too, and go off on the adventure together. We won't see until next December. Shigeru Miyamoto has told CVG that *Zelda 64* won't be released until April. He also revealed for the first time that N64 flash carts will be released. Already available for Super Famicom in Japan, you can download new game data at convenience stores. *N64DD* is set for a June release. *Yoshi's Story* is set for December 21st. *FZero* is out in June. Miyamoto responded to US rumours that the game's simplistic graphics would be improved, saying they were finished. He's concentrating on making the gameplay as fast and exciting as possible, and according to Paul, he's succeeded. An N64 game called *BioTetris* was also shown. A wire that measures your heartbeat. As your pulse increases, the blocks fall faster. Afterwards, a graph shows your heartbeat pattern, hopefully not finishing with a flatline.

GAMEBOY CAMERA AND PRINTER!

Once scanned in, you can play games with you as the, um, juggler/ DJ.

The Pocket Camera swivels 180° to face other people!

The innovation here. A camera that plugs into your Game Boy and allows you to download an image of yourself. You can then toy around. Just like the Print Club sticker machines seen in bigger arcades, you can then print labels using an upcoming Game Boy printer. You can also send images from one Game Boy to another. Sounds wicked to us!

We've already know it's ace!

Set for an April Japan release.

Super-thin stylish graphics.

Shigeru Miyamoto has concentrated solely on the gameplay!

The depth of the environments is what makes *Zelda* staggering.

Old-style gameplay, incredible new-style looks. We can't wait!

NEWS

FINAL FANTASY VII BREAKS ALL UK RECORDS

Final Fantasy VII hit the UK on Friday November 14th. And in a repeat performance of its Japan and the US releases, it beat all previous sales records on PlayStation, Saturn, PC and N64, selling 48,000 copies in only two days! This figure took even Sony by surprise. According to their estimates, the game has made £2.2 million in retail revenues, which almost beats the figure from the first two days sales of the Spice Girls new album.

Meanwhile, the game has passed the three quarter of a million sales mark in the United States, where its opening sales made more than the number one film - *Gl Jane* - at the American box-office during the same weekend.

THE KING OF VIRTUAL PETS

A new breed of Tamagotchi has been revealed to us by Bandai. A virtual pet based on none other than Elvis Presley!

The Elvisgotchi has all the functions of the original Tamagotchi with a few twists. Food is now represented as a big hamburger. Eat enough and your Elvis grows from his raw '50's lean look, into an overweight lounge singer who can't stop sweating. The peck-a-boo game is replaced by a guitar. Please your singer by performing some meaty rhythm and blues, with a tinge of gospel. The duck that used to clean up your pet's mess, has now been replaced by a more acceptable toilet. Discipline is now represented by some army stripes. If your Elvis doesn't perform to a Vegas standard, give 'em some army training. Neglect Elvis and he demands attention indicated by an adoring female fan. Or perhaps your pet wants young female flesh! Finally, the needle to inflict medication, should Elvis get ill, takes on a bizarre new twist. Rumours that combined button presses of medication, food and toilet causes Elvisgotchi to overdose, explode and die are unconfirmed.

This incredible new addition to the growing Tamagotchi range is still only a concept. However, if there's enough interest in Elvisgotchi, you never know, it may appear at a local toy shop soon. To voice your approval, call Bandai on 01489 790944, and demand Elvisgotchi be granted life!

⊕ A-hunk-a-hunk-a-burnin' love. In an egg.

FINAL FANTASY VII RULES!

COMET CHARTS! ELVISGOTCHI!

NEWS

BE FIRST TO PLAY SAMURAI SHODOWN 64!

If you know what's good for you, you'll head down to the Namco Wonderpark in Windmill Street, London on the 22nd December 1997. Firstly you'll get to see the best *King Of Fighters '97* players in the country battle it out in SNK's massive tournament, and secondly you'll be among the first to play *Samurai Shodown 64*! The combination of two of the hottest fighting games mean there will be masses of SNK fans packed into the Wonderpark at once. And if you've ever seen a hardcore *KOF* player (six fingers per hand, three-times the normal human metabolism, eyes that never blink), you'll know what a worrying prospect that is. Sounds great to us!

Samurai Shodown on Neo Geo 64. Play it on the 22nd!

NEW SUPER CONSOLE FROM EX-JAGUAR TEAM

Just when we thought Sony, Sega and Nintendo had the next-generation console scene sewn up, here comes a new player with top talent on board and technology that promises to outclass even the N64.

The project is shrouded in secrecy, but rumours are flying about the previously unknown US developer, VM Labs, and its new machine, originally known as Merlin, but now dubbed 'Project X'. What has been confirmed is that several big names are working on the machine, most of whom were associated with Atari in its Jaguar days. Two of the designers of the Jaguar hardware, Jon Mathison and Richard Miller are leading the Project X hardware development team, and veteran British coder and long-time Atari fan, Jeff Minter (programmer of *Jag Tempest* and *Defender 2000*) is currently working on software for the machine. Jeff has released some

screenshots of Project X demos he has produced, which – not unexpectedly – show swirling psychedelic colours, pictures of sheep and bitmaps of camels. If the Jaguar links don't impress you (hardly surprising, but let's not forget it was duff marketing and a lack of games that killed that machine, not crappy hardware), check this: Bill Rehtock, the head of R&D at Sony USA, has left his top job to become Vice President of Software Development at VM Labs, after being shown hardware that "knocked his socks off". Interesting, eh?

Though Project X will be ready "really soon", it won't be released by VM Labs themselves. Apparently a large, and as yet unidentified, electronics corporation is backing the machine. As for software, VM Labs say there are development systems already in circulation at certain top developers.

Yep, Jeff Minter is back!

PC GAMES FOR UNDER A FIVER

A new PC Games publisher has made it possible to get hold of quality PC games for less than a fiver.

Classic PC games have been available to the UK since early October for less than five quid! The company responsible is called Sold Out Software, and is rapidly living up to its namesake.

Games such as Virgin's classic *Dune*, a forerunner of the successful *Command & Conquer* strategy game, have already sold extremely

well. Other Virgin titles include *Creature Shock*, *The 7th Guest*, and *Lure Of The Temptress* – all of which received a lot of praise when they first released as little as three years ago. More superb Virgin games to come include both *Cannon Fodder* games (incredible), and *Flight Unlimited*.

For five quid! At this price CVG can only recommend that UK players head off to their local games store sharpish, and see what else is available (Sold Out Software are signing up top titles faster than we can keep up!).

game into all participating stores, and have promised us the final will go swimmingly. We have to mention a big thanks to all the HMV staff, who in the line of fire had the bright idea to still hold the challenge using a demo disk of the game, so the show went on. We guess this time the challenge game was just so hot, Eidos couldn't get it to the stores in time. As a result of these snags, qualifying times were very mixed. Excellent times of just over

1 minute 45 seconds were common, but so were times closer to three minutes, for those stores where they weren't playing the assault course level.

The fourteen qualifiers will meet in the final that takes place on Saturday 24th January at the London Trocadero HMV branch. Giving those competitors who now own the game, the chance to hone their skills, and really go for the record on the assault course. See you there!

The HMV computer and video games CHALLENGE

TOMB RAIDER 2 CHALLENGE UPDATE!

The qualifying heats for the *Tomb Raider 2* challenge were held on Saturday 22nd November.

Again there are reports of huge audiences and mass hysteria. And a few teething problems too. Eidos has apologised for not being able to get copies of the

PLAYSTATION ON THE INTERNET

[HTTP://WWW.PLAYSTATION-EUROPE.COM](http://www.playstation-europe.com)

The official European Sony PlayStation site will be fully up and running in January. There's already a preview version going which shows just how great the site will be.

It already looks amazing – probably the best-looking site we've ever seen – and there are loads of good ideas being started up. You can even customise your browser depending on your frame of mind each day! We'll have more on the site when it's working fully. Should be a good one.

Here you get to dress the skeleton any way you want.

The PlayStation Europe site looks fantastic. The borders on your browser can be changed each time!

ULTIMA ONLINE

Playing *Ultima Online* can be a fantastic experience (when the game isn't jerking about and cutting you off all the time). Everyone who plays has stories to tell, and we want to print them in CVG World every month. If you have a particularly interesting day, write out a SHORT diary explaining it. We also want little tips that you've got. Here's an excerpt from the diary of Pink the Bard, one of Ed Lomas's alter-egos.

SONY ONLINE GAMES

[HTTP://WWW.STATION.SONY.COM](http://www.station.sony.com)

↑ **Tanarus: Multi-player tank battles!**

↑ **EverQuest: A full-3D online RPG!**

Sony Interactive Studios America (SISA) have started making multiplayer internet PC games. The first to get going was *Tanarus*, a team-based tank strategy battle game. It can support 10,000 players at a time (20 per game divided into four teams of five players each) and is designed to have very little "lag" which slows the game down. *Tanarus* requires a fairly fast PC to run (Pentium 200, 1.6 megabytes of RAM) and even works with 3Dfx cards. You can download a demo from <http://www.tanarus.com>.

The next online game is to be *EverQuest* – a full-3D online RPG. It will feature 12 races, 14 character classes and more than 40 skills to choose from. Over 1000 people will be able to play on each server simultaneously, exploring five massive continents! Hopefully SISA will be able to avoid the connection problems that plague *Ultima Online*. Sounds promising. Have a look at <http://www.everquest.com> for more information.

WHAT'S GOING ON?

[HTTP://WWW.GAME-ONLINE.COM](http://www.game-online.com)

As you'll know if you read the last issue, CVG is now on the internet as part of Emap Images' Game-Online. The real-time Voting area is now running, letting readers vote on current video game issues. And hopefully by the time you read this, the real-time Chat rooms will also be available. Here you'll be able to get in touch with other gamers from around the world, as well as chat with the geniuses that create CVG. Game-Online also has themed weeks. Through December and January there'll be features on *Diddy Kong Racing*, *Quake 2*, and the various Winter Sports games coming soon. There's also going to be an interview with Toby Guard, the man who created *Tomb Raider* and, of course, Lara Croft. Make sure you look at the reader's forums – there are some hot discussions about biscuits which you'll no doubt want to be involved in.

Recently Game-Online had a *Final Fantasy VII* week to celebrate the release of the game.

DAY 2

"After spending many hours practicing my music, I bought a dog from a trader for 20gp which I named 'Pongo' and was given a free pig with it, I called him 'Hombre Hog'. After feeding my food supplies to Pongo I got annoyed with him following me everywhere and locked both him and the pig in a shop and ran away. I have heard stories of magical items in a nearby city called Vesper, so tomorrow I plan to make the journey there. I just hope I don't run into the gangs of 'PK-ers' (Player Killers) I have heard about. I should be safe – my musical skills are improving, and my new robe makes me look quite threatening."

DAY 3

"Today I finally felt ready to leave the safety of Britain and set out in search of a new city, Vesper. The woods outside the city walls are dangerous, filled with bandits, wild animals and strange monsters. I met a friendly-looking wizard named Kai-Mar and offered to sell him a large fish (which I had previously stolen from someone fishing by the river in Britain) and he stopped to think about my offer. Then he fished me with a lightning bolt. All I could do was watch helplessly as a ghost while he stole everything I had collected over the last few days. At this point I decided that I would roam the land in my underpants and a woman's hat, tormenting all. I have become 'Evil Lord Pink'. Beware."

Chris tmas. As well as being a time of hard-core religious worship and top TV movies, it's a time of friendly correspondence. Before the big day there's the Christmas card frenzy, then afterwards there's all the letters you have to write to Granny and Uncle Edna to thank them for their lovely gifts. Phew - you're going to have one busy biro this month! So while it's still warm in your hand, why not write to us as well? Whoever sends the best letter gets their choice of game dontcha know!

I'M HAVING A TIME CRISIS!

Dear CVG,
After reading in issue 190 a 'new games look at Time Crisis', I became very distressed. Yeah, I can hear you now, laughing at this statement, but I noticed something which may apply to a lot of people with newly bought PlayStation3. This is that the newer PlayStation3 only have a port for an RFU adapter. I believe this to be because Sony took out the 'video out port' from the first PlayStation3's so they could bring the price down to £100. Basically, my point is you showed a diagram with the Gun-Con plugged into the video out port (so that it had better accuracy), and my machine doesn't have that socket in the back. Does this mean that I can't play Time Crisis, as I was so looking forward to it, I started saving the £60 ages ago.
Richard Brookes, Cheshire.

CVG: Fear not Rich, as you can indeed play Time Crisis on your new machine, but you'll need to get one more lead to go with it.

The good news for yourself (and all the other people intending to buy Time Crisis with new

⊕ The GunCon schematics. Many Bothans died to bring us this information.

(machines) is that Sony are going to bundle this lead with the game. No extra cost. No extra hassle. Check out our little diagram to show you exactly how to fix it up to your TV.

CHALLENGE US! PLEASE

Dear CVG
I would like to know why there is no HMV/CGV Challenge in Ireland. The third one is approaching and still there are no signs of the two stores in Dublin and Belfast holding heats. Why don't you run a separate final over here because there are a lot of decent game-players in Ireland and it couldn't cost that much to fund. I would also like to know which is better and worth the money out of Goldeneye and Final Fantasy VII.
D. Kavanagh, Dublin, Ireland.

CVG: Challenge locations are up to the stores themselves. So, unless you can go along with a big group of mates and change the manager's mind, the challenges will stay to mainland Britain. Sorry. As for the games, Final Fantasy VII will last you a lot longer than Goldeneye, and is a great experience. On the other hand, Goldeneye amazes just about everybody who plays it. Hard decision. Wouldn't want to make it for you.

THE ALEX HUHTALA FAN CLUB

Dear Fooble Midget,
I am sorry that you cannot reach the door handle to your house. Maybe you should carry a ladder around with you. I own a Saturn. I hope you enjoy your Cup-a-soup.
Deen Lim, West Ewell, Surrey.

CVG: We tried to get Alex to reply to this letter, but he couldn't reach the keyboard. Poor little fellow.

CRUISIN' FOR A BRUISIN'

Dear CVG,
Please could you track down when Cruis'n USA is coming out. I have waited nearly six months for this game and I feel rather cheesed off as it's been on import for a year now. I have contacted The Games with no luck, tried various importers who told me it's not released. Please could you pull some strings and get it out or Sony will be getting my custom from now on.
Simon Harrison, Worthing, West Sussex.

CVG: We don't care if Cruis'n USA doesn't come out over here as it's complete rubbish! One of the worst games ever, in fact. Diddy

BITS THAT WERE SAVED FROM THE BIN!

Dear CVG,
Is there anyone left in the world who hasn't seen Star Wars? Who hasn't tried to do Chewbacca's strange voice? Or indeed, put a bucket on their head and stomped around the house in a cloak shouting "Bring me the Princess, I want her alive!" Or waved a red broom around, shouting at your little brother: "Your powers are weak old man, now I am the master!" No? It must be me then. But what would it be like without George Lucas? Without Star Wars?? I'd better stop right there because I'm scaring myself.
Grant Bush, N.Jobing, Gloucestershire.

Dear CVG,
How about making a Rage Racer type game for the Saturn, but instead of just having loads of rock soundtracks and 2-4 cars like Sega Rally and Marx TT (both still good games), have sound tracks from dance outfits like Sash, Puff Daddy Inc, Dave Angel, Goldie, Roni Size and U2 Bukem?
David Palmer, Derbyshire.

CVG: Can you imagine hurtling round a corner at over 150 mph in Rage Racer, cutting up a rival as the G-Force kicks in with 'Every step you take' by Puff Daddy blasting in your ears! What an anti-climax. Maybe you could get Elton John, Spandau Ballet and A-Ha as well!

Dear CVG,
Computer and Video Games is a saviour to many, many people. It's the best there is and if you don't realise that, then you should wake up and smell the Tamagotchi turd that you shuffle!
John Hagen, Elton, Chester

CVG: Heeyyyyy Johnny Boy! You so crazy-zeel!

Dear CVG,
There is one thing I want to say to the CVG Team. Where did you get Ed Lomas, surely he can't be real?
Xena. No fixed abode.

CVG: When Paul took over the editorship of CVG, he was out looking for staff in the local zoo, when he stumbled into a freak show. Inside, a man called Lomash was sitting under a sign which read Real Life Observing MASHine. Just looking at everyone. Paul stuck him under his jacket, took him home and called him Ed. By carefully nurturing him through his early years using the Spirit of the Mad Games, Ed Lomas was raised into the fine figure of a man you see before you today. The End.

Kong Racing however is much better and that is what you should spend your hard-earned on.

FILM BUFF MEETS GAMER

Dear CVG,
I was told that there is a movie being made of Resident Evil. Is that true and when is it coming out? Also, I was

looking in another mag, and there was a woman who looked like Lara Croft. Is there a movie coming out with her in it? Oh, and one other thing: when is *Resident Evil 2* coming out as I can't wait for that to come to Scotland?

Derek Cairns, Knightswood, Scotland.

CVG: Both of the games you mention will be made into movies. *Res Evil* already has *Jason Patric* cast as *Chris Redfield*, and if rumours are anything to go by, none of the gore from the game has been lost. As for *Tomb Raider*, *Liz Hurley* and *Demi Moore* are apparently the two favourites to play *Lara*. And the women you're referring to is *Rhona Mitra*, who *Eidos* hired to act as a real life *Lara*.

DEAR DEIRDRE IT ISN'T!

Dear CVG,

I have a few problems with your issue 192.

1. Why the hell were the Spice Girls featured on the front cover of the magazine when three games, namely *FFVII*, *Time Crisis* and *Goldeneye* had reviews inside. These three were some of the most important ever created (*FFVII* is a revolution, not a semi-revolution as "The Mana Hero" says in #192). The Spice Girls game is an embarrassment for the PlayStation and magazines as big as CVG should not be advertising it on such a big scale. This is not what the PlayStation was made for - give it to the cartoony, childish and generally inferior N64.

2. Why does *G-Police* only deserve a four out of five when it is such a classic game (what is the big problem if any, when it comes to giving *G-Police* a four)?

By the way, have I made the correct choice to save my money for *Time Crisis* and *FFVII* instead of *G-Police*, *Tomb Raider 2* and *SF EX*?
Henry Harker, North Yorkshire.

CVG: You're damn right they are some of the most important games ever created, which is why two of them got covers and *Time Crisis* was flagged heavily on two covers as well. We're sorry if you didn't like the Spice Girls cover, but the issue completely sold out so somebody did.

DEARLY BELOVED

Dear CVG,

I've got an idea for a pedal you could use for *Time Crisis*. Place a light and fairly large book over the buttons of the joy pad in port two. Then simply press on it with your shoe while playing to duck undercover. This is much easier and more hygienic method than using cheesy toes.

P.S. Please pray for my cyber-dog, *Snowy*, who was murdered at 46 years of age by a bastard who pressed the reset button and whose arms are now broken. RIP *Snowy* (Sniff).

Robert Bui, London.

CVG: Cheesy Toes. This letter was OK until we got to that part

TAMAGOTCHI HITS HOLLYWOOD

Dear CVG,

You may already know this, but there is going to be a Tamagotchi movie. As with any craze in Japan, an animated feature wasn't long in coming. The Tamagotchi movie begins with "Dr. Bonzo," an unfortunate man who has struck out on his one hundredth "marriage meeting". Being dumped for the 100th time seems to have been the last straw for Bonzo and, feeling

depressed and lonely, he goes to sit and think by the riverbank where he sees a UFO land. Rushing to the location, he finds the residents of the saucer to be the mysterious Tamagotchi. Dr. Bonzo then decides to investigate the mysteries of the Tamagotchi, which I assume are revealed in the film. Tamagotchi: The Movie was released in Japanese cinemas this summer and should be out on video in America now, though I doubt it will ever come out over here. If it is, then it will be released by Anime Projects, AD Vision or Anime Pioneer, and considering the film's nature, certainly not Manga Video. I was thinking you could buy the film on import and review it in the magazine.

Andy C.

CVG: Our hats go off to the mysterious *Andy C* as there was indeed an animated Tamagotchi Movie. It's success in Japan must have been limited due to the lack of coverage it received, but needless to say, we're tracking down a copy at the moment and as soon as we have one, you'll be the first to know.

CVG: You know that stuff about cheese coming from milk? Lies.

STAR LETTER

SHOULD YOU TRUST THE HIGH FIVE

Looking at the current performances of the Saturn and the PlayStation, the enormous gap in sales is a total contrast to the quality of the games on each system. The PlayStation has a far greater quantity of games being released, but isn't the quality more important? The public have been convinced by the huge variety of PS games, while the Saturn's limited software library has been its greatest weakness. Obviously the PlayStation has far more third party support, but why is this the case?

From looking at the sales chart in *Freeplay*, it is obvious that it is not the quality games which are flying off the shelves. All we see are endless "Platinum" games, which have only sold because of the fancy tag. Some of these games are truly dreadful by today's standards (*Alien Trilogy*, *Rayman*, *Worms*), and this shows the questionable tastes of many PlayStation owners. Most old Saturn games can be found for under £20, but because that fact is not advertised, they are ignored. This is another triumph for image over substance.

I think that the PlayStation is an incredible machine with a strong future,

but this is no reason for 3rd parties to ditch the Saturn so quickly. Just ignoring it because of the low financial return is not good enough. Maybe if they worked with the machine for a while, they would discover its true potential. Sonic Team and the AM departments are continuing to produce stunning games for the Saturn, and there is no reason why others cannot do the same. Their lack of effort is the main reason why such a great system such as the Saturn has failed to penetrate the mass market.

P.S. I like the way you have a High-Five celebration when four of them appear in issue 186. Then seven more come along in issue 192, and it doesn't seem strange. Could it just be the super quality of the new PlayStation releases, or is the High-Five not the accolade it used to be?
Gavin Woodworth, Penrith, Cumbria.

CVG: We all know that the Saturn is a cool machine, but the fact is developers outside Japan will not make as much money from Sega's machine as they would from Sony's. Sony learned from the mistakes they made in marketing Walkmans and Discmans and used that to their advantage by making the PlayStation the first console it was 'cool' to own. As it becomes more and more mass market, so the bulk of the owners is made up of more casual game players. The real fans bought the machine ages ago, and they know what to avoid. Everyone else who is just entering the market sees the prospect of cheap games as much more appealing than those priced at £40-plus.

As for your comment about the High Five, our standards haven't changed one iota. Of the seven games you refer to, four were on PlayStation. *Final Fantasy VII* and *Time Crisis* cannot be disputed. *SF EX Plus Alpha* is one of the best arcade conversions ever, and *Castlevania* is an all time classic 2D platformer. Remember that the High-Five is given to classic games, and all of those fit into that category.

 PlayStation™	 SURVIVAL HORROR	 BY CAPCOM	<ul style="list-style-type: none"> • NO OTHER VERSIONS AVAILABLE • NO OTHER VERSIONS PLANNED • STORAGE: 1 CD • RELEASED BY CAPCOM TEL IMPORTER
	 SPRING RELEASE	 1 PLAYER	

Resident Evil 2 takes the now-famous "world of survival horror" to the next level, with graphical environments, storyline, and character design that utterly smash the original.

RESIDENT EVIL 2

It's hard to say the words "*Resident Evil 2*" without a tremble in the jaw, a quivering of the bowels and a clenching of the gut. Capcom fanatics have been waiting for this game – nay, not just a game, an event – for what seems like an eternity. We've waited and waited, through delays, through a graphically inferior Saturn version, a graphically superior PC version, through a barely-worth-mentioning remixed original (*Director's Cut*, minus uncensored video sequences), through a complete revamp from scratch of the sequel's game design, and through more delays. Finally, the event has almost arrived, and guess what? *Resident Evil 2* was worth its wait... in entrails!

SATISFYING STORYLINE

Wes Craven (director of *Scream*) would be proud of Capcom's script writers, as the postmortem *Resident Evil 1* story follows one of the great tenets of any real horror movie: no one believes the heroes. Despite Chris and Jill's best efforts to warn the Raccoon Police Department (R.P.D.) about the horrors they barely survived in the mansion at the edge of town, their tale gets laughed off as so much hallucinative rubbish.

