# CVG: Born To Play

Original image: Wellcome Photo Library

What were you doing 20 years ago? Cutting your gaming teeth on Space Invaders on the Atari VCS? Or were you yet to sample the digital delights of a videogame on account of you not actually having been born by then?

Whatever, one thing's for sure now: you love games - that's why you buy CVG. And that's why we're the longest-running games mag in the world. Yep, you loyal lot have stuck by us during the good times (Super Nintendo battling it out with the Mega Drive), and the bad (the 3DO, 32X, Atari Jaguar, and other console catastrophes).

Things sure have changed over the past 20 years. CVG has gone through countless facelifts, we've featured more than 10,000 games and our team of dedicated gamers have sported some of the worst haircuts ever. But some things have stayed the same for all that time: CVG's honest reviews, the hottest info on the biggest games and videogame knowledge that spans two decades. No other mag can guarantee you this level of dedication to videogames, so if you want to know what's going to be making your thumbs bleed for the next 20 years, you know where to come.

See you in 2021...

## PS2 Drops In Price

### SONY'S MACHINE SLASHED TO £199

At first it was a whisper, then it was granted 'rumour' status, and then the official announcement arrived - PS2 is coming down in price to £199. Indeed, by the time you read this, it will have been tagged at less than £200 for almost a month.

This represents a huge slash in price for the machine. At the time of writing, a machine by itself would have cost £269.99, or £299.98 for the GT3 bundle.

In a press statement, Sony said: "Significant advances in manufacturing have produced increased efficiencies, and a brand new production plant has become operational in Japan, creating further economies of scale. These factors combined mean substantial savings can be passed straight to PS2 users."

The move could also secure Sony a massive grip on the console market ahead of Xbox and GameCube. Factor in a games line-up with more pull than a black hole and you have an irresistible home entertainment package. The fact that punters can now get the hardware (which, unlike GameCube and Xbox, also plays DVDs out of the box) for less than £200 should see Sony storming ahead in the console war. Especially as it also plans to roll out PSone Christmas bundle offers.

### THE PACKAGE...

For £199 you get the standard PS2 package, which is the machine, one pad and all the cables you need to get it up and running. Extra pads will continue to cost around £20 for an official one, while memory cards will still kick your wallet to the tune of about £28. New game releases will stay around the £40 mark for the time being.

Even though, on the face of it, getting a console, an extra pad, a memory card and a game is still going to set you back more than £280, don't despair just yet. Most shops will also have bundle deals that should offer pretty good savings.

### MEANWHILE...

The US release dates for both Xbox and GameCube are approaching fast - and are thrillingly close together.

Nintendo has set the date of November 18 for the launch of its machine, but Microsoft has had to postpone its November 8 date to November 15 thanks to minor production problems. The slippage means America gets Xbox and GameCube within three days of each other! Who'd be an assistant at Electronics Boutique there, eh?

In the meantime, you'll have to wait until March for the UK launch of GameCube, while a date has yet to be set for the Xbox. Dammit!

## THQ SIGNS BROCOLLI SPEARS

## Get The Britneys In

In life you're likely to need a number of licences: driving, marriage, fishing, dog and TV spring to mind. But no matter how licence-hungry you get, you will never be as keen on licences as games companies are. Boy, do they like a licence.

And the latest to snag itself a big, juicy licence is THQ, which has signed none other than pop princess Britney Spears for the next four years. It may be a Britney Spears licence in name, but in reality it's a licence to print money, since the lads at THQ can spread the bubbly-boy-magnet

across PS2, PC and GBA for almost half a decade. That could be anything like a dozen Britney games incoming. Providing, of

Her games will score highly...

course, that she doesn't fall out of public favour in a manner similar to, say, The Spice Girls, who couldn't snaffle a poo licence

...in the vain hope she will kiss us

these days, let alone a lucrative number from a big games company. That, people, is the way of the pop (and game) world.

And if you're wondering why we have no details about the games themselves, that's because there's none. What we do have is this gushing quote from THQ's Jeff Lapin, who says, "Since the release of her Baby One More Time album, Britney Spears has become a pop culture icon whose talent and style are coveted across the globe."

★ Really? Nothing gets past him, does it?

## Pick Me!

## MAKE YOUR OWN POP GROUP

We've had city sims, football management sims, theme park sims. We've even had plain old The Sims. Now we've got a pop group sim.

Popstar Maker is a 'pop group management-sim meets Music 2000' kind of affair and it sounds a right laugh. Imagine ITV's Nasty Nigel-starring Popstars, where you get to pick the band, design their image and record their single yourself. Just as with other sim-style games,

You'll get to create your own pop group. Can't be any worse than Hear'Say

A simple-looking Music 2000-style song maker lets you create the songs

Dance routines are vital, so your group have something to do when 'live'

You get to do everything right down to designing the CD cover

you'll have to bide your time and wait to see how your prodos go. Chart success means grooming them for their first live performance and after that, who knows? Bargain bin nothingness or world domination is up to your management skills. All on PSone as well. It just refuses to lie down and die.

LOOKS SO GOOD IT'S UNREAL

# Don't Shoot, Check Out The Visuals

If your jaw breaks when hitting the floor, we accept no responsibility. Blame Digital Extremes, the developer behind this stunning-looking Xbox blast-athon, *Unreal Championship*, due Spring 2002 in the US.

**GASP!** For a kick-off it looks absolutely fantastic. OK, so we've got used to seeing some pretty impressive-looking visuals banded around for Xbox games, but even by that standard, this looks a treat.

**THWOK!** Yes, this is a console, but get this - up to 32 players will be supported online. That's 32 players, kids.

**OC70-BOK!** As well as all the usual FPS action, air, land and sea vehicles will all be available to help you split righteous lead. And you'll do it all over 30 levels and with extra game modes added just for this port.

## IT'S UNREAL II - WE'VE GOT THE PICTORIAL PC PROOF

Every now and then a few new pictures of the stunning-looking Unreal II on PC leak out, and here's the latest batch of screens to gaze at, possibly even to touch.

The game's not out on PC until March 2002, but you can't blame us for getting excited when the images are of this quality. Check them, and check them good.

## Games To Rent

### TRY BEFORE YOU BUY - ONLINE

Predictions of how the Net will change gaming have been doing the rounds for years. Now it's taking a step in a new direction - broadband online rental.

Software To Go is a new service being trialled by BTopenworld, allowing users to 'rent' games from the Net for as long as a weekend, no CD required. Of course, you need to have broadband access and a pretty decent PC, but BTopenworld is also currently offering a half-price deal on ADSL installation. Our advice is to go to [www.btopenworld.com](http://www.btopenworld.com) for info on both Software To Go and the ADSL stuff.

# "Sony, Meet Sega. Play Nice"

## SEGA'S FIRST PS2 TITLES ON THE WAY

The first fruits of Sega's jaw-dropping partnership with PS2 are ready to roll – and originality is very much back on the menu. So let's have a look at 'em...

Initially planned for a DC only release, Headhunter is an action/adventure game set in a near-futuristic California where you wander around trying to find the crooks who killed your boss. Yeah, yeah, so it's another 'is it a game or is it a film' effort, but Headhunter is quality sticking out of its back pocket like a greasy comb. A script by X-Files writer, Phillip Lawrence, classy music by Richard Jacques and sound design by James Bond designer Dom Gibbs add up to a tasty package.

Ecco The Dolphin is a PS2 version of the old Mega Drive fave. Here's where stuff gets interesting, because traditionally the PlayStation doesn't do dolphins in much the same way as Mariah Carey doesn't do stairs. It

Wireframe trippiness

Jack Snake, er, Wade

prefers cars and fighting. You play as Ecco, a dolphin who lives in a virtual underwater world and can mess with time. Don't expect to tickle torque for hours. Expect a highly imaginative and great-to-look-at game. Check the shots.

Finally, Rez is a funny one. As you can see from the shots, we're talking wireframe graphics. Fly your evolving, pulsating craft through surreal landscapes blasting enemies to create thumping tunes. Hypnotic and certainly original. Was due for release on DC but never made it. We can't wait.

Ecco: expect more ambience and more world-saving New Agey antics

## SEGA'S OTHER PS2 TITLES IN THE OFFING

**VIRTUA FIGHTER 4:** This classic beat 'em up is likely to arrive in early 2002, making PlayStation 2 the place to be for fans of fisticuffs.

**SPACE CHANNEL 5:** No less than two versions of Sega's blinding dance 'em up are planned. We can't wait.

**F-355 CHALLENGE:** Only a working title, but the game is likely to involve a Ferrari 355. And a challenge.

Bullets cost less than anaesthetic

Ecco games are always tough

Rez – hypnotic and original

## XMAS DC PRICE CUT

# "To You Mate, A Ton"

Though it's currently lying on its deathbed with surgeons muttering, "There's nothing we can do for him," Sega's Dreamcast has some last words.

And they are: "I'm really, really cheap now. Buy me." Yes, by the time you read this, distributors Big Ben should have rolled out their Christmas DC bundle – a console, VMU and three games for just £100. And the games? Virtua Fighter 3tb, Jet Set Radio and Metropolis Street Racer – hardly to be sniffed at.

And despite the fact that by this time next year people will be saying, "Dream, what?", that's still a good deal in anyone's book.

## XBOX'S TRANSWORLD SCREENSHOTS

If there's one thing Xboxers can be sure of, it's that games on Microsoft's console are going to look the business.

Just get a goggle at these screenshots, all from two upcoming TransWorld games – TransWorld Surf, to be released just after the Xbox launch, and TransWorld Snowboarding, which is expected shortly after that.

Both games look great. That eagle's-eye shot of the pistes on TransWorld

Snowboarding, for example, had us buttoning up our coats and reaching for the thermostat – it looks that real. And if they can walk it like they talk it, then both games also promise meaty gaming goodness in every bite.

TransWorld Surf, for example, sees you taking to the high seas armed with just a pair of trunks and a board. You have to keep your karma meter high by doing tricks and interacting with other

sea users. And watch out if your karma falls too low, as you end up being vulnerable to shark attacks and risk being reduced to little more than bone marrow and shredded skin by the teeth of a Great White.

Clearly, TransWorld Snowboarding promises more of the same, though we doubt you get many sharks on snow-covered mountains. We'll keep you updated. In the meantime, feast your greedy eyes on these shots.

## It's Gr8 To SK8, Man

### PS2 GOES INLINE

Aggressive inline skating has become one of the world's fastest-growing participation sports, demanding high levels of fearless dedication and talent both at street and competition level. Now it's heading to PS2.

In addition to multiple world champions Cesar Mora and Fabiola daSilva, SK8 features the world's most influential 'street' skater, Jon Julio, plus a support cast of the cream of the world's street and competition skaters. Between them, these skaters manage to capture the full diversity of style, talent and sheer adrenaline-fuelled excitement that

No extreme sports title would be complete without suitably sick shreds

### SELLING POINTS

- 1 Officially licensed game starring world champs Cesar Mora and Fabiola daSilva.
- 2 Play as Mora, daSilva, Jon Julio or one of many other pro inline skaters.
- 3 In-depth character creator and editor so you can create your own skater and a skate park editor to create courses.
- 4 Huge variety of game courses.
- 5 Non-linear game progression.
- 6 Single and multiplayer game modes.

exists within the world of aggressive inline skating today.

SK8 is athletic, fast and exciting and allows the player to perform death-defying tricks in stunningly realised game environments, from street scenes and shopping malls to recreations of the world's most popular skateparks.

Jet Set Radio made inline skating games cool, but Xbox swiped the sequel. PS2 gets SK8 instead

## What the hell is this?

You won't get any prizes for getting it right, but you'll know that you are indeed the don of games. And maybe that you ought to get out a bit more. Clue: It's official.

# Terrorists Delay Games

Following the terrorist attacks in America and the possibility of military action in their wake, a host of game releases have been delayed and even withdrawn due to their sensitive nature.

One of the first to be taken off the shelves was Microsoft Flight Simulator for the PC, which Virgin pulled from its stores following newspaper reports that terrorists used the software to practise flying skills. Microsoft has since said it will remove the World Trade Center from the skyline in the forthcoming 2002 update.

Many more games have also been postponed. Twisted Metal Black for PS2, due for release this month, has been put back as it included a section where players had to shoot down an airliner, while Activision pulled Spider-Man 2 because skyscrapers in the game resembled the WTC. Similarly, Syphon Filter 3 on PSone has been temporarily shelved thanks to its anti-terrorist content, as has Dropship on PS2 and Tom Clancy's Rogue Spear: Black Thorn on PC. Even puzzle game Building Baku on PS2 has been

delayed due to its theme of demolishing buildings, while Command & Conquer: Red Alert 2 will undergo changes to its artwork which originally depicted flames around Manhattan.

Other games affected are City Crisis on PSone, which has been withdrawn completely due to some scenes in the game looking too much like real events. Other games undergoing changes prior to release include Metal Gear Solid 2 (set on a boat in New York) and Smuggler's Run 2 on PS2, much of which is set in Afghanistan.

## Star Wars: Starfighter for the Xbox

### SHARE THE WEALTH

Now anyone thinking of buying Xbox will get the chance to save Naboo from the Trade Federation too. Woo!

Xbox is going to need games like this

There's a good Star Wars game. Its name is Star Wars: Starfighter on PS2. And those planning on decorating the corner of their room with an Xbox will therefore be chuffed to hear that the very same game is being ported.

Expect super-hot graphics and similar gameplay to the PS2 version, with you flying one of three craft out of Star Wars: Episode I, protecting Naboo from the dastardly Trade Federation. One thing's certain: it'll be better than Super Bombad Racing.

# BOOM!

## NEWS SHORTS

### SHENMUE WOO!

We're reviewing Shenmue 2 in next month's issue, so whatever you do, don't miss it. It's the only sure-fire way you'll know whether Sega's super-sequel is as good as we're expecting it to be. But here's a little titbit for all you Easter egg hunters out there. Rumour has it that hidden on the Japanese version of the game is a bonus movie which apparently shows a 'Shenmue Saturn Version'. Why? Who knows.

### CANNED-VILLE

Sims fans were - "ahem" - 'sim'ply stunned at the shocking news that SimsVille (the much-anticipated Sim City meets The Sims game) has been canned by creators Maxis. The simple reason given by the Maxis boys is that the game did not match their own high standards and was not, in the words of one high-ranker "fun enough". But before you totally freak out and throw your PC out of an upstairs window in disgust, remember this - Sims: Hot Date touches down soon, and it's got all the left-over fun of SimsVille in it, plus a lot more fun besides. So that's a lot of fun to be had, then.

### LIFE'S A BEACH

Due to touch down in the summer of 2002, Beach Life for the PC is (intriguingly enough) a holiday sim. Players have to create resorts with hotels, bars, clubs and whatnot, while simultaneously keeping watch for outbreaks of food poisoning and holiday romances gone wrong. Sounds good? Yeah, we thought so, too.

### PILLOW TALK

Sherina Wong's Pillow Fight - now there's a damn good title for a game. In fact, if all games had titles as good as that, the world would be a much happier place, we reckon. And it's available on your mobile phone as part of a new package called MobileG.

Coming in a DVD style case, you get a scratch card so you can input a number on your mobile. Don't ask us how they do it, it's magic. Once you've done that, you get five mobile phone games on your mobile for a period of 30 days. They are: Sherina Wong's Pillow Fight, Formula Racer, Dime Bandit, Dollsaki! and Spy Master. MobileG is compatible with any WAP or GPRS phone on any network. We suggest you go to [www.mobileg.net](http://www.mobileg.net) for more info.

## CHAMP MAN TRIV

Football dunces look away now. This game is not for you. Oi! Look away! Championship Manager Quiz is basically that, and as you can tell from

Still, looks aren't everything, eh Ronaldo?

That's a football. Expect awesome visuals

the screens, it's not a great deal more. Due to land on PSone and PC in December, the game is packed with more than 11,000 football questions across a variety of different game modes. The most interesting-looking are the multiplayer mode of course, and of these the Pub Quiz mode is surely the most enticing. What else can you say? Breathtaking graphics? Innovative gameplay? It sets a new benchmark for videogames? Erm, not quite...

# Meet 'Digi-Chris'

## TARRANT'S BACK

Er, who's this? Tarrant's Cornish cousin?

Is this your final set of early shots? Are you sure? Don't want to change your mind or phone a friend?

Yes, this is what the fully digitised version of Chris Tarrant will look like when the PS2 Who Wants To Be A Millionaire 2nd Edition goes street-side this November.

From what we've seen of it so far, this looks like being the most 'TV-like' version of the game, with Tarrant sitting opposite the player's eye view, and even 'authentic' phone-a-friends (who, of course, aren't really your friends at all, but computer mates provided by the machine). If you want the whole family rounded around your PS2 come Christmas time, this is the game to ask Santa very nicely for.

Nice bit of product placement there

Looking for barnacles the hard way

## WETSUITS ON FOR JET SKI RIDERS

# Comrade Jet Ski

Water. It may be everywhere, but for many years the holy grail of videogames has been to make water that really looks like water.

Well with the mega-beef of the PS2, water effects are looking peachy, as you can see from these Jet Ski

Riders shots. The game also has the added advantage of ultra-realistic wave effects, full involvement from jet ski dufer Kawasaki, and it moves some too. We can't wait for its Christmas release. After all, this is a game that allows you to do submarine dives.

# Rocky Horror Shoo-oo!

Nobody can accuse game companies of being quick off the mark. A total of three film/game tie-ins are on the cards – all of them around the 20-year-old mark.

First up is the 1977 Best Picture Oscar winner Rocky, a licence that's been snapped up by publishers Rage, which plans a run of games based on the increasingly cack film series to appear on PS2, Xbox and Game Boy Advance. Expect to see all the film characters, including Mr Stallone's, as well as heaps of different game modes. Look out for an intriguing-sounding Movie mode. Don't hold your breath though, we won't be seeing the first Rocky game till Christmas 2002.

Meanwhile, Planet Of The Apes doesn't sound like such a slow starter, does it? Except when you consider that it's based on the original movie, released back in 1968 and starring Charlton Heston, not the

"Get your hands off me, you filthy ape," as birds often tell Dan. Co-incidentally, Heston said it too

Rocky's in-game model looks just like Stallone – punch-drunk

recent Tim Burton let-down. Ubi Soft plan the first Planet Of The Apes game towards the end of this year, while Game Boy Advance and Game Boy Color versions are due to follow. Expect simian action, and more news from us when we get it.

Last, but not least, is a babe in arms. A game based on the John Carpenter horror

classic *The Thing*, which was originally released way back in 1982.

Destined for PS2 later this year, *The Thing* looks ace, as these latest screenshots show. Part-survival horror, part-tactics, all gore, we're looking forward to all the creature-morphing stuff of the movie, as well as the paranoia of the human characters. Cool.

## NASCAR HEAT 2002 ON ITS WAY TO UK

NASCAR: heading for someone's PS2 in February

NASCAR might not pack quite the same punch here in the UK as it does in its native America, but that's not stopping Infogrames from unleashing NASCAR Heat 2002 on gamers in Blighty.

The game version doesn't sound that thrilling, but as usual we'll be good and reserve judgment until we've played it for three days on end. It's just that the early word on it makes it sound so... average.

Players choose between Single Race, Championship, Beat the Heat, Race the Pro and Head-to-Head modes. The first two you'll have experienced in a million other racers, the third sounds more promising, sticking you right into NASCAR

## MARIO KART: POOPER CIRCUIT

Nintendo has a special division called the Super Mario Club. They don't make Mario games. They don't make any games. They are the world's top playtesters. Their job is to make sure Nintendo's titles are tuned to perfection. It's thanks to them that the original SNES Mario Kart is one of the best games ever. You'll also see special thanks to them on the end credits of the new GBA Mario Kart. Another top title...?

Mario Kart: Super Circuit is a revelation. An incredible game that everyone should experience. But there are things wrong - annoying details that should have been corrected to make it surpass even Super Mario Kart. Here's our list of reasons why Super Circuit stinks, in an open letter to the Super Mario Club asking, quite frankly, why? Boys, you should be ashamed!