It's now two months later, Chris, Jill, and Barry are gone (Where to? You'll find out in the game), and Raccoon City has been completely overrun by zombies. How did this happen? Gee, could it be some nasty virus from that pesky Umbrella corporation? Experiments gone wrong? Nahhhh. Those policemen should have listened to Chris and Jill's warnings. Now look at them. All they can do is scratch, bite, sniff, chew, eat, and slop. Not to mention itch. (If you didn't play the first game that last bit probably has you wondering...)

Claire Redfield, Chris' scantly-clad and vivacious sister, hasn't heard from her brother in months. (By the way, Claire even sports the exact same "Made in Heaven" bomber design on the back of her jacket as his erstwhile bro. And hey, look – she's got that combat knife holster on her shoulder, too! Makes you wonder, don't it?) Lovely Claire rides into town on her Harley searching for her sibling, but instead finds nothing but good ol' American apple pie. Not to mention flesh-eating zombies. At the same time, Leon S. Kennedy, a new out-of-town recruit to the recently-beleaguered R.P.D., hasn't heard from his new employers since the interview but shows up for work anyway (fully clad in uniform! What, like they gave him one once he'd been approved for him to, like, practice feeling cop-like in?) Bad decision; always check with your new boss to make sure he hasn't become one of the undead since he offered you stock options. Thus the stage is set for *RE 2*.

➤ Search Chris' desk and check out his diary. You'll get a clue about the current whereabouts of the S.T.A.R.S. of *Resident Evil 1*. The words "Europe" "Umbrella headquarters", "secret laboratory", and "*Resident Evil 3*..." somehow spring to mind.

➤ A frozen secret laboratory!

➤ Leon and Claire are the heroes of *Resident Evil 2*. Say hello!

CASTING CALL

RE 2's cast of characters is much more diverse, well-written, and developed than RE 1. What a concept, characters with personality! The two primary supporting characters are Ada Wong and Sherry Birkin. Ada is a beautiful Chinese-

American woman who is looking for her missing boyfriend, John... but does she have other motivations? (By the way, original *Resident Evil* fans may remember the passwords from the "R.O.P.L.S." computers in the mansion lab:

ADA and JOHN. Simple coincidence... or does Ada have some connection to Umbrella? Sherry Birkin is a little 12-year-old girl wandering through the hell of the R.P.D.; you must protect her from anything and everything.

SHERRY

Sherry's frightened and she needs a nice adult to help her in this world of terror. Claire's not into baby-sitting, but today she'll make an exception.

Sherry's survival isn't much of an issue with four health sprays, but all the same you might not want to pat the doggies too much. And don't go talking to strange men with their faces hanging off.

When you're in control of Sherry, you'll have to solve a puzzle for Claire to be able to advance.

The amazing part is that you can actually play as these supporting characters at certain points in the game. These points are fairly brief, but add an unexpected and thrilling change of pace. It's especially cool to play as Sherry, as she's too small of a lass to carry any weapons of her own. Your only chance is to run for it! Fortunately, she's ready with four health sprays, and can take more damage than the adults. Seems strange, doesn't it... perhaps Capcom wants to avoid scathing letters from overzealous mothers about the graphic death of a 12-year-old girl in little Nigel's new PlayStation game by making it next-to-impossible to kill her!

There are other non-playable characters including the scoop-hungry reporter Ben Bertolucci, chief of police Brian Irons (who bares a striking resemblance to Mike Haggar, former mayor of Metro City) and the husband-and-wife scientist team William and Annette Birkin. With its great complement of characters, RE 2 offers more intrigue and suspense than RE 1 ever had.

Chief of police Brian Irons is hiding out somewhere deep within R.P.D. Will he help you? And who's the gorgeous corpse?

ADA

Ada wants your help finding her boyfriend, but there may be more to her than meets the eye. Admittedly, what you can see of her is pretty nice!

At this ventilation shaft, Leon boosts Ada up and then you take control of her in a brief section (much like with Sherry). She's not much better than Sherry with only a pistol at her disposal.

Rule number one about the R.P.D.'s morgue: the dead don't always stay dead. Stay alert!

RE 2 is filled with mini-story events where the screen goes letterboxed. Notice the gaping hole in this cop's chest; the next time Claire sees him, he's gonna be hungry...

Reporter Ben Bertolucci would rather stay locked up in his cell than risk his sorry ass trying to escape the R.P.D. To be honest, we don't blame him.

Annette Birkin is a brilliant scientist who wants her husband's work to live on at any cost. She doesn't care about certain other people living on though.

RESIDENT EVIL 2
WORLD'S FIRST PLAYABLE

COVER STORY

LIFE AND DEATH (MOSTLY DEATH) IN RACCOON CITY

Whether playing as Claire or Leon, you begin the game on the outskirts of town. Fire rages uncontrolled as zombies (former civilians and police officers alike) try to gnaw your skin. The game takes you through three floors of the Raccoon Police Department, the basement, the sewers, a factory area, a laboratory, and more which we could reveal but then we'd have to dismember you, then proceed to gnaw at your bones. The ultimate objective is simple: get out of town by any means necessary. Overall *RE 2* is more expansive than *RE 1*, and the

environments are astoundingly much more detailed, arguably surpassing even the beauty of *Final Fantasy VII*. There's quite a bit more animation and interaction with the backgrounds this time around, such as collapsing ladders, breaking floors, ominously creaking fans, fires to put out, and the like. The sequel does require a bit less backtracking than *RE 1*, but there's a far larger volume of areas to explore, so you almost don't even want to go and return to previous areas.

☛ Somehow you gotta find a way to clear this chopper. Wonder what possessed the pilot to fly it into the side of the R.P.D.?

☛ Insanely detailed renders fill *RE 2*'s world. Where else would you find a working fax machine and a shockingly realistic representation of a police briefing room down to the chalkboard and PA stand?

☛ Umbrella's laboratory is hidden somewhere in Raccoon City. Sane people would run in the exact opposite direction, but you're headed right for it.

TUT, TUT... LOOKS LIKE BLOOD!

RE 2's designers have gone overboard on the enemy design in this game — whereas the original sported a total of three different zombies, the sequel has more than eight, including a truly distressing, scantily clad female zombie, and zombies engulfed in flame! Producer Shinji Mikami has even gone on record saying he wanted to include child zombies... too bad he didn't.

Woulda been juicy. Other returning enemies from the original include the Cerberus, the Web Spinner, and crows, but most have been replaced with equally terrifying new deviants such as scuttling red monstrosities that are long of tongue, leaving behind puddles of drool as they go, incredibly hard to kill plant-based fiends, and a lovely new menagerie of new bosses.

☛ If you played the demo, prepare for a shock — these zombies will bust through the chain link fence.

THE BOSSES

☛ You know it's *Resident Evil* when the bosses have gross red eyeballs growing out of their sides.

☛ Are the croc's eyes larger than his stomach? You probably don't want to get close enough to find out.

The boss freaks include all manner of new Tyrants (there's one ominous, ten-foot tall Tyrant sporting a trenchcoat that cannot be killed, constantly chasing you... freaky!) and even a gigantic, ten-times-larger-than-normal crocodile that chases you down a sewer shaft!

☛ Dinner time at the R.P.D.! Brings a new meaning to the phrase "Mess Hall", eh?

☛ Face it. You know you want her. It's the new leggy supermodel, Chick Zombie!

☛ If zombies scare you, try this concept on for size: skin-less zombies. Ick.

☛ Nasty crows, stay away!

☛ The poisonous spiders from the first game are back in force.

☛ This creepy crawly enemy can slaughter you in one fell swoop.

EVIL AUDIO

The area of sound has been just as greatly improved on as everything else, if not more so! "How can this be?"; you may be wondering, "RE 1's pseudo-musical, ambient soundtrack provided a perfect accoutrement to the horror theme, adding an underlying, subconscious feeling of foreboding desperation to the already bleak situation before you." Then again, maybe you weren't. But in any case, *RE 2*'s soundtrack is just that – a soundtrack. The PCM (music playing on the internal sound chip, rather than from CD) quality here may even surpass that of *Final Fantasy Tactics* – until now, the best chip-generated music heard on the PS.

What about the voice acting? Is it as ridiculously slow and cheesy as the first game? Almost. Would it be *Resident Evil* otherwise? Because of the unbelievably corny way she says it, Sherry's "I don't know, the door won't open!" is notable. Listen for it near the end of the game when playing as Leon; it's just soooooo bad.

The game's other sounds, from some truly disturbing zombie moans to the rat-tat-tat of an Ingram sub-machine gun, are quintessential *Resident Evil*. Most impressive is the range of sound effects Leon or Claire's feet create, from crunching glass to clanging metal catwalks.

EVIL

WARRIORS CAN DO MORE

↑ Shake out when you're being bitten. If they're gnawing your ankle, it's head smashin' time!

↑ If they're biting your shoulder, you'll shove them away.

Capcom have given Leon and Claire (not to mention the enemies) a whole new range of exciting actions and poses. The first addition you'll find is the *Virtua Fighter* style head-tracking system – Leon or Claire look at the zombies around them, rather than staring straight ahead like some Greek god or goddess-physiquested mannequin at Harrods. Further, after you down a zombie, they'll stare in disbelief at the corpse. All characters breathe convincingly now, but the real attraction is the new limping system. As you get beaten down by foes, Leon and Claire will noticeably slow down, first clutching their

wounds, then limping pathetically, using their weapons as crutches. This adds a great element of strategy, especially when poisoned – your movements gradually become more sluggish as the poison penetrates deeper into your nervous system, leaving you frantically searching for a blue herb. Another exciting feature is the zombie push-back that our heroes perform as they're being gnawed on – giving a manly shove, they hurl zombies across the screen, which will also knock adjacent zombies down. Let's see those wimps Chris Redfield and Jill Valentine try that, eh?

↑ The heroes grab their stomach or drag their leg when injured. When they're in really bad shape, they'll use a weapon as a crutch.

HORRIFYINGLY FAMILIAR GAMEPLAY

↑ Key items can be in hard to reach locations.

↑ You've got to figure out a way to lower this ladder.

↑ Puzzles require you to push objects around, just like RE 1.

↑ Search everywhere for secrets; some aren't so obvious.

Play mechanics remain largely similar to the first *RE*. There are the now-standard item boxes, limited ammo, ink ribbons, typewriters, health sprays and tricoloured herbs. There's even a throwback

to the four Crests of the original – Chess-themed Plugs (Rook Plug, Bishop Plug, etc.). The puzzles remain similar too; pushing stuff around, pulling levers, and using the right item at the right place

are generally the name o' the game. There's some new stuff, like blowing walls up with plastic explosives and augmenting your weaponry, but we're talking mostly standard *Resident Evil*-ness.

↑ The fireplace plays host to a fairly obvious puzzle. You have to roast a pig (not really).

↑ If you're stuck on a puzzle, clues are usually right around the corner. Make sure you explore everywhere thoroughly before giving up.

RESIDENT EVIL 2 X 4

The main addition to the gameplay is the too-cool-for-words Zapping System. This somewhat mysterious gameplay improvement centres around beating Leon or Claire's basic quest, then saving to memory card. You're then able to play an alternate, totally different game of RE 2 that's adjacent to the original scenario, so to speak. We won't reveal too much, suffice to say that RE 2 hasn't really begun until you've beat it once. This means that if you beat the game with both Leon and Claire, you'll have access to four different RE 2 scenarios, complete with different locations, items and enemies... that's four, four, four games in one, people! Is that a mega-bargain or what?

↓ This relentless Terminator Tyrant chases everywhere in the game's "second quest" Zapping Mode. He's possibly the coolest RE enemy ever!

LIFE AFTER DEATH

Though this may sound strange, try to be killed by every single enemy in the game. Capcom devoted much time to the way each enemy finishes you. Check out the crab monster's repeated bashing of your skull on the pavement or one of the later bosses engulfing you into its toothsome maw and shredding you limb from limb!

GUNSHOT WOUNDS

↻ The man behind the counter is holding a shotgun in Leon's game, but a bowgun in Claire's game. Yes, each character can obtain vastly different weapons.

↻ Here, Ada bandages Leon up and his costume changes! Notice the shotgun with the attachment.

↻ Claire Redfield models her new devastating, multi-ammo-capable Spark Shot.

RESIDENT EVIL 1.5 - THE GAME THAT NEVER WAS

Remember when *Resident Evil 2* was supposed to release many months ago? Ever wondered why it didn't? Capcom got 65% through with the game (some sources) didn't like it, and started over from scratch. True story. Capcom still has a copy of that incomplete game and now affectionately calls it "*Resident Evil 1.5*" to reflect that it was halfway where they wanted the game to be and had elements of the original RE. Some of the changes from RE 1.5 to 2 included: different, better-looking game environments (1.5's R.P.D. building was very modern, but the renders were a bit bland, while RE 2's R.P.D. building is an ancient-looking museum converted for police

duty, with far more detailed and exciting graphics), different characters (a heroine named Elza Walker), and different zombies (RE 1.5's big advantage over the original was that it could fit eight zombies on-screen, but their polygon detail was much lower... somehow, Capcom have managed to fit seven on-screen in the final version of 2 with greater detail than RE 1's models!). Of course, as Capcom started over from scratch, almost everything is different! Wouldn't you just love to check out that almost-done version? Please, Capcom, include 1.5 as a secret bonus for good RE 2 players!

↻ Not much to do on this bus but get a few ex-cops out of their misery. You could try ringing the bell repeatedly to annoy the driver.

↻ This high-tech factory late in the game is one of the most gorgeous, detailed rendered environments ever seen in a video game.

THE END, FOR NOW

RE 2 is maybe 80% done, and key elements (such as the opening and ending FMV) have yet to be added. Also, the game seems a bit easy in its current form, mostly because you get three ink ribbons per pick-up (RE 1's English version limited you to two). Assuming the wizards of game balance at Capcom get it right, RE 2 will be an event no PlayStation owner will want to miss.

He may be an icon in Japan, but Goeman has yet to make a big impact on the British market. Konami are hoping their fifth game in the series will be the one to do it.

GOEMAN 64

WITH A LITTLE HELP FROM MY FRIENDS

What's bizarre about Konami's Goeman series of platform adventures is that, even though five games have been produced and all of them have been major hits in Japan, only one of them (the first SNES one, *Legend of the Mystical Ninja*) ever made it to an official release in Europe. Now the character has undergone a Mario 64-style 3D facelift and Konami are expected to release this N64 version over here next year. Meanwhile, we've been been sampling an imported cart packed with Japanese text – fairly incomprehensible, but we managed to work out the basics.

Goeman is the central character in this game, but he also has a couple of friends to lend a hand. Ebisumaru is with you from the start, and you can switch between them both whenever you are stationary by pressing the C-Down

button. A third person also joins your party during the game, a female swordsman we don't yet know the name of. And with one more character space in your inventory, we can safely assume that a fourth joins your quest along the way.

ONCE INSIDE...

Once you're playing the game, there are a couple of little pointers that might help quicken your progress. In the English version these will be plainly obvious, but the language barrier makes them more obscure. Import game fans, take note!

IN-GAME MAP

There are two sorts of map screens which you can consult. The first is the scaled down, more detailed version that shows you where doors and exits are located. Press the C-Right button whenever you're lost in a town or dungeon to call it up. Notice the lovely transparent effect!

SHOPS

You may not notice the shops at first, because the doors aren't as easy to find as you think. They stock a variety of items – the two that we found sold weapons and the other sold sushi! Just walk up to the table and select what you want to buy. Easy.

MAIN MAP

Finally there is a main map screen which shows you the location of all the towns, villages and other levels you may have to visit. To call this up you must pause the game and hit Z. You can rotate it by using the C-Up and C-Down buttons as well.

Good timing is needed here.

This guy gives you the hook.

Strange voodoo goings on here. He takes 10 coins to let you live!

❗ The less health Goeman has, the more pained and out of breath his movements become.

❗ One of the first enemies you can kill is this bizarre flying dog head. Just don't ask us, OK!

❗ Spinning spiky balls. We've never seen that before. Oh no.

🗝️ FIRST THINGS FIRST! 🗝️

The first main task you have to complete is getting yourself the grappling hook. This is to be found at the top of the mountain once you leave the first town. Look out for the ladder and climb up to the first ledge. There is a doll at the end of the platform, so get that and track back. Even though the ladders are right in front of you, the angle of the camera means you might not spot them, so look at our picture and you'll see what they look like. Work your way to the top and there should be a little old guy in his hut will give you the hook.

WHAT DO I DO WITH THE HOOK THEN?

Work your way back to the castle and find the ledge that has small boxes with swastikas on them (why swastikas?). With the grappling hook, you can cling onto these crates and drag yourself across gaps that are too big to jump. From this ledge you can access the castle which leads to the first boss.

❗ Fire the grappling hook into any of these boxes during your quest to reach far platforms.

BLOW YOUR ROCKS OFF

The first boss is a giant rock head whose weakness is the red spot on his chin. Smack him with your short staff, then when the head tips back, dodge the fire it spits. Go back to attacking the dot and when the head fires four lasers, jump over them. Keep repeating this and he'll soon be dead.

★ START A COIN COLLECTION! ★

The most common collectibles in this game are small coin-like objects, not too dissimilar to those found in Mario 64. The most common way to find these is by killing enemies and grabbing them as your reward. Also, smashing any vases you come across will drop four or five, and they may even be waiting loose in certain sections of the stages.

Once you've got a pocket full of these you can throw them in a kind of magic attack. Each shot uses one coin. You also use them as currency should you decide to purchase any equipment. You should keep an eye out for a guy on a pogo stick in one of the towns as well, because he pickpockets fifty of them and does a runner!

COME ON BARBIE LET'S GO PARTY!

The key to building up Goeman's strength is to find these dolls. The more you collect, the more your health hearts will increase. We're not sure how many you get once a doll is collected but it seemed to be one heart for every two to three dolls.

❗ Here is one of the said dolls.

❗ These aren't obvious ladders.

MORE GRAPPLE ACTION!

The stage before you reach the boss is a simple affair in theory, but could take some time if you don't plan your route carefully. The route to the boss is blocked by locked doors and you have to collect keys by killing all the enemies in the rooms, or sometimes by solving puzzles!

❗ You need to shoot the flower wielding grannies twice in order to kill them off. Silly old hags.

❗ An entrance to a shop.

GOTTA GO-MANI!

Goeman 64 contains a lot of text that will need translating into English, so, unless Konami pull off a miracle, you won't be seeing an official version of the game for a while. We'll have more info for you in a couple of months' time, though.

DRIVING GAME

BY SONY JAPAN

OUT MARCH

1-2 PLAYERS

- NO OTHER VERSIONS AVAILABLE
- NO OTHER VERSIONS PLANNED
- STORAGE 1 CD

RELEASED BY SONY
TEL 0171 547 1400

With the PlayStation having had lots of success on the back of the Namco driving games, this is the chance for Sony to prove themselves as developers.

Let's face it - the PlayStation isn't short of driving games. We've got rally games, Formula One titles, high speed thrills with the likes of *Rage Racer*, and even aeroplane racing. So what are Sony going to do to make everybody go and buy this one? Strictly speaking, that's something we're not going to be able to answer until we have a completed version, but the demo we've played has given us a fair idea. *Gran Turismo* is going to feature cars galore, all based on real vehicles which can be customised to suit your driving needs, and all of which have to be earned by skillful driving, as in *Rage Racer*. It certainly looks as though Sony of Japan are spending the time with this, and we'll have a bigger update next month.

GRAN TURISMO

DO YOU KNOW WHY WE STOPPED THE CAR?

One of the novel things about *Gran Turismo* is the driving test facility that lets you get used to the way the game handles. The lesson begins with a simple task, such as an emergency stop, where you have to bring the car to a standstill at an exact point on the circuit. Complete that and a new task is assigned, like taking a corner at a certain speed. The further in you get, the harder the tasks get and eventually, an entire lap is set before you, where you have to finish all of previous objectives in one go! Cool.

MEN AND THEIR MOTORS

A big selling point for this game is the number of cars available for you to race. There are ten different makes to choose from, and for each make of car, there are five different models to choose from. If you fancy following in the recent footsteps of Keith Flint from the Prodigy and hopping into a TVR, then this game lets you do that. Also selectable are Aston Martins, Chevrolets and Hondas. And if you can't afford a brand-spanking new car, the game offers you the chance to buy second-hand models, but you then run the risk of buying a really clapped-out motor that falls apart on the third bend.

• The competition gets tough as the other racers try and do a 'Schumacher' on you! Dirty guts.

MORE CIRCUITS THAN ED'S BRAIN!

Not content with supplying you with stack of cars even Artur Daley would be proud to own, *Gran Turismo* gives you loads of tracks to race them on. Initially there are eight selectable circuits that vary from standard high-speed tracks to city centre drives, with the usual hidden extra track in there somewhere too. As in *Rage Racer*, the track layouts change from race to race as the easier routes are blocked off and you're sent down more demanding detours.

ESSEX MOTORS LTD

Customising your car is another option that the programmers have explored in great detail. This should please the *Max Power* readers out there, because almost everything from the colour of the car to the shock absorbers can be customised. In fact so many alterations give you almost limitless vehicular variety. To add to the feeling of realism, the game is also analogue pad-compatible, and for once, it actually looks as though this mode is worth having.

Ⓢ The replay mode is just like watching the TV!

BUT WHAT'S IT LIKE?

The most important thing about *Gran Turismo* is the feeling of speed and in this respect it compares favourably with *Rage Racer*. One of the things about Namco's game was how slow it seemed when you first started playing, simply because you had to earn the right to jump behind the wheel of top cars like the Assoluto. The same applies in *Gran Turismo*. It starts off being a slow game, but once you've got a bit of cash in your pocket the real cars enter the fray and *GT* becomes an awesome prospect.

Ⓢ Stacked! One false move and you lose it.

Ⓢ One of the cool camera angles from the replay.

Ⓢ Once your mates have seen the replays in *GT*, they're sure to wet their pants!

Ⓢ Once your mates have seen the replays in *GT* they're sure to wet their pants!

LIGHTS, CAMERA, ACTION!

One of *Gran Turismo*'s most impressive features is its action replays. Once a course is completed, the replays start automatically and from the looks of them, you could be fooled into thinking that you're looking at a real TV replay. The cars all look very sleek and stylish, and have ultra cool lighting on them which shows off some of the graphical touches the programmers have implemented. Take a look at these in-game screenshots here to get a feel for it.

Ⓢ Take the wheel in Executive Company Car Racer! Race Keith the Sales Manager to the wine bar before Happy Hour expires! A litre of Pina Colada will be your prize!

THE GRAN FINALE

There are rumours doing the rounds that a near-complete version of *GT* is in the country. We'll be doing our best to track it down and bring you a comprehensive update next month.

85% complete	RPG	BY TEAM ANDROMEDA	SATURN PROCESSORS AVAILABLE • NO OTHER VERSION PLANNED • STORAGE 1 GB • RELEASED BY SEGA TEL 0181 999 2009
	EEP RELEASE	1 PLAYER	

One of the flagship titles for the Saturn returns for a third incarnation. This version however, is something completely different!

The programmers behind the *Panzer* series, Team Andromeda, have to be applauded for trying something different. It would have been quite easy for them to make the third *Panzer Dragoon* game another fantasy shooting epic. But they've proven their ingenuity as developers by taking the best elements of *Panzer*, and incorporating them into a role-playing game. To their credit, Andromeda has decide to keep the outstanding visual style of the previous games in *Panzer Dragoon Saga*. Even in the early demos we were treated to, the graphics were nothing short of stunning. All the light-sourcing, animation and shading are superb, and all we have to wait for now is an English text version so we can tell you how it plays!

PANZER DRAGON SAGA

SMACK MY DRAGON UP!

The combat interface in *Saga* is a little different to any previous *Dragoon* games. There's a group of icons to the left of the screen, and each one is a different attack or spell you can cast. You can attack a single enemy with a group of laser shots or fire a bigger but weaker cluster of lasers at multiple targets. You can cast spells once you have learned them and heal yourself as well. Anyone who forks out for the Japanese version will have problems getting to grips with it because of the Jap text, but there is a training mode inside the game which should get you going.

As you can see, the boss are nothing short of amazing. And no hints of slowdown!

THREE TIMES THE FUN

The main game is made up of three distinct parts which come into play depending on your situation. When you're walking around the houses, villages or towns you come across, the view shows the hero, Azel, strolling around chatting to people, buying items, etc. Travelling between towns is the second style, and that is the most reminiscent of the old *Panzer* games because you're shown riding on the back of your dragon. When enemies pop up you can fly into them to activate the combat mode. This being an RPG, the combat is more reminiscent of that in *Final Fantasy* as it relies on an energy bar being full before you can attack. Shooting baddies drains the bar, and you have to wait until it has filled itself back up before you can attack again.

As you can see, the boss are nothing short of amazing. And no hints of slowdown!

ENTER THE DRAGON

Even though the Japanese version is practically finished, there's little chance of *Panzer* arriving on these shores for a good few months yet. Once the translation has been completed though, the Saturn could have yet another top *Panzer* game. Keep your eyes peeled, readers.

SATURDAY MORNING

THIS NEW CLEARASIL COMPLETE REALLY WORKS. I USE IT EVERY DAY AND LOOK AT ME!

DO I HAVE TO?

YES, THIS IS ONE OCCASION YOU REALLY SHOULD LOOK UP TO YOUR OLDER BROTHER. NEW CLEARASIL COMPLETE FACEWASH IS JUST WHAT YOU NEED TO HELP PREVENT ZITS. USED EVERYDAY IT WILL HELP KEEP YOUR SKIN FEELING CLEAN AND FRESH.

CLEARASIL COMPLETE IS FIVE TIMES BETTER THAN ORDINARY SOAP AT BEATING SPOTS* AND IS AVAILABLE IN AN EASY TO USE PUMP ACTION BOTTLE.

ITS DEEP-CLEANING MICROBEAD FORMULA AND SPECIAL SPOT STUFF HELPS GET RID OF BACTERIA WHICH CAN CAUSE UNWANTED ZITS. UNFORTUNATELY, THIS DOESN'T INCLUDE YOUR OLDER BROTHER!

ALL YOU NEED TO HELP BEAT SPOTS!

* CLINICAL STUDY RUN OVER 8 WEEK PERIOD.

You may have noticed by now that Ocean have new game character about to be released on the British market. But how good exactly is *Jersey Devil*?

When it comes to 3D platformers, games like *Croc* have proved that the PlayStation can more than match up to the standard of *Mario*. Of course, they still aren't on a par with those games, but there is still a lot of scope for improvement. *Jersey Devil* is another title hoping to make the next rung of the ladder after *Croc*. As you would expect from a game of this nature, the platform game rulebook has been used to full effect. It features flash graphics, a central character that has the ability to run/jump/fly as is necessary and loads of levels and secrets. But with so much other competition, does *Jersey Devil* honestly make the grade?

JERSEY DEVIL

• Hold triangle while airborne to fly. • Likewise, triangle also pushes crates.

AND TODAY'S LETTER IS...

The basic idea behind *JD* is that you have to collect five letters to spell the word *KNARF* which will enable you move onto the deeper levels. The reason for these particular letters is that the evil Dr. Knarf has decided to take over the world using vegetables blah blah blah. The way to find these is usually a lot more complicated than just smashing open a crate, as there is a strong puzzle element to this as well. If the crate doesn't reveal a letter, then you're more than likely to get a pumpkin. Collect one hundred of these and guess what? You get an extra life.

• Jump into the fountain and it will shoot you skywards, and into this letter. Only another four more to go. Once they are found, then you can...

• Enter the doors marked K. They are usually tucked away somewhere, and there will be more than one door on the level. Start hunting people.

SPIN SPIN SUGAR

The 3D glory of this game comes into effect with regard to the camera angles. At any point in the game, you can spin the view round 360° to make tricky jumps that little bit easier. This can also reveal hidden bonuses that are at the top of otherwise obscured trees or ledges. Simply whacking either of the shoulder buttons moves the camera in the same direction.

BETTER THE DEVIL

Jersey Devil should be in the shops very soon, but even so, we'll be giving our opinion on Ocean's big Christmas title next month. 'Til then readers.

The game isn't even out, but already *Deathtrap Dungeon* has sold in its millions and jump-started a worldwide craze. And that was fourteen years ago!

IAN LIVINGSTONE'S

DEATHTRAP DUNGEON

Ian Livingstone is the head of multi-million pound games company, Eidos. And his success is largely due to a collection of books he co-wrote back in the Eighties. The *Fighting Fantasy* series allowed the reader to take part in adventures, making choices by turning to different pages of the book. The concept was a huge success, with kids reading the books in schools everywhere (with their fingers marking out every eight different sections). To date, the *Fighting Fantasy* series has sold 14 million copies in 23 languages, and the best-selling of the bunch is *Deathtrap Dungeon*. Livingstone always planned to turn the books into videogames, and now he has the chance. The technology is available, Livingstone is in the right place and *Deathtrap Dungeon* is coming!

IT'S A TRAP! LOOK, THERE'S SOME MORE!

The left pic features deadlier weapons.

YE OLDE RENTOKILL.

The plot to *Deathtrap Dungeon* is classic fantasy stuff, and fans of the book will recognise it instantly. The city of Fang has become the residence of a red dragon, who has forced the citizens to build a deep labyrinth around him. With the people gripped in fear, the city's ruler, Baron Sukumvit, has offered a reward of 10,000 gold pieces to anyone who can slay the dragon. Many have attempted 'The Walk', all have failed. Now you have arrived to face the challenge. Or as the dragon calls it, sport!

Fine examples of Paul's 'facing north' dance.

IF I C-CAN JUST R-REACH M-MY... PIG BOMB

There's a huge range of weapons in *Deathtrap Dungeon*, and some of them demonstrate the twisted sense of humour that's gone into the game. Close range weapons come in the form of swords and hammers. And magical versions - like the Black Spirit sword - are awesomely wieldy blades. Slashing combos can be pulled off too resulting in some excellent decapitation. For true pyrotechnics though, you have to find the long-range weapons. Blunderbusses, flamethrowers and most bizarre of all, a pig that homes in on the closest creature. Throw it badly though, and it goes for you!

To help flesh out his vision of the *Deathtrap Dungeon* videogame, Livingstone has called on the talent of some age-old colleagues. Assisting with the game design is Richard Halliwell - who designed the Space Hulk and Warhammer tabletop battle games for Games Workshop (a company that Livingstone also founded). Together with Jamie Thompson - editor of *White Dwarf* and creator of the *Way Of The Tiger* books - they've created what they promise are some of the most fiendish traps ever seen.

Must have followed my trail of smarties!

DUNGEON RAIDER

Deathtrap Dungeon's structure is very similar to *Tomb Raider*'s. Playing as either a barbarian or scantily-clad (and fashionably large-breasted) female, you view the action from a third-person perspective. You can also spin the camera around the main character, or stop and survey the area through their eyes. There are ten levels, with ten more sub-levels. These take you from the dungeon's entrance, through such colourfully-named areas as the Snake Girls' lair (complete with aforementioned scaly wenches), The Hive, The Sunken Castle, and finally the Dragon's Lair.

The dreaded Breakfast Table stage

TIME STANDS STILL DUNGEONEERS...

Fighting Fantasy fans are drooling over the prospect of a brilliant *Deathtrap Dungeon* videogame. And with the original creator taking such a hands-on approach, it's all looking highly promising. A review next month, and if things go well, other FF games are promised.

TM, ® AND N-CUBE ARE TRADEMARKS OF NINTENDO CO., LTD. © 1997 NINTENDO CO., LTD. © 1997 BOSS GAME STUDIOS, INC. ALL RIGHTS RESERVED. TOP GEAR RALLY IS A TRADEMARK OF KEMCO.

Myth may look like another reworking of *Command and Conquer*, but it isn't. You don't erect buildings, you don't make your own troops and you don't have tanks. It's your warriors against the enemy, and last man standing is the makes his team a winner.

It sounds simple, but the best games often are. The key to being successful in *Myth* is to try and plan ahead. Ploughing in with all weapons slashing and hacking is fun and funny, but more often than not leads to your death. Enemies appear half way through the level just when you think you've got the existing soldiers licked.

Scenery has an effect too, with archers often found waiting at the top of steep cliffs to have a better chance of picking you off.

Then there's the of blood too - loads of it. Arms, legs, heads, gut and entrails all litter the battle arena once the action has died down, so don't play it eating your dinner.

SMALL BUT PERFECTLY FORMED

Dwarves are the most important characters to have in your team. They're physically weak, which is why you mustn't let them get exposed, but their offensive talents are not to be sniffed at. They have two forms of attack which involve bombs. The first is a simple petrol bomb-style affair: an explosive is hurled into the air and explodes on contact with the ground - anything in the vicinity will instantly turn into a mess of giblets. The second sees the dwarves lay small packages that act as mines, and erupt once somebody touches them, so beware!

4 The top picture shows the destruction the dwarves can cause. Well placed bombs = carnage!

When bomb-laying dwarves, sword-wielding knights, and lightening-throwing mages meet head on, you can bet there will be bloodshed. Buckets of it!

MYTH

4 The undead are almost defeated. Keep the village secure to win the level.

THAT CINEMATIC FEELING

The 3D engine enables you to have complete control over the view of the game. Everything in the game is a 3D model, so rotating and zooming around is 'meat and drink', especially under the influence of 3Dfx PC's.

THE KNOCK ON EFFECT

Laying multiple mines is also a good way to get a group of enemies killed in one go. Once each of the mines are close enough to each other, they explode in a chain reaction. An arrow is often a good way to start one of these, as a well placed spear is enough to trigger the sequence. If any weapons or shrapnel dropped by dead soldiers are lying around as well, they fly off in all directions. These kill enemies, but more often than not just cause wounds.

4 The guy throwing lightning is called a Fetch. Getting close is the only way to kill them quickly.

MAGICAL MYSTERIES

With a February release looming we'll have the full review next month. This could be a big title, so keep an eye out for it.

The Japanese are a little way behind us when it comes to golf. Apart from Jumbo Ozaki, well-known golfing faces from the Far East are pretty rare. But their enthusiasm for the sport never wanes, and the success of Everybody's Golf is a testament to that. Nothing like 'western' golf games that concentrate more on simulation, this one just sets out to be fun and easy to play. It certainly doesn't take long to get into, but the more demanding European market may not take to this in the same way as they did to the PGA series. Only time will tell.

CAPTAIN HOOK

When it comes to hitting the ball, Everybody's Golf uses the same tried-and-tested control system as most other modern golf games. Press once to set the power meter moving. Press again to set the strength of the shot, then, as the meter comes back to the start, you need to press the shot button again when it reaches an accuracy mark to send the ball 'straight down the middle'. Miss the mark and your ball veers off to the left or right when you hit it. If you get a perfect shot of 100% power and spot on accuracy, a "Nice Shot" message appears and the vapour trail on the ball is orange instead of blue. Mmm, 'proper'.

☛ A little whistle for luck... and 'Presto Bongol' Full power and perfect accuracy. Lovely play.

LORD LUCAN OF GOLF

To begin with, you only have the choice of two playable characters, the male golfer Taku and the girl called Mary. But, as you can see from the screenshot below, there are a stack of silhouetted golfers for you to find. The way to do this is to enter the versus mode. You'll be pitted against one computer-controlled player in an 18 hole round. All you have to do is beat him or her over the round and you'll be able to take possession of their form next time around.

☛ Shadow Company ran golf balls out of 'Nam.

GOLFING RPG STYLE!

We could be wrong (the text in our copy of the game wasn't all in English), but it looks like Everybody's Golf has an interesting new feature - the players appear to earn experience points as they play. If you enter a tournament, you'll see that the players at the top of the leaderboard have between 0 and 50 Exp points. The further down you go the less points you have. You earn these points with feats of golfing skill, like hitting birdies and chipping in from off the green, and the more points you get, the better golfer you become. Cool eh?

☛ Taku's hit a birdie. Call the RSPB!

There is a simple rule to hit games. It goes like this – if you're making a sequel, make sure it's much better than the original. Otherwise you'll fall flat on your face.

UEP Systems, the makers of the surprise hit *Cool Boarders* obviously realised this, for they've made one of the best sequels we've ever seen. Offering more features than you would have ever dreamt of, plus more besides. This really does look like being the king of snow boarding games. *Killing Session* will see you pulling switch method mans, stalefish melancholy cripplers and loads more that sound completely ludicrous. Let's get ready to go snowboarding!

If the original *Cool Boarders* was Godzilla, then the sequel can only be Godzilla – thirty stories high, and breathing fire. Hey, we're not exaggerating.

COOL BOARDERS KILLING SESSION

DOUBLE WHAMMY

Fans of the original game will gawp at the size of the sequel. Even if all you got was the Free Ride section, this game would still be triple the size of the first. Free Ride is basically the original game, but with courses that are much bigger, and there are a lot more of them. Here you ride solo, but like the original you can save ghost data to race against. Win cups for best time, best tricks and best overall score to reveal lots of hidden extras.

➤ I can see for miles & miles, and it looks really er... bendy!

➤ Scary things happen in the dark. Like this narrow course.

➤ Lots of pipes up ahead, but best not stop to admire 'em.

➤ Make a cool trick? How about staying upright for ten seconds!

BOARDING IN A WINTER WONDERLAND

Snowboarding Combined is the name given to the new championship event. Here eight boarders race down the slopes, in a bid to be the best. Taking place over nine courses, this isn't your conventional 3-2-1-Go! type of race. Before each

slope is tackled you must compete in a jump contest, points scored here determine your start position in the race proper. As in a rally, players then start the race at intervals. You'll have to master jumping to get the snowboarding pole position.

➤ Make a jump, trick and land it, to get a good position.

➤ Long cool tunnels and other graphical delights will appear.

➤ Try staying on this high narrow pipe to really show-off.

BETTER: RUN HOME TO MOMMA NOW

The main criticism aimed at the first game was the fact that you tackled each slope alone. The only way to really race was against your previous best times, and the ghost data of your best attempts. Well, Snowboarding Combined gives you seven more riders to compete against, but best of all is the new two-player mode. Now with the aid of a split-screen, you can race a friend over the Free Ride courses. You can only race one-on-one, and not against the other computer riders, but this is still a brilliant addition.

⚠ Beware of the narrow bridge, especially if you're both on it at the same time.

⚠ No more racing against previous best times. Show 'em who's the real boss!

A PINK JACKET WITH THOSE SHORTS!?!

A minor difference from the original, but one that works well is the character select option. In the original game you had the choice of a male or female rider, and then you had to decide on what they wore on the slopes. For the sequel you must choose a character to play as. At the start of the game there's a choice of four – two male and two female. Again you can select their fashions, and what board they'll be riding. The difference however, is that each character has different abilities, some are faster than others, better at turning, able to perform better jumps or have greater balance. The trick is to select the character that is right for the style of course and game you are playing.

⚠ The horrendously designed CVG team board. We'll bring you a better one next month, promise.

DO THE FUNKY PENGUIN

Another two new areas are available for you to play around with. The Board Park is a place to just kick back and enjoy. There are no clocks, no other competitors. Just you, your board and some obstacles. The idea here is to have fun, just jumping over barrels, performing rail slides and leaping over abandoned cars. The Masters mode is a more serious challenge where you must perform designated tricks on a massive never-ending slope. For each trick you successfully execute, ten seconds is added to an ever-decreasing clock. As soon as time runs out, it's game over.

⚠ A massive course requires some huge tricks. To get an A grade here is tough.

FOR THE REAL PIPE SMOKERS

We've saved the best 'til last. For the trick freaks, there's only one place to play – the Half Pipe. Your rider enters a large bowl with steep banks on either side. Here you must perform as many tricks as possible on the lip of the pipe before time runs out, or before you reach the finish line. The number of moves you can perform is impressive. Tricks are put together with the use of the four shoulder buttons. Performing combos with these, it is possible to string long lists of moves together, which is essential if you want to get the really big points. The one thing to remember is to keep your momentum going while in the half pipe.

JOIN THE BOARDER PATROL

If you liked the look of the original, but felt it didn't have enough happening to warrant purchase, we advise you to keep an eye out for *Killing Session*. It's shaping up to be a brilliant sequel.

100% COMPLETE

SEGA SATURN

SNOWBOARDING BY JVC

FEB RELEASE 1 PLAYER

- NO OTHER VERSIONS AVAILABLE
- PLAYSTATION VERSION PLANNED
- STORAGE 1 CD
- RELEASED BY JVC TEL 0171 248 3121

As well as being one-third of a terrible tongue twister, this could be the greatest snowboarding game yet.

STEEP SLOPE SLIDERS

Get out your baggiest waterproof clothes, and wax down your board, 'cos there's finally a snowboarding game coming out on the Saturn in the UK. This isn't something that's been quickly bashed out to make a fast buck either. A great deal of thought has been put into this game, to make it as realistic as possible. You can board relatively anywhere on the different slopes, pulling off all manner of tricks. Add an innovative control method and lots of cool secrets, and Steep Slope looks likely to be a real winner.

Choose your favourite? Who'd want to play as that Dr. Octopus lookalike? Only Tom Guise would.

WHO MADE THE SNOW YELLOW?

While Cool Boarders may be a much faster and more frantic game, there's no denying Steep Slope has a style all its own. The engine used to drive the game is very impressive, using a similar approach to the one Travellers Tales used on Sonic R, where objects 'mist' into view, rather than just popping up. Another neat little trick is the way the lower sections of the courses are a lot dirtier. Here the snow is brown from 'overuse', and of course there's not as much virgin snow as at the mountain top.

Down below it gets pretty dirty, while on the top it remains pure white - the snow, that is.

TREAD THE BOARDS

At the start of the game there are four available boards to choose from. Each has a different style and attitude. The riders are a mixed bunch indeed, with young and old, male and female all represented. Smash a previous best time or get a high trick score and more boards become available. And there's lots more secrets available after this lot that we're just not going to tell you about yet. The con-

trols for Steep Slope are quite different for a game of this type. Moving the D-pad shifts your weight and changes direction, and you can pull off tighter turns by jamming down the shoulder buttons. This method allows you to come up with the kind of cool combos you need to pull off point-scoring tricks.

IT AIN'T DOWNHILL FROM HERE

The game features seven very different courses and locations to play around in. Four of the mountain slopes are collectively called the Extreme courses. Here the idea is to get down the course with either the fastest possible time or the highest trick score, or a combination of the two. There's also an Alpine stage which is like a downhill competitive event. Here you must successfully pass gates that are positioned along the course. For every gate you miss, a second is added to your time. Snow

Board Park is where to go if you just like to perform tricks at a more laid-back pace. Finally, there's the Half Pipe, yet another cool area, where you can just drop in, get air and do cool tricks.

Snowboarding's cool, but how about jumping out of helicopters too?

SOILED SONY SHORTS

This game has quite a few fans in the office at the moment. The freedom it offers is closer to the real thing than Cool Boarders. We'll be giving you the full reviews of both next month.

FIGHTS BACK WHEN CORNERED

GRAND ★★★★★
THEFT

AUTO

IT'S CRIMINAL NOT TO

A LONG, DIFFICULT MEETING.

Then a 200-mile journey over treacherous mountain roads. Life can be stressful for a top international executive, but that's not your problem. You're a car thief working for the Mafia and you need to rip off his car for a crime mission.

Of course, stealing cars and shooting people creates innocent victims.

Anyway, if the highly-engineered saloon stolen from this advertisement is not your cup of tea, Grand Theft Auto offers you over 30 different vehicles to steal, each with its own handling characteristics, including sports cars, buses, garbage trucks and motorbikes.

In headrush-inducing top-down perspective you race through three different cities, each with its own massive and unique road system and local landmarks.

Your Mafia bosses will require you to commit numerous tasks along the way.

But for this much adrenaline, it's criminal not to.

BMG
INTERACTIVE

TWELVE GAMES OF CHRISTMAS

er... actually there's only nine.

GUARANTEED TO BREAK THE ICE AT PARTIES

Buckaroo and Formula One? Twister and Tekken? Time Crisis and brussel sprouts?! It can only be CVG's Plan X-mas - to trick your decrepit relatives into playing videogames...

Words: Alex Huhtala
Pictures: Mike Harding

Yay, it's Christmas finally. All the shops are closed, and you've done the traditional last minute dash to buy presents for relatives you only see once a year. All that's on TV is Noel Edmonds and some movies you've seen a hundred times already. What you really need is excitement. Something to get the adrenalin going. An excuse to get the family and friends onto the console for some madcap antics. The collective minds that bring you CVG have been in this situation many times before. We know the score, and more importantly know how to throw a good party. Forget Musical Chairs and Pin The Tail On The Donkey. Wake up your granny, and prepare for CVG's guide to the ultimate Party Games.

DO YOU EAT YOUR GREENS?

This is an accuracy test, with a rather nasty forfeit for those that don't make the grade. Depending on your aptitude there are three difficulty levels - easy, good and hardcore. Easy is for those that never play games, while hardcore is for the sort of people that eat, drink and sleep games.

The game is played in any mode. With each player shooting as best as they can until the end of the first stage, and the accuracy percentage is given. If a player does not reach the specified percentage, then they will have to perform the forfeit,

and eat a raw Brussel sprout!

Easy - get over 20% accuracy

Good - get over 40% accuracy

Hardcore - get over 70% accuracy

These percentages should be adjusted to accommodate the people who are playing - you don't want to have to eat the sprout on every round or you'll puke.

FORMULA 1 '97 BUCKAROO!

GENTLEMEN START YOUR DONKEY!

You know those people that sway around, and start getting dangerous with their elbows when they play a racing game? Well this event is for them. Players take it in turns to drive a car and see how long they can survive. This game involves some real audience participation, because it's up to everyone else to put the driver off. Ideally feathers, or feather dusters should be used to tickle the driver. Once they're in a really agitated state, the game begins proper.

Two coat hangers are attached to the driver's elbows. Each player then takes it in turn to hang folded strips of paper on the coat hangers. Players

who aren't hanging their strip of paper must carry on ticking the driver. Should the driver 'buck' and the paper strips be scattered, then the player who attached their strip last, loses. The driver must then pause the game, and a note made of how long they survived. The loser must then perform a preselected forfeit. Each player gets a turn as the driver. With the overall winner being the driver that survived the longest.

To put a further spin on the game. We must race around the chosen circuit in reverse. Hold down to get the rear view, then turn the car around, and race the circuit in the correct direction.

PARTY GAMES

DIDDY KONG PYCAT RACING

NO.5 RORY BREMNER'S NOT INVITED

At the character select screen make a mental note of your characters catch phrase. For example Diddy Kong goes 'I'm Diddy ooh-ahh' and Banjo says 'I'm Banjo uhh-huh'. Now have a race. Whoever is leading must say their catch phrase, and perform their characters sounds. If they stay in first place for more than ten seconds, they must continuously repeat the catch phrase. As soon as another player takes the lead they must perform their catch phrase, and so on. For extra hilarity players should dress up as their chosen character.

This may not sound like a great way of playing, but after a few tizers and sherbets it can get really funny.

Steve's unfair advantage (he did the review of Diddy last month) annoys the rest of the party.

It takes some super-human teamwork to make the boy Key eat the whole bag of sprouts.

NO.3 OOH IS THAT THE HANDBRAKE?

Here's how to have a four-player game on *V Rally*. A pair of players team up with one elected driver, the other navigator. The driver must be blind-folded, and the navigator must successfully direct their partner around the track,

USUALLY IMPAIRED V RALLY

XMAS

by shouting out when to turn and brake, etc. Race a championship, with the driver and navigator swapping places after each race. This is a great way to get extra amusement out of any racing game.

NO.5 TURN ON HALF A SIXPENCE

Instead of holding the pad the normal way up, turn it so the prongs are facing away, making the direction controls completely opposite. Now have a tournament. Of course this can be done with any foot-ball game, but why have cotton, when you can have silk?

TRACK & THREE-LEGGED FIELD

NO.5 WHO WILL BE THE NEW ROLF HARRIS?

Everyone knows this is a brilliant multi-player experience, but we know a way to make the game even more fun. Play the game as you would normally, only with the addition of some new rules. First-off you are not allowed to use your fingers, hands or arms to press the buttons on the pad. However, any other part of the body is allowed. Toes are recommended, but for the more ambitious try using your nose for a real challenge.