**NO FEATHER:** The jumping power-up that was so cool in the original. Even more disgraceful is that now, without it, the greatest shortcut of all [in hidden original Ghost House 1] is almost impossible.

**RED SHELL OVERLOAD:** The red homing shell power-ups track round corners better than ever. And they are so common in multiplayer that you may as well stay in second. And don't get us started on the three red shells.

**NO KOOPA TROOPA:** Every character had a match in the original. Toad had Koopa. So now if someone picks Toad first, who can you turn to? Heavyweight Wario? Thanks a bunch.

**INCOMPLETE SNES TRACKS:** The original courses are in, but every track has bits missing that originally made them so cool. No pipes on Mario Circuit, no speed-ups in Bowser Castle, no thwomps on Rainbow Road...

**THE GHOST:** A power-up that really made sense in the original Battle mode - it was great for stealing your enemy's red shell. But here, in a race, it has no strategy at all.

**NO VICTORY TUNES:** There was nothing more satisfying than humming along to your character's personal winning anthem in SNES Mario Kart. Another great feature... gone!

**NO INDIVIDUAL WEAPONS:** Yoshi laid eggs, Bowser farted fireballs, Princess dropped shrinking cakes. Each computer-character had their own excellent attacks. Now they just nick your power-ups. Lame.

**GREEN SHELL:** Once there was a skill to green shells. Laying them strategically next to banana skins, even using them to block the reds. But now you just take pot-luck firing them backwards. Why?

**TOO DAMN DARK:** Okay, this is a problem with the GBA screen. But everyone must feel torment as they fall off the edge of the Boo Lake levels simply because you can't see the screen!

**FOUR TRACKS PER CUP:** Aside from neatly removing the fun of a tie-breaking fifth race, it ruins the layout of the old SNES cups, mixing the courses across the wrong cups.

**CHEESE LAND:** Oh, and while we're at it, Sunset Wilds? Hello? With tasteless stages like these, why don't we just draft Rayman in too and complete the picture!

**BUT TO BE FAIR...** Here's five reasons why, even after all that, Super Circuit may well be the best game ever, second only to the original.

1. The Super NES courses. For all our gripes, my God they are in there!
2. Banana-recovery. Hitting the brake to save a skid. An excellent addition.
3. Perfect powersliding. Spot-on to the original.
4. Four players, one cartridge. Ambassador, with these features you are really spoiling us!
5. The original music. Almost all in there, even the old title tune in multiplayer mode.

## HOT SCOT McRAE'S BACK FOR PS2

Dear old Mr McRae. His first name makes him sound like the kid at school who stank, but he can't half drum up a top rally game.

When Colin McRae Rally came out, men, women, animals and everything in between

hailed it as the best rallying game ever. It was just you and the road with the clock for an enemy. The sheer speed and finesse of the damn thing meant you never walked away from a Colin McRae session with dry palms.

Looking forward to climbing into the hot seat?

Mouth-watering replays are par for the course

And he's back. Out next year bound for PS2, Colin McRae Rally II, or Colin McRae Rally 2002!, is the Scot's first next-gen outing, and we're already bulk-buying Pro Plus in readiness.

"We're aiming for a very personal experience," crows Colin McRae Rally associate producer Rick Nath. "The previous games were all about the cars and the tracks. We want the player to really connect with the feeling of being McRae, not the car, and work with the co-driver, Nicky Grist, and the Ford team as a whole." Come again?

### 4-PLAYER LINK CABLE

By: Logic 3  
Cost: £7.99

This four-way GBA link cable is excellent value. Two of the connectors are detachable so you don't have to worry about dangling cables if there's less than four of you playing. There's very little wrong with this and for a measly £7.99 you really would be daft to pass it up.

Nintendo probably spent a fortune researching different colours for their handheld wonder, so it's unlikely this 3-pack of covers will make your GBA look better. But they are perfect for customising your console. Paint the cover, snap it on and you'll be a true individual.

She fancies the pants off me. Why won't she sleep with me

My girlfriend's happy to go to a movie, a club or even the football.

So why won't she go all the way? 

It's a question asked by millions of horny guys every day.

The answer is probably that she's simply not ready yet.

For sex to really go off with a bang, both partners need to be completely ready, especially if it's their first time.

If one of you isn't, you're likely to ruin what should be a very special moment (or preferably several moments...)

Think about how she feels. If you think she loves you now, show her you're cool  enough to wait. Chances are she'll be crazy about you then.

So if you're getting a bit het up, keep your pants on.

As they say, good things come to those who wait...

Original Evil is back from the dead

September's shock announcement that the Resident Evil series will only appear exclusively on GameCube and Game Boy has sent half the games world into excitement-induced cardiac arrest. The other half (mainly Sony junkies) just burst into tears. So the moment CVG bagged some mind-melting screenshots of the debut title to hit GameCube - a remake of the original Resident Evil on PSone - we dispatched our man in Japan to nail an exclusive interview with the series creator, Shinji Mikami. You want all the gory details? You want to know what to expect when you return to Capcom's house of hell? You got it all. Horror has a new face, and it's going to keep you screaming until your lungs are bloody and raw.

ON THE COVER: RESIDENT EVIL ON GAMECUBE

**D**igging up the dead, messing around with their limbs and facial features, then bringing them back to life isn't a hobby for those with weak stomachs. The mere thought of decaying flesh, hollow lifeless eyes and pools of blood would make most of us hurl. But grave-robbing, mutilating, and reanimating a la Dr Frankenstein is actually what Capcom is doing by resurrecting and reworking every Resident Evil game exclusively for Nintendo's uber-console, GameCube.

Plus, with Resident Evil 4 and 0 in the pipeline, fright fans are in line for a mind-blowing catalogue of disgustingly dark adventures. And by the look of their first effort, a remake of the original Resi game, the world's most famous survival horror series is set to completely terrify and amaze like never before. So get ready to see your insides.

#### THE DARK LEGACY

The global success of the Resident Evil games isn't the result of luck. The dark mixture of an ongoing and intriguingly sinister storyline, and a cast of brilliant characters and spine-chilling music create the solid backbone for the series.

But what's really kept us coming back for more has been the sheer intensity of the adventures and the terrifying atmosphere that each of them have managed to create. Creepy shadows, claustrophobic locations, groaning zombies, sudden scares and the overall eerie visual style of the Resi games have been the key to conjuring up such

## SHOULDER TO SHOULDER

Way back in 1996, we were all wowed by the visual style of Resident Evil on PlayStation, and the nail-biting atmosphere it created. But the GameCube remake offers up the ultimate Resi experience. Stunning 3D environments are packed to the rafters with amazing detail and some of the finest lighting effects ever seen in a videogame. You'll be proud to own a GameCube.

*The pre-rendered backdrops in the original Resident Evil looks so basic by today's very high standards*

*The same dining room, but five years on. The level of detail and lighting effects are outstanding*

*The hall seemed so dramatic all those years ago. Were we blind, just stupid, or easily wowed? Hmm*

*GameCube flexes its graphical biceps and shows off. Evil has never looked so utterly beautiful*

**↑** "Hi! I luv you mate, giz a newly animated interactions

**↑** Eerie light pours into the corridor from outside, creating a world of threatening shadows. Brrrr!

deliciously gruesome experiences. Yet as graphics and consoles have improved, so has the horror. Code: Veronica on DC and PS2 are a perfect example of this, but nothing can prepare you for the level of sheer terror that Resident Evil on GameCube is cooking up.

#### HOUSE OF HORRORS

It's only five years since we first set foot in the famous mansion that sits at the centre of Resident Evil, but CVG recently revisited the scene on P5one and we were shocked at how dated the original looks when put side by side with the GameCube update.

But if you're thinking that this remake is just the same old game with a new lick of paint, think again. Shinji Mikami, creator of the franchise and head honcho on the GC version, has worked with his team to make this as fresh an experience as is inhumanly possible.

"Over 70 per cent of the puzzles have been changed from the original," Mikami told CVG, "and there are a couple of changes [in the storyline] but I can't tell you [what] yet". Also, when we asked him whether there are going to be any new rooms and locations within the remake, he confirmed that there would be. But that ain't the half of it. You see, the second

## RETURN OF THE ZOMBIES VII

Making us jump, puke and tremble has been a trademark quality of all the Resident Evil games. But this visually astounding remake of the first Resident Evil game on Nintendo's super console is set to have you crawling under your bed

and screaming for your Mummy. Watching the game in motion is scarier than most great horror movies, so when you're actually in there and controlling the action, expect nothing less than to smell the sweat of your own fear.

**hug. Urrpp... Sorry." Smell that sweet zombie breath as you get physical with Mr Scabby. The between Chris Redfield and the creatures in Resi on GameCube are phenomenal**

**Taking the cinematic approach, camera angles in this remake are more dramatic than in any previous Resi game**

**You can almost smell the stench of rotten flesh and pure evil. The environments are dripping with that much detail**

you step into the refurbished and richly textured GC game, you'll be transported into a new realm of tension and exhilaration that's off the Richter Scale.

#### UNDER THE MICROSCOPE

The visual blitzkrieg that hits you as you move through the rooms in the mansion will make your eyes pop out of your head, because the sheer density of detail is unlike anything ever witnessed before.

Stunning polished marble floors reflect imposing spiny candelabras, the fireplace and candles in the dining room flicker and burn super-realistically, and carpets, wallpaper, paintings and every object in sight are so intricate that the 3D environments feel utterly believable and look totally flawless. But the magic ingredients that help create an atmosphere of true horror are the astounding lighting effects, which haunt the entire game.

#### THUNDERBOLTS AND LIGHTNING

You're creeping through one of the many dimly lit corridors, gripping your Beretta and expecting the unexpected. A clap of thunder erupts outside, accompanied by a bright flash of lightning that streams through a nearby window, illuminating your surroundings and casting long, real-time

**As you creep your way through the cobwebs and dirt, your heart will be thumping so hard and fast it hurts**

shadows along the narrow carpet. Then the lightning stops and you're back in a world of dark shadows and the unknown. You relax for a split second thinking the coast is clear, but another crash of thunder fills the air and light pours down the corridor yet again. Out of nowhere appears the silhouette of a zombie.

The moment you spot it you'll jump out of your skin. And remember, this is all in-game action. There's no cutscene thrown in here to emphasise the point, because the action is enough. See, *Resident Evil* on GC doesn't rely solely on the familiar scare tactics of previous games to frighten you, and this powerful lightning effect is just one of the many new and brilliant elements that will have you tense like never before.

#### BLINK AND DIE

Another way that Capcom has achieved a truly intense atmosphere is by adding new windows where there were once brick walls, and by chucking in loads more fantastically freaky and dramatic lighting effects.

When you're walking through the mansion, moonlit trees sway in the wind outside and cast rippling shadows that dance eerily around on the internal walls, constantly tricking you into thinking there's something moving in edges of the darkness. Little touches like this intensify the gameplay and overall feel of the game because, unlike the PSone original, you're

**f** The sound has been completely remastered too. Even the sound of the gun clicking is brilliant. How very sad we are...

**f** Remodelled and looking uber-cool, Chris is ready for some serious zombie slashing action. Check out the knee pads

**f** Can't get enough of your blood. Forget Dracula, *Resident Evil* zombies could drink him under the table

## HARDCORE SLASHER ACTION

In every Resi game to date, the routine has always been as follows: zombie grabs you by collar, you tap all the buttons frantically, cramp kicks in, the flesh-dripping monster takes a bite out of your neck, and you shove them to the blood-stained ground.

But things are changing in the remake, with souped-up action that's far more realistic than any of the previous games. Check out this sequence for an example of some of the new close-combat interaction that's been added.

A zombie bursts out of a door

You creep down a dark corridor

It grabs you by the throat

Lightning brightens up the corridor for a split second as you rapidly retaliate

You stab at the zombie's eye

You reach for your combat knife

Finishing it off with your Beretta

ⓘ Don't get fooled by the antiques and overall stylish decor, because this mansion is home to some pretty unsavoury folk

ⓘ Check the size of the knife Chris is packing on his chest

ⓘ Action kicks off when you least expect it, and don't be surprised if you lose your head. Eww!

now forced to constantly stay alert. Blink at the wrong moment and you'll be face to face with pure evil, losing your blood faster than a pig at an abattoir.

### SMOOTH AS SILK

The graphical leap from Chris Redfield's first blocky appearance on PSone to

Claire Redfield's sleek styling in PS2's Code: Veronica was huge, but the new motion-captured and ridiculously smooth characters on GameCube make all previous efforts seem like dull crayon sketches. Reworked and remarkable, Chris Redfield looks absolutely amazing, as do all the monsters. But what's even

Corridors feel far more claustrophobic and intimidating

There's so much going on in every frame of Resi on GC

more impressive is the way the characters move and interact.

Wrestling with zombies is more realistic and fluid than in any of the other Resi titles - Chris' forearm muscles tense up as he grapples with monsters, zombies lunge for your jugular mouths gaping in a more horrific and brutal fashion, and simply the way Chris moves around and reacts in general is astoundingly realistic.

Also, loads of fresh animations have been included in the remake, which in turn has spiced up the action. In other Resi games, when a zombie grabs you the only option has been to shove them off. But from what we've seen, in certain situations you can pull your trusty combat knife out of your belt and viciously stab them in the eye. This kind of inventive addition makes combat far more involving and interactive. And as the camera angles have been constructed more cinematically (the action and characters often fill the whole frame of the screen), playing Resi on GC feels like you're in the thick of a brilliantly shot zombie movie.

#### POP GOES THE ZOMBIE

Capcom refused to be drawn by our questions about the AI of the creatures in the remake (whether your evil attackers follow you through rooms, respond to the sound of your movements or purely the sight of you), but what we do know for sure is that zombies can swing open doors and latch onto you when you least expect it. Also, Mikami told CVG, "We have changed

The action is far more in-your-face and up close.

## RESI ROUND-UP

GameCube might be getting most of the attention, but the huge Resi franchise still manages to do some moonlighting elsewhere.

Resident Evil Ground Zero will see Milla Jovovich, sexy star of The Fifth Element, in a brand new adventure that doesn't borrow its storyline from any of the games. It's set to be a Hollywood blockbuster, but with Resident Evil on GameCube headed our way, why watch it when you can live it?

Even though Game Boy Color doesn't have the same oomph as GC, the little wonder has still managed to come up with a gem in the form of Resident Evil Gaiden. Set on a luxury liner with a top-down perspective, you bomb around the boat collecting clues, gathering items to help solve puzzles and fighting anything unholy.

The battle sequences are the best bit, as the camera switches to a pseudo first-person view and you have to execute a series of button presses to kill the mutants before they gut you. It's different and it works. Look out for our review next month.

The overhead view works like a treat

A monster cracks you on the chin

Check out Milla Jovovich, the not-exactly-ugly star of Ground Zero

A super-strong zombie pounces to chew you up like a doughnut. But

Better remember to drink lots or you'll sweat yourself to death

“Die, stinky dead bloke!” The muzzle flashes from your trusty Beretta look fantastic as you unload a full pistol clip into the chest of this walking corpse

the locations where the monsters appear.” This means you’re constantly looking over your shoulder and trying to control your bowels at all times, for fear of being pounced on. Again, this new feature adds even greater tension to an already petrifying experience.

Survival horror takes on a whole new meaning, as you’ll be lucky to get to the end of the game without actually collapsing and dying from a heart attack first.

#### HORROR HEAVEN

PlayStation 2 owners won’t see any *Resi* games appear on their machine as a result of the exclusive deal signed between Capcom and Nintendo, but serious fans of the series and true hardcore gamers will already be saving their pennies for a ‘Cube. But this bold collaboration has proved that one thing is for sure: Nintendo isn’t scared to get blood on its hands and is definitely looking to appeal to older and darker games players as well as the cutesy crowd who buy Nintendo purely for the whole Mario and Zelda thing.

Due out in Japan in March 2002 and in Europe later that year, *Resident Evil* on GameCube promises to be a horror phenomenon. Survival horror has never looked this impressive, believe us. So if you’re still looking for a reason to get one of Nintendo’s shiny new boxes, we can give you six: *Resident Evil*, *Res*

*Evil 0*, *Res Evil 2*, *Res Evil 3*: *Nemesis*, *Res Evil Code: Veronica*, and *Res Evil 4* (to be released in that order).

Just from what we’ve seen so far, the remake of the original *Resi* is enough of an incentive to buy a ‘Cube on its own. So with the entire heavyweight series in its corner, it looks like Nintendo is set to uppercut its critics with a global knockout.

## DEVIL MAY CRY

FORMAT: PS2 OUT: NOVEMBER DEVELOPER: CAPCOM PUBLISHER: CAPCOM

**K**nee-length boots, velvet trousers, a scarlet jacket and a grey, pudding haircut. The hardest man to appear in videogames in a long time is certainly the worst dressed. But tell him that to his face, and he'll hack you 15 feet into the air with his broadsword, then juggle your body with bullets from a pistol in each hand. Hit the floor living, and a shotgun blast smashes you to mush, your brains hitting the floor before the spent shells do.

You know those epic slow-mo shoot-out sequences in John Woo movies? That's how *Devil May Cry* plays. Controlled carnage on every screen. Demon-hunter Dante bounces like Muhammad Ali, leaping and tumbling as he fires off shots to send the dead back to their graves.

**f** Bonus round: shoot 100 bugs in 30 seconds

**f** Everybody lets their inner demon out from time to time. Trouble is, when Dante does he leaves hundreds of bloody corpses everywhere. You little devil!

**f** These scissor-toting witches are some of the least scary enemies in the game. Far more friendly than the raptor-like lizards you blow apart with the grenade gun. Bok!

Dante's day starts off quietly when a beautiful girl smashes through the wall of his detective agency on a Harley and pins him to the floor with a sword through his chest. Dante slides up and off the blade, and the lady knows this is the man to stop the hordes of hell invading Earth. So they head off to the resurrection site – a remote island dominated by a huge castle.

### IDEAL HOME EXHIBITION

Dante enters a glorious hallway. The brickwork is crumbling and a giant staircase spirals up to the floors above. Gargoyles seem to watch his every move and torches flicker light into the darkest corners. It looks like PS2 games are supposed to look: amazing. Dante's every move is filmed with a cinematic camera sweep, then a cut to a new camera to show a better angle. Flicking camera angles? Capcom? Survival horror, right? Wrong.

*Devil May Cry* is about as far removed from Resident Evil as you could imagine. Chris Redfield wouldn't

Many of DMC's puzzles are time-based. Hit a switch, then run like mad down to the door, chopping anything that gets in the way. Here, Dante was too slow

last ten seconds in this place. Point the stick, and Dante dashes instantly. He can jump, spring off walls, roll and strafe – and he needs to be this nimble to stay alive. Dante walks into a room, and the door slams shut behind him. No way

out. Then ten razor-clawed marionettes drop down from the ceiling and start swinging for him. You need to have some awesome destructive power to live through that kind of onslaught on every other scene.

Dante packs a giant broadsword and more conventional bullet-based weaponry, and uses both to produce fantastic-looking combo kills. There's no worry about ammo, as every gun you fire has a bottomless clip. It's just bang, bang,

ⓘ A demonized shotgun in full effect. Lethal

bang until you are the last man standing. The action is very arcade-oriented, with progress hinging more on your ability to execute a roomful of hellspawn than solving a twisted logic puzzle.

#### THE DEMON INSIDE

The structure is also far removed from Res Evil, with Devil May Cry broken down into 23 missions. Early on, it's a case of surviving a fairly linear progress through the castle, but a puzzle element kicks in so you've got one eye looking out for an item that'll let you make it to the next missions as you're knee-deep in demon guts. Typically, you'll go through a door and the mission is done. The next mission commences on the other side of the door. The breaks in between enable Dante to explore the darker side of his character.

The thing that makes Dante such an effective demon hunter is that he's half demon himself. His knowledge of the dark side is what makes him such a powerful ally to humanity in its hour of need. At first, the demon half of Dante, Alastor, is inactive but every slain foe yields a red orb that Dante collects and spends to harness his demonic power.

Initially the demonic episodes are pretty subtle. Dante hacks enough baddies up to call on Alastor and his body gains a shimmering blue outline. He can run faster, hit harder and every bullet he fires streaks across the screen coated in blue energy, turning a humble shotgun into a lethal lightning gun. Impressive. A few thousand more orbs and Dante yields to Alastor completely.

Black wings and claws spring from his body, and he blazes a trail of destruction across the screen like a hurricane.

ⓘ "So, does that mean you're pleased to see me, or are you going to try and rip me into little bits?"

Basic enemies like the marionettes and scissors-toting witches are little match for our hero in this mode. The frequent boss characters take a bit more convincing, though. The very first boss – a fire-spitting scorpion about ten times

ⓘ On the way back down, you get chased by evil

ⓘ John Woo-style double hand-cannon action

Dante's size – scuttles into a small chamber. You leap and roll to take cover behind stone pillars as it vomits orange napalm, ducking out only to smash the beast in the face with your sword as it gears up for the next apocalyptic strike.

#### PICK ON SOMEONE YOUR OWN SIZE

More Dante's size is the demon knight that steps out of a mirror as Dante's reflection, before transforming and engaging you in a treacherous duel across the decrepit ramparts of the castle. Bullets only bounce off, and you've got to jump close enough without falling to your death to deal sword blows.

Devil May Cry is a tantalising prospect. It's more action-focused than other PS2 adventures, with slaughter around every corner. The presentation is slick, with cutscenes drawn using the impressive in-game graphics. We'll know if there's enough of a story to drive the carnage along when the UK code arrives, as well as if the arcade nature of the game stands up to extended play.

#### CVG RECKONS

Tactile demon carnage filmed in glorious PS2-ovision. We can't wait for the slaughter to begin. Dean

## JAMES BOND 007 IN... AGENT UNDER FIRE

FORMAT: PS2 OUT: NOVEMBER DEVELOPER: EA PUBLISHER: EA

**W**ith the exception of GoldenEye on the N64, James Bond movie licences tend to suck like a Dyson Hoover. So why not ditch sticking to the movie plot-lines entirely? Instead, dream up a story so full of action that any game based on it couldn't possibly fail. Which is what those crafty people at Electronic Arts have done. What's more, instead of opting for just one genre, EA has gone for a mixture of gameplay that incorporates everything we know and love about Bond, from high-speed car chases to thrilling gunfights.

### THREE INTO ONE

One minute you're creeping stealthily round a terrorist base, and the next you slip behind the wheel of your hugely expensive (and soon to be trashed) Bondmobile. With a screech of burning rubber, you speed off through the crowded streets of Hong Kong to hunt down the evil troublemakers. And when those pesky terrorists still refuse to give in, it's time to stand

rocket launchers and – everyone’s favourite – the sniper rifle, more than do the trick when it’s a good firefight you’re after to alleviate all that sneaking around tension.

The driving stages already blow away anything that *Spy Hunter* on PS2 managed for sheer white-knuckle driving action, and they feature some punishing pursuits that do almost as much damage to your thumbs as to your expensive Aston Martin.

#### IT’S PLAYTIME!

And in the *Time Crisis* gun-game homage, someone else drives the car or tank while you get the fun job of playing with all your cool weapons, totalling hordes of terrorists, blowing wheels off their cars and downing their choppers.

But it’s not all you against an entire island full of bad guys. With a passing nod to *GoldenEye* – one of the finest multiplayer experiences on the N64 – there is a four-player, split-screen deathmatch option. You and your mates compete to see who is the real Bond

and who is as dangerous as Blofeld’s fluffy cat with the diamond necklace.

#### ODDJOB’S ARSE

By shoeing in so many styles of play, *Agent Under Fire* is clearly intended to have appeal as wide as *Oddjob’s* arse. The missions we’ve

played so far have been a blast. But let’s just hope the developer played *Die Hard* Trilogy, which was an abject lesson in how *not* to take completely different gameplay styles and make them get into one overall package. Meanwhile, we’re all off to polish our Walther PPKs.

2 No Bond game is complete without a sniper rifle

# PARAPPA THE RAPPER 2

FORMAT: PS2 OUT: JANUARY DEVELOPER: SONY PUBLISHER: SONY

**B**ass, how low can you go? Your rings your things, your house your spouse, bow-wow-wow yippee-yo yippie-yay, motel, hotel, Holiday Inn! As you can tell we're so down with rap that it hurts, especially with the amount of gold chains and LL-style Kangol hats we continue to wear long after they went out of fashion.

## SMOOTH MOVES

Even Les has been known to slip into an old-school Adidas tracksuit and start breakdancing while Pete waxes lyrical and freestyles on the mic - okay, maybe we don't go that far - we're far too busy playing games instead. But since we got our hands on a copy of Parappa The

Rapper 2, we've been living out our hip-hop fantasies in a bling-bling style.

Yep, Parappa The Rapper, the paper-thin hound dog that rhymes better than Snoop Dogg himself is back, in an even phatter sequel. In fact, it's also fatter, due to a lot of the fancy new 3D effects, but thankfully the stylish pup and his pals are still drawn in the same distinctive flat style as the original.

Having won the heart of Sunny Funny, Parappa faces a new task - defending his town from the evil Noodle Group, which plans to turn the world's hamburger supply into noodles. No we don't know why either, it's all a bit bizarre, but that's quite typical of the crazy world that Parappa inhabits.

## NOW REPEAT AFTER ME...

If you missed the first game - and judging from the low sales, you probably did - it's as

straightforward and fun as they come. Basically, it's a funky-fresh version of Simon Says, where our hero will find himself in a scrape and needs tuition to overcome his dilemma. This tuition comes in the form of raps delivered by some weird-looking characters - a kung fu master that happens to be an onion and a BMXing moose are just some of the strange sights. All you and Parappa have to do is listen to each line of the rap and repeat it, pressing the buttons on the joy pad to match the symbols being shown on screen, keeping in time with the dope beats, boyee!

Boasting a distinctive cartoon style and some of the funniest tunes you'll ever hear in a game, Parappa the Rapper 2 looks like it'll be just as fun as the first. Whether it sells this time is another matter. Peace out!

## MOTOGP 2

FORMAT: PS2 OUT: NOVEMBER DEVELOPER: NAMCO PUBLISHER: SONY

**B**eing back in the saddle of MotoGP 2 is a reassuringly familiar experience for anyone who shredded rubber in Namco's first bike racer. The two-wheeled petrol guzzlers have the same distinct, edgy feel as before,

and they still twitch as you pull on the throttle hard into a corner. Along with some of the better and more well-known tracks, such as Donnington and Suzuka, many of the riders from the original are in here too.

**i** The detail's been ramped up since the first game – now you can see reflections on the bikes

Even the Challenge mode makes a comeback, though the rewards you get for completing tracks within the tight time limits have obviously changed.

As for other new stuff... well, there's not a great deal. There are five new tracks, making a total of ten, each based on circuits from the FIM Racing World Championship. The rider roster has also been updated, and the bikes given a fresh lick of paint and the season's sponsor logos slapped on the side.

### ROAD HOGS

Glossy paintwork isn't the only improvement the bikes in MotoGP 2 offer though. The ability to tweak your superbike has been expanded, but the game's arcade feel hasn't been compromised – you can adjust stuff like the

## CRASH

FORMAT: XBOX OUT: MARCH DEVELOPER: RAGE PUBLISHER: RAGE

**I**t ain't subtle, it ain't pretty and you won't come through it unscathed. So if you don't want your nice shiny car pounded to a metallic pulp then don't even think about entering Crash. Because the name of the game here is

to put your car in a tight little arena with a load of other vehicles, then drive around smashing into each other until only one is left moving.

### DEATH RACE

The appeal is instant, there is nothing to learn and you don't have to bother with a manual. Within minutes of hitting Start, the course will look like a busy supermarket car-park after Mr Bean tried to park – little pieces of car everywhere. The only rule is the last car left moving wins, so you'll learn pretty quick that constant head-on collisions are not the way forward. You'll need to be swinging the back end around arcade style to cause maximum mayhem but minimum damage to you.

It's still early days with only a few courses playable, but there's plenty of beautifully detailed cars to smash up. What we've seen follows very closely to the Destruction Derby games on PSone. The Bowl course starts with

**i** Not much point calling the RAC out now

**U** Never did quite manage to master parking when it

stiffness of the suspension and brake dampening without faffing around in mechanic shops like Gran Turismo 3. And the difference out on the tracks is instantly noticeable.

Good job too, because you'll need to fine-tune your motor to tackle one of MotoGP 2's other new features – wet weather. And when we say wet, we mean totally drenched. Rain splatters on your visor as you cruise around the track, drastically cutting your visibility to little

more than a few feet. The bike skids and swerves if you hit a corner too fast, so the one way to avoid chewing concrete is to keep the revs low and only make a move to overtake on the longest straights.

The same applies to racing against a mate in wet conditions, but because there's only two of you competing, one single error could cost you the race. So make sure you take it slow and steady, or eat a gobful of gravel.

The replays are still lush to look at

The more spectacular the collision, the more points you get

on Xbox that PS2 can't do. It will certainly need some tightening of the handling and more imaginative course designs to make this dollop of car carnage the irresistible prospect it could be.

# SMUGGLER'S RUN 2 HOSTILE TERRITORY

FORMAT: PS2 OUT: NOVEMBER DEVELOPER: ROCKSTAR PUBLISHER: TAKE TWO

Most driving games are so predictable with their strict course boundaries that you can't cross. Smuggler's Run 2 is different. It gives you a massive landscape, complete with huge hills and deep valleys, puts you on the head and says, "There you go, why not drive around and enjoy yourself a bit?"

Mind you, most driving games don't have you dealing with crossfire, landmines and avalanches either.

## MINI-GAME MANIA

The single player smuggling missions have you racing to pick up contraband, destroy vehicles or chase someone across the desert – an improvement over the last game which became

**1 Blast over mountains to pick up the package**

**1 Smash through this small town to evade the law, make your delivery and get the hell out!**

# “Violent, politically incorrect racer – and proud of it!”

**1 The next step for speed traps – heavy artillery**

a bit predictable with its objectives. Throw in a bunch of carnage-related mini-games that have you playing bomb-tag and capture the flag (among others), and you have more than your average off-road racer.

But speed and exceptional handling capabilities aren't all your only tools for getting away from the attention of your law enforcement pursuers. Traditional oil slicks and smoke screens are joined by the less conventional method of exploding barrels thrown out of the back of your vehicle to trash any chasing motors. One point worth noting: many people complain about the pop-up and draw distance in PS2 games, but in Smuggler's Run 2 you can

see for miles. As you head towards the horizon, hills and objects slide towards you smoothly, rather than suddenly appearing from nowhere.

## FORGIVING AND FUN

Despite the missions, the weapons and the terrain, the main change has been to make the game more fun. There's more to do and, though the physics feel that much more realistic, it's a lot more forgiving when you are bouncing around the countryside, and you don't spend quite as much time off your dirt-buster. Could be one to look forward to if the tight corners of your F1 games or the lack of weapons in Gran Turismo 3 are getting you down.

**1 Turbo boosts are limited, so go easy on them**

**1 Like one of the three wise men, follow the sign in the sky to reach your goal – but it won't be a stable**

## CVG RECKONS

It's chaotic free-racing action from beginning to end, and it looks like having enough new features to make SR2 a worthwhile sequel. We'll try and sneak our review over the border for next issue. Les

The control system here really makes you feel part of the game, rather than being on the outside looking in. Creeping up on terrorists, leaning round corners, getting your sights on their heads for the perfect one-shot kill – using your skills and equipment to maximum effect gives you a feeling of total immersion. Syphon Filter 3's wide open environments and multi-objective missions will have you hammering the trigger button one second, and the next stealthily crawling along using your mine detector. Success using all these Bond-like gadgets to complete one-player missions opens up mini-

Multiplayer sees you and a mate going head-to-head in Tag, Scavenger Hunt and Target Practice modes, or if you feel a bit less competitive, the developer is looking at putting in a special co-op mode. The unlockable mini-games feature special missions like escaping from bases, eliminating guards,

assassinating commanders and retrieving vital objects. Basically, individual gameplay elements made into games in their own right. **W**e're slowly turning into Americans. Or at least that seems to be EA's master plan, as it keeps relentlessly shoving an endless line of Yankee sports games our way, with basketball being at the top of the list. And someone's buying them, so they must be right – we are turning into the 51st state of the USA.

#### KEEPIN' IT LIVE

NBA Live 2002 is the latest lanky-legged offering, and as with most EA sports sequels, it's been a case of applying the three Rs: Rework, Renovate, and Repackage.

Lose your marker and pop in a three-pointer

Unsurprisingly therefore, the gameplay is staying very faithful to NBA Live 2001, with the main additions being a bundle of new dunks and moves around the hoop. But where EA is concentrating its efforts is in slightly restyling the look of the game and adding a whole new play mode. Franchise mode sees you managing an NBA club, scouting and drafting rookies and the like – you know the score.

In a slightly bizarre move, rather than trying to make the players look more realistic, EA has redesigned the visuals so that they are more colourful and look a bit more 'gamey'. If only they'd taken that idea a step further and made a funky cel-shaded game we might be a bit more excited. Never mind.

## VIRTUA TENNIS 2

FORMAT: DREAMCAST OUT: NOVEMBER DEVELOPER: SEGA PUBLISHER: SEGA

Virtua Tennis: your chance to watch the greatest names in tennis battle it out in the finals of tournaments all over the world from the comfort of your sofa – just like the British tennis players do every year. It also ranks as one of the best DC games ever, and certainly the best multiplayer game on Sega's machine, especially on a widescreen telly. Fitting then, that the sequel is going to send the DC off in style.

### GAME, SET AND MATCH

Fifteen tennis superstars and one token Brit make up the Virtua Tennis 2 roster, and this time the women get in on the act too, with the mighty Williams sisters and their butch colleagues all playable. And as if that wasn't enough, you now get the chance to create your very own player and train them up to take on the revamped World Circuit mode in tournaments and challenges.

As before, you play on the various circuit surfaces (clay, grass and artificial), only now the stadiums have been rendered in much more detail. "So what?" we hear you ask. Well, with the big step up in camera angles used during the game and the various replays, you'll be seeing a lot more of your surroundings.

The controls have been kept as simple as before, although there are new varieties on the

The usual Wimbledon situation – no sign of a British player anywhere near the Finals

# “Just as easy to pick up and play as before”

Diving may be spectacular but, if your opponent hits it back, you'll never get up in time

cross-court shots and dives that the players make. So you now have more moves to suit your style, be it serve and volley or baseline domination. All of which gives Virtua Tennis 2 a bit more depth and challenge.

Despite these tweaks, it's every bit as easy to pick up and play as before, so within minutes you'll be sending powerful smashes straight at your opponent's face or teasing a drop-shot agonisingly out of range. And let's face it, that was half the appeal of the original.

Virtua Tennis 2 is hardly what you would call a radical overhaul, but anyone who loved the original will notice the improvements. The question is: is it enough to justify forking out another £30? Much as we agree with 'if it ain't

broke, don't fix it', we think sequels need to offer a lot more than the original to give them that must-have appeal.

### CVG RECKONS

## MOTO RACER 3

FORMAT: PC OUT: NOVEMBER 15 DEVELOPER: DELPHINE SOFTWARE PUBLISHER: EA

Check out Paris' romantic River Seine. **AWW**

The previous two games in the Moto Racer series were fairly unremarkable attempts at bringing the excitement of the track to the screen. Developer Delphine has recognised its earlier failings and resolved to introduce some of the more diverse thrills of the new generation of sporting sims, such as Tony Hawk's Pro Skater, MX and the rest.

### BRINGING BIKES TO THE MASSES

Bike-racing games are hard to get right. Some

concentrate so much on accurate speed and handling they completely ignore visual presentation, resulting in the feeling of riding a slick, shiny beast around a blurry track watched by zombie muppets. Not MR3. Riding around the streets of Paris in Traffic mode, you'll be stunned by the sharpness and clarity of the environments. The AI of the other bikes and cars is even more impressive. It's uncanny the way they swerve around and try to block your way when you attempt to overtake.

Freestyling in the Stade de France is a bit of a turn-on, but surely even those saucy Frenchies frown on doing the Karma Sutra in public

### KRUSTY TAXI

Choose your driver from an initially stunted line-up of Simpsons characters, then pick up other cast members from one location and drive like a loon to take them where they want to go to gain extra time and money. Sounds familiar? Even the green hexagonal destination boxes are the same as the DC classic, though at least Crazy Taxi's arrow has been changed to a hand.

What is new is the mission-based gameplay that gives you tasks such as knocking over items or racing Mr Burns to be first to get to the Nuclear plant. While hardly complex or original, it at least lets you unlock some classic characters, like the Mr Plow version of Homer.

Despite (or maybe because of) all these similarities, we'll eat our shorts if the Crazy

Taxi-style simple but addictive gameplay combined with the greatest cartoon show on TV doesn't prove enough to be a winner.

**S**o you're out one night and your best mate falls into a mysterious pool of gunk and turns into a weaselly little rodent. Most of us would beat the stinky vermin dead with the nearest blunt object, but Jak heads off on a mission to restore his cheeky pal Daxter back to his old self. And what ensues is a rich Technicolor adventure that sees you leaping through the most breathtakingly awesome 3D environments ever seen in a platform game.

Jumping around, grabbing onto cliff edges, upper-cutting kooky baddies, and negotiating tricky terrain becomes second nature within a matter of minutes, enabling you to get into the thick of the action from the word go.

And with a massive host of weird and puzzling objectives to complete throughout the game – such as herding Yakows into their pen and unblocking Eco-Harvesters – it seems there might be enough action to keep even the hardest of hardcore platformer freaks happy for a long time to come.

Klonoa 2 and Rayman Revolution have been the only recent platformers on PS2 so far, but it's time to up the ante and Jak & Daxter is set to do just that.

# "World War II done Quake style – sweet as!"

## RETURN TO CASTLE WOLFENSTEIN

FORMAT: PC/PS2 OUT: DECEMBER/TBC DEVELOPER: NERVE/GREYMATTER/ID PUBLISHER: ACTIVISION

A dozen marines peg it up the beach. Hails of bullets from Nazi machine-guns tear half your team to pieces in seconds while the rest take cover. A lieutenant calls in a massive airstrike, lighting up the twilight, but before you can charge, a sniper shoots your helmet clean off and follows up with the death shot. Lucky, then, that this is World War II done Quake style. While you're in limbo waiting to

respawn, a medic leans over your twitching body and it's instantly game on again.

### BACK IN JACKBOOTS

Wolfenstein is promising to be the rounded solo and multiplayer experience that Quake 3 wasn't. We'll have a full one-player preview next month, but what's already obvious from the multiplayer demo posted online is that this is the next step on for first-person shooter teamplay.

The Allies must complete three objectives to win – all the Axis forces must do is stop them. Sounds easy? It isn't. Depending on which class you choose to play as, you'll be drawn into different roles using different tactics, and teamwork is essential. For instance, snipers, flamethrower and rocket-launcher troops will need to protect Marine engineers so they can plant dynamite to breach the beach, while the Germans must man pre-set heavy machine-gun nests for extra firepower.

### WAVING RYAN'S PRIVATES

Whichever side you play, it's carnage. Grenades bounce through gun slits, gibbs fly, human

Choose your class – and your respawn point

"I said HEAL him!" It's vital someone on your team chooses to be a medic. They carry guns too

The Allies first objective is to breach the sea wall defences. Blow the door with explosives, then pile in and clear the machine-gun nests with flamethrowers

Where's your helmet, soldier?

He's dead. That's a live grenade. You're next

torches blunder around and bodies are blown over walls. Combat feels similar to Quake with two major differences – you'll only get healed by Medics, and when you die you can wait up to a minute to respawn. It's frustrating at times, but it really makes you think before going all heroic.