If you find yourself in a situation where there are more than four people who want to play the game at a time, we recommend what we like to call a three-legged race. Here players team up, with a maximum number of four teams of two. The teams then operate their pad together, each pressing a single button. If you're feeling particularly cruel you can join together the index fingers of both players with an elastic band, or piece of string.

The nose, elbow and smelly foot are all legitimate control methods here. Piercing may improve performance.

GUARANTEED TO BREAK THE ICE AT PARTIES

PARTY GAMES

NO.1 EVERYBODY (BACKDOOR'S BACK) **actua** SHOCKER 2

Live up football games by switching the formation of your teams completely. Play Goals in attack, defenders in midfield, midfield and forwards in defence, and your star striker in goal. It may sound dumb, but it can make some games a lot more exciting.

GOLDEN EYE

BATTLE OF THE BONDS

NO.5 'THE GAME'S BOND!' 'AND I'M BOND!' 'ME TOO!'

You need four people to assume the role of the different James Bonds, then battle it out in a multiplayer game.

First of all you'll need four straws of varying length to decide who is which Bond, who was the best Bond, down to worst. You'll probably find yourself eliminating George Lazenby or Timothy Dalton out of the game, as we can only accommodate four Bonds. The current running order of Bonds here at CVG are (in reverse order): Timothy Dalton, George Lazenby, Roger Moore, Pierce Brosnan and Sean Connery. The short straw gets to play as the elected weakest Bond and so on.

When the game begins you must remember these simple rules - each Bond can only use specified weapons, which are as follows. The worst has to use the Hand Chop, third can only use the Walther PPK, the second best is allowed the Silenced Machine Gun and the best Bond has the power of the Moonraker Laser. Play until there's only one Bond left standing.

If the Bond with the Moonraker Laser defeats everyone, everything went against our plan. If a lesser Bond defeats a higher Bond, the higher Bond must perform a forfeit. To add extra excitement players must perform impressions of their selected Bond, adding a quip when killing another player is extra stylish. At the end of each game the straws are drawn again, so everyone gets to be the different Bonds.

CHOOSE YOUR STRAW AND BOND. WHOSE NOT STRAW?

HA HA! HE SAID CHOPPER. AT THE VERY END OF HIS CHOPPER THE BOND CHOP!

THE NAME'S BOND. JAMES BOND!!!

ROAD LAZENBY

THE WEAKEST BOND TO BE THE STRAW TALKS

JUST KILLED THE STRONG ONE UP NOW

NO.3 IT'S PARAPPA WITHOUT THE MUSIC. **TEKKEN** Twister

We've called this game Tekken Twister, but it works with any fighting game. So we've chosen to play the awesome *Fighters Megamix* using the same rules instead. You'll need two teams of three to partake in the ultimate battle mode. Start a normal battle mode with each team selecting their characters. Now the real fun begins. Each team of three has control of one pad, with each player controlling buttons A, B and C respectively. Player A also controls the D-pad. While whoever is using C, can also operate the shoulder button. When battles commence, each team must shout out combos and commands to give them a chance of winning. Alternatively, teams just bashing the buttons should produce some bizarre results.

MUST PERFORM COMBO URUGAAAA!

THE GAME IS NEVER OVER

Those are our favourite games to play at the moment, but we know there are loads more out there just waiting to be invented. Instead of retiring your old games to the bottom of your 'played that a million times' pile, try thinking up new ways to play them. You may be surprised to discover a completely new game. Of course these games aren't restricted to the originals that we've selected here. Try playing *Sega Rally* Buckaroo for instance, or a *Quake* Battle of the Bonds. The choice is yours. If anyone thinks they've come up with an original way to play a chosen game, please send us in your suggestion. If we like it enough, we might just put it to the test.

FREE STUFF

WORTH
£129

SONY PLAYSTATION

If you don't have a PlayStation, you're going to miss out on some of the hottest games of the year, *Final Fantasy VII* being one of them. You don't need to shell out over £100 to get one – just answer this question: **WHAT DOES THE SONG SAY TO DECK THE HALLS WITH?**

WORTH
£24

PC POWERPAD PRO

The Powerpad Pro has everything you could need in a PC controller – an analogue stick, a D-pad, a throttle control and loads of buttons. To win one for nothing, answer this question: **WHICH OF SANTA'S REINDEER HAS A BRIGHT RED NOSE?**

WORTH
£29

FIVE ERAZER LIGHT GUNS

The Erazer is certainly one of the coolest looking light guns around, and it's even got a rapid recoil feature! It's compatible with both Saturn and PlayStation games, so if you want one, just answer this question: **WHAT KIND OF ANIMALS PULL SANTA'S SLEIGH?**

WORTH
£99

NINTENDO 64

Currently the most powerful games console available, the Nintendo 64 has some fantastic games that you can't afford to miss out on. To win yourself the machine just answer this question: **WHAT TYPE OF BIRD WAS IN A PEAR TREE?**

Why have a Merry Christmas when you could have a gun-toting, cliff-top racing, bitch-fighting Christmas? How? By winning hundreds of pounds of games gear right here!

TOP GEAR WHEEL

We gave the excellent Logic 3 Top Gear steering wheel a score of five-out-of-five in last issue's Buyers Guide. If you want to get one for free (and remember, it works on the Saturn, PlayStation or Nintendo 64) just answer this question: **HOW MANY LORDS WERE A-LEAPING?**

WORTH
£69

SEGA SATURN

If you want some of the greatest arcade games ever, in your own home, you need a Saturn. Simple as that. To win yourself one for nothing, simply answer this question: **WHAT WAS SEGA'S SPECIAL FREE CHRISTMAS GAME THAT WAS AVAILABLE LAST YEAR?**

WORTH
£99

WORTH
£49

FREE STUFF

HOW TO ENTER

To stand a chance of winning any of the goodies here, follow these simple instructions.

Put the name of the prize you're going for, plus the answer to the question on a postcard or sealed envelope. Feel free to go for each and every item here, and you can stick all your entries on the same postcard. Just go for it, win the lot! We'll be picking the winners out of a very big hat on **Friday 9th January 1998**, so make sure you've got your entries in well before then.

Send all entries to:

**FREE STUFF 194,
CVG, 37-39
Millharbour,
The Isle Of Dogs,
London, E14 9TZ**

N64 ARCADE SHARK

The Nintendo 64 Arcade Shark is a big chunky stick which works with both analogue and digital Nintendo 64 games. To win one you just have to answer this question: **WHO DOES A TELEVISED SPEECH EVERY CHRISTMAS DAY?**

CHECKPOINT

The month's events and software releases at a glance. **Christmas**

This is where you can find out when the games you want for Christmas are due, and win yourself a free one. Put those in red on your Christmas list now!

Finally, after months and months of build-up, Christmas is here. Some of the biggest games of the year have been released, and the buying frenzy has begun (for organised people, at least). But it doesn't all stop as soon as Christmas is over, oh no.

Panzer Dragoon Saga, *Sim City 3000*, *Beast*, *Flight Unlimited 2*, *Banjo Kazooie*, and other big games will be on the shelves in January for you to spend your cash on. Have a nice holiday. Make the most of it - you'll be back to school/work within a few weeks! Ha ha!

THE CHRISTMAS PERIOD

Starts 25th December

The time of year where everyone stops working, or going to school, so they can play video games and eat lots of food. It's one of the best times for the games industry, as everyone gets their biggest releases out for the holidays. We recommend waking up on the 25th, watching Noel's Christmas Presents, eating a bag of chocolate coins, then settling down to play *Tomb Raider 2*, *Diddy Kong Racing*, *Quake 2* or *Duke Nukem 3D* all day. Merry Christmas, one and all!

KEY: ■ Red Ask Santa for these games! ■ Blue Tell Santa to burn these!

WIN! WIN! WIN!

Competitions are judged very soon after the magazine is on sale. Make sure you enter as quickly as possible to have a chance of winning!

PANZER DRAGON SAGA

One of the coolest features of *Panzer Dragoon Saga* is being able to breed your dragon to be exactly as you want. You can then take your creation out into battle with you. To win a copy of the game on Saturn, we simply (and rather obviously) want you to design the ultimate dragon ride. Show us what it can do and our favourite will win the game. Mark your entries:

PUFF THE MAGIC DRAGON

GRAND THEFT AUTO

In *Grand Theft Auto* your challenge is to become the most successful gangster in the whole city. As you know, to be a really frightening gangster you need a cool name that everyone is terrified of. Let us know what you'd call yourself if you were top dog of your home town. The best name wins a copy of *GTA* for the PlayStation. Mark your entries:

MAKE ME WIN OR I'LL CUT YA!

SENSIBLE WORLD OF SOCCER 2000

To win a copy of *Sensible World Of Soccer 2000* on the PC we want you to tell us what football will be like in the year 3000. What will have changed? What will the rules be? What will the stadiums look like? How many different away kits will Manchester United have? Explain it as briefly as possible, and include a picture to make it clear to us. Mark your entries:

WHO'S THE ROBOT IN THE BLACK?

Send entries as soon as possible to:

HO HO HO!

Early Christmas presents for the winners of Checkpoint 192's competitions.

G-POLICE

We wanted you to design the best police vehicle ever – the ultimate criminal-catching machine. The winner of G-Police for the PlayStation is **Nicolas Gunn from Bath** for inventing The Crunchal! It's armed with a 90ft long truncheon, CS spray, super police handcuffs and a giant doughnut on the back.

DUKE NUKEM 3D

We asked you to invent a new catchphrase for Duke to mumble when playing the game. Our favourite ones were by **Gilbert Taylor**, who didn't include his address. We'll let it go just this once – tell us what you want – tell us what you want – Gilbert. His best phrases were "Die mother bitches" and "I gonna rip off your head, shove it up your ass, and pump your neck full of lead". Great.

5th Dec

☛ **Quake 2:** The sequel to one of the best games of all-time. There's no doubt that this is going to be one of the biggest sellers this Christmas. Don't miss out on it!

1st Dec

☛ **Diddy Kong Racing:** The best racing game on the Nintendo 64! This should already be out by now, so if you haven't already got it – get down that shop right now!

19th Dec

☛ **Croc:** Now PC owners get to find out what *Super Mario 64* is like. Except it's quite a lot better than *Croc*.

16th Jan

☛ **Myth:** It's packed with loads of blood and guts, and plays very well too. This could turn out to be a very tasty strategy game!

HEXEN 2

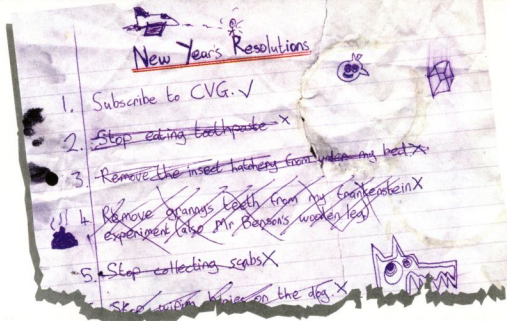

To win the fantastic *Hexen 2* on PC you had to design a spell that a member of the CVG team could do on the others. In the end we decided that the winner was this one from **Christopher Resse from Ormskirk**. It shows Jaime Smith's amazing magic which makes everyone 70 years older!

THE TWO KINGS

At Christmas time, spare a thought for those less fortunate than yourself. Like Doug and Darren from HMV, the poor men who supply us with this release schedule (HMV and CVG aren't responsible if a game doesn't meet its release date – bug the games companies instead) and spend years of their lives being hassled about competition prizes. Thank you, Merry Christmas.

There's one New Years Resolution that's *easy* to keep

For only £22.50 you can have a year's worth of CVG delivered to your door before it's in the shops. That's 12 issues for the price of 9!

RESERVATION

Having won back all our hearts with the brilliant *Track & Field* on the PlayStation, Konami have been pretty busy of late. This year has seen them release updates to *International Superstar Soccer*, and the latest instalment in the *Castlevania* series, but next year sees them all guns blazing. *Goeman* and *Metal Gear Solid* are going to be two of the biggest games of 98, but before these two comes another biggie – the sequel to *Track & Field*. Now with added snow and ice, and an official licence to make everything seem even more realistic. Strap some planks to your feet, and prepare to become number one in the world.

NAGANO WINTER OLYMPICS '98

With Jack Frost finally nipping at your nose, the last thing you'll want is a game that makes you feel even colder. However, this is the successor to *Track & Field*. We don't mind wrapping up warm for this one!

NAMCO WINTER OLYMPICS '98

NO JOKES ABOUT MUESLI

There are two events under the Alpine Skiing banner. These are the downhill and Giant Slalom. In both you have to ski down a course of flags as fast as you can. Miss one flag and you're disqualified. The Giant Slalom actually has the shorter course. The Slalom is a tougher challenge, as you need to negotiate tighter turns and more of the alternating coloured gates. To control your skier you just have to steer and use button A to apply your ski edges. This results in a loss of speed, but a much tighter turn. While Downhill sees you make one attempt at greatness, Slalom requires two, with your score being calculated from both runs.

GOTTA GO FASTER!
THE KIDNAPPERS ARE
GETTING AWAY!!!

I FEEL A FREEZE COMING

This console reproduction of the Winter Olympics is made up of twelve different events with one thing in common – there's a lot of white on screen! To get you better acquainted with what to expect, we'll look at each event over the following pages. We don't want this to sound like an instruction manual, but because all of the events have their own unusual control methods we'll be filling you in on those too.

THE NINTENDO TWIST

Nagano sees the debut of the Hyper Sports formula on the Nintendo 64. However, instead of using the traditional button-bashing control method to increase your athlete's performance, Konami decided that a simulation and simplification of events and joystick techniques was more appropriate to simulate sports which are more dependent on grace and style than sheer power. Another difference is that you can't play all of the events as a competition. Instead only seven of the twelve available make up the full-on tournament.

PUT SOME PROPER SHOES ON

If you're thinking 'this isn't like *Track & Field*', then you're right. However the next event has more in common with the original. Welcome to Speed Skating, home of button-bashing – or rather 'button-stroking'. There are two different races – a 500 metre sprint and a 1500 metre endurance race. Both use similar controls. A power bar that sits in the top corner of the screen swings left and right and to build up and maintain your speed on the ice you have to press the left and right shoulder buttons in time with the bar's swings. Keeping your presses in sync with the bar makes your skater go faster, while missing a beat slows him down. In the 1500 metre race you also need to keep an eye on a stamina bar, and if it reaches zero, pray you're near the finish line 'cos Mr Skaters legs will simply refuse to work.

❗ If they had spikes on the bottoms of the shoes, instead of blades they might not move as fast, but they'd have a cool new sport called Rink Ruining. Where do we sign up?

❗ No wonder they go down on a tray. It must be to collect the contents of their trousers once they reach the finish line.

❗ If Mr Luge Guy has big feet or gets too excited, he may have problems seeing where he's going. Hope he hasn't got an itch!

OII! SORE ARSE

A contender for one of the most dangerous sports ever invented, the Luge sees you hurtling down the bob sleigh run on little more than a dustbin lid. The event starts with a quick bash of the shoulder buttons to build up speed. In reality this is the part where the Luge rider is clawing his way to the first bend, with some specially spiked gloves. Once you're on that course you must steer your way safely to the bottom. To go faster you'll need to steer higher on the banked sections, but then you run the risk of flipping over and being disqualified.

WHO'S THIS BOB GEEZER?

Just like the Luge except here, the four riders have the knowledge that they're hurtling down the course in a fiberglass torpedo. The four man team means this event starts off faster than the Luge, but turning can be a bit more sluggish. The sprint at the start is controlled with repeated pressing of the A button, followed by four presses of the B button, which command each team member to get into the bob sleigh. Once they're safely in you have to steer them safely through the twisty course. Take care controlling the bob on the corners or it's Wipeout Time.

Look at that guys rubber band legs at the back. He must be Stretch Armstrong's cousin.

TIGHT, WAVY OR A KEEGAN PROTO-MULLET?

Last month we told you this was the potential piker in the pack. This month we can confirm how awesome it is. Curling, along with bowls which it resembles, may be one of the most boring sports in existence to actually watch. However, playing it is a different matter. Teams compete against each other in a knock-out elimination contest played on an ice rink with a large target painted at one end. The idea is to 'curl' stones towards the target, with the winner being the team that gets their stone closest to the centre of the target. The game is played over four separate rounds, in which four stones are curled by each team.

One team member throws the stones while two more hang around looking kind of dumb, then start polishing the ice-lad with brushes to spin the stone and make it go faster. The controls are simple, but Curling is more reliant on skill and tactics than the other events. The control stick is used to aim and select power for the throw. The B button selects left or right spin and the A button sets the stone in motion. To get the guys with the brushes to start polishing the ice you have to press A repeatedly. No kidding, this is the best event in the whole game, and a lot of fun to play. Curling is the sport of the future.

A TALE OF TWO CONSOLES

As we mentioned last issue, Konami have another version of *Nagano* up their sleeves. The PlayStation edition includes the same events and we'll be reviewing it next issue. It promises to have more in common with *Track & Field* on the PlayStation than the N64 game, which means button-bashing will feature more strongly too. Which will be the better of the two? You'll just have to turn up next month to find out.

It's not much of a view unless you're sitting in the front. Next time bring a book.

CVG OPINION

Have you ever thought, 'I'd really like a glass of milk', then poured it out, taken a huge gulp and gone, 'EUURGGHH!' because it had gone sour? Good, because you'll understand how I felt after playing this game. There I was, looking forward to a fine winter sports game in the *Track & Field* style, but I came away with an unpleasant taste in my mouth. The problem is that this game isn't quite sure what it wants to be, and a lot of this confusion is down to the control methods used for each event. While one event may have some button-bashing, the next requires a different approach. There doesn't seem to be much consistency, and what was wrong with button-bashing in the first place? Of the events themselves, half of them are too dull and similar to each other. Where's figure skating and the biathlon? Historically, that's always been the case with simulations of winter sports, there isn't a great variety of events - and unless they're done in a pure arcade, or simulation form they're all very samey and boring. If the numerous skiing events had the pace and style of Namco's *Alpine Racer* coin-op, Konami would have had something to shout about. Instead, what we have here is a game that only the Ski Sunday groupies will enjoy.

ALEX HOPKINS

RATING

Would have been better called 'Curling Featuring the Nagano Winter Olympics'. A disappointing winter sports sim and a huge waste of potential.

Imagine a game with almost no limits. Where you can do what you want, whenever you want. You can meet friends then have a beer and a game of chess with them. Or you can join a gang of warriors and hunt down dragons. You can be a feared criminal or you can be a respected healer. You can build yourself a house and you can write a book. You can buy a ship and search for new lands. You are free to do what you want, interacting with thousands of other real players from around the world. And then... you get cut off and the game freezes up. Welcome to the land of *Ultima Online*.

PC CD ROM	ONLINE RPG	BY ORIGIN	<ul style="list-style-type: none"> PRICE £44.99 NO OTHER VERSIONS AVAILABLE NO OTHER VERSION PLANNED STORAGE 1 CD PRODUCED BY ELECTRONIC ARTS TEL 0753 508442
	OUT NOW	INFINITE PLAYERS	

Bored of living on Earth? If you've ever wanted to get away from it all and start again, here's your chance. A new life awaits.

ULTIMA ONLINE

When you're killed you get two choices - restart immediately with penalties to your alignment and skill ratings, or become a ghost. As a ghost you must find a friendly wizard who'll bring you back to life.

THE PRICE OF A LIFE

Even though you're paying top dollar for *Ultima Online* you're only buying the game (complete with cloth map and pewter pin badge) and a month's worth of play in the *Ultima* universe. If you want to continue *Origin* charges a monthly subscription fee of \$9.95 (about £6). As we write this, EA are importing the game from the USA but they aren't supporting it and they aren't running any servers in Europe, so you have to pay your sub by credit card directly to *Origin* in the US. Oh, and let's not forget you need your own internet account to play too. So if you really want to spend a whole alternate lifetime in Britannia it could run expensive.

ULTIMA ONLINE

REVIEW

THE MIRACLE OF BIRTH

Once you've logged on to your internet connection and started the game for the first time, you need to create the character you are going to be playing as. Give yourself a name - preferably something that fits in with the epic medieval feel of the game, rather than the unimaginative "Randy Savage" that we've come across a few times. Now choose what your main line of business is likely to be. You can either distribute your skill points yourself, balancing out how intelligent and physically strong you want to be as well as setting your main abilities, or you can use one of the preset templates as a guide. Then you get to choose how you're going to look. Choose your hair and skin tone, your hairstyle and take your pick of a wonderful selection of beards. Once you've done all of this, it's into the alternate universe of *Ultima Online*.

↑ Recent free updates for *Ultima Online* have added more wild animals and monsters to the woodland outside the safety of the city walls.

VISIT SUNNY BRITANNIA

Choose where in Britannia you want to start. It's a large world, and new characters won't survive the dangerous journey between cities, so you're best off starting in the capital – Britain. When within the city walls you are under the protection of Lord British's guards. If anyone tries to injure or steal from you, simply call "Guards!" and they'll rush to your assistance, hacking down the criminals in seconds. The cities

in Britannia are very much like real-life cities. They contain all the kinds of shops you'd expect, along with banks, pubs, libraries, theatres, and even massive castles for the aristocracy. Using your standard 100 gold pieces as well as your character's unique skills, you need to ready yourself for adventure. Make sure you do the most important thing first – get yourself a fancy hat from one of the clothes shops!

YADDA YADDA YADDA

Communicating in *Ultima Online* is simple. You just type in whatever you want to say and it appears above your character's head. Anyone who can see you can also hear you. To trade items with other players you just drag them out of your backpack and drop them over another person's head. A box appears to show what each you is offering, and once you are agreed the items are exchanged. Many of the inhabitants of Britannia are computer controlled NPCs (Non-Player Characters) who have their own artificial intelligence. They react to certain keywords that you say to them, and respond accordingly, though it's always obvious who is a real person and who isn't.

⚡ Don't waste your time making jokes with the NPCs – they haven't been programmed with a sense of humour, just like the Americans.

⚡ In certain buildings you can find bulletin boards where players post messages and warnings.

⚡ Naaaaaaaaaargh! No! No! No! Come on, you damn thing! Work! Work! Let me in! Aaaaaaaaaaaaa!

CVG OPINION

This really is the ultimate game idea. It has a completely different feeling to any other game I've ever played, and it really seems completely limitless. The scope for developing your own character is unbelievable, and the skill system is worked out in such minuscule detail that you can be anything you want. The NPCs (computer characters) are often just a hindrance, but have lots of useful information which you can get out of them if you ask the right way. The graphics are just right for a game of this style, but move very jerkily even when you install them to your hard drive (the minimum install is around 300Mb, and the maximum is nearer to 500Mb!). The interface is a bit fiddly and it takes a while to learn how to use each character class, but once you know what you're doing it's not so bad.

The biggest problem by far is that there are currently only American game servers, and there are no plans to start any in the UK. This means that everyone will have to put up with games jerking around and freezing up all the time, and that is EXTREMELY annoying. *Ultima Online* is a unique experience, and is certainly one of the most ambitious games ever made, but (as a lot of American players have already been complaining) it all feels slightly unfinished. It takes ages to get your character anywhere, but if you're willing to put up with the connection problems you could find yourself falling in love with the *Ultima Online* universe. *CV DMMAS*

MASTER YOUR TRADE

Every character has a large number of skills, each with a rating number next to it. For example, a bard has a high "musicianship" rating, but is terrible at stealing. Your distribution of skills is essential when setting up your character, as a warrior who is good at making jewellery isn't going to get very far. Some characters use their skills to make objects which they then sell, such as tailors and bowyers, while others are more useful for defence or attack. Wizards can create spells, and bards can pacify or anger people with their music. Practising a skill increases your rating in that area.

⚡ Learn your character's skills carefully before using them.

RATING

A virtual alternate world with almost unlimited possibilities. *Ultima Online* still needs some work and some UK servers to really reach its potential.

Here at CVG we're all great admirers of Japanese developer, Treasure. Their Sega titles, on both Megadrive and Saturn, have all been must-haves, so you can imagine how eagerly we were looking forward to their first N64 title. But when we got our Japanese copy of *Go! Go! Troublemakers* back in August we plugged it in and - oh calamity! - how our jaws dropped in dismay. It was a 2D scrolling platform puzzle game with baffling, frustrating action and complicated controls! Had Treasure gone off the boil? Had some key game designer departed? Was the World about to end? Or was it just that the in-game text and instructions were all in Japanese and we didn't understand what was going on? Well, er, yes. That was it. Now that we've got hold of an English text version of the game we've finally discovered the truth about *Mischief Makers* (as it's called in Europe). And here it is!

	PLATFORM/PUZZLE	BY TREASURE/ENIX	<ul style="list-style-type: none"> PRICE £79.99 NO OTHER VERSIONS AVAILABLE NO OTHER VERSIONS PLANNED STORAGE CARTRIDGE RELEASED BY THE TEL 01780 603377

Could our initial misgivings over Treasure's first N64 game have been misplaced? Now that we've finally managed to play the game properly we can reveal that *Mischief Makers* is full of surprises!

Meet the characters - Marina, Professor Theo, and the villains.

ALIEN ABDUCTION!

Apparently, British industry is in decline because no-one wants to be a scientist these days. Hardly surprising though, what with the ever-growing threat of ALIEN KIDNAPPING. Take Professor Theo, for instance. He's a top man in robotics, and he gets abducted by extra-terrestrials on a regular basis in this game. He and his cybernetically-enhanced chum, Marina Liteyears, have followed a cosmic distress signal to the planet Clancer and when they arrive the Prof is promptly (and repeatedly) shanghaied by the locals. It's all a plot concocted by the local evil Emperor who wants to conquer Earth and has enlisted the help of the easily-led Clancers. Controlling Marina, you have to rescue the Prof, wipe out the Emperor's minions and generals, then confront His Excellency himself for a telling-off he won't forget!

I've been captured by the Evil Empire?
What are you gonna do to me?

After a while Professor Theo becomes resigned to the fact that he's going to be kidnapped every few levels.

HOW TO DRIVE A MARINA

Mischief Makers is unique among N64 platform games insofar as it has a traditional 2D, horizontally-scrolling playfield and only occasionally uses the machine's 3D graphics capabilities for minor effects like moving floors. It plays almost the same as old-fashioned 2D platformers, and some of Marina's moves, such as the ability to grab and throw enemies, are straight out of Treasure's first game, *Gunstar Heroes*. *Mischief Makers* is also unusual in that it doesn't use the 3D Stick. This is so that you can use the D-pad for movement and the C-buttons to fire a quick burst on Marina's rocket thrusters, boosting her left or right (for extra speed), up (for extra jumping height or to hover) or down (to slam whatever she's holding into the ground). There are so many functions on the controller that learning them and managing them all in the midst of a frantic battle is one of the toughest challenges you have to face in this game.

Once a level is completed you can go back and do it again later to stock up on crystals, or find the yellow crystal.

When you're in a battle zone like this, the challenge is simply to survive!

Get stuck in a puzzle level and it's a good idea to give everything a shake.

Here you just have to run for it before the scenery collapses beneath you!

★ ★ ★ ★ ★ RUN! FIGHT! THINK! ★ ★ ★ ★ ★

The action in *Mischief Makers* is spread over five 'worlds', each made up of between ten and twelve distinct levels. Some of these are more battle-oriented, with Marina having to fight her way through crowds of enemy Clancers or take on a single, tougher enemy. Others are puzzle-based and they involve exploring the level to find particular objects (ghost, lost children, whatever) or finding a route through the level using teleporter stars.

floating Clanballs, Clanballs on rails, bombs and whatever else comes to hand. There is a third breed of level, the Oh-My-God-I've-Got-To-Keep-Moving level, that forces you to move fast to outrun disappearing scenery or tumbling rocks. These will be familiar to anyone who's played Konami's old platformers, such as *Castlevania IV* or *Bucky O'Hare*, but then that's hardly surprising seeing as many of Treasure's team are ex-Konami staff.

★ SHAKE IT ALL ABOUT ★

Marina doesn't start the game with any weapons at all. Very occasionally there are guns or missiles that she can pick up from fallen foes, but for the most part the only way she can defend herself is by grabbing her opponents and throwing them at something hard, or each other. When she's fighting larger bosses, you have to work out where and when you can catch hold of them with the help of a flashing grab cursor. Before you do smash them into the floor though, try pressing down twice on the D-pad to give them a shake. Sometimes this can empty their pockets of life-giving crystals or other useful items. Try it on the scenery and you might find new areas open up!

Listen for the sound that tells you something new has appeared elsewhere in the level.

That's it, mate, just cough up all o' them luvverly crystals.

Jump and grab the Clanballs to reach higher places.

Marina can bounce herself off Clanballs in any direction.

Often the only way to deal with foes is to grab and slam them.

Boost-sliding like this is the fastest way to get around.

Dig in 'suspicious-looking' places to get a surprise.

Crouching and rolling gets Marina through the tiniest gaps.

Jump then use Marina's booster to reach high ledges.

THE CRYSTAL MAZE

Crystals are what keep the game going and they're to be found lying on the ground or floating in hard-to-reach places. Sometimes if you grab a Clancer and shake him, a load of crystals fall out of his pockets. They come in four colours.

NINTENDO 64

Blue crystals increase Marina's health slightly and green ones give it a larger boost. You can keep collecting both until you have a maximum three energy bars worth of health.

Red crystals don't have any effect during the game, but if Marina runs out of health you can trade them in for extra credits. 100 crystals buys you back into the game with full health.

CATCH A FALLING BOMB...

For the most part Marina's only weapon is her grab-and-throw technique, but she can also capture heavy artillery such as machine guns and rocket launchers from certain enemies when they die. One other technique that's particularly useful against bosses is Marina's ability to grab enemy shots and throw them back. Missiles, rocks, laser beams and even giant fists can all be 'returned to sender' like this. Which is cool.

Stolen weapons never last very long so make the most of them while you have them.

There is one yellow crystal hidden on each level and the only way to complete the game fully is to find them all. Sometimes they're hidden out of the way. Sometimes enemies have them.

Here, Marina grabs the missiles, powers them up with a shake, then sends them straight back!

MIXING IT UP DOWNTOWN

Remember the mix-'n'-match weapon system Treasure used in *Gunstar Heroes*? Well, there's something similar in *Mischief Makers*. On some of the later levels there's a Clanpot which you can use to collect and store items such as time bombs and shurikens for use elsewhere. You can also use the Clanpot to create more powerful weapons by dropping objects in it, then giving it a good shake. For instance, if you put three flowers in the Clanpot and shake it you get a shuriken. Mix three shurikens together and you get a boomerang!

Pick three flowers...

Mix 'em up in the pot...

Hey presto! A shuriken!

★ BOSS OVERLOAD! ★

Treasure never skimp on the bosses in any of their games, and *Mischief Makers* is no different. In the early levels you get simple but nonetheless dangerous foes to deal with at the end of each world. On later levels, minor bosses turn up in every other level, and as Marina proves to be more of a threat to the Emperor's plans, his generals start turning up in their powerful mechs, and even if you defeat them once they may well be back a couple of levels further on for a rematch!

CLANCER WORM

A fire-breathing worm that turns up in the Clancer Desert. Just grab its head and keep slamming!

BEE CLANCER

Bee-ware its powerful sting and when it conjures up a swarm of bees, punch them all to swat them.

MIGEN AND MIGEN JR.

Jr is the big guy. Grab his fists and throw them at dad, then make him smack himself in the gob.

GENERAL LUNAR

Lunar attacks twice, with bombs and guns, then with his missile-and-laser-armed mech, Cerberus Alpha.

GENERAL TARUS

First time around, Tarus attacks with fists and rocks. Next time he brings his giant tank mech, Sasquatch Beta.

GENERAL MERCO

Armed with a lance, a shield and his mech, Phoenix Gamma, Merco is a mighty tough customer.

★ RIDE 'EM CYBOT! ★

When mere running and boosting about aren't enough, Marina has to climb aboard whatever mode of transport is handy.

Marina has to boost to power the tricycle, but her Clancer stand-in, Teran, can pedal like crazy.

Like Cat Clancer, this ostrich-thing is a good runner and can flap over the Clancer mech's lasers!

These springy fellows appear in several levels. Jump on and let him spring you to new heights.

Cat Clancer works for the Emperor until Marina beats him at Dodgeball and he agrees to help.

After this minor boss is defeated in the second world he returns in the last world to help Marina.

CVG OPINION

Treasure have built a reputation for ingenuity, so I expected their first N64 title to be a mega-game with original gameplay and 3D graphics to die for. It came as a shock to find they had stuck with what they know, a scrolling 2D platform game. Worse yet, for the first ten or so levels *Mischief Makers* provides little to occupy your attention apart from the annoying controls. Whether this is some test of faith to discourage all but Treasure's most devoted fans I don't know, but once through those early levels the quality really shines through. *Mischief Makers* is like Treasure's Megadrive games - unusual action, lots of variety and special effects, a versatile character (once you've mastered those controls), and excellent bosses. Once I'd got into it, I was unable to stop until I'd finished the next level. For a while it looked like *Mischief Makers* was going to be quickly finished, just because you end up playing the whole thing in one all-night sitting. By the fifth world though, that's clearly not the case. It gets really tough from there on, and even if you do eventually beat the Emperor you still have to find all the secret yellow crystals to finish the game properly. So don't be put off by those first impressions - this is a game you'll be playing for months to come!

PATON CLANCER

RATING

What initially looks like Treasure's first duffer turns out to be one of their finest. An excellent old-fashioned platformer with loads of action!

 PlayStation™	CORRIDOR	BY AARDVARK	* PRICE £29.99 * PC, SATURN AND N64 VERSIONS AVAILABLE * NO OTHER VERSIONS PLANNED * STORAGE 1 CD * RELEASED BY: INTERACTIVE TEL: 0171 234 2760
	OUT NOW	1-4 PLAYERS	

It's time for PlayStation owners to have a go at saving Earth's babes from those alien scumbags! Let's kick ass and chew bubblegum!

DUKE NUKEM

Duke is going for complete world domination. PC owners are currently looking forward to *Duke Nukem Forever* while Saturn owners have been enjoying a fantastic version of *Duke Nukem 3D* for the last few months. Now we've got *Duke Nukem 64* and *Duke Nukem* on the PlayStation - the original game, minus the "3D", plus a load of new levels. And for those of you with friends and lots of money, there's even a two-player link-up mode. Holy cow!

WEETABIX GOGGLES ACTIVATED

The PlayStation version of *Duke Nukem* is basically a straight port of the PC game. Instead of using a real 3D game engine like the Saturn version it uses a similar "2.5D" one, meaning that fancy effects such as real-time lighting aren't possible. All of the levels are the same as they were and all the speech is in, but the game runs very slowly and jerkily when compared to other games like this.

I AMN'T AFRAID OF NO QUAKE

PlayStation *Duke Nukem* has all of the levels from the PC game as well as a load of extras. One of the two new episodes is for single-player games while the other is a collection of Dukematch levels, including some all-new ones. The new levels aren't as good as the originals, but are a bit more varied. The first one, for example, looks like the start of *Tomb Raider!* It'll be interesting to see how id Software react to one of the new Dukematch levels - it looks very familiar...

Anyone who's played *Quake* before will recognise this as the first room of the start level!

There are some very strange sections to the new levels. And new enemies!

DUKE VS DUKE

A split-screen multi-player mode wouldn't have been possible on the PlayStation, so Aardvark have included a link-up mode instead. You need two consoles and two copies of the game, but it's certainly better than nothing. We had quite a few problems when testing it, with connection troubles and so on. Still, at least it's there if you want to try it out.

CVG OPINION

Saturn *Duke Nukem 3D* got me right back into the game. It's so fast and smooth that it's a joy to play. PlayStation *Duke Nukem* is enough to put someone off the game for life. Developers Aardvark have gone for a straight conversion of the PC game with extra levels, which is fair enough. The problem is that their game engine is terrible. Everything moves really slowly and jerks about all the time, and the textures look more blocky than usual. Even the simple gun animations are cut so they look stupid. But the worst thing is the control system. There are three settings, all of which are awful, making the game impossible to play quickly. The PlayStation has got some decent corridor games, including the fantastic *Exhumed*, so *Duke Nukem* really isn't worth having. Too jerky and too fiddly to play. And the music.... agh!

CVG LDMAS

EXTRA HARD SUB GAME MEMORISING THE CONTROLS

One thing that made *Duke Nukem 3D* so good to play on the PC was the way that the controls worked. Unfortunately the PlayStation version has an absolutely terrible control system. The default mode doesn't have strafe buttons (to sidestep left and right) so you have to hold a button to move sideways. There are three different settings, one of which is called "Doomed" and is based on *Doom's* controls. Trouble is, looking up and down is essential in *Duke Nukem* and it's so fiddly to do here that it's not worth bothering. The controls completely ruin the game.

Duke Nukem on PS has terrible dance tunes.

RATING

A terrible conversion. The bad graphics and stupid controls make it no fun to play at all.

Maybe you know everything about *Duke Nukem 3D*, but this isn't the same game. This is *Duke Nukem 64*.

After the astounding Saturn version of *Duke Nukem 3D*, you'd expect a fantastic Nintendo 64 conversion of the same game. But that's not happened. Instead we've got *Duke Nukem 64* - an upgraded version of the game featuring new levels, new weapons, new graphics, new speech, and none of the risqué jokes. The story is the same, as Duke is shot down by aliens ("Scum" this time, rather than the more offensive word used in other versions) over L.A. and needs to work his way through the city, then figure out how to save the Earth's babes from a fate worse than death! Go Duke - time to kick some alien buttock!

DUKE NUKEM 64

NUKE 'EM DUKE!

Duke Nukem 64 looks very different to the other versions of the game. All of the weapons have been redesigned and some new ones have been added. Normally at the start of the game there's a hidden rocket launcher, but in *Duke 64* it's a new grenade launcher. You can also get double sub machine guns and expander crystals for the shrinker weapon - shoot someone and they grow until they explode! There's also a powerful plasma cannon that can be charged up to fire an extra-powerful shot which blinds you for a few seconds!

☛ This is the plasma cannon. Hold the fire button to built up masses of power.

☛ Be careful when using the grenade launcher, as it's easy to kill yourself.

WELL RIP YOUR HEAD OFF AND... GIVE YOU A NICE FRIENDLY KISS

Duke Nukem 3D is known for having a risky sense of humour. Duke swears, goes into some sleazy places and blows enemies into chunks of body parts. Nintendo weren't too happy with many of the things going on in the game and have had a lot of them removed. New speech has been recorded to replace the swearing, new sections of levels replace anything that might offend, and some of the gore has been toned UPI. Nintendo seem to think that corpses hanging by hooks through their heads are less offensive than a statue without a top on.

☛ Nintendo don't think that nightclubs are suitable for gamers, so you get a packing yard instead.

☛ Captured babes are now covered up and need to be rescued instead of put out of their misery.

☛ The new dead bodies are pretty sick - spines poking out of chests, etc.

☛ No rude book store for Nintendo owners - just a gun store instead.

FOUR DUKES ARE BETTER THAN ONE

Duke Nukem 64 has lots of multi-player options. You can choose either co-operative or deathmatch games, and play with up to three other people at once. If you haven't got enough friends you can add computer-controlled Dukebots to make up the numbers. As well as all the one-player levels there are a few deathmatch-only stages designed especially for *Duke Nukem 64*.

CVG OPINION

I really don't understand what's happened with *Duke 64*. If all the risqué stuff had been removed that'd be alright, but everything that was funny has been taken out and the gore has been increased! It's not the funny gore either - it's the dead bodies, and they're just plain disgusting now! The graphics are great. The 3D engine is smooth and moves pretty quickly, and the new 3D explosions and bosses look quite good. The new weapons don't really seem to fit in with the rest of the game, and effects like the mirrors have been left out. The control system is good, using both the 3D Stick and the cross-key to keep the game moving quickly. New sections have been added to some of the levels, but they really don't match up to the rest of the game. All the original areas a very cleverly designed giving you something to do in every single room, while still looking like they could be real buildings. The new sections don't fit in with the whole idea that made *Duke Nukem 3D* such fun. Also the grenade launcher is badly thought out - the grenades bounce too quickly and too far, making it too dangerous to use often. *Duke Nukem 64* is certainly very good, but little details could have made it much better.

EV LOMAS

A disappointing translation of such a great game. It's got most of the important elements, only without a sense of humour.

 PlayStation	PLATFORM GAME	BY NAUGHTY DOG	 PRICE \$39.99 PREDECESSOR AVAILABLE NO OTHER VERSIONS PLANNED STORAGE 1 CD RELEASED BY SONY TEL: 8111 847 1800
	OUT NOW	1 PLAYER	

Ready for the continuing adventures of Crash Bandicoot? Well you'd better be, because here he is.

Each console had a platform star to wow the public last year. *Mario* and *NIGHTS* were locked in a fierce battle, while PlayStation's contender was of course *Mr. Bandicoot* – a good game, but up against two of the greatest ever, the marsupial fell unceremoniously flat on his face. That's not to say that the game didn't sell, because it did. So while *Mario* and *NIGHTS* take a breather until their inevitable sequels – Crash spins back hoping to improve on his last attempt. Though how will he fare against another bunch of challengers, namely *Diddy Kong* and the return of *Sonic*?

THE NUTTY PROFESSOR

You may have tried your hardest in the original game, but there's just no stopping an evil villain. Hence Dr. Neo Cortex is back with a new dastardly scheme, and he's tricked Crash into being a part of his grand plan. Dr. Cortex requires 24 crystals scattered in each of the stages of the game for his new scheme, and Crash has been handpicked to go out and collect them. Will Cortex be thwarted again, and will Crash save the day? It's up to you.

Crash is totally bewildered to face a hologram of an aged Tom Nook upon his travels.

WALK BEFORE YOU CRAWL?

Some new features have made their way into the sequel. Namely Nitro crates and Crash's ability to crawl and slide. Just like in the first game each level is littered with hundreds of crates for Crash to bust open. Bouncy and Standard are the most common, plus the dreaded TNT crates and the rather nice 1UP, which gives you an extra Crash to play with. The new Nitro crate is just like the TNT-style except without the countdown. Touch one of these and it's instant destruction. Crash's new crawl and slide is activated by the circle button. It is very useful for getting through narrow gaps, and sliding into enemies who inhabit such places, especially on the levels that are viewed from the side. It can also be used to simulate interference with baby polar bears.

Crash slides under this electric fence while being chased by a snowball.

Nitro crates are dangerous, especially when placed on ice.

The Komodo brothers, a tricky pair of bosses, one spins around and the other throws swords.

WINNER TAKES ALL

Just like the original there are bonus levels to be found, but they play a little differently in the sequel. Now any bonuses you collect in these sections remain unclaimed until you reach the end of the bonus stage. Failure to reach the end means you get nothing, Crash doesn't lose a life, but if you want all those extra lives and apples you have to enter the bonus stage again.

☞ If you want to get all the crates on a level, you have to enter the bonus sections.

☞ A slippery oel has discharged into the water, and zapped Crash.

☞ Look at that, the Jimmy Hill twins!

IN SPACE NO-ONE CAN HEAR YOU SPIN

Whereas the last game was set across different islands, each consisting of several stages, *Crash 2* is set in a tower, much like Bruce Lee's last film *Game of Death*. Crash must work his way up the tower. Each floor contains doorways to that level's stages. Complete each stage and step on the lift that is at the centre of the room, to be transported to the next level. Before you enter the next level however you must defeat a boss, each as colourful as the last. The levels are surprisingly similar to those found in the first game, except for levels that see Crash flying through a space station strapped to a jet-pack. Here you must apply careful thrust and brakes to avoid the usual pitfalls, including some rather mean lasers that take some perfect timing to negotiate.

☞ Zero gravity, deadly lasers, no problems.

CRASH BANDICOOT ON ICE

To add variation to the formula of entering levels and clearing them of all crates, a hog was introduced that Crash raced on in a couple of levels in the first game. For the sequel the hog has been replaced by a polar bear. These levels still play exactly the same, except you are now placed in some snowy environments, where the real danger is some icy sections to negotiate. Even more hazardous are the Nitro crates that are left in dangerous positions for you to crash into. In the original there were also levels where Crash rode around on lily pads and jumped on logs. These have now been changed to a jet-ski that Crash surfs down the river, while hopping onto logs and the backs of hippos.

☞ We thought polar bears were supposed to be fierce, this one's way too cuddly.

2nd OPINION

When the first *Crash Bandicoot* came out, I found it entertaining, the levels were challenging and Crash himself was mildly rib-tickling. However, it just lifted ideas from other games and lacked any real soul of its own. *Crash 2* goes further, by duplicating its own predecessor! Unlike masterpieces like the *Sonic* series, *Crash 2* doesn't refine or build on the first game at all. Nonetheless, I did chuckle at his wacky Bandicoot antics. But not to the extent that I'd buy this game.

Tom Gulse

CVG OPINION

As sequels go, this is *deja vu* city. I found myself rubbing my eyes in disbelief, and had to quickly play the original game again. Just to check this wasn't just the same thing with a big number 2 slapped on it. Upon closer inspection there are some marked improvements over the original. The graphics are better, and even more colourful (if you can believe that). Getting a perfect score on each level now takes a bit more work, and the jet-pack sections do add a bit of variety. The big question is how much did you like the original? If you thought it was the best thing since sliced bread you'll love this. It's more of the same, better designed and perhaps longer lasting. Everyone else though, will no doubt be wondering why real imagination was thrown out the window.

Alex Marmalea

RATING

Crash spins back in an almost identical rerun of his former hit. This is still a good game, but is unlikely to win new fans, or cry out 'must have'.

While you're waiting to see if Shearer gets fit for the World Cup, hold a home version of the tournament for the Jules Rimet trophy in *Actua Soccer 2*!

actua SOCCER 2

Gremlin plumped for Alan Shearer to endorse this game, as well as provide the motion capture. But he manked up his ligaments, so they got Liverpool's rising young star Michael Owen to do it instead! The end result is completely the opposite to EA's titles, it's a good game. EA tried the 'celeb doing motion capture' angle with David Ginola, but, frankly, the fat bloke who plays in goal for your local Sunday team could have done the job for the last couple of FIFA games since the end result was crap.

Actua Soccer 2 is such an improvement over the original that it's frightening. Everything from the feel of the game, the look and the pace have been bettered and Gremlin now have one of the most playable footie games on any format. Fact.

THE FREEKICK SPECIALIST

Scoring from free kicks is another excellent way to score goals that even your opponents will recognise as having a pinch of quality to them. Hold down the shoot button and a power bar appears. If you have a free kick just outside the box, letting this run up to full will always result in your shot ballooning over the bar. Aim for three quarters to get

the perfect power. Secondly, it's always useful to remember that holding up-right to try and place the ball in the top right corner will put loads of backspin on it, after which the ball ends up in row 2! Keep the down right diagonals on the D-Pad held and hitting the target won't be a problem. The same thing applies to penalties, incidentally.

⚡ The view for these free kicks stays like this until the ball hits the net...

⚡ ...or is saved by the goalkeeper. The wall even jumps up to block the shot.

BACK DOOR, BACK DOOR!

One thing that makes games like *ISS Pro* and *Olympic Soccer* so good is the ease with which you can set up chances from crosses, corners and free kicks. In the original, players could cross the ball when a square appeared as the icon underneath them.

While the same applies here, the triangle becomes a dedicated cross button which will always go towards a man in the box. Holding square makes the striker on the end of the delivery perform a diving header, volley, overhead kick or whatever shot is applicable. Scoring from these is difficult, but you are guaranteed some good goal-mouth scrambles and panic attacks once you get into those positions.

STRAIGHT DOWN THE MIDDLE

The through ball is fast becoming an integral part of soccer video games. It adds loads more goalscoring chances for a start, but also allows for a greater degree of realism when playing. Slipping a ball between defenders isn't as easy to do in *Actua 2* as it is in, say, *ISS 64*, but you can still carve open defences with a well-timed pass. Tapping X is a normal short pass to a team-mate's feet, but if you hold it down for a second or longer, then release it, you unleash the through ball. Even when you do manage to get through to the goalkeeper, beating him is far harder.