The demo ([www.planet.com](http://www.planet.com)) is just a taster. Since the single-player plot features reanimated zombie beasts, the full multiplayer game should offer far more varied scenarios and maybe even the chance to play as a brain-sucking ghoul. We're standing to attention already.

## CVG RECKONS

It's probably morally wrong, but damn – World War II is fun! And this is just the demo. Pete

## POLAROID PETE

FORMAT: PS2 OUT: DECEMBER DEVELOPER: IREM PUBLISHER: JVC

**E**ver been walking along and seen something awesome? Like a dog chasing an old man who runs smack into a road sign, which then topples over and crushes a bus full of nuns. Afterwards you always think, "Damn, I wish I had a camera." Well, Polaroid Pete gives you that camera – and so much more.

### GET SNAP HAPPY

In case you hadn't guessed, the game is from Japan. It plays like a mental mixture of side-

scrolling shoot 'em up and Pokemon Snap. You're sent out into the streets by your newspaper editor to get some scoops, snapping all of the crazy events going on around you. Children fall over, volcanoes erupt, giant ghost creatures attack, and you have to get it all on film. At the end of each level you're scored depending on the quality of snaps you've taken. It's repetitive and simple for sure, but we've been playing for ages and constantly spot new stuff happening in every level to keep us going.

Take an especially good shot and you get congratulated

### Snap folk and things happen

### Monster attack! Get the scoop

Bath house fun – just don't slip on the soap

The graveyard level is ace, if pretty tough

## CVG RECKONS

Some of us love it, some of us hate it. But we won't make any snap decisions. Final verdict next issue. **Les**

**T**hink betting through the cities from Blade Runner and Fifth Element (only without Bruce Willis or that bird who never wore much) half a mile up and at 300kph and you start to see what NYR is about on PS2.

### CRAZIER TAXI

Advertising boards and lighting effects

combined with a gritty look give you the feel that this is a bustling metropolis. Which it is.

While flying through narrow gaps between skyscrapers and swooping to get through tunnels and around obstacles, you also have to deal with passing traffic, and dozens of passing vehicles can be on screen at once. The courses are littered with shortcuts accessed by

smashing through certain windows and advertising screens.

But what really makes NYR stand out from other racers is the need for both horizontal and vertical steering as you duck and dive through the city, and the increased acceleration as you descend takes some getting used to. This has definitely caught our attention though.

## NEW YORK RACE

FORMAT: PS2 OUT: NOVEMBER DEVELOPER: KALISTO PUBLISHER: WANNADOO

It's like Fifth Element meets The Fast And The Furious with a bit of Crazy Taxi thrown in. Mint-ola!

Pretty neat explosion effects, eh?

## CVG RECKONS

Concept racing games always make us suspicious, but with the Blade Runner feel of the city and some unusual twists to the action, this might be one of the rare winners. **Les**

Reach for the skies in Nintendo's fun and challenging take on flight simulators.

**99** **BLACK & WHITE**  
2001, PC  
Peter Molyneux re-invents the god game genre that he originally invented. That's dedication!

**98** **THE SIMS**  
2000, PC  
Create a family and guide them through life... ideal for all the Big Brother addicts out there.

**97** **SILENT HILL**  
1999, PSone  
Konami's disturbing response to the Resident Evil series takes the best elements of survival horror and manages to add psychological terror into the mix. The PS2 sequel turns the cack-o-meter up to eleven.

**96** **VIRTUA FIGHTER 2**  
1994, Arcade/Saturn  
Still the best in the series - a masterclass from Sega in how to make a beat 'em up.

**95** **POKEMON GOLD/SILVER**  
1999, GBC  
Number 95? Such a low placing could indicate that the craze may have subsided, but there's no denying that Pokemon is still a remarkable game. The Gold and Silver editions offer 100 new creatures between them and an internal clock. This new feature actually takes into account when you are playing, as some Pokemon can only be caught at specific times. Genius idea.

**94** **STARCRRAFT**  
1998, PC  
Sci-fi set real-time strategy from the makers of Warcraft. Features some great base-building and cosmic warfare.

**93** **HEAD OVER HEELS**  
1987, Spectrum  
A platform-puzzler with the good old days, with two characters to control in this end-of-an-era isometric runner.

**92** **THIEF: THE DARK PROJECT**  
1998, PC  
A creepy game with top stealth action, strategy, ingenuity and excellent missions.

**91** **VAGRANT STORY**  
2000, PSone  
Heavily cinematic RPG from Square that plays a bit like a medieval Metal Gear.

"IT LOOKS SIMPLE, BUT THERE'S JUST SO MUCH TO DO." Jai Sutton

**90** **SYSTEM SHOCK 2**  
1999, PC  
A canny blend of RPG with first-person shooter. Keeps you on your toes as there's a sense of danger around every corner.

**89** **DRIVER**  
1999, PSone/PC  
Relive all your favourite movie car chases, dodge traffic and avoid the cops. Buggy, but there's fun to be had nonetheless.

**88** **DONKEY KONG COUNTRY**  
1994, SNES  
Rare squeezes impressive visuals from the ageing SNES. Lucky for us it plays great too.

**87** **KNIGHT LORE**  
1984, Spectrum  
Ultimate, which later became Rare, amazed gamers everywhere with this incredible isometric 3D adventure.

**86** **DAYTONA USA**  
1994, Jaguar/DC  
Linked-up, it's still the best arcade racer around. Bit of a shame about the dodgy rock music that accompanies the driving, though.

**85** **TEMPEST 2000**  
1994, Jaguar/PC  
No Shakespeare malarky here - this is a hypnotic shoot 'em up based on the arcade original via the trippy genius of Jeff Minter.

**84 ASTEROIDS**  
1980, Arcade

Pure game play shines through in this test of reflexes and zapping skills. Vector graphic bliss.

**83 SPEEDBALL 2: BD**  
1990, Amiga/NES/etc

A classic mix of extreme violence and game play often resulting in more fights than goals.

**82 RIDGE RACER**

1995, Arcade, PSone  
Namco's greatest racer since the days of Pole Position gave the PlayStation a "great start, now go for the lead!"

**81 STREET FIGHTER ALPHA 3**

1999, Arcade/DC  
The greatest fighting series ever made still shows no sign of retiring, and this is the slickest incarnation yet.

**79 BANJO KAZOOIE**  
1998, N64

A clever little platformer from Rare that features plenty of puzzles and its trademark brand of humour.

**78 SSX**  
2000, PS2

This PS2 launch title features super-fast snowboarding with top tunes, responsive controls and large courses to explore.

**76 BUBBLE BOBBLE**  
1986, Arcade

Simple but fun platform thrills. Bub and Bob are changed into bubble dragons, the rest is history.

**77 RADIANT SILVERGUN**  
1998, Saturn

Slick shoot 'em up that proved the Sega Saturn was a more than competent console when in the right hands.

**80 SUPER MARIO KART 64**  
1996, N64

Long-awaited sequel to the SNES classic that improves many aspects - analogue steering and a wider variety of power-ups and weapons, four-player races and even better four-player battles. Sadly, the level design and enemy AI just aren't quite as magical or fun as the original. Hopefully Mario Kart on GameCube will prove to be a worthy update.

"NOT AS GOOD AS THE ORIGINAL, BUT WHAT IS?" David Powell

**75 SONIC ADVENTURE**  
1998, DC

The 'hog's return doesn't disappoint, with Sonic displaying lightning-fast speed to traverse the stunning level design. At times it feels like you're riding a roller-coaster, but there's slower adventure parts where the story unfolds and new characters are introduced. Don't forget the Chao - cool virtual pets to nurture and race - plus a NIGHTS cameo.

"WOW! THE SPEED! MY BRAIN CAN'T KEEP UP!" Noel Garner

**74 GRANDIA 2**  
2001, DC

An old-fashioned RPG given a modern lick of paint. Pity the story's so long-winded.

**73 SIM CITY 2000**  
1995, PC

As mayor it's up to you to attract new business, residents and fight off alien invasions too.

**72 LYLAT WARS**  
1997, N64

Update of the SNES classic Starwing. Great levels, multiple paths and introduced rumble!

**71 GRAN TURISMO 2**  
1999, PSone

More cars and better handling, new Arcade mode and two-player races... what else did you expect?

**70 PAC-MAN**  
1980, Arcade

The videogame equivalent of Star Wars, Pac-Man was a phenomenon that not only gobbled dots, power pills and ghosts in an innovative maze game, but gobbled coins out there in the real world too. Sequels, duvet covers and a cartoon series soon followed.

**69 OUTRUN**  
1986,

Arcade/Spectrum/Saturn/C64  
The first racer to let you actually choose your preferred route and radio station, with an unbeatable soundtrack too.

**68 JET SET WILLY**  
1983, Spectrum

The legendary follow-up to the classic Manic Miner. It's creator, Matthew Smith, then mysteriously disappeared for 15 years after its release. Odd.

**65 SAMBA DE AMIGO**  
1999, Arcade/DC

Shake maracas to the Latin hits. If this doesn't put a smile on your face, absolutely nothing will.

**67 QUAKE III ARENA**  
1999, PC/DC

Intelligent bots in the single-player mode mean every game is now a deathmatch. Hurrah!

**66 CHRONTRIGGER**  
1995, SNES

The producer of Final Fantasy and Dragon Quest's designer/author team up for this massive RPG.

**64 SONIC & KNUCKLES**

1994, MD  
Due to a unique cartridge, this allowed previous Sonic games to play in and enjoy bonus levels.

**63 BOMBERMAN**

1987, SNES/MD/Saturn  
Forget the one-player mode, Bomberman rules as a multiplayer battle. Simple but so addictive.

**62 WAVE RACE**

1996, N64  
Jet-ski racer with ultra-realistic water and buoyancy. The tricks you can perform are good too.

**61 SECRET OF MANA**

1993, SNES  
A sword pulled from a stone causes world chaos. Three adventurers must search for eight Mana seeds to restore order. A huge adventure where you can call a friend to help you, each taking control of one of the heroes. There's no dull turn-based battles either, it's all action.

"ANOTHER MAGICAL MOMENT ON THE GREATEST CONSOLE EVER." **Richard Forsett**

**60 MAX PAYNE**

2001, PC  
Slick shooter that twists The Matrix's 'bullet time' from a cool special effect into a genuine control innovation. Nice.

**59 SKIES OF ARCADIA**

2000, DC  
Huge RPG that borrows heavily from Star Wars. It's pirate-themed, but instead of sailing the high seas you command a flying ship in your efforts to become a legend. Pity the combat system is a bitiffy.

**58 COUNTER-STRIKE**

1999, PC  
Originally based on the brilliant Half-Life, Counter-Strike has evolved via the Internet into the ultimate in team combat.

**57 POKEMON RED/BLUE**

1995, GB  
The phenomenon started here! Catch monsters and train them for battle or trading. Genius.

**56 XENGEARS**

1998, PSone  
More RPG goodness from Square, featuring giant robots and a thought-provoking story.

**52 LEGEND OF ZELDA: LINK'S AWAKENING**

1993, GB  
Link's first Game Boy outing. It manages to recapture the Zelda magic on a handheld.

**51 TOMB RAIDER**

1996, Saturn/PS/PC  
Oh how the mighty have fallen! Lara's original outing was and still is a classic adventure, boasting massive levels full of secrets, surprises and plenty of hair-pulling puzzles. Quickly churned-out sequels, being associated with Cool Britannia and an action-packed but weak movie have since dampened Lara's flame. Core Design is sensibly taking its time over her next outing.

"I'LL NEVER FORGET THAT T-REX."  
**Andy Grainger**

**50 RESIDENT EVIL 2**

1998, PSone  
Less scares as the action shifts from the original mansion to the streets... but even more zombies!

**49 COMMAND & CONQUER**

1996, PC/PSone  
Survive missions or multiplayer skirmishes in this strategy masterpiece that introduced the power of Tesla coils.

**48 UNREAL TOURNAMENT**

1999, PC  
Threw down the gauntlet at Quake's feet by being designed as multiplayer only with great modes, maps and weapons.

**47 SONIC ADVENTURE 2**

2001, DC  
Even more than before, with two-player challenges and much-improved Chao-rearing. Features quite a mixed bag of levels, but Sonic still rocks.

**46 DEUS EX**

2000, PC  
An absorbing adventure/RPG/shooter/sci-fi masterpiece that's very difficult to explain in just a few words, so why don't you just go play it instead?

**45 TONY HAWK'S PRO SKATER 2**

2000, PSone/DC/PC/GBA  
Plays like a dream, is big and challenging and now you can create your own levels.

**44 LEGEND OF ZELDA**

1986, NES  
The very first appearance of Link sold well over a million copies and introduced us all to the land of Hyrule. Was it really 15 years ago?

**43 ELITE**

1984, BBC, Acorn  
Space-trading shoot 'em up epic. Fly anywhere and truly open-ended... you can't argue with that.

**42 CHAMPIONSHIP MANAGER 00/01**

2000, PC  
Realistic football management sim that if you're not careful will take over your life. That's a promise!

**41 CASTLEVANIA: SYMP OF THE NIGHT**

1997, PSone/Saturn  
Quite simply, this is one of the best platform games ever made, with fantastic level design, creatures and music.

**40 VIRTUA TENNIS**

2000, Arcade/DC  
A simple, responsive control system makes this a winner and the extra home modes are just outstanding. Multiplayer rules, and the sequel should be just as good.

## 39 RESIDENT EVIL

1997, PSone/PC

It may have borrowed a lot from Alone in the Dark, but Capcom's stab at horror spawned even more imitators. The original boasts an eerie mansion populated by zombies and a crack military squad which has been sent in to explore. Littered with puzzles, traps, B-movie dialogue/acting and with some out-of-your-seat scares, Resident Evil is a genre-defining survival-horror classic.

**"I NEVER THOUGHT A GAME COULD SCARE YOU. MY MISTAKE."**  
Ali Hussain

## 38 YOSHI'S ISLAND

1995, SNES

A magical adventure resembling a kid's drawing brought to life.

## 37 METROPOLIS STREET RACER

2000, DC

Rulebook-wrecking racer that tests your skills to the limit in stunningly recreated real cities. Outstanding.

## 36 SENSIBLE WORLD OF SOCCER

1992, PC/Amiga

Simple controls mean every match is down to skill. A great blend of action and management.

## 30 FINAL FANTASY IX

2000, PSone

An old-fashioned Final Fantasy with the emphasis firmly on fun, with lots of mini-events and a captivating card game.

## 29 LEGEND OF ZELDA: MAJORA'S MASK

2000, N64

Poor old Link's got just 72 hours in which to save the world in an adventure that plays like Groundhog Day.

## 28 SUPER MARIO BROS.

1985, NES/GBC

The portly plumber's first platform adventure, featuring koopa shells, a princess and, of course, plenty of pipes. It's still an absolute classic all these years later.

## 26 JET SET RADIO

2000, DC

Combining rollerblading, graffiti and being chased by the cops, Sega created one of the coolest games around with astonishing cel-shaded graphics, huge levels and a memorable soundtrack. The only stumbling block is the erratic tricks, but even these don't dampen the wow and fun factor.

## 27 TEKKEN 3

1998, Arcade/PSone

The third King of the Iron Fist Tournament is the most enjoyable Tekken outing so far, with a wide range of characters that offer something for everybody - even cheesy players, thanks to Eddy's capoeira moves. There's plenty of options including a side-scrolling beat 'em up mode and a bizarre game of beach volleyball! The PS2-powered Tekken Tag Tournament pales next to this classic.

**"BRILLIANT CHARACTERS AND UNFORGETTABLE MOVES."** Paul Lau

## 35 MONKEY ISLAND 2: LECHUCK'S REVENGE

1991, PC

Great humour, even better insults and, er, sea-shanty music in the continuing adventures of Guybrush Threepwood.

## 34 CIVILIZATION II

1996, PC

It's up to you to guide your civilisation through history, battle rivals and build wonders like the pyramids. Kiss your love life goodbye - this is your new babe.

## 33 RESIDENT EVIL CODE: VERONICA

2000, DC/PS2

The fourth outing in the zombie-blasting series is now fully 3D with some truly incredible set-pieces and gruesome creatures. Code: Veronica is easily the best Resident Evil to date.

## 32 SEGA RALLY

1995, Arcade/Sat/PC

The first racer to offer the gamer a variety of road surfaces. The level design and car control are close to perfection.

## 31 GRAN TURISMO

1998, PSone

A wide range of cars to modify and then race, plus some stunning replays helped to make this a PlayStation milestone. And it only got better...

**25 CRAZY TAXI**  
1999, Arcade/DC/PS2  
Absorbing arcade action as Sega places you behind the wheel of a cab that doesn't even know the Highway Code was printed.

**24 FINAL FANTASY VIII**  
1999, PSone  
It may have some stunning CG sequences and Guardian Forces in your command, but it's not Final Fantasy VII, is it?

**23 PANZER DRAGON SAGA**  
1998, Saturn  
A fine swansong for the Saturn, this huge adventure mixes an RPG with a shoot 'em up.

**22 PHANTASY STAR ONLINE**  
2000, DC  
A truly global adventure as Sonic Team utilise the DC's online play to create a memorable experience.

**21 ISS PRO EVOLUTION 2**  
2000, PSone  
Long-admired football series that goes from strength to strength... and still gets outsold by FIFA.

**20 DOOM**  
1994, PC/PSone/N64

A space marine gets rid of demons on the moons of Mars – a simple plot but the action that ensues is unforgettable. There's a great array of weapons including the chain-gun and BFG, and hundreds upon hundreds of pink hellspawn to battle. Doom blew away everything before it and the PC market hasn't been quite the same since.

"CAN YOU IMAGINE HOW DIFFERENT THINGS WOULD BE IF THERE WAS NO DOOM?" **Albert Rossi**

**19 SUPER METROID**  
1994, SNES  
Huge sci-fi adventure that boasts great enemies, bosses and a brilliant surprise ending.

**18 PERFECT DARK**  
2000, N64  
Sci-fi semi-sequel to GoldenEye. Having no Bond licence didn't prevent Rare making another hit.

**17 SONIC THE HEDGEHOG**  
1992, MD  
Sega's mascot is the antithesis of Mario: sleek, sharp and super-fast... the game's not bad either!

**16 HALF-LIFE**  
1998, PC

First-person shooters come and go, but when they're as perfectly plotted and paced as this, well, they tend to stay in the memory. From the opening monorail ride, you just know that what lies ahead is going to be special and the ensuing action certainly doesn't disappoint. So special, in fact, that Dreamcast [nearby] got a version and PS2 is about to snaffle one too.

"A TOUR DE FORCE THAT KEPT ME UP SO LATE I LOST MY JOB, BUT IT WAS WORTH IT. CAN'T WAIT FOR A SEQUEL." **Jim-Bob**

**15 NIGHTS**  
1996, Saturn  
Quite possibly Sonic Team's finest hour, NIGHTS simply defies genres. It sold pretty poorly, but it's still an undoubted masterpiece. Love it! Love it! Love it!

**12 GRAN TURISMO 3 A-SPEC**  
2001, PS2

There may be less choice but the cars look more realistic than ever. However, the real improvements are under the bonnets of each car, allowing you to really feel the difference in handling. Finally a game that delivers on the promises made by Sony and the PS2.

"SINCE I GOT IT, NOTHING ELSE HAS BEEN IN THE MACHINE." **Matt Wong**

**11 STREET FIGHTER II**  
1991, Arcade/SNES/MD

Revived beat 'em ups, became the most competitive coin-op ever and spawned one of the worst films of all time. Responsible for an entire generation of dumb-struck gamers only able to speak the phrase "Yeah, but it's not as good as Street Fighter II" once every month.

## 10 SHENMUE 2000, DC

A stunning adventure set in mid-eighties Japan, allowing legendary designer Yu Suzuki to not only create his first home game, but also to revisit past hits – Hang-On and Space Harrier – and borrow moves from Virtua Fighter. Best of all, there's more to come! Yessss!

**"IT'S BETTER THAN REAL LIFE." Tom Wilkes**

## 09 TETRIS 1989, GB

It's been an addiction since 1985, but it wasn't until 1989 and the introduction of the Game Boy that Tetris really became a legend and everyone started viewing the world in little blocks of four and humming THAT tune. Nintendo's handheld edition of Alexey Pajitnov's puzzle masterpiece resulted in over \$2 billion in Game Boy sales. Ker-ching!

**"CAN I VOTE FOR TETRIS TWICE?" Clive Davies**

## 08 LEGEND OF ZELDA: A LINK TO THE PAST 1992, SNES

The best role-player ever? Link faces a cataclysmic struggle between the forces of Light and Dark. A memorable cast and spectacular use of the then-new 16-bit console created another gem.

**"MIYAMOTO'S FINEST HOUR, A TESTAMENT TO HIS IMAGINATION." Leigh Rushton**

## 07 SUPER MARIO WORLD 1990, SNES

Hat-swapping magic from Mario, who changes caps to garner new powers such as flight, and there's also the addition of his dino-chum Yoshi who likes to eat apples and koopa shells. It's coming to GBA next year!

**"PIPE-POPPING PLATFORMING PERFECTION." Scott Rayner**

## 06 SUPER MARIO KART 1992, SNES

Arguably the greatest two-player game of all time and still puts most serious racers to shame. Like Robbie Williams announcing he was quitting Take That and going solo, the initial announcement of a Mario racer was met with howls of derision. Of course, Nintendo proved everyone wrong. Great course design, a brilliant battle mode and power-ups that encourage dirty play. Invest a bit of time learning the tracks and you're hooked like a popstar loves cameras – brilliant!

**"A FUN BREATH OF FRESH AIR, LEAPS AND BOUNDS AHEAD OF THE COMPETITION." Katie Garber**

## 05 GOLDENEYE 1997, N64

The chance to be Bond on missions that don't require gun-blazing action but an element of suave sophistication. This slick shooter rewards brains above brawn, utilising silencers and sniper rifles to dispense enemies and not alert others. A brilliant control system, great multiplayer mode and another massive hit for Rare and Nintendo.

**"I BOUGHT IT FOR MY KIDS. YOU CAN WORK OUT THE REST." Steven Harris**

## 04 METAL GEAR SOLID 1998, PSone/PC

A legendary comeback. As in the game, Solid Snake was a recluse, unseen since the 8-bit era and all but forgotten. Creator Hideo Kojima had other plans: for years he waited for technology to catch up with the ideas he always had for Snake. Metal Gear Solid is the result. Great action, memorable set pieces – Psycho Mantis, second pad fight – and a great anti-war theme.

**"IT MAY BE SHORT, BUT EVERY SINGLE STEP IS SURROUNDED BY GREATNESS." R Perry**

## 03 FINAL FANTASY VII 1996, PSone

Square knew N64 cartridges wouldn't let it create the stunning movie sequences or orchestral soundtracks that've since become synonymous with the series, and so moved to the PSone. It was the right decision and perhaps one that influenced Nintendo ditching cartridges for the GameCube.

**"A COMPELLING STORY, FULL OF HUMOUR AND EMOTION, THE ONLY GAME EVER TO MAKE ME CRY."** Carl Sinton

## 02 SUPER MARIO 64 1996, N64

"It's a-me, Mario!" From the famous stretchy-faced greeting to the final battle – despite the odd camera glitch – every second shines. Mario is taken from his familiar 2D surroundings and thrown into a 3D world that feels like this is where he always belonged. Nintendo and Shigeru Miyamoto nailed 3D gaming first time at bat. Ingenious puzzles, incredible control, memorable creatures and mesmerising surroundings are the icing on the cake.

**"REMINDED ME WHY I GOT INTO PLAYING VIDEOGAMES IN THE FIRST PLACE."** Jake Miller

## 01 LEGEND OF ZELDA: OCARINA OF TIME 1998, N64

Another Miyamoto masterpiece. Ocarina of Time is a magical adventure, chock-full of memorable characters, beautiful locations and the stunning level of imagination and innovation we've come to expect in the series.

Link's task is to save Hyrule from the evil Ganondorf. The Ocarina of Time of the title allows Link to warp from the present to the future, changing between being a young boy and a man. This not only changes his appearance, but events and locations of items too.

The music heard in the game is simply superb and the ocarina itself is a real instrument that actually works. Link can learn new tunes to play that possess magical powers, or, if you get really stuck in the game, you can make him play the theme from EastEnders, or anything else that takes your fancy!

Adding to the excitement of release, just like the NES days, Nintendo couldn't make the cartridges fast enough. If you managed to get a copy, you felt very lucky.

**"THIS IS THE PROOF THAT NINTENDO MAKE THE BEST GAMES IN THE WORLD."** Mark Leary

Hands up who loves Miyamoto!

# WHERE'S MAR

That's what CVG readers asked when we invited them in to play GameCube. Get the low-down on what your fellow

# 10?!

CVGers reckon right here

ON THE COVER: YOU PLAY GAMECUBE!

NAME: Aaron Francis  
AGE: 17

Aaron had to be pulled howling from Monkey Ball 'cos he's a big Nintendo fan and can't wait for UK launch day.

NAME: Will Woodfall  
AGE: 16

Will's got crazy hair. He's also gagging for GameCube and will probably get a GBA when you can link it up to 'Cube in games like Kirby.

NAME: Ricky Constantinides  
AGE: 20

Tricky Ricky used to be a SNES slave. He now mainly enjoys manly strategy games but still has softness for Ninty in his heart.

NAME: Wayne Lawrence  
AGE: 17

Wayne is still smarting from the death of Dreamcast and now he has to choose between the three next-gen power-houses.

**O**n a chilly autumn day, gamers from across the country united in their love for games right here in the CVG offices. Sounds messy, but it wasn't. We gave some loyal CVG readers the chance to play GameCube months and months before their mates, and to vent their spleens and share their views about Nintendo's new

machine with you. They even went away with a limited-edition CVG T-Shirt. Can you feel the love?

#### THE 'CUBE ITSELF

All eyes are on GameCube to out-perform Xbox in sales and out-charm PS2 with its awesome array of unforgettable characters and games with that elusive Nintendo sparkle of genius. But what about the machine itself?

You've read what we reckon over the past few months, how excited we are about the different coloured units available at launch and how we love its dinkyness. Our team of testers loved it too - except for the handle.

"There's no need for it," said Will, "because you're never going to walk down the street swinging it like a bag." We said that we quite liked it because it was different and cute and a complete opposite to Xbox's bulky blackness, but the boys could only see the practical side: "The handle gets in the way of it sitting flush against the wall," reckoned Aaron, "they should make it so you can take it off." Aside from the Handle of Doom, the lads gave GameCube's design two thumbs firmly up.

Our testers were bowled over by this

## LUIGI'S MANSION

"It's just like Ghostbusters!" Kwame was ecstatic about Luigi and it was the game our gang wanted to play first. Luigi's Mansion is certainly the kind of graphical showcase every new machine needs to wow punters, but we had a few concerns about the possibly repetitive nature of play and the much slower pace than Mario 64.

### THE MOST SPECIAL EFFECTS

Our testers' jaws dropped when they saw the game physics and particle effects in motion. Suck a curtain with the hoover and it flaps realistically, shine the torch out of the screen and you see dust floating about in the beam.

"The graphics almost look like they're pre-rendered, and then there's all these physics happening too," drooled Ricky. "Yeah, like that bit where you have to blow the curtain across the window to let in cold air," agreed Will. "That's really cool because it not only shows off the special effects but it's also the way to solve that room's puzzle," he said. Particle effects caused yet more joy in a boss fight with a dancing lady: "Just look at all the stuff coming out of her!" yelped Wayne as hearts, coins and wisps of ectoplasm exploded from our undead missy. Beautiful.

It was the special effects in Luigi's Mansion that impressed our team of gamers the most

Everyone agreed Luigi's was the main game to buy

### LUIGI LONGEVITY?

We put our worries about lifespan [Luigi's - not our own!] to the team. "Luigi's Mansion is the type of game you'll play by yourself when you've got no-one to play Wave Race with," said Wayne. "I've heard it's fairly easy to finish," said Aaron, "but it plays wicked - I'd definitely want to play it again after I'd completed it."

Luigi's Mansion proves one thing: that if you want character in your games, Nintendo really is the only choice. Everything from Luigi's nervous humming to his terrified reflection in the door handles as you enter new rooms, everyone agreed it's all sheer GameCube magic. And we love it.

Luigi sucks! Well, his hoover does, but his game most definitely doesn't. Who cares that there's no Mario game?

Luigi oozes character and the lads giggled during play

NAME: Kwame Busia  
AGE: 16

"He can read Japanese!" everyone cried as Kwame translated the Luigi's Mansion intro. As well as having crazy language skills, he loves RPGs and is a serious Nintendo fan.

## WAVE RACE: BLUE STORM

When it was time for our team to reluctantly change games and try something else, they unanimously opted for Wave Race over Super Monkey Ball. About half of the guys had played the N64 version and were eager to see what 128-bit enhancements had been

made to their favourite water racer. They were about to find out that 'not many' was the answer.

### WAVES OF NAUSEA

There's no doubting that the water effects in Wave Race are outstanding. "The feeling of the water is awesome," said Kwame as he bounced across a big, choppy wave in the city harbour. "The riders look and move great too," said Antony, who later blamed his failure to win on the fact he was checking out his female rider's "cute ass".

NAME: Antony Pepera  
AGE: 20

Antony has loved Nintendo since Super Mario Bros on NES and has owned every Big N machine since. Most recently he's been playing ISS 2000 on N64, despite owning a PS2.

1 The city harbour is the toughest course

1 Replays show off the stunning graphics

1 Feel the icy splashes punishing your inner thighs in this arctic wilderness

1 Wiggle that butt! The riders' animations wowed our crowd of Nintendo fans more than the game

1 Like Luigi's, it was the special effects such as splashes on the screen that really impressed the lads

### SWEET OR SOUR?

However, it wasn't long until the initial cries of "sweet graphics" were replaced with "I'm probably not going to buy this". The lads reckoned that the main problem with Wave Race: Blue Storm was that it's essentially just an update, featuring the same course locations and sometimes even the exact same course layout.

"It's just the same game with better graphics," said Jigar. We asked that if the formula worked, why should Nintendo change it? Will said: "They've had five years since the last one and it's still just a racing game - there aren't enough extras like Monkey Ball's multi-player modes." The boys agreed that as good as it is, it's a pretty lazy game. We still had to tear them away from it though.

NAME: Jigar Patel  
AGE: 17

Hardcore shoot 'em ups like Quake III float Jigar's boat, so naturally he's busting for Duke Nukem on GameCube. He's also into PS2 and will probably get one for Devil May Cry.

➤ Bonus rounds of joy as you collect all the 'nanas

➤ Monkey Ball ski-jump madness in Party mode

➤ Party games were the biggest surprise

➤ Monkeys trapped in balls is sinister

## SUPER MONKEY BALL

Last up on the playtest was Sega's Super Monkey Ball and there were howls of pained confusion at seeing the Sega logo on a Nintendo machine. Monkey Ball was

by far the biggest surprise for the team and was the game they spent longest playing, thanks largely to the sublime multiplayer games.

### SUPER MONKEY ATTACK!

"It looks like it's for a niche audience and sort of Dreamcast-y," said Ricky. "But it's addictive," Antony agreed. "I can see

myself playing day after day." Super Monkey Ball is a great party game, as you can play multiplayer in all the different modes. In Normal mode, players take it in turns to complete the courses, which proved great fun, but it was the proper Party mode that rocked our gamers' worlds.

Monkey Race sees you racing your rivals in high-speed dashes: "It's faster than F-Zero!" cried Aaron. Kwame said it reminded him of Wipeout, while the Monkey Fight and Target games caused big laughs and were the final icing on the banana-shaped cake. "I can't believe I'm going to have to wait five months to play this again," sobbed Antony.

➤ The lads howled at the hairier moments like these and cheered when the tougher sections were beaten

➤ Graphics are good, gameplay is awesome

## THE VERDICT

The guys loved GameCube, but none of them was tempted to start saving for an import Japanese or American Cube. "I don't mind waiting," said Wayne, "plus it'll be much cheaper with more games available." They all agreed that Luigi's Mansion was the best of the three Japanese launch games, followed by Super Monkey Ball, then Wave Race Bluestorm. "Luigi is just perfect for GameCube because it's got character," said Will, adding, "but we'd all rather be playing a Mario game at launch." "Wave Race is good but could have been a PlayStation game," Ricky thought, but it was Rogue Leader that the guys were really gagging for. "That's going to be the one everyone's gonna want," said Kwame, "followed by Luigi second."

So there you have it: we love GameCube, you love GameCube, all Nintendo needs to do is officially announce a European launch date and the world will be a better place for all.

**CVG:** We know what you mean!

### PRICE BUT DIM

I always buy your magazine, but you keep putting up the price. It went from £1.50 to £2, then £2.50 and now £2.80! It used to be a great value magazine, but now it's getting like all the other magazines that are a rip-off. I think you should put the price down to about £2. This would get even more readers reading your magazine. Please take this into consideration.

**Mr Value Master**

**CVG:** Yes, let's put down the price. And, hey, we'll house all the homeless and feed all the starving while we're at it. Only, we can't and it's because the world's a cold and cruel place, Mr VM. Sorry.

VALUE FOR MONEY

### MOAN, MOAN, BLOODY MOAN

I think the world of videogames is seriously going down the pan. Current releases for most consoles including PS2 (which is the main culprit) are full of uninspiring and unoriginal games. What I find more gut-wrenching is that gamers seem to want this - no-one bought into

games like Jet Set Radio. Well, until GameCubes arrival I'm going to lock myself in my magic picnic hamper and fashion toothbrushes out of small hairy dogs in a vain attempt to shut out thoughts of Tomb Raider 99 and GT47.

**The John**

**CVG:** Jeez, it's all doom and gloom with you, isn't it? But the fact JSR didn't sell well is a crime against gaming, we agree.

### HEAR, HEAR

A letter in issue 231 from John G complained producers no longer cater for the hard of hearing. I agree. Having started Dino Crisis 2 this morning I noticed that without the sound it is just running about shooting dinos with no plot.

If there are four-and-a-half million people who are hard of hearing then it's just one million of them bought a PS2 at £300 Sony would make a massive profit. But why should they buy if the games are unplayable?

**Michael Simcock**

**CVG:** Your maths relies on A QUARTER of all deaf people buying a PlayStation 2. Sorry mate, but we think your pleas are gonna fall on deaf ears.

You haven't gone deaf, it's just my voice. I've got a saurus throat.

## CAMERA FLASHPOINT

I've been playing a lot of Operation Flashpoint recently and have to say it is one hell of a game, especially with all the mods and patches you can get off the Net.

Anwar Hussein

**CVG:** Have you tried downloading photos from a digital camera to use in the game? Check out the gormless goon on the right in the pic above. Recognise him, anyone?

## ARCADE IN HEAVEN

I agree with Cackman in issue 237 when he says arcades are dying. The problem is if a fruit machine is put in an arcade, there is considered to be gambling on the premises. I have never been in the arcades in

## SHORT STUFF

I'd like to thank CVG for getting behind GameCue and realising its potential when it seems so unfashionable to do so.

Richard White

**CVG:** Just doing our job, Rick. Unless you're being sarcastic...

I'd like to make a suggestion on how to make your magazine better... Put the release date of the next issue somewhere. Thanks very much, and keep up the good work.

Dan Payne

**CVG:** Who he?

# DRAWINZ WOT YOU DUN

Can't spell or do joined-up writing? Never mind, scrawl a picture of some of your fave videogame characters instead. Or just draw whatever pops into your twisted mind. Make it good and it'll get a golden bone, but if it's a heaving pile of monkey slurry, we'll humiliate you like childish bullies.

Check out William Shields's tribute to the world's most famous plumbing duo. And look, he's mentioned CVG's 20th birthday. Not good enough for a golden bone, but you get one of CVG's spanking new, limited-edition T-shirts for being creepy enough to remember our b-day.

Crewe (where I live) because they are for over 18s only and I am only 13. And when I do go in an arcade they are just as Cackman describes them. So let battle commence and let's get our brilliant arcades back!

Adam Kinsey

**CVG:** Exactly, Private Kinsey, and we shall expect you to lead the charge. Who plays fruit machines anyway? (except for smelly, desperate old men who don't understand horse racing).

## UM, SORRY...

Two weeks ago I emailed you to ask for information about my economics project, which was going to be about the next-generation console war. I never got any reply, and because of this I had to change my project to something else.

Saifullah

**CVG:** Sorry, Saifullah, but if it makes you feel any better, Madonna emailed us recently wanting information on PS2 specs, and we didn't reply to her, either.

## YET MORE GRIEF

What the hell has happened to CVG? It used to be informative, fun and written by people who cared about games. Now it's an uninteresting childish teeny pop mag.

Ade Wild

**CVG:** Ade Wild? He's bleedin' furious! Look Ade, lighten up. Tell you what the problem is, mate - you've gone and 'grown up' haven't you? The things you used to think were fun you now think are childish. But our love for games is as great as ever.

## WITH FRIENDS LIKE YOU...

Hello, I'm one of your biggest fans and I love your cool, funny, accurate mag. But now you've changed the layout it looks a bit boring. I hate those ugly coloured panels that you place your text on. I hate Freeplay - I always have. Don't get me wrong, I still think your magazine rocks but the layout is poo. Overall rating: 2/10 for layout, 8/10 for news and reviews and stuff, 5/10 for both intertwined

Yajirobi

**CVG:** You're one of our biggest fans and you give us a mark of 5/10. Sheesh, we dread to think what score you'd give the mag if you didn't like it!

## PLANET CVG

Can anyone beat this pic of Dan with CVG in Cyprus earlier this year? Send us your photos avec CVG from around the world.

A big thanks to puppa

# CVG STINKER

## ENEMY OF ALL READERS, BEGONE!

I am complaining that you chose a letter comparing the statistics of consoles such as the Mega Drive and the SNES to today's specs as the CVG Stinker in issue 239. I found this very interesting, and was surprised at your Smart Alec response.

And if that wasn't bad enough, the Golden Bone letter was about how Les Ellis looks like Wolf from Gladiators. Pathetic. You ignore a letter about the power of games consoles, insult the writer and then commend somebody for writing a

letter concerning someone looking like a 'celebrity'. Now, the magazine in general. Good news section. The reviews are average. Handheld section, nice. Target age group seems to be early teens, as nobody above that would stoop so low as to read such utter rubbish...

Matthew 'Redalien' Wilkes

**CVG:** See how we cut off your letter there, Matt? Not only was that because you went on to say even ruder things about us, but also because it's about time you started reading Old Twat Monthly.

# HAVE YOUR SAY

While hanging out in games shops pretending to work, we've been asking gamers which GameCue game you are most looking forward to playing. Below are the results. Mario Sunshine in third? You lot are weird.

## GROOVY GAMING GEAR OF YESTERYEAR #4: PC ENGINE

Year released: 1987  
Manufacturer: NEC

### WHAT IS IT?

The PC Engine, or TurboGrafx-16 as it was called in the US, was one of the smallest but most powerful games consoles available in the late 80s. Though it had an 8-bit processor, it stood out thanks to a 16-bit graphics engine. The games looked better than anything else and chucked everything around the screen a lot faster. The cartridges were the size of a credit card. It was also the first console to ever offer an optional CD-ROM drive. And yes, those Extra strong mints next to it are to scale!

### WHY DO I WANT ONE?

If you love your games surreal and very Japanese, this is the console for you. The PC Engine also sported a fine array of arcade conversions and original shoot 'em ups that never made it onto other consoles or were never given the same magical treatment. It also looks great.

### LOOK OUT FOR...

Toilet Kids: your character gets sucked into a toilet and ends up in a top-down shoot 'em up battling flying turds. Or try Chan and Chan, another game involving toilets and turds. Photograph Boy is like an early

Pokemon Snap, except you'll be taking pics of UFOs and dirty old men (see p56!) Gunhead, Devil Crush, Galaga 88 and Mr Heli and are all a bit more sensible and a good start for your collection – not a toilet in sight!