'HE WAS ON THE NEXT PAGE...'

Barry Davies grabs the mic once again to front the ups and downs of the beautiful game. But he has been joined by his Match of the Day partner-in-crime Trevor Brooking. Barry still gives his opinions on the bulk of the game, but after nasty fouls, goals, or half-time intervals, Trev nips in and summarises the play for us. And it is always relevant to what's going on. If you're playing a tricky away match and go in at half time one-nil up, Mr Brooking remarks on how the visitors must be very happy by their performance so far. Cool!

ⓐ Aim for the player nearest the keeper, and press X. Hold square, aim for the net and wait for the goal.

ISS PRO VS ACTUA SOCCER 2

Finally, a game has come along that can challenge ISS Pro as the King of PlayStation football games. In fact, in our opinion, Actua 2 has dethroned ISS and rightly wears the crown. Ignore the review scores and listen to the facts: Actua is a much more playable game. It's easier to pick up, and scoring goals is much more realistic in that you can actually picture some of the goals being stuck in the onion bag in real life. The players' AI is very good too, and something which proved difficult in Pro was the through ball. Actua's is far from perfect, but seems easy to pull off. Congrats go to Gremlin then!

ⓐ Just don't use all the hot water OK?

THE PC VERSION

With both versions of Actua out before Christmas, you PC owners may want the lowdown on your version, especially since it's better than the PlayStation title! For a start the PC has a Scenario mode which lets you take over situations from classic games. There's also an Editor

to customise teams, etc, plus a multiplayer LAN option (should you have access to that as well). The PC version offers superior graphics, with the close up animation and stadium detail benefitting too. If you're faced with the choice, go for the PC version, as it seems more polished overall.

ⓐ The players in the PC game are more detailed and the animation is smoother.

ⓐ Spot the ball! Send your answers to the usual address, on a ticket to the World Cup.

CVG OPINION

Our summary box says why Actua 2 is better than ISS Pro. So I'll tell you why this game is good in its own right. The whole game engine is a massive improvement over the first - it's quicker and has a lot more action. Goalmouth incidents are common, and once you've grasped the basics, goalless games become non-existent. The thing which impresses me the most though is crossing and scoring from corners. You swing a ball over, and a player runs to get on the end of it, before unleashing awesome volleys. They're not guaranteed to score, but they look cool. There are a couple of flaws, though. The off-side rule is very strange and doesn't play as in real life (a player can still be offside when he's received a ball, even if, when the ball was played he was onside - very frustrating). Some of the tackling seems to be a bit weird too, as taking people out from behind often goes unpunished. Still, Actua Soccer 2 is very cool, and well worth getting if you want an ISS Pro beater.

STEVE HEBB

RATING

Improves a hundred per cent on the original. Superb gameplay and graphics will keep any self-respecting football fan occupied for hours.

With *F-Zero 64* still some months off, here's Acclaim's attempt to fill that N64 futuristic racing game gap. Hold tight!

extreme-G

The trouble with motorsport today is it's all rules, rules, rules. No speeding in the pit lane. No ramming the competition off the road. No Uzis. *Extreme-G* puts the danger back into racing in a futuristic setting.

Eight riderless bikes (driven, in true Cyberpunk fashion, by the brain impulses of spectators) go head-to-head on a collection of outlandish extra-terrestrial circuits. Each bike is equipped with a laser cannon, a nitro-booster (good for three uses) and an engine that can take it to rocket speeds. To make things more interesting, there are especially devastating weapons to collect along the way. So if speed and skilled driving aren't enough to get you to the front, perhaps a well-aimed rocket will be!

THE LONE BIKER OF THE APOCALYPSE

There are four options for the solo player in *Extreme-G*. The main action is in the Extreme Tournament in which you race three increasingly-difficult competitions at three increasingly-difficult skill levels. As you go through the circuits in this mode they become available in the other game modes. Choose Practice and you can drive a 'friendly' race on any available track. Time Trial, as the name suggests, pits you against the clock as you attempt to smash the best recorded lap and race times. The fourth game mode is Shoot 'Em Up, in which you pick a track then race around it behind a bunch of target drones, blasting as many of them as possible during the course of three laps. A bit unusual, but then *Extreme-G* is almost as much about blasting as it is about racing.

ROLLER COASTER RIDES

There are a total of twelve circuits in *Extreme-G*, but the only way to see them all is to complete the Extreme Tournament at Meltdown level. It's worth the effort, because *Extreme-G* contains some of the most amazing circuits you'll see in any racing game.

It starts off sedately enough, with the bog-standard desert tracks, then moves on to more industrial settings before heading into Mad-Dog Fantasy Land. As you progress you notice new things being added to the circuits: pipes (drive up the walls, and over the top), alternate routes, loop-the-loops, vertical straights and finally, gravity-defying roadways that head one way, then double-back so you're driving back the way you came — UPSIDE DOWN!

These roller-coaster rides account for a lot of the thrills in *Extreme-G*. Our advice is to play the game on as big a screen as possible. And if you're prone to motion sickness keep a bucket handy.

BIKER RIOT!

All the bikes come with a laser fitted as standard. Some are better than others, but they're of little consequence because for the most part you'll be using the one-shot weapons that you pick up as you go. As in *WipeOut*, these sprout from certain points of the track in the form of icons. Drive through them and the weapons drop from the sky, either mounted on a saddle that sits over the bike, or on a truck that follows it. There are four basic varieties, as follows...

◀ Caption in here. Caption in here fdsfsg fd sf sdfs a

GO NITRO-MODE!

Even on the hardest level, *Extreme-G* isn't that difficult to beat, but to keep the thrills going you get a password whenever you win a tournament. These earn you a more advanced bike, or activate crazy features. One of these is a fish-eye lens effect which exaggerates the perspective, making it look like you're going even faster than you are. Another transforms the bikes into boulders (a bit crap really), while another turns all of the tracks upside down and reverses the controls. The best we've seen is the infinite-nitros mode which gradually activates the fish-eye mode as you accelerate, giving a cool warp-speed effect!

DEFENCE

There are two shields available, one that makes you impervious to weapons, and another that repels other bikes, allowing you to charge through the pack.

MISSILES

You can get explosive rockets that fire forward or backwards, homing, in threes, four or packs of five which fire one at a time or all at once.

MINES

Proximity mines are most common, but you also get laser lmpet mines which explode when a bike breaks the beam between them.

SPECIALS

Tractor beams that drag back your rivals, white-out flares, and flame exhausts all become available by the time you get to the more advanced races.

◀ Better call in Rentokill.

◀ Tracks set in Satan's bowel!

◀ Look at those curves coming up.

FUN WITH MOTOR-CYCLE GANGS

Extreme-G's multiplayer options are extensive, and we were pleased to see that they could all handle up to four players in the now standard quarter-screen format. There's the usual Head-To-Head race as well as a Cup Challenge in which up to 16 players compete in a knockout tournament, racing two at a time. The Flag Race is a witty variation on the Head-To-Head, in which the winner is the one who drives through the most flags on the track, rather than the one who finishes first. Last – and least exciting – is the Battle Arena, a last-man-standing shoot-out which takes place in one of four tiered arenas. While this worked wonderfully in *Mario Kart 64*, *Extreme-G*'s super-fast bikes don't handle well in such confined spaces and getting another bike in your sights is a frustrating process.

◀ Clearly modern motorcycle sport has some way to go before we see races set on tracks like this.

CVG OPINION

I discovered it was a big mistake to approach *Extreme-G* expecting an N64 version of *WipeOut*. *WipeOut* is a real racing game. *Extreme-G*'s entertainment experience breaks down into 20% racing, 20% blasting and 60% Wow-That-Looks-Amazing!. In *Extreme-G* you don't worry about learning to control your bike because you just bounce through the corners, leaving you to concentrate on blasting your way through the opposition. It's not bad, but it's shallow. Having said that, by the time you get to the super-fast, mega-wisty, cool-looking circuits on the *Extreme* level you don't care because you're getting such a buzz off the speed and the awesome visuals. My reviewer's common sense is telling me not to be fooled by the pretty graphics, but there's no denying that once you get into *Extreme-G* it is really good fun. To me that's how games are supposed to be.

PATL CHANCOY

RATING

A real tart of a game – all looks and hardly any brains. A great ride though. *Extreme-G* isn't *WipeOut* on N64, it's something very different.

Sega's conversion machine continues at full steam. While the habit of releasing Saturn versions of hit coin-ops has proved extremely fruitful in the past, this year sees a surprise change in quality. Only now are we seeing home versions of 1997's arcade crop. Though by Sega standards, 97's arcade titles were a mixed bag. Brilliant games like *Scud Race* and *Virtua Fighter 3* are glaringly absent from the Saturn release schedule. Instead we've got conversions of some of the not-so-hot games such as *Manx TT* and now *Sega Touring Car Championship*.

PASS THE SICK BAG

All these innovations and additions are great, but with *Touring Car* there's one problem, and it's a biggie – the graphics. While screen shots on this page may give you the impression that this looks a lot better than *Sega Rally*, when you're playing, this couldn't be further from the truth. These graphics only do one thing – create nausea. The game moves at a very fast speed, the frame rate however, does not. This makes the game a bit of a dog to play. Graphics appear flickery, and taking tight corners at speed now becomes almost justice. The screen update and frame rate is just too slow, to make racing possible. It's all very annoying. Perhaps Sega should have acquired a license to use the title *Rage Racer*.

SEGA TOURING CAR GRAND PRIX

Another new feature is the option to drive longer races. A good idea, since the arcade races are often far too quickly. In this new Grand Prix mode, you'll have to pay attention to damage inflicted on your car and tyre wear. Should your performance drop because of the extra burden placed on your motor, you'll have to make full use of the pit. Yes, the pit lane that always used to provide a problem (when computer drivers bump you into it, during an arcade race), now plays an important part during these longer races.

	OUT NOW	1-2 PLAYERS	

Created by members of the original *Sega Rally* team, could this Saturn racer steal that gaming colossus' crown?

SEGA Touring Car Championship

NEW LIFE FOR OLD FISH

The growing trend these days is to include lots of console only extras to conversions of arcade titles. *Touring Car* is no exception. Featuring extra circuits, more cars and quite a few secrets, as far as extras go – this lot isn't bad. The Saturn mode plays host to an extra circuit, which is great for speed freaks. There's also the opportunity to tinker about with your cars on the set-up screen. Here you can make the cars perform to your needs. There are two famous secret cars to drive, from a game mentioned elsewhere on this page. The best addition of all, and a great innovation, are three time-released circuits. These appear for 24 hours, on set days only. The idea is to Email Sega with your best time, and claim huge fame and fortune in the process. The first time-released circuit appears on December 24th!

Get near a bridge and the graphics will go into super-jerk vision mode.

We don't want the windows washed!

CVG OPINION

While Sega's arcade divisions have spilt us rotten in the past, the first half of 1996's titles were not the best they've produced. Unfortunately for Saturn owners, we're only now seeing the end result of this poor period. This year's Saturn arcade conversions have offered us nothing new, and nothing that is better than the games we've already got. I can understand the reasons behind converting a hit game across to a console, but a poor game and the feeling is "why bother?". There were great expectations from many that *Touring Car* would finally prove to be a *Rally* beater, but I'm afraid that couldn't be further from the truth. The effort has been made in the Saturn extras department, but the game itself is really disappointing. Every cloud has a silver lining, and judging from this year's arcade titles, next year should be very good indeed.

ALEX HARRIS

RATING

The arcade conversion machine blows a gasket, and hits a sticky patch. *Touring Car* may please fans of the original, everyone else should go and get Sonic R.

The greatest adventure trilogy ever is now complete. And we're not talking Star Wars here.

THE CURSE OF

MONKEY ISLAND

The *Secret Of Monkey Island* was called "the best game ever" by many until the release of *Monkey Island 2: LeChuck's Revenge*, which took the title away from it. So it's no surprise to find that the third game in such a highly-regarded series is in such demand already. *The Curse Of Monkey Island* follows the hero of the series - failed pirate Guybrush Threepwood - on his crusade to win back Elaine Marley, the love of his life. Normally that wouldn't be too much of a problem, but this is a *Monkey Island* game, remember.

AAR, IT BE DEAD SIMPLE TO PLAY, AN' RIGHTLY SO

The game interface has been simplified from the first two *Monkey Island* games, making it less annoying to play. Previously you had a selection of actions in the bar at the bottom of the screen which you selected along with items to make an action sentence. Now it's a lot simpler, with an interface more like Lucasarts' other recent graphic adventures.

PIECE OF EIGHT

As you move the regular mouse pointer around the screen it changes red to indicate items that can be used. Pressing and holding the left mouse button brings up a gold coin with three actions on it. The hand lets Guybrush pick things up, use, take, push, open them and so on. The eyes on the skull in the middle are for examining and reading things, and the parrot head is for talking, eating, and even blowing things.

DEAD MAN'S CHEST

Pressing the right mouse button at any time brings up a big wooden chest containing all the items you're currently carrying. It's very simple to use - you just click and drag whatever you want to use into the playing area and put it where you want. You can also use the coin symbol on any item in your inventory.

IT'S BEEN HEARIN' STORIES.....

The fantastic hand-drawn introduction sequence begins with our hero, Guybrush Threepwood - the young pirate that we led to stardom in the previous two games, floating lost at sea in a dodgem. Play *Monkey Island 2* if you want to know why. Just as he's giving up all hope of surviving he drifts right into the middle of a battle, which

coincidentally involves the evil undead pirate LeChuck attacking Governor Elaine Marley's fort on Plunder Island! Naturally, LeChuck isn't happy about Guybrush killing him twice and locks him up in the hold of the boat. Your first task is to escape from LeChuck's boat and save Elaine before the zombie pirate can steal her away forever!

A RIGHT GOOD LOOKIN' UN

The *Curse Of Monkey Island* features some of the best graphics ever seen. The hand-drawn backgrounds and characters are easily good enough to feature in a proper animated movie, and the amount of detail is truly astounding. The in-game characters look identical to those in the video sequences, making the whole thing blend together perfectly. The cut-scenes are magnificently drawn and really show off the amount of character that everyone in the game has. There are also some great 3D rendered models which blend into the cutscenes just right.

THERE BE LOADS TO DO IN THIS 'ERE GAME

As well as the usual point and click sections of other graphic adventures, *The Curse Of Monkey Island* also has the occasional alternate section to break things up a bit. The biggest of these sections is Chapter Three out of the five in the game. Once you've assembled a crew (and managed to stop them singing sea shanties!) it's off to do battle with the evil Captain Nottingham. Your map shows the location of nearby ships, and getting right next to them takes you into battle mode. Use the wind to get next to the enemy ship, shoot them with your cannons and get on board! Here you must swordfight with the captain using clever rhyming clever insults and retorts which you need to learn on the way. Win the swordfight, steal all their booty and buy more powerful cannons from Plunder Island!

At the start of the game you get to use LeChuck's cannons to take out his crew in their smaller boats!

This section is like a mini-game of its own. If you've seen the movie *Deliverance* you'll particularly appreciate it.

I DON'T BE LIKIN' THE LOOK OF 'IM

The thing that always made the *Monkey Island* games stand out from the crowd of dodgy graphic adventures was its excellent collection of characters. Some are carried across to the third game, making cameo appearances that fans will especially appreciate. One new character who appears right at the start is Murray – an evil talking skull who has recently lost the rest of his body (it was your fault). Every now and then he turns up with another fiendish scam to take over the world which is obviously not going to work because of his lack of body. D'oh! The mad owner of the fried chicken shop on Plunder Island is another favourite.

CVG OPINION

Anaah. *Monkey Island*. Brings back memories of swapping 13 Amiga disks backwards and forwards for months on end. The first two games are magnificent and even though the original creator, Ron Gilbert, wasn't involved in the third, it's still fantastic! The graphics are certainly some of the best 2D we've ever seen, with amazing hand-drawn animation for all of the excellent characters. The sound is particularly brilliant as well, with Lucasarts' IMUSE music which changes as you play – something noticeably lacking from *Jedi Knight*. The sense of humour is as great as ever, with tons of little details that prove the dedication of the designers. And the game is bigger than most other adventure games, with five sections which get bigger as you go on. Each of the sections has different objectives, locations and even little sub-games to keep your interest up. There are masses of fans of the series like me who will go crazy for *The Curse Of Monkey Island*, but it's not essential to have played the other games to be able to get into this one. A beautiful, massive adventure game with a great sense of humour. Essential. CV LOMAS

This guy lives in fear of El Pollo Diablo – a 7ft chicken who doesn't like his medieval version of KFC. It's funny. Honest it is.

This is where you first come across Murray the demonic skull. Scary or what?

RATING

A classic graphic adventure game which can easily consume your social life for months. Do yourself a favour – let it.

THE CURSE OF
MONKEY
ISLAND

REVIEW

Three years in the making – *Blade Runner* has finally arrived. Though the word ‘finally’ may be inappropriate. Until this Summer nobody knew the brains behind *Command & Conquer* were working on a top secret game that would revisit a classic movie from 1982. If we’d known about the game back at its inception, the anticipation would surely have been too much. As it’s happened, the announcement of *Blade Runner* has been one of the best surprises of the year. The finished game plays like a sequel to the movie. With all the familiar scenes, and characters being revisited. All that you need to play it is a monster PC and plenty of popcorn.

Two months ago we gave you the first look at this amazing game. Now, in a fraction of a replicant’s lifespan, comes the review.

BLADE RUNNER™

A NEW LIFE AWAITS YOU...

Los Angeles 2019. You are Ray McCoy, Blade Runner, assigned to hunt down illegal replicants (androids that are prohibited from Earth). You have orders to shoot to kill any replicants. This is not called murder, it is called retirement. Your first job is to investigate a vicious case of animal murder. Real animals are a rare luxury, replicants may be involved.

Try out this target range before heading into the streets for real, in the game that is!

EYES, JUST DO EYES

The look of *Blade Runner* is simply astounding. The designers have used a similar approach to that which Squaresoft used in *Final Fantasy VII*. Renders, full-motion video and a large amount of polygons have all been mixed together to give the game a definitive look. Rain and lighting effects are then added, as well as moving parts to backgrounds. The police spinner (flying car) is used to get around the town. When the spinner arrives at a location the ‘camera’ moves around as if this were a real film. This feeling for the film and even the novel it was based on pops up again and again while you’re playing. The end result is hard to criticise.

Chew is a tough cookie to question, but if you tell him he’s in danger, he’ll soften up.

WAKE UP, TIME TO DIE

Perhaps the strongest part of the game is its feeling for the original film. The designers have got the look, and sounds spot on. The familiar Vangelis music plays at key moments. You get the same opening sequence, except here it’s all done with rendered graphics, and even cast members from the film have returned to provide voices. Much like the movie *Back to the Future 2* where Marty McFly returned to events that we’d witnessed in the original film, the same happens in *Blade Runner* the game. It’s set at the same time as the movie, so you’ll even bump into Leon and Rachel, Chew and JF Sebastian, all voiced by the original actors. Westwood also contacted Syd Mead who contributed much to the look of the film, and provided designs for the game.

This guy’s thespian delivery is very funny.

Is she a replicant?

The ESPER finds more clues.

The map from your spinner.

YOU KNOW WHAT A TORTOISE IS?

As in the film, there are a number of machines to help search for clues and detect replicants. The Voigt-Kampff is a machine which measures emotional responses to tricky questions. All Replicants are planted with false emotions, so the VK is like an emotional lie detector. The ESPER (don't ask us what it stands for) is a photograph analyser, that allows you to search pictures for clues. It is possible to zoom in on images and also to pan around them. Often the clues will be hidden behind other objects, or you may just want a better view of a suspect. KIA is short for Knowledge Integration Assistant. Basically this is a computer where all your clues are stored and arranged. Not only information that McCoy has found, but all other Blade Runners. By downloading information from the mainframe at police HQ, you can pick up clues you may have missed.

🕒 Eh? It's the batcave!

🕒 McCoy goes sniffing around for clues.

TOO BAD SHE WON'T LIVE...

There are over 70 characters in the game. All of them have their own Artificial Intelligence (AI). Questioning certain characters triggers off events later in the game and at specific moments the story can split into many different paths. Failure to retire a replicant in one scene will result in an encounter with the replicant later. In the meantime though, that replicant may pass on information to other characters in the game. Because of this AI, it is actually possible to trick replicants. In one game we played, McCoy killed several humans, tricking the reps into thinking McCoy was on their side. Then we went and retired the replicants as well.

🕒 McCoy does his best Columbo impression while with this potential replicant.

🕒 Now he's tied up with a gun to his head. Whatever next?

CVG OPINION

Westwood have done the unthinkable. To take one of the best films ever made and turn it into a game that is worthy of the title is no small feat. However, their obvious love for the movie may have harmed this 'game' in a way. It seems that *Blade Runner* may have been too big a license to tackle and what we are left with is more a companion to the movie than a game. The result is mesmerising and immersive. Once the game is finished however, you are left yearning for more. Not in terms of story, this is the game's strongest part. But, the gameplay is little more than asking questions, in the right place, at the right time. Throw in the occasional shoot-out and that's the game. The fact that it's all over (bar different twists, replicants and endings) in the first day is a shame. I still love this game, but I can't say 'you must get this', as I know many will feel let down. Westwood may have come up against too big a mountain with the license, but I can't think of anybody who could have done a better job.

ALEX NORTON

RATING

You'll be both impressed and disappointed in that order. An amazing display of graphics, story telling and use of the license, but way too short.

MACE: THE DARK AGE

The Nintendo 64 has a 100% disappointment rate with fighting games so far. Not one of the fair number that have been released is good enough to be worth buying (except maybe *Killer Instinct Gold*) so no-one's really expecting anything from *Mace*. It's got a great selection of characters – a Viking, an executioner, a samurai, a skeleton, a knight, something that looks like the big bug from *Men In Black...* and a hidden chicken. It uses similar controls to *Soul Blade*, only with *Away* on the d-pad being used to block. Some cool combos can be worked out if you put in the effort, but the game itself just isn't balanced enough to be worth getting right into. *Mace* is very pretty-looking and can be fun, but you'd be much better off renting than buying.

COMMAND & CONQUER: RED ALERT

Red Alert is practically the same as the first *Command & Conquer*, only it's set in an alternate World War Two where the Allied Forces are battling against the Soviets. As such it has loads of new vehicles, structures and tactics to go with it. This conversion of last year's PC game is practically spot-on in terms of graphics, with the added bonus of translucent menus and explosions. The PlayStation game even features extra levels not in the original PC release, as with the first C&C. A link-up two-player mode and PlayStation mouse support are now available. If you haven't got a mouse, the joypad can be a real pain as you can't move your pointer quickly and click to send troops or attack. It often cancels your selection as you MUST keep the pointer still as you press the button – annoying, but not a big problem. Red Alert is certainly the best strategy game on the PlayStation this Christmas.

CRITICAL DEPTH

The easiest way to describe this game is as *Twisted Metal* with submarines. The idea in the main game is to collect a set number of pods, then go to the exit. Thing is, the other characters are trying to do the same. Shooting someone enough times makes them drop the pods they are carrying, ready for you to pick them up. You choose your character from a wacky selection, ranging from the CIA in their futuristic stealth submarine to something that looks like the robotic fish from *Stringray*. The full-3D movement is good fun, as you can swim straight up and jump out of the water, then dive down on top of battling enemies below. The most annoying thing when playing the computer is that as soon as you collect a pod they're onto you, chasing you to the end while battering you with shots. The game is pretty overvalued, but has some highlights including the two-player mode.

MEN IN BLACK

One of the biggest movie licences of the summer which automatically constitutes a terrible game right? Wrong. For once, a movie tie in comes along that doesn't have characters running through a scrolling city beating everyone up. Instead, *Men In Black* goes for a *Resident Evil* style affair, and manages to pull it off quite successfully. The backdrops are very well done indeed and don't require any flashy 3D cards. The one real downer is a little however (the characters walk like they need the toilet), but you do get used to it. You track through the streets of New York, before being entered into the world of the *Men In Black*, and the game really starts. Over 200 locations are there to explore, loads of puzzles to solve and a rock hard difficulty setting, which can also be frustrating. It's a very smart movie tie-in and one I can recommend.