### WHERE CAN I GET ONE?

Expect to pay £100-£300 depending on condition and model on eBay – it's unlikely you'll find cheaper. Or try [www.telegames.co.uk](http://www.telegames.co.uk). Check out [www.classicgaming.com/thedump](http://www.classicgaming.com/thedump) if you're an emulator fan. It's full of PCE goodies including vast libraries of original game ROMs – but you have to own the original versions to do this, otherwise it's stealing, innit?!

### ALTERNATIVELY...

The PC Engine GT (TurboExpress GT in the USA). A portable version of the PCE with a colour active-matrix LCD screen that used the same HuCards. It's bulky but has a huge catalogue of games and a superb backlit screen. If you've got more money than sense, then hunt around for the PC Engine Duo R-X. It plays all Japanese HuCards, CD and Super CD-ROM titles.

# MELTING POT

## SEND US YOUR GAME IDEAS

999

Play a whole host of rescue and law enforcement people. As a coastguard, pick up stranded swimmers in a time limit. In the fire section, begin by rescuing cats from trees, and move on to burning buildings. As a mountain rescue person, save stranded hikers, plus fly a cool helicopter! © Peter Richardson

There's little worse than coughing up a wad of dough on a game or peripheral, rushing back with it from the shop and then finding it is an absolute crock of poop. But even then, during your darkest hour of rage and disappointment, it can be hard to bring yourself to actually destroy something you've just spent your hard-earned cash on, no matter how much it might deserve it. That's where we fit in. Send us your worst-ever buy, we'll beat the crap out of it and then replace it with something better. All you need to do is explain in 50 words why it must die.

Simply send your hated gaming objects (games or hardware) to the usual address, marked Smash It Up. Sorry, but we can't return any entries. Only the best entry each month will get a replacement prize. Please state what game/knitwear you own.

## ANYTHING THIS BAD MUST DIE

Is it really too much to ask that this GBC Worm Light actually helps you to see the screen?

### YOU SAY:

The packaging read, 'Allows enhanced viewing in low light and travel conditions.' But when I plugged it in, a bright orange dot appeared on my GBC screen so I couldn't see anything. I angled it away from my GBC, but there wasn't enough light to see. The shop wouldn't give me a refund, so what else could I do but send it to CVG? I know you'll dispose of it in a suitable manner. Do your worst.' Robert Plumber, Kent

### CVG SAYS:

Didn't you see the tell-tale signs? It's urine-coloured and has a snake-like decorating it. But you've clearly seen the error of your ways by sending it to us to Smash It Up, and who are we to pass up an opportunity for some legitimate peripheral vandalism?

## BUG STOMPER

Sometimes they're just amusing little glitches. Sometimes they are horrific balls-ups that ruin whole games. Bugs – no matter how hard they try, they can never quite get rid of them.

To make sure fellow players know where to expect a code cockroach, let us know when you find one. We'll print the worst offenders and crush them with a CVG hobnailed boot. Send any candidates you come across to [mailbag.cvg@dennis.co.uk](mailto:mailbag.cvg@dennis.co.uk) and we'll do the rest.

### TOMB RAIDER

Format: PSone

Stand in a doorway. Move the camera around at mad angles as if you're looking for something. Sometimes you can look inside Lara or get the camera angle in a compromising position.

## TELL US ABOUT THOSE GAMING GLITCHES

### HIDDEN AND DANGEROUS

Format: DC

Occasionally if you perform an action, e.g. lying down, the soldier falls out of the level through the floor and dies. On the first level, if your men descend a gentle slope, they fall to their doom.

## TO THE FUTURE

The evolution of games, from pixelated past to wire-free future

### TOYS

Before videogames, kids had to play with strange plastic objects called toys, normally based on Saturday morning cartoons like Teenage Mutant Ninja Turtles and He-Man. Also massive was Dungeons & Dragons, which was a bit like boring PC RPGs, only you had to do the maths yourself.

### GRAPHICS

Pre-1993, people didn't see in 3D, they saw in parallax. Think pantomime scenery. "Streets Of Rage 2 has multiple parallax," games mags would exclaim, meaning there's a fence in the foreground and some houses in the distance. Into-the-screen action (normally Mickey Mouse being chased by a moose) was scary as incoming objects expanded into blocks of colour. While rotation looked great until you noticed everything was as flat as a pancake.

### SEGA MEGA-DRIVE and SUPER-NES

The heavyweight rivals of the early '90s. Flashy SNES had Mode 7 rotation, showing it off by spinning every game's title screen. Hardcore Mega Drive Mortal Kombat featured red blood (the SNES only bled green). But really there was no contest - Mega Drive Street Fighter 2 had six elephants, while the SNES only had four. Parp!

**COMPUTERS (1982-1990)**

Required a telly and had no mouse, since everything was done by typing 'code'. Kids could make 'I am skill' scroll up the screen. Those who did it in different colours are now games industry millionaires. In computer club, your machine ranked you. Commodore 64 owners had the best games. Spectrum owners had the wrong machine. Beeb owners weren't allowed in. Later, the Amiga and Atari ST invented pixelated porn and dance music!

**TAPES and FLOPPY DISKS**

It's really true, disks used to be floppy. They couldn't play music or movies, but could fit your "I am skill" program on a pack of three. Before that, games were stored on tapes. Code crackers (highest pimps at computer club) traded iffy compilations which never loaded unless you manually rubbed the tape against the reading head. Those people are also now games industry millionaires.

**ORIGINAL GAME BOY (1990)**

A console that fits in your pocket! If you were a clown. The screen was green-on-green and blurred if anything moved. But it beat colour rivals - Sega's liver-shaped Game Gear and Atari's Lynx - because of Tetris, a game so addictive even your gran played it. Like that was a benchmark of quality...

### THE HARD DRIVE

A name once uttered only by the computer club regulars. But thanks to the new PS2 add-on and built-in Xbox one, console games are about to change for the better. Store characters and skins, download extra levels, customise your loading wallpaper, even play 'organic' games that save over themselves. Imagine breeding a forest of rare Mews unique to your copy of Pokémon. Soon you may even be able to download Special Edition movie out-takes and add them to your DVDs.

### BATTLE OF THE CONSOLES

Never has the rivalry been so heated, but over the next year you decide who wins! Xbox has raw power, PS2 has the mass popularity, and GameCUBE has creative genius and GBA compatibility. But as Dreamcast proved, there probably isn't room for all three!

### GAME BOY ADVANCE

Still playing games in 3D? Get with the programme! SNES-style parallax, sprite-scaling and rotation (see The Past) are all de rigueur again, thanks to Nintendo's new baby. But with it comes all these old gaffers claiming this proves old-skool games are best. We'll let you in on a secret: they never looked this good.

### COMPUTERS

Some people say PCs are losing popularity. We say, check out the new desktop Sony VAIOs or the new Apple iBook. Digital technology means all machines, cameras, Walkmans, phones and consoles can share information. Take a photo of a baboon's arse, turn it green on your PC, record a fart and make a green, butt-headed Solid Snake with arse-breath. The technology is there.

## THE HOLO WALL

FOR KICKING: BUFFY THE MOVIE

A genuine Sony invention currently on display at the Explora Science Museum in Beijing. The wall-sized 'perceptual' computer screen reacts to movement and touch. Enjoy Dancing Stage EuroMix? Then imagine breakdance battling an on-screen opponent for real. Want to play a Buffy game? Perhaps you'll be able to interact with future episodes of the show. Although the lovely Sarah Michelle Gellar will probably be claiming a pension and sporting bingo wings under her arms by then.

GET YOUR BOO BREAK

## DATATILES

Another Sony prototype already in existence. See through tiles that react to a table-top electronic screen. Throw one down and your email appears on it. Another might have your favourite website, the movie channel or downloadable games. More than PS3, this could be the Sony entertainment machine of the near future. If you fancy watching that stuff in the top-right corner though, you might want to bring some tissues.

## GAME & WATCH POCKET WATCH

Nintendo's cross-console compatibility brings us this: a wafer-thin, multi-function toy. Personal organiser, mobile phone, Game Boy Supreme, clock and virtual pet all in one. With collectible chains to clip it to your belt for that latest pocket watch fashion.

YOUR HAND OFF  
DUTY, BEFORE I  
LET IT OFF!

### XBOX XTREME

With Microsoft, bigger is always better. The long-awaited Xbox 2 looks like a 1970's super-computer, complete with games on old 8-track tapes (ask your grandad what that is). Of course, with no room for the telly, the Immersion Bowl-X headset is required to see the image-rendered, clip-mapped 4D graphics. We didn't make up those terms, honest.

### TOTALLY WIRE-FREE

One day your kids will ask, "What were plugs?" And you'll reply, "They were needed to give machines power." And they'll say, "What was wrong with radiated Tesla beams?" Then visiting time at the old folks' home will be up, so they'll leave. Wire-free technology doesn't just mean no more tripping over joypads. Without horrible cables to hide at the back, TVs could be round and sit in the middle of the room, computers could be double-sided and sound systems could be tetrahedrons.

### COIN-CD and DVD

Of course, everyone will just download MP5s, but for hip DJs, mixing on old-skool CDs can't be beat, even though they'll be coin-sized triple-albums. And why still have DVDs at all? 'Cos the Star Wars Trilogy will only just have come out.

Thank you Diddit. Let's put them down by the stairs.

## WHAT THE SCORES MEAN

- 1 - Argh, it stinks!
- 2 - Abysmal
- 3 - Sucks a fat one
- 4 - Oh pur-lease
- 5 - Very average
- 6 - Hmm, not bad
- 7 - Pretty tasty
- 8 - Very good
- 9 - Essential
- 10 - An unmissable belter that defines the genre

1 Even getting in the lift is an unsettling experience in Silent Hill

# Silent Hill 2

Just about as frightening as anything on a CD can be

## OH MY GOD!

What really makes Silent Hill 2 are those moments of pure and utter shocking weirdness that are usually reserved for the pages of Clive Barker books or David Lynch films. In fact, to say that some of the grotesque scenes you'll be a part of are the stuff of nightmares is one hell of an understatement.

If you had nightmares like these, you'd probably be gurgling in an asylum right now. Just have a quick peek at this collection of sanity-challenging sights for an idea of what we mean...

This fraakish beast has been keeping this girl prisoner. God only knows what it's been doing to her...

1 A grosser scene you'll never see

2 Not even the women-folk are spared

3 These beasts plague your progress

44 Imagine all the people, living life in peace yoh-hu-ah-a-ha," a famous hippy once wrote. What a rubbish idea. It'd ruin videogames, for starters. We'd all be forced to spend hours playing sickeningly non-violent, upbeat remakes called Resident Goodness and Full-Life. We need the freedom to choose to cack our kecks in fear at unspeakable, decidedly non-peace-loving horrors. We need Silent Hill 2.

1 Anything could be turking in that fog...

So imagine this instead: James Sutherland has had a letter from his dead wife asking to meet her in the town of Silent Hill. Apart from his missus contacting him from beyond the grave, last time James visited Silent Hill, skinless dogs and corpses prowled the streets. So call him brave or call him mad (find out which if you finish the game!), but James sets off for the Hill. Cue you.

## HORRIBLY GOOD

You start at a motorway lay-by, overlooking the lake that provides the backdrop for the town of Silent Hill. The motorway tunnel ahead is blocked. You must continue on foot, clutching your wife's letter. A mist has descended, animal calls cry out from the woods as you make your way to the town. You are completely unarmed, alone and confused, creating a sense of vulnerability that never leaves you in your time in Silent Hill. This is survival horror at its very best.

The game plays much like others in the genre and the control method is close to the slightly clunky Resident Evil system. Combat is similarly a matter of holding a shoulder button to aim and bashing X to fire. But there are many touches that set this apart. For a start, these locations are fully 3D, so the camera is more dynamic.

Ⓛ The character detail is awesome

Ⓛ Rotting corpses stuck in great big tubes. Just one of the pleasant sights on offer

Ⓛ What will you do? Jump, or start crying like a girl?

As you walk, by holding L2 you use the right analog stick to move James's head, and with it the camera view. And when James notices an object, he'll turn his head to look at it as you move past it. Sweet. But the main difference is the way *Silent Hill* has a feeling of realism. You're an ordinary guy with a bad haircut rather than a hot chick with a grenade launcher. *Silent Hill* is like any other US mid-western town and there are no cheesy haunted houses with secret government installations beneath them. Instead of laser guns and automatic rifles, you fight with iron bars and hunting rifles – great for anyone who loves a game with a consistently believable atmosphere.

#### YOU SO STYLISH

The game also has a visual style of its own. The outdoor locations are veiled in a white shroud of clinging fog, giving the town an unearthly feel. Most of the indoor locations are nigh on pitch black, so you rely on your torch to navigate the deserted hotels, apartment blocks and bowling alleys.

Reflections of neon signs flicker in dank puddles. Pools of dark crimson form on the floor where your recently-killed foes lie. If you run, James's pace drops as he gets knackered, and when you stop he bends over, panting. It's a masterclass in creating tension and atmosphere.

To match the haunting visuals is one hell of a messed-up soundtrack. Instead

Ⓛ There's not that much in the way of weaponry available, so each new one you find is a god-send

Ⓛ Look after Maria well or it's game over

of music is an unrelenting cacophony of clanking metal, groaning and the echo of your own footsteps. As in the first game, a pocket radio James carries with him starts pumping out white noise when any creatures from the other side are near. This simple device adds bucketloads of atmosphere and plays an important role in the gameplay.

#### CUT OFF IN ITS PRIME

We've been glued to the screen ever since we first got hold of *Silent Hill 2*. It's the darkest, most stylish, most adult and most downright freaky survival horror game ever. Even Les was chilled to the bone.

But this may not be the perfect game for everyone. It's a bit of a 'thinker' and the pace is slow. The action is nail-biting but doesn't flow thick and fast, and the combat isn't as sophisticated as some may have wanted. Also, it doesn't take very long to complete, maybe 14 or 15 hours for the first time through on Normal level.

But for all that, this is pretty much the last word in the genre started all those years ago by *Alone in the Dark* and made popular by *Resident Evil*. Unless the next survival horror game makes some pretty impressive steps forward like fully interactive environments and more flexible control systems, it will most likely be little more than a slight shock next to the unrelenting terror that is *Silent Hill 2*.

#### CVG RECKONS

Its spine-chilling atmosphere will leave you speechless. A top survival horror. Steve O

**N**ormally, a guy wearing tight tights running round a city flicking sticky fluid at people would lead to arrest. But do it in America and you're hailed as a superhero and have comic books written about you. The problem is that no matter what radioactive powers you may have, your age will still catch up with you. And in gaming terms, Spider-Man has just found that out the hard way.

Because, while developer Neversoft has added a few new features to keep the interest going in this sequel, the control system and movement is now really starting to creak under the strain of keeping the sticky one on his toes.

**1** Web your hands up for extra-hardness

**1** Seems a bit harsh - he was only scrounging in the bins

**1** Spider webs onto... er, the sky

**1** Let's hope he's lost his fear of heights

### ELECTRO SHOCKER

With the first game being such a hit, the follow-up was inevitable, so we can be grateful they have actually put in some new features rather than just rehashed the same old formula. The web-flinger has new attack combos he can use on the array of thugs you meet, but until you face the bosses you can easily get away with relying on just one or two of them. You can also get new outfits, like insulated costumes that don't get affected by electricity - pretty handy when you're fighting a bloke called Electro.

But all these new outfits and special moves come at a price. The normally athletic web-slinger now moves like an old granny going to the post office to get her pension. He can only turn in 90° movements, which is okay until you need to line up a subtle move to a new rooftop,

or when you're fighting a boss and need to hit something with your web in a hurry. It gets very frustrating when you spend more time lining up a jump or a shot than actually doing it.

With all the secrets to unlock in the game there is a lot to do. But the bulk of the action involving swinging from roof-to-roof webbing thugs lacks variety and the controls feel clunky, which all erodes the appeal of the original somewhat. Some nice artwork can be found inside for die-hard fans of the comic books, but if you've played the first game to death you'll be hard pushed to live with this for any more than a few levels. After that, the novelty will most likely wear off and the control flaws will force you to realise that this just isn't fun any more.

The brains behind the Spider-Man games are also responsible for the awesome-looking Tony Hawk's 2 on GBA as well - maybe they should have given Spidey a skateboard.

## ENTER SANDMAN

A close-up, hand-to-hand scrap with Sandman (or any of the bosses) is just not going to do you any good

All that flying around the city leads to one thing - the inevitable boss battle. Going toe-to-toe with these guys isn't the way to beat them, so use your environment and special Spidey skills. If something is hanging precariously from a hook, chances are you can drop it on the head of the boss - you see how it works?

Make like a true superhero and run away to lob stuff at him from the high ground

## CVG RECKONS

More like Spider-Man 1.5 than Spider-Man 2. Looks tired and grimy and lacks variety. Les

Let's clear up any confusion right away. The new best footie game in the world isn't an ISS game. Yes, you read that right. But this isn't because FIFA and co have finally managed to hit the target instead of shooting well wide, it's because Konami has given the latest ISS game a new name. Pro Evolution Soccer is ISS Evolution 3 in all but title. What else has changed? Well, this being on PS2, it looks fantastic. Beckham looks and moves just like in real life, Owen is quick enough to give Germans nightmares, Steven Gerrard really smashes every shot he hits and Seaman looks like a girl from the back.

#### NOT JUST 'HIT AND HOPE'

The player animation is spot on, and your team-mates make clever runs into space when you're on the ball. It's very satisfying to thread a through ball to your striker and have him dance around the keeper for one-nil. You earn goals here with considered build-up play and tactical nous, not just by twatting a long ball and hoping for the best.

This is how the game looks on the most zoomed-in camera view. Very pretty, but unworkable if you're a serious PES player. Zoom out a couple of notches, and the park opens up for your visionary passing moves

The line-ups are shown just like on the telly

#### IT'S JUST LIKE WATCHING... TV

ISS games have always been bang on the money when it comes to reproducing the feel of football on a console, but have never amazed looks-wise... until now. Next to this, ISS Pro Evolution 2 looks slow, jerky and rough around the edges. Players in PES now move with incredible smoothness, hit volleys with a crack and march onto the pitch with the game camera filming them like it was a proper televised game.

A sweep around the stadium shows off the fantastic detail. Munich's Olympic Stadium (where England beat the Germans) and Monaco (where Liverpool beat the Germans) look incredible here

# Soccer

Like real football, you can mix up the pace at will. Every player has four different run speeds, making Maradona runs up the park a tantalising possibility. Special moves are at a premium, and only the best players can dummy and feint with consistent effectiveness. Zidane is no longer a liability because of his lack of pace – his real-life skills are carried over so he can turn on a dime and hit long balls straight to feet.

Defenders aren't nearly as effective going forward, but earn their keep as they climb over strikers to head away long balls. Donkeys like Tony Adams will fall over if they try a step-over, but master strikers like Batistuta can feint inside and out – righting a major wrong for people who played previous versions.

## BE A SVEN, NOT A KEVIN

The authenticity extends to tactics. If you're getting overrun in midfield, drop a striker back in and you'll notice the difference straight away. Players also tire as a game progresses, and you'll need to juggle your subs wisely to win. Activating an in-game strategy with a button press could be all it takes to jolt a stagnating nil-nil into life.

At its core, Pro Evolution Soccer plays similarly to ISS Evolution 2, meaning a couple of problem areas go unpaired. You don't get enough control of where to play the ball at corners and throw-ins, and the roster of teams looks pitifully small next to those of This Is Football

2002 and the FIFA games. Seven English club sides are included: Man U, Arsenal, Leeds, Liverpool, Chelsea, West Ham and Newcastle, alongside the cream of Europe and every significant national team.