PEAK PERFORMANCE

Peak Performance doesn't try to be clever with the graphics. It doesn't run thousands of polygons a second. It just goes for speed and gameplay. Or so we're told. Speed it certainly does have, but the gameplay to go with it? Unfortunately not. Granted, *Peak Performance* does have some good points. For example, it has loads of vehicles for you to race as – most of which have to be earned – increasing the chances of playtime. But at the end of the day, it's just too annoying to play. The two player mode is an absolute joke. It stays as both cars on one screen until a driver gets too far ahead, when it splits into two screens. The trouble is, if you are near the edge of the track, you get lost in the picture and your car isn't on screen at all. Oh dear.

FORMULA KARTS

Karting, the sport for young joyriders who can't wait to get behind the wheel. *Formula Karts* is an accurate and competitive translation of the sport onto PlayStation. The karts handle realistically, with that familiar hairdryer noise for an engine, and the impression that you're going a lot faster than you actually are. The 10 courses on offer are of the twisty, bendy variety. Surprisingly short, but wide in places. It's the AI though that really makes this game surprisingly good. The computer drivers just never give up. Most racers leave you with a feeling that all the other drivers in the game are on rails, but here if you manage to edge in front of someone, you've got a battle on your hands. The karts are also quite slippery and skiddy to control, and keeping the racing line can be difficult. The only let down are the graphics and longevity. Give it a try and you could be surprised. **ALEX HUHTALA**

➔ Go onto two wheels and drive along the arrows on the wall for a speed-up. This is a lie.

NIGHTMARE CREATURES

Nightmare *Creatures* has been in development for quite some time. Every time we've looked into its progress, the game has got better and better. Now comes the time for its release, and something has gone horribly wrong – they forgot to put the controls in! Yes, what's the point of a beat 'em up set in a free roaming 3D environment if the game suffers from poor controls and a dodgy combat system? Both available characters offer nothing radically different, as you roam the Victorian streets in search of the demons of the night. Yet when you encounter these foul beasts, you're just aching to perform some new moves that sadly never arrive. There are also problems with poor camera angles, glitchy gameplay, and terrible enemy AI that allows you to perform the same move on them for a fast defeat. In a word, this is flawed with a capital F.

➔ We work in London and it's just like this every night on the way home. And at the office.

MONOPOLY STAR WARS

The Star Wars franchise continues, this time with a PC version of the hit board game. Yes it's Monopoly, but with a Star Wars twist. All the usual rules of Monopoly apply, and this plays exactly the same as the board game. The addition of movie clips and rendered characters doesn't add an extra dimension, but it looks nice. Some sequences are quite amusing, like Darth Vader dropping to his knees and groaning as he lands on someone's property. Unfortunately, these sequences take an age to load, and slow down the game immensely. The negotiating screen is also confusing, and the computer AI very tight when trying to put together deals. If you've already got the board game, there's little point in making this extra purchase. For some reason Chewbacca always wins. Perhaps that famous line from the original film bears some light on this odd fact.

TOMB RAIDER II

If you thought finding The Lost Valley, lead bars and fuses in the first Tomb Raider was tricky, this guide is for you.

Core have made Tomb Raider 2 much more challenging than its predecessor. To help you battle Mr Bartolli and his henchmen; find artifacts, forever lost burial sites, and shipwrecks, read on.

PLAYERS GUIDE

TECHNIQUES

If you've practiced the Assault Course in Lara's garden, you're already familiar with some of Lara's new techniques. During the game you discover even more. Here's a recount of them all.

NEW MOVES

When fighting the enemies, the roll button (Q) becomes very useful, as the enemies can't get a lock on Lara and she can be in a better position to shoot them.

The roll button is great when Lara is doing certain difficult jumps too: if you press circle just after the jump, she turns mid-air.

Some rooms in the game will have spikes or broken glass on the floor, Lara can get through it if you hold the walk button.

Climbing ladders – a technique Lara uses a lot – is simple, but dismounting can become tricky as you won't always be able to go up or sideways. While holding onto a ladder Lara can do a back flip to get onto a platform behind her.

➔ Climbing onto slopes, then jumping forwards or backwards while you slide is another technique you'll find very useful.

DRIVING

Once Lara arrives in Venice, she gets a speedboat. Driving it is pretty easy, the important thing to remember is how to get out of the vehicles quickly, which is done by pressing square and left or right.

On a later level there is a snow bike. Driving it is the same as the boat, but you have to be pretty careful not to crash too often, because Lara loses health.

With both vehicles you have to watch out when you jump over objects or gaps, as they are likely to explode if dropping from a height.

SAVING THE GAME

It's advisable to save the game regularly, after you've killed a couple of enemies or completed a series of difficult jumps for example. This way you'll also save your health, as you don't get many medical packs on later levels.

WEAPONS

As in the first game, you start with a pair of pistols and a shotgun. You also get a box of flares, which prove useful as there are lots of dark places Lara visits. Your arsenal builds up fairly early in the game – automatic pistols, Uz's, and a Grenade Launcher. However you lose everything at the start of level five when you find yourself imprisoned on the Offshore Rig. Don't despair – you get to pick up the rest of your old weapons plus a harpoon on the same level. The amazing M16's can be found on the Wreck of Maria Doria, and there's a Grenade launcher on The Deck.

LARA'S HEALTH

Some of Bartolli's men leave a gift when you kill them, either medical packs or ammo. As the levels get more difficult, the enemies get tougher, and you need to use a lot of med packs to recover after encounters with them. You have to be cautious on later levels, as you won't get as many medical packs.

Sometimes you'll find a med pack in an empty room, with no sign of danger. Chances are you'll have to use it immediately because you never know what lurks around the next corner! There are also a few devious sections where the only way for Lara to progress is by falling from a great height. Lara will only survive if her health bar is full.

THE LOST WORLD TWO

The first level – The Great Wall, is very short, but it does contain a very cool secret! Get to the cave from which you descend a long way down, on a zip line, but before you do that, turn around and face away from the edge of the cliff. Jump back and hold onto the edge.

(1). Slowly manoeuvre to the far left then drop down. Just above you there is a crack, you can grab it and shimmy until you have enough space to climb up (2). Go to the end of the room, then down the ladder (3). You will end up at the bottom of the cave. By the way, there is a T-Rex waiting for you (4)! The secret can be found at the far end of the opening (5). But once you collect it, there's another surprise outside...

VENICE: THE BOAT

Once you get the boat and successfully navigate through a maze of underwater canals, you find yourself in a similar maze, only above the water. What you have to do is open a couple of gates and explode some underwater mines in order to get through the main gate. The main gate stays open only for a limited period of time and by opening side gates and exploding mines you are creating a short-cut.

SECRETS

Each level has three secrets, in the form of small green, orange and white idols. Only when you have all three on the same level will you get more ammo and/or medical packs. Not being able to reach the green idol on The Great Wall level (it's tricky!) probably made you wonder if you'd just missed a key to the next part of the game. Well, yes – but it was 'only' a secret.

Upon entering, turn left and get out of the boat by the gondolas (1). Once you've killed a couple of bad guys, one of them will leave you a key to the Garden Door (2). Inside is a switch which will open one of the gates. Next, you have to visit a couple more rooms (3) and (4) which is just around a corner and a bit tougher. As you enter it, you will find a key, but the door will close behind you and you'll have to climb up and defeat more enemies before you can finally get out. After you get the Iron Key, go to the platform (5). The switch inside will open the second gate for you.

Notice the second boat by the entrance? You need it to explode the underwater mines in front of the main gate (6). Once you've done that, go to the ramp room (7). The switch inside opens the main gate, but the countdown won't start until you go over the ramp. Now you have to gather enough speed to take you up through the windows (8) & (9) to the other side, then go straight through a passage (where you have opened the gates), then turn right and voilà! (by the way, there is a secret in here which you may want to collect before you attempt this section).

OFFSHORE RIG: THE PLANE

While imprisoned Lara is taking a nap, you've got to figure out a way of getting her out of there. All you have to do is move some boxes out to create the quickest way out for Lara (1) - the door is again tight. When you get out, an alarm sounds and some goons will start to chase Lara. Unfortunately you have no weapons, so the only thing to do is to escape into the water.

Be careful not to be pulled into the giant fan (2), but you'll need to pass this obstacle to progress. Next thing to do is to climb inside the plane to retrieve your confiscated pistols (3). Before you can get to them, though, you need to switch off the engines (4), then jump and grab the wing above the right propeller (5 and 6). From here walk along the top of the plane and you'll fall through to the room where your trusty shooters have been stashed.

OFFSHORE RIG - THE DIVING PLATFORM

Some enemies you encounter on this level leave colour-coded passes to open doors. Obtaining the green pass is a little more difficult than the rest. It involves finding and crossing this big square room with water on the bottom and gantries close to the ceiling - without getting killed. Here's how to do it. If you look into the water below you, you'll notice two divers. Lara can get a lock on them without getting into the water. Once you dispose of the divers dive into the

water, swim to the nearest platform to the right (2) to get a secret (be careful, the henchmen will try to shoot you as soon as you're out of the water). Now swim to the top left corner of the room where you'll see a ladder (3). From here you can climb up to the gantries. Jump across to the other side of the room (4) where you'll see a passage (5). Leave it for now and head the other way (6) to get the green pass behind the glass (7) first. Now go back to the passage.

40 FATHOMS

In the middle of the ocean with no way of getting up to the surface? No problem. Swim to the left of the small yellow submersible, then forward until you see the remains of an old ship (1) (you might find lighting a flare useful at this point). There are two sharks in the water with you, but you can worry about them later, first you need to get some air. Follow the wrecked hull of the ship to the left until you see the anchor (2). Above it is the way inside. As soon as you get some air, the sharks come after you, so be ready with your harpoon gun - you should have enough harpoons to get rid of all of them. Proceed into the second underwater chamber and find an entrance to the third on your top left (3). The fourth chamber will have a switch on the bottom left corner which opens a hatch. From there you'll be able to get air again.

DIVING AREA

When you've killed the two dogs, and four of Bartoli's henchmen, here's what you need to do next. Jump to the platform in the middle of the room which contains the giant, moving hook (1). Jump from the edge and grab onto the side of the middle platform (2). Then you can climb up and you won't get hurt (3). Now you need to do a running jump onto the next platform (4), then grab it and clamber up it in the same way. Then do a running jump to the other side of the room.

40 FATHOMS - THE DOOR BEHIND THE FLAMES

Your timing needs to be perfect here, and you have to move fast. As you enter the long corridor you will see a switch to your left (1), it opens a door to a secret (3). You will have to run to the end of the corridor and turn left, and jump across the low beams to get to it (2).

Now you're in the water with the sharks again! So long as you change direction while you're swimming, you'll be all right. After you get the secret, go back to the long corridor and turn left. This bit is quite dark, so you might need to light a flare to see the ladder. Climb it and you're inside a room with a switch (4).

The switch opens another room at the far right of the map, where you find another switch (5). This one will extinguish the first two flames so you can get to the switch (6). Now you have to hurry as the flames reappear in a short while. This switch will open the room next to the secret door. The switch in that room (7) will extinguish the other two flames, but only for a short while.

From here, you switch the first two flames off (8) again, then head straight to the final door (8). Save the game before you do this bit, because you might need to practise it first.

SNOWMOBILE JUMPING

The snowmobile is a real pain to get to. More likely than not, you'll end up in the water after desperately trying to get across the ravine that stands in your way (1).

The give-away in this case is the medical pack nicely resting on a rock just above the water (2). Get to it and from there all you need to do is go up (3). You will end up in front of the snowmobile and some very tough enemies. Again that medical pack was a warning of certain injury just around the corner.

Once you're on the snowmobile, you'll very soon come to a dead end (4) so you have to dismount and remove the two big bricks blocking your way (5). Then you just have to rev up and jump the snowmobile through the clearing (you can do the rest of the journey on foot, but the snowmobile does make it more fun). The only way to do this is to drive carefully around the room (6) and get enough speed to carry you over (7).

WE'LL REVEAL A LOT MORE

Like the first game Tomb Raider 2 is massive. So much so, that you may need a bit more help. We didn't want to give everything away in just one issue, 'cos we know how annoying that can be. This guide was intended to get you on your way. Should you have any more difficulties along the journey, then please write to us, telling us your problems, and we'll bring you another guide soon.

SONIC R

SUPERSONIC RACE GUIDE

Find the hidden features and Chaos Emeralds with our full-on guide to the hyper-hedgehog's racer!

GOLD CUPS

You get a Gold Cup next to the name of a course once you've got first place on it. Get cups on the first four courses to open up the final Radiant Emerald course and be able to play as Dr Ivo Robotnik.

GOLD COINS

There are five Gold Coins on each of the first four courses. If you can collect all five then go on to finish in first, second or third in a race you'll get challenged by a secret character. If you beat the secret character in a three-lap race without any of the usual power-ups (all the shortcuts are open from the start in these races) you'll be able to play as them from then on. Once you've collected a hidden character, they'll often replace their original counterpart in future Gold Coin races, making it harder than usual. Make sure you do the course you find hardest first, and the easiest one last.

CHAOS EMERALDS

There is one Chaos Emerald on the first course, and two on each of the next three. You need to collect an Emerald during a race, then go on to come in first place in order to keep it. Collect all seven to gain access to Super Sonic and get different music on the extra track. It's possible to collect both Emeralds in one race and keep them if you're good enough.

RESORT ISLAND

A simple enough course made fairly tough by the water surrounding the whole thing. Using either the flying characters or Sonic's double-jumps it's possible to shortcut across most of the water, which can save large amounts of time.

COIN 1 Run up the grey rock face at the first bend, then go onto the roof over the track. Don't turn too early or you'll fall through the scenery.

COIN 2 After the corner with the rock roof (with Coin 1 on it) turn off to the left and run through the cave behind the waterfall. The coin is at the end.

COIN 3 Following the path after Coin 2 you reach a door requiring 20 rings to open. Go through it and the coin is sitting in the middle of the cave.

COIN 4 At the tightest corner on the course, run straight off and onto the series of islands in the water. The coin is on the island at the far left.

COIN 5 After the split-up you reach a spool in the course. Take the left route up the hill and the coin is in the middle of the track.

PREPARE TO CHALLENGE... MECHA-SONIC!

Robotnik's evil metallic version of our hero isn't all that tough to beat. He collects lots of rings and always uses them on the speed-up at the end of the track to whizz around the last few bends. Master the shortcut through the trees before the final loop as this saves lots of time, and use Sonic to double jump across the water for the first two main corners. Mecha-Sonic is strangely one of the toughest hidden characters to beat, so don't worry if it takes a few goes.

BLUE CHAOS EMERALD

The first Emerald in the game can be found in the second locked cave. You need 50 rings to open the door, but if you avoid the speed-up toward the end of the lap you should be able to save enough up for the second time around.

RADICAL CITY

It's not possible to fall off the track in Radical City in most places, but if you make a mistake you could easily end up getting lost in the middle section. The coins and Emeralds are mostly out of the way of the race, so learning their locations is quite important.

COIN 1 Follow the course around from the start and as the track splits off to the left, drop down to the lower level (not the left-hand piece of track). The coin is right against the wall behind you. If you do this on the second or third lap, you should have enough rings to be able to run through the 20 ring door to get the Green Emerald straight after.

COIN 2 From the first split in the track, take the left-hand road, making sure that you don't fall off the track towards Coin 1. Keep to the main path all the way without taking any of the shortcuts and you'll come to the Gold Coin in the middle of the track as you go under a flyover.

COIN 3 Take the left-hand route from the first split in the track and follow it around until you see a barrier on the edge of a right-hand bend. Jump through the barrier and you'll land on a ledge with lots of rings and a Gold Coin. If you fall off the far side of the ledge, you can turn around and jump back when playing as Sonic.

COIN 4 If you follow the main track all the way around from the start you'll find a barrier on the right of the track. Jump through it and you'll fall down onto a giant picture of Sonic which is covered in bumpers. In the middle is a Gold Coin. Run through to the far side of the Sonic picture and you'll come out by the giant fruit machine.

COIN 5 Not long before the end of the course is a 20 ring door on the right of the track. Get enough rings to open it and there's a Gold Coin waiting right on the other side of it. Slow down through the door as you don't want to miss it. The track is shorter this way but you don't get to use the speed-up on the main part of the course.

PREPARE TO CHALLENGE... MECHA-TAILS!

Mecha-Tails is probably the worst character in the game, if you've managed to get all five Gold Coins you shouldn't have any trouble at all beating him in the one-on-one race. Remember that the ring doors are open and it'll be a doddie, even though you'll never want to race as Mecha-Tails himself.

GREEN CHAOS EMERALD

At the first split in the track, drop off to the left as with Coin 1 and run straight ahead to reach a 20 ring door. Open it to find the Green Chaos Emerald. Instead of carrying on, turning left and rejoining the track back near the start, it's quicker to turn around and go back out through the ring door. Turn left from here to get back on the track at a later point.

PINK CHAOS EMERALD

This is easy enough as long as you've got enough rings. Following the main track around, you'll reach a 50 ring door on the left before you reach the section with the giant fruit machine. Go through it and the Emerald is in the middle of the track just after the bend.

REGAL RUIN

One of the more confusing tracks because of the large number of steps and water sections. It takes a few goes to get used to the layout of the course, but whatever way you go you'll need to make lots of sharp turns. Also, you NEED a character who can jump.

COIN 1 From the start of the course, run up the ramp to the left of the first straight. Simply follow the line of rings and collect the Gold Coin at the top. From here you need to jump off to the right unless you have over 50 rings to open the door.

COIN 2 If you take the normal route from the start line and turn right at the first wall, you'll end up facing a medium-sized hill. Run to the top of the hill for a Gold Coin.

COIN 3 After the first few bends you'll reach a steep ramp which leads up to the main section of the course. Instead of going up it, run to the left and jump on the spring right next to it. The Gold Coin is in the air above the spring.

REGAL RUIN CONTINUED OVERLEAF ▶

REGAL RUN CONTINUED

COIN 1 After the down slope where you turn back and forwards on yourself, turn around and go down the hidden passage-way next to the barriers. At the end, turn right up the slope to find a Gold Coin.

COIN 2 Once you've completed the backwards/ forwards slope, run down the main route. After travelling under the bridge, turn left and go up the ramp to get the Coin.

PREPARE TO CHALLENGE... MECHA-ROBOTNIKI

Make sure you learn the course well before taking on the course. Mecha-Robotnik. He knows the shortcuts and uses them all the time. If you make more than two mistakes you're likely to be beaten.

YELLOW CHAOS EMERALD

From the start/finish line, go up the left-hand path as if you were collecting Coin 1. Run past it and open the 50 ring door to find a small pyramid containing the Emerald. Be careful not to fall off the ledge and you can jump along the pillars to save more time when rejoining the main course.

BROWN CHAOS EMERALD

Following the major route through the course, go through the 20 ring door instead of turning right along the backwards/ forwards slope. Jump up the steps, collect the Emerald, then run down the side and around the loops to rejoin the track.

REACTIVE FACTORY

Another track which can be extremely confusing when you don't know it very well. There are lots of routes through the course, many of which are pretty much useless, so stick to the ones that you know work.

COIN 1 From the start of the race, head straight off the first corner through the cones. Turn right at the end of the path and jump or float (depending on your choice of character) over the water onto the top of the submarine to get the Coin.

COIN 2 As the first straight goes to the right, look for a small barrier with arrows on it at the right edge of the track. Turn off here and jump or float over the water to find a Gold Coin. Go round the back of the pillar and inside to get back onto the track.

COIN 3 Just as you reach the start of the main flyover (with the magnetic section at the top) turn off to the right. You really need to slow down to make the turning, but there's a Gold Coin down the path. From here you can quite easily go to Coin 4.

COIN 4 After collecting Coin 3, run along to the end of the passage to the main track. As you get to the open area, skid around to the left and you should be able to see the Gold Coin by a big pillar. Get the Coin and rings and carry on around the pillar to save time.

COIN 5 Take the main route around the course (don't turn right to collect Coin 3) so that you go over the big flyover that leads to the end. Just after the section that magnetises you is a 20 ring door which leads to a small room with a Gold Coin in it.

PREPARE TO CHALLENGE... MECHA-KNUCKLES!

Mecha-Knuckles is a cool character to play as, but he's not as tough to beat as he may seem. If you take some of the shortcuts and don't make any big mistakes you should be able to stay ahead of him without too much trouble. Sonic is the best character for this course.

PINK CHAOS EMERALD

Immediately after the loop, and just before the big banked right-hand corner, you must turn sharply to the right. Go through the 50 ring door and the Pink Emerald will be fired out of the pipe so that it lands just in front of you.

WHITE CHAOS EMERALD

After the big banked right-hander, turn left so that you run off the track next to the speed-up road. Go along next to the water and go through the 50 ring door from the left side. The White Emerald will be fired out of the yellow submarine so that it lands on the front of it. Jump up and collect it, then run over the top to rejoin the track.

DIDDY KONG RACING

GUIDE

Rare's 'proper' *Mario Kart* game will no doubt be filling many a stocking over the festive season, and with this CVG Guide To *DKR* Mastery you'll be able wipe the floor with your least favourite cousin when he turns up to challenge you on Boxing Day.

THOSE EXTRA BALLOONS

As well as getting balloons for finishing the levels, there are a couple hidden in the main map screen as well. If you find yourself short by a single number, have a scout around outside for the four extra ones that you need. The most hidden ones are shown here, and the other two are really obvious so you don't need guidance for those. Now, let us begin....

GENERAL TIPS

There are a few important little pointers that could make the difference between first and second place.

SPEED BOOSTS

You don't get the full effect from a boost if you have your finger on the accelerator when you activate it. You can tell whether you've got maximum acceleration by the colour of the smoke that spews forth from the back of your vehicle. Balloon-enhanced boosts give a blue plume and ground based kicks are green when they are used at full power. These tricks are best for use against the bosses, as they give you that extra little boost needed to cross the finish line first.

SKIDDING

The normal skid may not be sharp enough for you to take corners at the tightest angles, so using the brake mid-skid is a useful way of cutting down recovery times. Whichever way you're sliding, the back end of the vehicle will swing out in that direction while the front locks up. Holding the brake for too long will cause you to spin out, and lose you valuable time. Using the brake like this can be used to hit speedboosts on the track, and reach tricky silver coins.

STORING POWER UPS

Keeping hold of certain power-ups is a good tactic to bear in mind, particularly in boss encounters. When you come to face the Octopus, try and pick up three red balloons so that you have ten rockets. Keep up with him until halfway through the final lap then unload them all in one go. You'll reduce him to a virtual standstill and can overtake on the line. If you're second in a normal race, having a homing missile is always a good weapon, but only if you can see the leader to shoot at!

MIRROR MIRROR!

Yes, *Diddy Kong* does have the obligatory Mirror mode, meaning that once the game is completed you can do it all over again to find yet more hidden delights. Finish every every level, recover all of the pieces of ammu all the gold trc and beat Wisp twice. Now, when you select a character, **Advent** 2 appears as option and the is the Mirror mode.

⊕ A bit of a spoiler here, but if you're using this guide, the entire game is going to be ruined! This picture shows the end sequence...or does it?

⊕ And just when you thought you'd finished everything, old Wispig comes along and does a runner again! Another world to do yet!

SHORTCUTS TO VICTORY!

DINO DOMAIN: FOSSIL CANYON

A simple one, this, but it shaves off a nasty little corner. After hitting the first couple of zippers, keep going straight, towards the pool of water. Another booster appears in front of you, release the accelerator and let it power you over.

SHERBERT ISLAND: WHALE BAY

This one can really shoot you up the leaderboard once you've got the hang of it. After the first bend, use the boost and head straight for the pirate ship. A whale will rise, and you can ride up it's back. Hit the R shoulder button to leap onto the boat and jump off to the left!

SNOWFLAKE MOUNTAIN: WALRUS COVE

Perhaps the most useful shortcut in the Snowflake Mountain levels. After two sharp corners near the end of the lap, you'll hit three small jumps over some ice. Then take the left-hand path, release the accelerator as you hit the boost and zip straight into first place!

DRAGON FOREST: BOULDER CANYON

As well as being home to the key, this level also has a handy shortcut which leads to a hidden coin in the Silver Coin Challenge. Get to the split in the water and take the left hand path. Not only is it shorter, but it brings you out at a point further along the right path.

FUTURE FUN LAND: SPACEDUST ALLEY

After avoiding the spaceship's fire you should be out in the open. Fly off the edge and head towards the boost that's visible in the distance. Fly through it, keeping in line with the passage behind it, and you'll whizz through, picking up a coin (if applicable) on the way.

ACCESSING THE TT CHALLENGE

The TT Challenge is the first real 'secret' part of the game you find. Every world you have to visit has one key located inside it which opens up that world's TT Challenge door. Win the four player game inside these levels

and you're awarded one quarter of the TT amulet. Once you have a key, you can simply exit the level and the game still registers you as having collected it. Here are the locations of each:

DINO DOMAIN: ANCIENT LAKE

The programmers were obviously being kind as this is the easiest of the keys to find. As you approach the first bend, the key is sitting on a small ledge in front of you. Simply drive up and collect it. Pah!

SNOWFLAKE MOUNTAIN: SNOWBALL VALLEY

At the very start of the stage, don't bother going forward. Instead turn left straight away and you should see a small passageway. Drive down there and the key is set back into the ice.

SHERBERT ISLAND: CRESCENT ISLAND

Again, this key is near the start of the level. From the start, take the left hand split and drive into the water. Keep going further out and you should see it resting inside a small cave in one of the cliff edges.

DRAGON FOREST: BOULDER CANYON

Make sure you have a triple speed boost saved and drive up to the bell. Drive past it, the turn around and hit it so the drawbridge raises. Use the boost to shoot over the bridge and onto the key.

TROPHY CHALLENGE

You should find this sub-game easy, seeing as you have already completed the levels twice in order to open the race up. All you do is race each track within a world once and you're given points depending on where you finish. Finish at the top of the table and you're given a gold trophy. Get all four and you can be whisked off to space!

SPACE! THE FINAL FRONTIER!

The secret Future Fun Land levels! These are the final challenges to test your Diddy Kong Racing skills to the limit. Each of these huge stages are immensely tough, and as for the final boss - see our box on Wizzpig for the best ways of defeating him. By now you should be ready for any tricks the game will throw at you, so there isn't much useful advice we can give for these stages except to say, 'Practise'!

BUT THAT'S NOT ALL!

Once you have obtained all four of the main Amulet pieces and the four TT Amulet sections AND opened the mouth to race Wizzpig the first time, you can gain access to the first secret character, Drumstik. Drive down to the water's edge and look for the frogs. Look carefully and you'll see one of them now has a little tuft of rooster hair on top of his head. If you run over this frog (easier said than done), Drumstik is released and becomes available for racing. And there's still more! TT is also a selectable character, but accessing him is a hefty task. You have to race every single track in Time Trial mode and beat TT's time for the course. Do that and reset the game, and TT should now be a playable racer. Cool!

See the tuft of hair? Run the frog over to get Drumstik! Cool!

MAGIC CODES

MAGIC CODES LIST																	
BOSSIES & BROTHERS SPEED	077	TO LET YOU BANGALAZ	0A1	ALL BALLOONS ARE RED	077	ALL BALLOONS ARE GREEN	077	ALL BALLOONS ARE BLUE	0A1	ALL BALLOONS ARE YELLOW	099	ALL BALLOONS ARE RAINBOW	099	FROM OFF SCREEN	0A1	THE GREAT ADVENTURE	0A1

AWESOME HIDDEN PASS CODES!

Just to top it all off, we have some cool codes for you to enter. Go to the option screen and into the Magic Codes section. Now enter as many of these as you want to really bust open Diddy Kong. And if you've got Drumstik by now (the normal way), the option to turn him on and off should already be open.

HA-HA, THIS-A-WAY!*

And so onto the boss. The first Wizzpig is on foot, but jumps over the water. And as with all of the bosses, the key to defeating him lies in collecting all the power-ups. The first time you and the 'Pig meet, there are no balloons, but loads of zippers and you have to touch every one of them. Remember to take your finger off the accelerator for max boost!

The second time your paths cross thines are a lot tougher. This time, you have to collect nearly all of the power ups. Speed boosts are especially handy, but the most important is the shield just before his throne room. Activate it as you go in, and you'll dodge all of the laser shots filling the room. It's tough, but after a couple of attempts, and once you've worked out the locations of all the bonuses and boosts, you'll have him licked in no time!

*This was the theme tune for Wizbit, one of Steve's favourite TV show when he was a nipper. And Wizbit sounds like Wizzpig... So, er, shut up, right?

BYEBEALLOONS	Weapons are disabled
TOXICOFFENDER	All balloons are green
BODYARMOR	All balloons are yellow
OPPOSITEATTRACT	All balloons are rainbow
BOMBSAWAY	All balloons are red

SNK HYPER DRIVE – ENGAGE!

Samurai Shodown 64 is almost complete and proved highly popular at the JAMMA show (it rated as fourth most played game there in last month's chart). To find out the story of this incredible game and the creation of the Hyper NeoGeo 64 hardware that runs it, we spoke to those responsible at SNK's development centre.

CVG: When did development start on the Hyper NeoGeo 64?
SNK: The first conception stage began in the spring of 1994.

CVG: Was all the development done in Japan?
SNK: We started off looking at foreign technology but ultimately all the development was done in Japan.

CVG: How big is the hardware development team?
SNK: There were about 50 people within SNK involved with system planning and design but if you include all the staff of the other companies involved in the project it was a large team.

CVG: Before you started development what kind of hardware research did you do?
SNK: This time, before the development we didn't research the 64-bit system, rather we researched the next generation NeoGeo so we didn't specifically do any research on the 64-bit hardware.

CVG: With regards to hardware features, were you influenced by Sega's Model 3 or Capcom's CP-System III?
SNK: Naturally, we were influenced.

CVG: What special hardware features did you know you wanted to include when the hardware was in its initial design stages?
SNK: We really wanted to make the Hyper NeoGeo 64 as versatile as possible by exchanging the special NeoGeo software cassette.

CVG: Did the software team ask you to specifically include any special hardware features?
SNK: The game development staff did participate in the development as did some third party game software developers.

CVG: How long did the design and development of the hardware take?
SNK: It's difficult to separate the design and development but together they took about 3 years.

CVG: How does the Hyper NeoGeo 64 compare to your competitors' hardware? Is it better, or just different?
SNK: Since our development concept is different

from theirs it's just not possible to make a simple comparison of the different hardware capabilities.

CVG: Does the Hyper NeoGeo 64 have any unique features not available on the other hardware?
SNK: It excels in being able to blend 2D and 3D together.

CVG: When designing the Hyper NeoGeo 64, what emphasis did you put on the hardware's 3D capabilities over its 2D capabilities? Is it capable of producing great 2D games as well?

SNK: We used all we've learned about 2D to date, so it can handle practically any known 2D genre. In addition, with its 3D capabilities, communication and special I/O features, etc, it should be able to handle new kinds of genres that have never been seen before.

CVG: Is the Hyper NeoGeo 64 upgradable?
SNK: We attach great importance to the expandability of the present Hyper NeoGeo 64 system.

CVG: Is the sound hardware separate or is it part of the Hyper NeoGeo 64?
SNK: The sound is one section on the main Hyper NeoGeo 64 board.

CVG: Has the sound system been improved to match the better graphics?
SNK: Comparing the Hyper NeoGeo 64 to the NeoGeo, we've paid a lot of attention to the quality of the sound and we've been able to offer a better sound quality than ever before.

CVG: Do you have a message for all the arcade gamers who are looking forward to playing with your Hyper NeoGeo 64?
SNK: For all of us who are involved in the amusement industry, we think that the development of the Hyper NeoGeo 64 will make it possible to widen our contact with the players. Because of this development we will be able to offer more interesting and richly expressive entertainment to them all. Please look forward to Hyper NeoGeo 64!

4 *Samurai Shodown 64's* graphics are fantastic, but still keep to the style of the original games.

4 Those of you who are bursting to play *Samurai Shodown 64* should go to the King Of Fighters '97 tournament at the Namco Wonderpark in London on 22nd December. SNK will be showing off the Hyper NeoGeo 64 for the first time ever!

SAMURAI SHODOWN 64

SNK / Hyper NEO GEO 64 / Nearly Complete
© SNK LTD.1997 ALL RIGHTS RESERVED
JANIMA SHOW VERSION. SUBJECT TO
CHANGE AT ANY TIME.

With revolutionary game play features such as the 360-degree battlefield, free-dash and multiple battle zones along with stunning 3D graphics and 2D animation this series has reached a new level of sophistication.

CVG: Why did you choose *Samurai Shodown 64* as your first Hyper NeoGeo 64 game? Did you ever consider *KoF* or *Real Bout* as well?
SNK: We did think about *KoF* and *Real Bout* as well, but we chose *SS64* because we believe its widely appreciated originality will have the most impact.

CVG: When did development start?
SNK: The development groundwork started over a year ago but full time development began from around November of last year.

CVG: How big is the software development team?

SNK: Depending on the stage of development the number of people working on the development is different but on average there are about 20 people.

CVG: With regards to game features, were you influenced by Sega's *Virtua Fighter 3*, Namco's *Tekken 3* or Konami's *Fighting Wu Shu*?
SNK: There wasn't any game in particular that we had in mind but from the point of friendly rivalry then maybe the *Tekken* series.

CVG: Were there any special features you knew you definitely wanted to include when you started the game design?
SNK: We wanted to capture the game character of *Samurai Shodown*.

CVG: Besides being a 3D version, what are the greatest differences between *Samurai Shodown 64* and previous versions of *Samurai Shodown*?
SNK: We wanted to evolve the combination attack even further beyond the typical standardised element that it's become in current 3D fighting games. With simplicity being the key, we are going to introduce a newly conceived system where it is possible to change your offense and defence during the combination. Another easy-to-understand feature is that, in order for the players to enjoy the real taste of a fight in the 3D environment, we've added a special button for the 'FREE DASH' movement. With this you can now run around and chase or be chased within the battle area. This non-combat strategy nature to the game is an important element which will add a wider variety of tactics for you to use during the fight.

CVG: The game appears to allow you to move about more and interact with the scenery. Were you influenced by Square's *Bushido Blade*?
SNK: There were areas that we used as reference.

CVG: Because of the success of Sega's *Virtua Fighter 3* and Namco's *Tekken 3* were you

under a lot of pressure to produce an even better fighting game?
SNK: We weren't really under pressure because of the success of other fighting games, rather we felt pressure because this is SNK's first shot at a fighting game on the new Hyper NeoGeo 64 board.

CVG: Were the characters' movements created using motion capture?
SNK: Yes, they were.

CVG: What percentage of the Hyper NeoGeo 64's true power potential does *Samurai Shodown 64* use?
SNK: I think it uses about 60 to 70%.

CVG: With regard to creating a 3D version of *Samurai Shodown*, what has been the greatest challenge for you?
SNK: The main point is that we have to create 3D versions of characters that have already been fully designed.

CVG: Is it difficult to maintain the character's image and appeal when you change the character from a sprite to a set of polygons?
SNK: This slightly overlaps with the previous question but trying to represent a 2D character depicted by a fine and elaborate design with a limited number of polygons is a very difficult achievement.

CVG: Can you tell us about any interesting features in *Samurai Shodown 64* that aren't in any other fighting game?
SNK: I think that as a 3D fighting game that uses weapons, a major feature of *SS64* is that the area of fighting tactics have been represented perfectly. As mentioned earlier, *SS64* is not simply another 2D game that's been converted to 3D. With regard to the method of representing the 2D sections appropriately I positively believe that the Hyper NeoGeo 64 has superior capabilities. It has the image of being the right board for the right job and we've used it represent everything in just the right way.

ROAD'S EDGE

SNK / Hyper NEO GEO 64 / Complete
© SNK LTD.1997 ALL RIGHTS RESERVED
The second Neo Geo 64 launch game, *Road's Edge* takes you racing around the most challenging roads of world, right across America, Asia and Europe, pitting you against a rich variety of driving hazards. With a force-feedback steering wheel you can experience the true sensation of RV (Recreation Vehicle) driving as you sling it through sharp curves while being jolted by the bumpy roads.

🚗 You get to race Land Rovers around snowy mountain tracks in *Road's Edge*. Cool!

🚗 *Road's Edge* has been tested in the London Namco Wonderpark recently.

We would like to say thank you to the Hyper NeoGeo 64 development staff for taking the time to answer our questions. Thank you.

HYPER NEOGEO 64 - SNK REVEAL ALL!

ARCADE

JAMMA-HOT ARCADE GAMES OF 1998

Look no further for some of the hottest games you'll see in our arcades over the coming year, as revealed at the Tokyo JAMMA '97 show. Last month we revealed the show's 10 most played games, as polled by Japan's top arcade magazine, GAMEST. This month, we look at the others hot machines that were present. Games that were equally as monumental - as our opener, *Ehrgeiz*, demonstrates...

EHRGEIZ

NAMCO/SQUARE/DREAM FACTORY / System 12 / 15% complete
© 1997 SQUARE/DREAM FACTORY ALL RIGHTS RESERVED
JAMMA SHOW VERSION. SUBJECT TO CHANGE AT ANY TIME.

Famous for *Tobal No.1* and *Tobal 2* on the PlayStation, Dream Factory have now turned their attention to the arcades for one of the most innovative fighting games ever seen. Members of Dream Factory's development team originally worked on *Tekken* and *Virtua Fighter*, so they're no strangers to arcade fighting games. The version of *Ehrgeiz* on show at JAMMA was only 15% complete and was only just playable but the public reaction was nevertheless very favourable.

Too many fighting games are big for a while but become tedious once they've been mastered. For this reason, Dream Factory want to avoid making *Ehrgeiz*'s gameplay dependent on combos and instead let the player interact with their surroundings. By letting you jump onto objects, walk along the perimeter fences and use items in the arena, the game lets you be more creative in battle. Also, a fire-ball shooting element lets the characters fight at long-range, making use of the whole arena instead of being limited to face-to-face fighting.

As work progresses on *Ehrgeiz*, Dream Factory will be using the feedback they were getting from JAMMA to improve the game. In fact, they are already redesigning all the stages and background scenes, and at the moment they are concentrating on adding new characters. The version at the show only had 3 playable characters, Rio, Godhand and Naseem. Although they were very similar at that time, Dream Factory have stated that they will make them more individual in the final version with a greater diversity of attacks and special abilities. Look out for something amazing coming this way soon!

4 Ehrgeiz has some really cool-looking characters. As you can tell, the guy on the right looks a bit like Jin Kazama from *Tekken 3*.

4 You can run anywhere you want in the arenas, even jumping on the railings and scenery!

4 The movement of the characters is very reminiscent of *Tobal 2*. It's really amazing to look at.

WINTER HEAT

AM 3 / ST-V / 80% complete
© SEGA ENTERPRISES, LTD. 1997

All your favourite Decathlete (*Athlete Kings*) characters are here including two new rivals from Britain and Norway. Each character has their own special abilities depending on what type of sportsman they are ('Skate', 'All Round', 'Alpine' or 'Nordic'). Your chosen character must compete for two gruelling days in eight winter sports. On Day One, you face the relatively easy Speed Skiing, Ski Jump, Downhill and Short Track Skating. On Day Two, you'll come up against the much harder Slalom, Bobsled, Speed Skating and Cross-country skiing. Gorgeous 3D CG scenes and dramatic camera angles capture all the tension of each sporting event.

4 The Saturn version of *Winter Heat* will be completely identical.

SEGA WATER SKI

AM 1 / Model 2 / 100% complete
© SEGA ENTERPRISES, LTD. 1997

SEGA's latest 3D water sports simulation brings the water-skiing experience to your local arcade with four cool water-skiing dudes each with their own specific skills and water ski tricks to master! There are three courses. Beginner sets you near a beautiful South Pacific island where you can race with the dolphins. Intermediate is a little more challenging as you find yourself in a humid jungle area with hungry crocodiles. Finally, Advanced places you in a pleasure park full of various attractions. SEGA have made the controls simple enough so that anyone can play easily. The foot control pads can be moved left and right to control your direction and by lifting your heel you can jump as well.

4 *Sega Water Ski* looks a bit like *Top Skater* on water.

PSYCHIC FORCE 2012

TATTO / Taiko Wolf Board / 40% Complete
 © TATTO LTD. 1997 ALL RIGHTS RESERVED
 JAMMA SHOW VERSION. SUBJECT TO CHANGE AT ANY TIME.

TATTO surprised many people at the Jamma Show by showing a great looking test version of a 40% complete *Psychic Force 2012* on their all new Taiko Wolf Board. Although still early in development, it's already showing plenty of potential and there were large crowds gathered around it throughout the show. With incredible graphics, this is probably the only game that can truly show the true 3D power of any next generation hardware with its unique lighting system that allows you to freely fly around a true 360-degree combat arena. We've already seen some of the new game system features and we can tell you that you're going to be impressed with the considerably enhanced gameplay. Wait for our full game report coming soon!

Unfortunately, the pictures of *Psychic Force 2012* that Taito have released aren't very clear. We'll have better pictures soon.

MOTOCROSS GO!

NAMCO / System 23 / Still in Development
 © NAMCO LTD. 1997 ALL RIGHTS RESERVED
 JAMMA SHOW VERSION. SUBJECT TO CHANGE AT ANY TIME.

From the creators of the *Suzuka 8 Hours* series and *Cyber Racers* comes the full throttle racing experience of *Motocross Go!* By teaming up with Yamaha Motor Co. to simulate their latest offroad bikes Konami have designed the courses to maximize the fun of jumping with washboards, banked turns and even a giant flight of stairs to climb! Jumping is the key element in this game with more than 10 incredible daredevil tricks to perform as well. The cabinet bike produces realistic suspension in both the front and back wheels making it one of the most physically interactive games ever. NAMCO's new System 23 hardware displays incredible CG with dynamic Gouraud shading of translucent objects for amazing effects never seen before!

Most motocross games released so far have been rubbish. Thankfully *Motocross Go!* is really good fun. Some of the jumps you can do are truly amazing!

RACING JAM

KONAMI / Cobra Board / 30% complete

© KONAMI LTD. 1997
 JAMMA SHOW VERSION. SUBJECT TO CHANGE AT ANY TIME.

After the stunning debut of the super powerful Cobra board with *Fighting Wu-Shu*, Konami proved its versatility by unveiling the first incredible Cobra board racing game. Amazingly smooth animated cars race around unbelievably detailed courses. More than just beautiful graphics, the game comes with the ultimate cabinet, incorporating a huge dynamic screen, super sound system, force-feedback steering wheel, clutch pedal, handbrake and 5-speed stick-shift with reverse gear. The gameplay is equally realistic with 18 production models from famous car manufacturers, a wide variety of courses, 8 player link up and multiple car settings to play around with.

Although you can't really tell from these pictures, *Racing Jam* is one of the best-looking driving games ever. At times it looks like real life! Honest!

80% SNOWBOARDING

A snowboarding game from the team behind Wave Race 64, and you basically have the surprise new game from Nintendo. Already 80% complete and it showed the punters at the Space World show, but will it do the same over here? It features three tracks at present, which

REVENANT

Revenant is a new Fantasy RPG that promises visually stunning graphics, making it the most detailed Role Player to date. You are Locke, who belongs to a race of enhanced humans who have access to powers called 'Exiles'. Locke's home village

Continuing in the hugely successful line of Sim games, Bullfrog announce a conversion of their PC hit, *Theme Hospital*. As conversions go, this one is looking very good indeed, but the real challenge for the programmers is getting the controls and playability just right. The basic aim is simple. You are manager of a struggling hospital and you have to turn it around, using limited resources and loads of patience. Bizarre diseases come your way, like Hairytits, Bloaty Head and Kings Complex (the infected wear suede shoes and eat cheeseburgers like Elvis). It's all very tongue-in-cheek, and we should have a review in time for next month.

isn't a lot so that is something Nintendo must improve on. However, graphically speaking it is looking stunning. The shots pictured look a bit too good to be real, but even so, the few genuine grabs show off the game's potential. A two player mode is being built in and all the flashy tricks can be pulled off to earn you points. This could be a big one...

is destroyed and he is captured and sold into slavery. It's here that the game begins. Details are sparse, but we'll keep you posted.

COMMANDOS: BEHIND ENEMY LINES

Ⓢ A C&C beater maybe?

Commandos is the latest in a long line of C&C challengers. Here the gameplay is set in World War 2. You take control of allied commandos, who must complete successful missions against the German army. As you command only a small complement of men, you'll have to be a master strategist to get your men through the missions alive. Keep an eye on terrain, and the enemies movement, then launch your attacks. Each of your commandos have different skills that you'll have to make full use of. The computer AI is being developed to a very high standard, so the enemy will react differently to your actions every game. *Commandos* could be a serious contender for the C&C crown.

WARGAMES

Ⓢ These are all PlayStation shots.

Adapted from the film *Wargames*, this 3D battle simulation from MGM is starting to take shape. The game is apparently a huge step forward from *Command & Conquer* and could be the new war sim to which others are cloned. It retains a lot of links to the film, with Matthew Broderick's original character now employed by the government to prevent another *Wargames* scenario. Hacking is still an integral part also, as it allows players to gain cash, power ups and some vital clues along the way. The PC version will allow LAN and Internet play, with the PlayStation offering simultaneous two player split screen action. Both formats are due for release in April 1998.

WARIO LAND 2

Ⓢ A new enemy for Wario and a completely new game. Should be cool!

Not much in the way of info about this one, but good news for all Gameboy owners is that this is DEFINITELY being released over here by THE as part of their plan to once again boost the popularity of their pocket machine. Some people are claiming that it'll be the biggest Gameboy title of the year in Japan and when you consider that *Pocket Monster* also came out this year (which has sold more copies than FFVII), that's some prediction. As soon as we have more, you'll be the first to know.

THE FINAL FANTASY

It's called the Hardy Daytona bike in *Final Fantasy VII*, but CVG is the only games mag to have ridden the real thing – a pants-shredding, dandruff-loosening motor cycle called the Yamaha V-Max.

Cloud on the CVG version of The Real Thing – the awesome Hardy Daytona motorbike!

Someone in *Final Fantasy VII* director Yoshinori Kitase's team is obviously a speed freak – the V-Max is the clear source for Cloud's bike in the game with both machines boasting a 'see-me-and-weep' vee four liquid-cooled motor, distinctive air-guzzling intakes and urban street styling. The first time CVG takes you for a ride...

The game was designed in Japan, but Yamaha called on the Americans to deliver the concept of the V-Max. Bike industry observers say Yamaha in Japan was unlikely to have created such a overdose of form-over-function. For the V-Max became an instant legend, a big, bad, asphalt-chewing ass-whipping drag bike that had no aspiration at all to go around corners.

For a start, that distinctive engine says it all – oh sure, it might be stacked with four camshafts, 24 valves and four carburetors to shovel gas into the 1,198cc holes deep inside those black and polished casings – but ultimately its sole (soul?) purpose is to shorten a straight line from A to B (incidentally, the engine has now ended up in one of the most over the

top custom bikes ever produced, the Yamaha Royal Star). The telltale signs are shaft drive, not chain, a 1-o-n-g wheelbase of 2.3 metres and a sewer busting weight of 262kg.

Taking one of these on a race track is about as sensible as wearing trousers made from pasta.

So what's it like to ride?

Well, whap open the throttle and the bike hits 60mph in under three seconds. Keep it open and it shovels your frontal lobe into your throat as the bike tops out a few seconds later at 156mph.

This is a bike that begs for some US blacktop, not the roundabouts of Surbiton.

Throttle off too late as you rocket towards a bend and trouble strikes with a capital T. The soft suspension squats like a coward in a boxing ring and the raked out front-end and lardy rear tyre struggle to work out what the hell is going on. Nerves of steel are needed as are butts, elbows, knees and fingers of iron – falling off is the crock of poo at the end of the 138bhp rainbow.

The game costs £44.99, the V-Max a cool £9,359. Enjoy the game first as it costs less and hurts less. Then start saving for a bike licence and V-Max, and start ploughing up the planet!