## FIGO? AT WEST HAM?

The best option for a long solo game is the Master League mode, where PES imagines up a 32-strong world club superleague. You start in Division 2, and try to lead your club to glory. Every win earns points to spend on players, so with enough good results Figo can play for West Ham. Previous games saw the challenge evaporate when you'd built a dream team, but now you have to pay players a retainer at the end of each season to keep your squad together.

ⓘ Scrutinise the animation in replay. Absolutely flawless

ⓘ "Gut goal Carsten! Ve vill beat ze Englanders easy, ja!"

The developers paid special attention to accurately modelling the faces of 200 top players.

Multiplayer rules as ever, with the bread and butter two-player game complemented by some smart game AI that makes even a four-on-four game a joy. Perfect, then? Not quite. It seems harder than ever for a good player to dominate a weaker one, and players will occasionally inexplicably shoot wide from an easy chance. But hey, that happens in real football. PES will often chuck you a boring nil-nil draw as well, but that's like real life too. You wanted real football. Now you've got it.

**N**o-one bats an eyelid if a man dressed as a giant toddler struts around of Soho, and likewise the folk in AirBlade don't seem to find anything unusual about a guy whizzing around on the world's first hoverboard. CVG doesn't care much for weirdos parading as weeners, but hoverboards rock and deserve our full, undivided attention!

Using almost exactly the same controls as a Tony Hawk's game, AirBlade has you floating around large arenas, popping nutty tricks and carrying out objectives that are pretty similar to, well, a Tony Hawk's game. But unlike other extreme sports titles, AirBlade provides you with different missions (against the clock) on each level. Try nailing the bad guys with your hoverboard, disrupting giant satellite dishes, grinding dodgy stretch limos and leaping on to a low-flying helicopter.

This is all great when you're boosting all over the place, grabbing poles and swinging around like an orang-utan, but AirBlade's hoverboard gimmick means that the gameplay is unavoidably floaty.

#### THE FLOATER BIT

If you've ever played a Pro Skater game, you'll know how difficult it is to stay on your board and pull off a string of tricks or one major stunt - ball-crunching falls are common. But whenever you fire off a trick in AirBlade you don't have to think much about skill, timing or balance as you automatically land on your feet.

This soft and cushioned approach to stunts takes the edge off what could have been a potential bail-fest, and you'll be hard-pushed to fall off your board short of pelting headlong into a wall, kamikaze style. Broken down, AirBlade looks as visually awesome as the up-coming Tony Hawk's 3, but the action is geared towards gamers who like their extreme sports nice and tame. So if you're a bit of an unco-ordinated amoeba or you just love hoverboards like the rest of us, take a look.

## LOOK MUM, NO WHEELS!

You have to carry out the objectives on each level within a strict time limit, but you can use the arrow at the top of the screen to guide you through the challenges. While this aid may take away a little of that buzz you get in other similarly structured games, time is short making it an invaluable tool that keeps the action fast and fluid.

**H**ot on the heels of THQ's MX 2002, MXrider brings with it a similar blend of fast racing action and certifiably crazy and impossible stunts, but in the race for motocross domination Infogrames' bike game is just that little bit dirtier, loonier, more intense and entertaining than its direct counterpart.

Intuitive racing and stunt controls make MXrider easy to pick up, but, as with MX 2002, tricks don't play a major role when you're racing in the Championship mode, as they're more for show than anything. Dirt and water splash onto the screen and cack your rider in mud as you smash into other AI competitors, and these cool, if basic, effects help add the sensation of speed and drama to the action. And the fact you can adjust the other AI riders' aggressiveness from tame-as-pussycats to hard-as-nails makes races feel quite hardcore.

And as good as they all may look, they're hardly likely to get you genuinely cacking yourself as you realise you've clipped the back of another car and are heading towards a wall at 200mph. So what has EA, which is more prone than most to annual cash-ins, done that might make this latest instalment actually worth getting?

The answer – not much. The stats and drivers are all bang up to date, so Button will be a load of crap, Coulthard's car will break down a lot and Schumacher will win everything in sight – unless you stop him, that is. But apart from that, you're looking at a few weather effects, your driver peeling a strip off his visor and a handling

As we're finally getting to the stage where they can't really do much more to these games apart from update the stats and tweak the visuals every year, why don't they just put in an editor that lets you do it yourself? There's your buying decision right there. Can you handle an F1 game that tries to be too realistic for its own good, or do you want something that is actually fun to play?

**N**ext-gen mania has violently shoved N64 out of the window, but as the machine helplessly spirals down towards the console graveyard far below, there's still time for one last party, Mario style.

With buckets of new mini-games and a new Duel mode, you'd be forgiven for initially thinking this is an all-singing, all-dancing fresh experience. Which it ain't.

Though mindless mini-games are fun, after a few days of controlling the little plumber through tiny and restrictive scenarios, you'll be longing for the kind of meaty gameplay and free landscapes found in Mario 64. It's frustrating that Nintendo invested so much effort into the Party series, but denied us the joy of a second Mario 3D adventure on N64. That said, with GameCube and Mario Sunshine on the horizon, this should be time for celebration so let's at least try to get into the party spirit. Conga anyone?

## ROYAL RUMBLE

The Nintendo superstars from MP2 are all back as controllable characters, as well as Waluigi and Daisy. And in true Mario Party tradition, the entire game revolves around the heady figure of 70 new multi-player mini-games that litter the five differently themed boards. Nothing startlingly new or complicated here, but give the Battle Royal mode a bash with

Spin and hope, as luck plays a big part

some mates and you'll have a good laugh as you get up to all sorts of crazy activities in some brilliant little games. However, though the games are great fun to play once or twice, they're pretty brainless and the novelty soon wears off. All the games are original, but they're still in the same vein as the previous Party games, so you never really feel dazzled by any of them.

## PARTY FOR ONE

The last two games didn't really focus on the single-player game, and MP3 has tried to remedy this with its Story mode. Though the action is more structured than before, playing against AI characters just isn't much fun. When you're playing with buddies you get to dig each other in the ribs and swear at one another as you button-bash through a race, and it's this feeling of constant silly interaction that's the best thing about MP3. But when you're on your own, it's hard to throw yourself into the single-player experience.

In the Duel Mode two-player option, you choose a

partner from a selection of 12 Nintendo bad guys. You pay your hired mercenary partners by earning cash in mini-games with your main character, and your buddies fight it out on the board. It works quite well, but the gameplay is too bitty and nowhere near as fun or fast as something like Pokemon. And this sums up MP3.

The action is turn-based, but not quick and fluid. As you wait for others to have their turn and for mini-games to kick off, your attention will drift. The gameplay is far too stuttered unless you're with a pack of friends. The clue is in the title: Mario Party. Have you ever been to a party with fewer than four people attending and had fun? Thought not.

## GOING LOCO

MP3's motto is clearly 'variety is the spice of life', having thrown as many little games as physically possible into one cart without it exploding. But built within a boardgame structure of dice-rolling and turn-taking, you'll find yourself switching off unless you're in the thick of the action in a mental mini-game.

**G**ames like *Commandos 2* ought to come with a special health warning. You may worry that straining too hard to lay an arse egg can make you prone to a fatal embolism. Don't. Worry about straining so hard while playing *Commandos 2* that your head drops off and sits gibbering to itself on your lap. It's that hard. But it's also worth pretty much every second you spend playing it.

#### ON YOUR BELLY, SOLDIER

Original *Commandos* veterans will know the drill – tactical, squad-based action with heavy emphasis on sneakage. Hours of crawling on your belly, posing as Nazi soldiers, hiding bodies, studying guard patrols, punctuated with occasional bursts of frantic action. Your first full mission sees you infiltrating a sub pen, stealing sleeping pills and drugging an officer's drink to get the key to a safe containing an Enigma machine. Plus you get new objectives mid-mission. Phew!

All the old team are back along with three additions: the thief Lupin, saucy seductress Natasha and Whiskey the terrier who, unlike Natasha, is a real dog.

#### VITAL STATISTICS

Some of the levels are massive and initially bewildering, but you get maps and even location shots of what you're looking for. It's just one of several cool features which make the complex scenarios a bit easier to manage, along with being able to set your troops to fire on sight.

## SKINNING A CAT

Like a real commando, you're encouraged to think on your feet and be tactically flexible to complete your mission. There's no right way to do it, just your way, Marine.

On the tiny first training mission your lightly armed team of two are the thief, Lupin, and the engineer. How do you play it? Plan A: go gung-ho and wade right in all guns blazing? Or Plan B: stay undercover and play it sneaky. It's up to you and there's nothing to stop you doing a bit of both. Here's an idea of how the different approaches play out...

Engineer kills guards for a machine-gun and uniform

# Commandos 2: Men Of Courage

### Like starring in your fave old WWII movie

It's a touch ironic that as Brits have had to rely on the Germans, who were neutral in WWII, to make a game about an elite fighting unit invented by... the British.

The level of detail lavished on the dynamic environments and AI will have you weeping for joy too. From the different ways enemies respond to alerts [which will keep you on your toes], to seeing Nazi officers make their soldiers do push-ups while you're waiting to sneak past – you'll be constantly marvelling at what they've crammed in. Before asking yourself how to use it to your advantage.

#### SAVING GRACE

Anyone can tell from the screenshots that *Commandos 2* looks razor sharp, but what's not so obvious is now you can go inside buildings and also get to see the action from four directions. And you'll need every one of them to stand a chance of getting on top of your mission objectives.

Thankfully they've included unlimited saves to take the edge off the pain of failing to take out that tricky guard for the twentieth time. Though when you get stuck it's often worth a re-think as the way you go about missions is limited only by your tactical imagination. Add in three difficulty levels, hidden items that unlock new levels and a multiplayer mode, and we're talking about a lot of playtime.

#### LONG, DEEP AND WELL HARD

*Commandos 2* isn't without its faults, such as pathfinding errors forcing you to change camera angle, but these are mere niggles. Really, the biggest criticism that

Split-screen keeps track of everything

will be levelled at is it looks and plays much like the first and can be every bit as difficult and frustrating. But with this amount of extra depth and graphical finesse, we can't see fans of the first game complaining.

**I**f you still think Gran Turismo 3 is the be-all and end-all of racing games, you may wish to turn away now as we will be talking about something that will be new to GT3 fans. Fun, carnage, outrageous driving antics and huge pile-ups that you really want to be a part of. Just the kind of things that would drive GT3 die-hards to bang their heads against their accurately rendered airbags in disgust.

#### PUTS THE CAR IN CARNAGE

Burnout is *not* trying to rival GT3 or any of those super-realistic F1 games. It could worry about perfect gear ratios or spot-on racing lines, but it doesn't. Instead, with a passing nod to racing games of old like Need For Speed, it gives you the chance to handbrake round corners and race the wrong way down the road, scattering the oncoming traffic. Then when all else fails

and you get to wipe out, you can forget those quiet little crunches into walls that leave your car undamaged; you're going to wipe out in style. And the more stylish your wipe-out, the better rewarded you get.

With so much emphasis on exciting racing action, there'll be moments that will have you swaying in your chair, wincing and then laughing as the carnage mounts up. You'll panic as you try to squeeze between two trucks to gain extra boost points, only to see one indicate to turn into you. You'll sway in your seat when your boost gauge fills and you hit the turbo button as the screen blurs and it becomes a case of *when you lose control, not if.*

#### DEMON DRIVER

Whether you're creating bedlam in the championship or going head to head in the two-player, you don't have to worry about little things like racing nicely. If you get the chance to gently nudge an opponent into an oncoming truck, take it, 'cos you can bet your exhaust pipe that they'll do it to you. Our favourite dirty trick is to hit a patch of dirt just as the chasing pack gets close so that they can't see, then laugh when they wipe out as a truck ploughs into

them. Little touches like this are what makes this game so much fun.

Any game that makes a point of letting you view a replay of your crashes is never meant to be taken as a serious sim, and it won't take too many handbrake turns around hairpin bends before you wonder why you ever bothered spending hours on learning how to drive on the sim games. It comes close to being a *Now That's What I Call Music* of racing games, taking all the best bits of other titles and combining them onto one disc. How do you take your racing games sir, one lump of fun or two?

Need for Speed on DVD has a big influence. The crashing was more fun than the racing, but it wasn't intentional back then!

Damn lucky then that TC2 works with the old G-Con 4S, which only costs about eight squids second-hand. Get in!

the closest you can come in a videogame to feeling like a full-on Hollywood action hero.

You and your partner jump out from behind your shiny red sports car and storm into a forest with all guns blazing. Taking out a few hundred bad guys, dodging falling trees and blowing up a battle tank, you then tear through a warehouse. Clambering aboard a moving train, you shoot some more goons then fight a giant beefcake who beats you about the head with a cruise missile and peppers you with machine-gun fire from a helicopter. Phew, and that's just six minutes in!

The feeling of non-stop action throughout TC2 rocks, and by the end of every session you're left pumped up, breathless and nursing a throbbing trigger finger.

## ALL NIGHT SHOOT-OUT

As with all lightgun titles, gameplay becomes unavoidably repetitive after a while in TC2. But to deal with this problem the game at least tries to spice up the proceedings with a unique single-player Double Gun mode, and some top two-player co-operative action.

And sure enough, the multiplayer will hook you in for many extra hours of play, whether you've got the luxury of iLink or not. Romping through the levels, covering your mate's behind while trying not to shoot him in the face is pure class.

However, as most of us aim like drunk monkeys with our non-shooting hand, the Double Gun option is more for the effect of making you feel like a car-jacking gangster than anything else. The actual gameplay is only altered by the fact that you have twice as many bullets and a pistol in each hand. Fun, but little more than a novelty.

But what'll really keep you up at nights and crawling back for more are the wickedly difficult mini-game Crisis Missions. Having to plough right through a wall of tanks and oncoming rocket fire within a stupidly tight time limit – in the knowledge that a single hit will take you out of the picture – is one of the easier challenges you face.

You'll need Olympic aiming skills and you'll have to hammer the trigger like you're playing Track & Field to complete some of the scenarios that crop up in this full-on arcade blaster. But the sheer intensity and addiction factor of these mini tasks will turn you into a happily gibbering gun-junkie.

#### HOT SHOT, PART DEUX

PS2 owners should feel very smug, as TC2 is exclusive to the beautiful black box. The Story mode with its limited credits is admittedly short, but to get to the end you'll have to be a seriously good shot. And with loads of extra features, stunning animations, blinding visuals and cool scenarios, this is a quality arcade-style actioner and a worthy follow-up to the classic PSone game. The only catch is that you need one – preferably two – lightguns to get the most out of it.

So if you don't mind getting blisters on your pinkies and cramp in your shoulders, try TC2 and be wowed by the best console gun game ever.

There's a preview with the old E-Can 45s: when hitting fire you need them thanks to reach the side buttons to duck and reload.

#### CVG RECKONS

Gun games may not appeal to everyone, but the sheer hardcore gun-fighting brilliance and awesomely animated scenarios make TC2 king of the hill. Mike

House of the Dead 2 (DC), Time Crisis (PSone)

Just when you think you've got rid of all the bad guys, another troop pops up

You'll get thrown about the screen, making it even harder to hit the targets

None of the bad guys are afraid to get up close and personal

Don't hit your partner

#### TOTAL RECOIL

TC2's firefights are packed with so much blistering action that your eyes may well swell up like tennis balls and bust out of your head. The screen is constantly alive with aggressive and inventive attackers, including flying ninjas, barrel-tossing blue dudes, rocket-launching redneck commandos and abseiling sharpshooters. You'll hardly see a single static moment in the entire game.

In true arcade style, every level ends with a good old-fashioned boss confrontation. Bok!

# FIFA Football 2002

## FIFA may be pretty popular, but it's still not perfect

COST: £49.99  
OUT: NOVEMBER 9  
PLAYERS: 1-8  
DEVELOPER: EA  
PUBLISHER: EA

4 The crowd animations and flare effects are sweet

5 Weave your way through the defence and let rip

**S**parks are bound to start flying when gaming's two biggest football franchises go head to head. It's an age-old battle that's constantly seen FIFA come up trumps in the sales charts, but repeatedly fall second place to the mighty gameplay of ISS.

But this latest FIFA update has made serious efforts to make the game feel more in-depth, flexible and exciting. The new features that have been thrown into FIFA 2002 are indeed great ideas and show a positive and innovative move on the part of Electronic Arts, but with drastic changes in gameplay there are bound to be some teething problems. And with a £50 price tag, we'd like this football game to have a glistening white set of gnashers and impeccable dental hygiene.

### ON THE RUN

What stands out like a big red boil on Beckham's nose as soon as you start kicking the ball around are

the new dotted lines appearing all over the place when either player is on the attack. There's no need to adjust your telly though, because these lines mark the direction of players who are making runs off the ball. And what's cool is that you can select which player you want to dart forward by scrolling through them using the L1 button. Great idea, and it looks easy enough, but successfully connecting a pass to their feet as they plough into the box is like trying to thread a cucumber through the eye of a needle.

Plus there's a new 'weighted pass' feature, which enables you to measure exactly how hard you twat the ball. All

of which makes pulling off great through-balls an art reserved solely for football experts and those people who are patient enough to practise for many long hours – which, admittedly, FIFA nuts normally do.

### WHO THE HELL IS THAT?

As expected, FIFA uses all the official clubs and names, but this is somewhat of a wasted opportunity as none of the players actually look much like their real-life counterparts, which could disappoint many hardcore fans.

Even with the new changes, this still feels and looks very much like a FIFA game – you can still pull together simple and effective passing moves, and smack ridiculous shots at goal, so fans of the series won't be disappointed. But with the awesome Pro Evolution Soccer arriving on the scene only a couple of weeks after FIFA's release, EA's golden boy is going to have some pretty stiff competition.

## PULLING OFF TOUGH BALLS

Build up the play and push up into the other team's half. Then set one of your men off on a blistering run

Now try to land the ball in their path. If you do it first time, you're a gaming god

The basic FIFA gameplay is still in place, but there have been a couple of major additions made. You can send players on runs and perfectly weight passes onto their nimble toes. Only problem is, you'll have to be a gaming guru to master this art within the first few hours of play.

## CVG RECKONS

New tricks and turns mark a new direction for FIFA's gameplay. But at ten quid more than PES, we want a near-flawless football game... which this isn't. Mike

Six new mutants and arenas aren't really enough, but for a dose of simple and reasonably fluid superhero punch-up action, X-Men: Mutant Academy 2 is actually quite good. Not nearly in the Tekken or Street Fighter league, but worth a look if you've exhausted all your other fighting games.

Vintage carnage is on offer as you take to one of many different vehicles, stugging it out in deathmatches or endurance fights with a bunch of other guys. The locations aren't quite as gritty and atmospheric as Sony's game and the action doesn't have that edge-of-your-seat touch, but it's well worth a look for fans of the series who can't wait for Twisted Metal Black.

**A**s the third Pro Skater game looms for PS2, Konami unleashes its debut skateboarding title as a pre-emptive strike. But it's more of a party popper in the ear of General Hawk than a daring napalm attack.

ESPN XGS is a mediocre extreme sports effort that isn't a patch on even the original Tony game on PSone. It looks sweeter, but there's no fluidity of movement and nailing tricks is awkward. With objectives that don't even attempt to push the genre forward, this is truly uninspired.

Why wait for WaveRace on GameCube...

COST: £39.99  
OUT: NOVEMBER

DEVELOPER: RAINBOW STUDIOS  
PUBLISHER: INFOGRAMES

**N**intendo loves harping on about how you can only play certain games on a Nintendo machine – games like WaveRace. Not any more, as Splashdown has stuffed WR's head down the dunnie and is poised to pull the flush any second.

With the most visually stunning water effect seen in any game anywhere, Splashdown gets off to an impressive start. The water itself varies in colour and physics on most of the courses – from the clean-looking waters of Nice to the murky blackness that is Loch

**U**m, you need to be in the water

**N**o, not quite, try the water!

**T**here you go, see, some water sport action is clearly the way forward

Ness. Course layout screams for you to experiment. Sweeping curves, long straights and tight bends are perfect for showing off how well you've mastered the initially awkward controls, while big ramps mean impressive tricks.

Modes on offer in Splashdown include arcadey Championship racing, Career where you open up the game's secrets, or Free mode for driving anywhere and trying out manoeuvres at your own pace. Perseverance is well worthwhile, especially for embarrassing a mate in split-screen.

Splashdown dumps in the water and leaves the chasing pack to ride over its log. Nice.

With in-depth stats on more than 100,000 players in 26 leagues, it's fortunate you can cut it so it only gives you the information you really need to run your squad.

This update features an improved media interaction section, the chance to argue with the directors about money, and loads more. Out of all the football management games, Champ Man reigns supreme, and this latest version is no different.

**I** Not the first time dinosaurs have featured in C&C but they're worth a couple of laughs

**T**wo things are certain in life: death, and the inevitable add-on for Westwood C&C strategy games. This follows the usual Red Alert time-twisting plot, plus new missions, units and buildings offering fresh strategic options.

Right from the first levels you're fighting for survival, and the best defence is offence. Given the game name, you want to start out as Yuri but you can't in solo, and the fact you need the original arte both bummers. Predictable yet solid, C&C nuts will lap it up.

**I**t's not April 1st already, is it? Surely Empire can't expect us to take this waste of a CD seriously?

With confusing layouts, laughable 'action' graphics and a system where you seem to stumble from one ugly set of stats and screens to another, it proves one thing for sure: you get what you pay for.

It's not a tough decision: Champ Man's slightly more expensive but on-the-ball management experience, or this tacky effort which is destined for bargain bins everywhere. Hmmm...

CVG'S INDISPENSABLE GUIDE TO THE BEST WAYS TO KEEP YOUR

## ADVANCE WARS

COST: £34.99

PLAYERS: 1-4

OUT: NOW

DEVELOPER: NINTENDO  
PUBLISHER: NINTENDO

Only Nintendo could do a war game and make it a) look cute, and b) one of the finest GBA games available yet. You're a rookie Commanding Officer in charge of enough mobile firepower to take out a small country or two, and that's

exactly what you have to do to save your own homeland from invading forces. Advance Wars is turn-based strategy heaven and is every bit as essential for your GBA as Mario Kart.

### SIR, YES SIR!

Nintendo knows you've probably had no interest in strategy games so far in life, and has done everything possible to craftily tempt you into wanting to play the game. It's impeccably presented for one thing, and there's a cracking story with strong characters to keep you hooked. By the time you've got through the ten mandatory – and very lengthy! – training missions you'll be the ultimate CO, versed in the ways of combat and ready to wage war across land, sea and air.

Like any strategy game, from chess to Pokemon Stadium, your different units – in this case submarines, infantry squads, planes and such – all have different

Sea battles are tough, so you'd better watch out for enemy subs

Execute your commands then watch your troops fight it out! Cool!

The pointy finger selects units

Moving units strategically is key

strengths and weaknesses. You have to figure out the best way to use these attributes to either take out all of the opposing force's units, or by capturing their HQ. Only then will you feel victory licking at your lobes.

### THE PERFECT WAR

The fun comes from the careful plotting of attacks, which are brilliantly animated, and from the sheer amount of depth of play. There are dozens of different unit types, more than 100 maps and a whole host of multiplayer games to play. You can even design and trade your own arenas with mates. Advance Wars is challenging, addictive and highly original. It's also an outstanding example of what can be achieved on GBA with a little thought and effort. Absolutely blinding.

## ESPN X GAMES SKATEBOARDING

COST: £34.99

DEVELOPER: HONOLULU STUDIO

PUBLISHER: KONAMI

Who put glue on the halfpipe?

As extreme as a walk in the park

Back To The Future made skateboarding cool way back in the '80s, and the Tony Hawk's games are solely responsible for the urban sport becoming super-chic over the past few years. And, as you'd expect, some folk are trying to cash in on this recent phenomenon. However, the T-man must be making it all look just a little too easy, because ESPN X Games doesn't even come close to recreating the experience of skateboarding.

Looks like a bad 2D platformer

Tricks feel wooden and clumsy

### BAILING OUT BIG TIME

Once you've hopped on your board and hit the skate park, you'll initially feel rather confused by the overhead layout and stupid cut-away side-scrolling 2D scenes that constantly break up the action. Then you'll feel completely disgusted and disappointed by the clumsy controls that make pulling off tricks difficult and totally unrewarding. Add to this the fact the courses are tiny and the graphics are painfully weak, and you could say that this truly sucks. Big time. If Tony on GBA is considered the king, then ESPN is the lowly tramp that sits outside the castle walls sipping paint thinner and stinking of wee.

## FINAL FIGHT ONE

COST: £34.99

PLAYERS: 1-3

OUT: NOW

DEVELOPER: CAPCOM

PUBLISHER: UBISOFT

Even though they're older than time itself, Bruce Lee movies still kick ass. For many retro gamers Final Fight One is just as much of a classic as Enter the Dragon. It was one of the very first scrolling beat 'em ups that had sprites as big as its gameplay and arcade and SNES punters loved it. But unlike Bruce's awesome movies, Final Fight hasn't aged well at all.

### YAWN 'EM UP

As is often the case with retro re-releases, if this didn't have the heritage to back it up, it'd get bundled into a van for a good drubbing. The Final Fight name saves it from this fate, but only for players who remember the original. Less crusty GBAs will find the gameplay repetitive, the limited animations laughable, and get bored with it after the retro appeal of the first few goes wanes. Save your money for the much better Street Fighter II instead.

## ESPN FINAL ROUND GOLF

COST: £34.99

PLAYERS: 1-4

OUT: NOW

DEVELOPER: KONAMI  
PUBLISHER: KONAMI

Golf is probably quite exciting for the professionals who play it for fat cash prizes, but as a videogame it's hardly going to rival Mario Kart in the frantic play stakes, is it? Still, Final Round Golf manages to be a pretty good digital rendition for people who like to hit defenceless little dimpled balls with big sticks.

### SWING TO WIN

There are 14 characters with varying skills and five fairly interesting courses to master, along with a four-player link-up mode for championships with your mates. It's pretty user-friendly and one of the most playable golf games in recent memory, but it will only really be of interest to the golf fan.

## STEVEN GERRARD'S TOTAL SOCCER 2002

Track the ball and get ready

Presentation is pretty swish

COST: £34.99

PLAYERS: 1-2

OUT: NOW

DEVELOPER: EXIENT  
PUBLISHER: UBISOFT

It seems all the big Premiership players are pimping their names out to promote footie games for a little extra pocket money, but Steven Gerrard need not feel too much like a soccer renner boy because 'his' game is actually quite good.

### BANANARAMA

With a top-down view and basic graphics, it's nothing special to look at, but once you start knocking banana-curling shots at goal and stringing together passing moves you'll be hooked. There aren't loads of special tricks, flips and all that palaver, but the action is fast, fluid and addictive, and that's all you want in a handheld footie game.

DEVELOPER: DENKI  
PUBLISHER: RAGE

Veteran puzzlers ChuChu Rocket!, Mr Driller 2 and Tetris Worlds are all headed for GBA, but no matter how much we love and trust these big names, it's time for more new talent. Kuru Kuru Kururin proved it could be done, Hot Potato had the right idea, and now comes Denki Blocks - Game of the Show at ECTS. But considering the other contenders for this 'high accolade' were mostly crap PC real time strategy games, it's no surprise that Denki Blocks came out victorious.

As you might have guessed from the name, there are blocks involved, and the basic aim on each of the many levels is to

Smiles abound in Denki land

Two-player joy for girl and boy

stick and slide corresponding coloured blocks together to make certain shapes in as little time and using as few moves as possible. Yes, it all sounds and looks a little bit Sesame Street, but Denki Blocks is actually quite a sophisticated and difficult game - especially once you've conquered the early levels. It may not as original or addictive as Kuru Kuru Kururin, but it's still a clever and tough strategic little puzzler nonetheless.

# LADY SIA

COST: £34.99

PLAYERS: 1

OUT: NOW

DEVELOPER: RFX INTERACTIVE

PUBLISHER: TDK MEDIACTIVE

In the chilly wastes, our Sia feels the icy breeze around her nips

Sia's got issues. She's been sent out on a mission to free her people from oppression using a big sword and some nifty footwork. She also has the unsettling habit of regularly morphing into a giant best-woman and running rampage. In the scary female stakes at least, Sia beats Xena and even the hatchet-faced sourness of Anne Robinson.

## BLONDE AND VICIOUS

You probably wouldn't want to date Sia, but any right-minded platform game fan will definitely want to spend time playing her game. Spanning 24 massive levels across four lusciously drawn worlds, Sia's hacky-slashy platform-puzzle adventure is one of the finest adventure experiences on GBA. It's not bursting with originality, but what it does do so well you can't help but fall for the mixture of intense and often brutal swordplay and the simple but enjoyable puzzling. The fantastic enemy characters, incredible boss fights and stunning graphical style seal the deal. A surprisingly good platformer you should definitely check out.

# BLOCK-OFF

## TETRIS BLOCKS VS DENKI BLOCKS

Forget dance-offs, Run DMC, and all that break-dancing nonsense, because block-offs are definitely the way forward. Check these moves...

ROUND

1

The granddaddy of puzzle blocks steps up to the plate with an almighty acrobatic display, spinning frantically and displaying its many forms – T, stick, snake, square, and the impressive L-shape.

ROUND

2

As the Tetris blocks sit back smugly in a tight huddle, the Denki blocks show off their skillz. In a dazzling show of sticky magic, loads of single Denki join together to form one massive mutha of a block.

ROUND

3

Hundreds of Tetris blocks suddenly fall from the sky, crushing all the Denkis and creating a mile-high block mountain. The Denkis never had a chance against such awesome block-rockin' feats.

# AND THE REST...

## JP3 PARK BUILDER

A busy park will rake in the cash

Build the ultimate Dino theme park – just watch out the attractions don't escape and start munching on the punters. It's tricky to get to grips with at first, with loads of detail, but if you put in the effort you'll love the amount of freedom given to you.

\*\*\*\*\*

## LEGO RACERS 2

Lava levels cause carters fiery pain

It's adventure racing with the cup-handed LEGO folk. Complete challenges in Story mode to get further or challenge mates in multiplayer. It's clearly aimed at younger players and the races are too easy, but still moderate fun.

\*\*\*\*\*

## LEGO BIONICLE

It's hardy Zelda, but fairly playable

Bionicle's a massive RPG-style adventure that's fairly good fun, albeit in a generic way. There aren't many gameplay surprises and it's a bit goodie-two-shoes in theme. Graphics are nice though, and it at least stays faithful to the Bionicle world.

# POKEMON CRYSTAL

PLAYERS: 1-2  
 OUT: NOVEMBER 2  
 DEVELOPER: NINTENDO  
 PUBLISHER: NINTENDO

Games phenomena such as Pokemon are like the trots - they don't happen often but, when they do, the releases just keep on coming. And once you've got the bug, there's stuff-all you can do about it - just try to get on with life until you're cured. So, since there's still no sign that the gaming nation is falling out of love with Pikachu and chums, fans shouldn't be surprised that they're now expected to raid their piggy banks yet again. This time it's for what is basically an expensive upgrade - just a few months after Gold and Silver.

## "The definitive handheld Pokemon game"

### PIKACHU LAUGHS AT YOU

The basic Crystal gameplay is identical to Gold and Silver. The main storyline and principal characters are unchanged, although some of the trainers and incidental characters that you meet on the way are different. Aside from an all-new animated intro, the game begins in familiar fashion but you'll soon start to notice the enhancements as you retrace your first steps into the wilds of Johto.

During battles you'll see that all the enemy Pokemon now herald their arrival with a cool animated taunt, kind of like a Pokemon version of WWF wrestling. It's quite a shock to see Machop twitching his muscles at you or Grimer poking his slimy tongue out.

Other cosmetic tweaks are less immediately obvious but equally impressive. Certain areas of the map have been given a Jynx-sized lick of paint in terms of colour and detail, while your trusty Pokedex features completely new descriptions revealing previously unknown facts about your beloved critters. Meaningless drivel to some, but pure poetry to Pokemaniacs.

Caterpie wiggles his impressively animated proboscis

Catch the Unown Pokemon and unravel the secret messages in the ruins

### BEACH-FRONT BATTLE

Aside from the new animations and glossy graphical touches, considerable improvements have been made to the mini-games and side-quests in Gold and Silver.

The new addition that most Pokemon fans will be uncontrollably drooling over is the Battle Tower that has miraculously sprung up on the seafloor in Olivine City. Well, at least it makes a change from deckchairs, swingboats and candy floss stalls. The Battle Tower acts like a mini version of Pokemon stadium, where you can enter a team of three Pokemon against some of the toughest Poke trainers in the land. The Ruins of Alph have also been expanded to reveal a massive treasure hunt quest which finally solves the mystery of the Unown Pokemon. There's even a roof market on the top of the Goldenrod Department store where you can use binoculars to spy on your neighbours. Cool.

### GOTTA BUY 'EM ALL

Is Crystal a rip-off? When compared to Pokemon Yellow, probably not. There are just about enough extras to justify Pokemon fans handing over their cash. Still, it's hard not to bang your head against the wall with frustration at the fact that Gold and Silver were ever released at all in their original incarnation when something so much better was lurking in the wings.

Now, what did you  
say your name was?

Go girly in Crystal if you want, we won't judge you

## CVG RECKONS

Gold and Silver have been tweaked and buffed to within an inch of their shiny lives to produce the definitive handheld Pokémon game. But is it fair on the fans' pockets? Find out in the review next ish.

## DRIVEN

Good old Sylvester Stallone has been recreated in pixels in videogame licences harking right back to the classic '80s cheese-fest Rambo. So it's rather strange then, that in *Driven* – the licensed game from the forthcoming movie – Sly's digital self looks much younger than he did way back in his Rambo bandana-wearing days. Will the wonders of modern technology never cease?

Like a bolt of lightning, you boost through a gap and sprint for the line

The aerial camera view makes it easy to judge corners, a la *Micro Machines*

### SPEED ADDICTION

Regardless of Sly's digital makeover, *Driven* looks to be a fairly decent – if not all that original – driving game, offering arcade challenges, multiplayer modes and an exhaustive story game. Graphically, it's not much of a step up from GBC, but the game is fast, fast, fast. So much so in fact, that it could well turn out to be the most exhilarating 'proper' racer on GBA.

Bok! Thwak! Kapow! Hurt the bad guys and make comedy noises for added fun

DEVELOPER: **UBI SOFT**  
PUBLISHER: **UBI SOFT**

Make sure you've packed some kind of dangerous stimulant into your utility belt – it looks like that'll be the only way you'll get a buzz while playing this GBA Batman adventure. *Vengeance* is part-platformer, part-racing game and part-puzzler but, as is often the way, the various gameplay elements don't seem to get all that well.

### BAD-MAN?

The version we played was pretty early and the developer has worked on it since, but we're still not convinced. The platform game sections felt as generic as anything seen on GBC and the combat horribly repetitive. Visually it's lovely though, so we hope Ubisoft is fixing the problems ready for release. Wait for our review next issue to find out.

# SHAUN PALMER'S PRO SNOWBOARDER

PLAYERS: 1-4  
OUT: NOVEMBER/DECEMBER  
DEVELOPER: NATSUME  
PUBLISHER: ACTIVISION

We're not at all sure about Mr Shaun Palmer. Apparently he's a loud-mouthed, tattooed, arrogant s.o.b with extreme sports attitude (sigh), prone to making daft pointy hand gestures and mugging for the camera like a tit. But, to give him his dues, he's King of his game and has a habit of winning practically every championship he ever enters, across a selection of extreme sports. Luckily, the game recreates his 'board-based sporting efforts and not his sickeningly 'gnarly' persona.

## SO LONG, SLALOM

Like Tony Hawk's on the GBA, Shaun Palmer's Pro Snowboarder mixes 'real-life' tricks and race challenges with

The cool multiplayer action is something that TH2 lacked

Jump and grind. There are loads of obstacles to use on each track

Hit the slippery halfpipe and try to rack up a ridiculously sick score

objectives, such as collecting various objects on each slope. These goals are laid out at the start of each level and then you take to the chilly wintry air with your feet strapped to an ironing board. The key difference between Shaun and Tony is that in Palmer's game you're always tearing downhill, making it impossible to collect missed objects and severely limiting your freedom to roam.

The game's still fun and there are loads of gameplay modes crammed in, but it's doubtful it'll meet the standard set by the outstanding Tony Hawk's 2.

Seems a shame you can't drive the digger

# MAT HOFFMAN'S PRO BMX

PLAYERS: 1-2

Given the choice to go out for a beer with Mat or Shaun, we'd choose Mat if we wanted to avoid getting beaten up/arrested/killed. But when it comes to deciding whose game we'd rather play, Shaun easily wins. There are still some finishing touches to be made to Mat's game, but our minds have been made up.

## TONY'S STILL KING

Get beyond the digitised bikers in the title screens and you're presented with an oddly deformed cyclist in jolly arenas, as if somewhere between the character select screen and the start of the game someone went all super-cutesie Japanese. It also plays just like the GBC version released a few months back and that's not a good sign for this supposedly flagship GBA title.

Another extreme sport, another crazy trick name. Fulanu indeed...

## ECKS VS SEVER

PLAYERS: 1-4  
 OUT: NOVEMBER  
 DEVELOPER: CRAWFISH INTERACTIVE  
 PUBLISHER: BAM! ENTERTAINMENT

First-person madness! Yep, it's all kicking off on the Game Boy Advance front, with yet another new first-person shooter camping out ready to headshot its way to the very top of the handheld FPS heap. Ecks Vs Sever throws you into the boots of rival government agents Ecks and Sever, with a different story and missions depending on who you choose to play as.

### ECKS VS SEVER VS DOOM

With the same control interface as Back Track and the forthcoming Doom, strafing is achieved on the shoulder buttons and works fine, though it's frustrating not being able to look up and down. The game's challenging and the story looks promising, but it'll be going up against Doom which has already been hailed as the Daddy by many. Find out which is best next month.

## INCOMING!

They're coming for Christmas - expect a full hands-on next issue

**ISS:** Konami's renowned football brand is the acknowledged uber-footie game for consoles and now it's looking to become king of the handheld soccer scene as well. It's just like the SNES version and has a full digitised commentary! Get in.

**MOTO GP:** The first motorbike racer on GBA should come up with the goods for racing game fans tired of cartoon racers. As long as it has got the pseudo 3D, Mode 7 trickery we reckon it'll be alright. If it hasn't we'll be cutting its brake leads in protest.

**GRADIUS:** The classic shooter returns once more in a full GBA update. Expect eight brand-new high-speed scrolling levels, cool special effects and many a mega-boss fight. Visually it's gorgeous, and we'll be happy as long as there's no slow-down.

**SUPER BUST-A-MOVE:** Bub and his gaggle of mental buddies make their GBA debut. Looks like it'll offer the traditional puzzling of the first Bust-A-Move games and choosing to ditch the awkward pulley system of later games. You know it'll be good.

## SUPER DODGE BALL ADVANCE

Based on the old game where kids chuck a tennis ball at each other - if you're hit, you're out - Super Dodge Ball Advance takes this stupidest of pastimes and turns it into what's shaping up to be a pretty cool videogame.

### FEEL MY BALL

Each player on every team has their own health bar, and the aim is to take out all the opposing team's players by knocking them all out. There are more than 50 acrobatic super throws and loads of attack methods you can use to wipe out the other team, and of course when you're under attack you can dodge or catch the ball. Duh. It might sound a bit dull, but SDBA offers up strategic and skillful diddy sports action that's offbeat and addictive. Plus it looks good too.

Forget the lacklustre Ubi Soft Dexter game, this is the choice of the true fan. Dexter on GBA captures everything that makes the cartoon such a hit with kids and clued-in oldies too, from the OTT music to the excellent visual style. Dee Dee's gone and cloned herself and now there are hundreds of mini Dee Dees bombing about the lab and breaking machines.

### ATTACK OF THE CLONES

Dexter's got loads of gadgets at his disposal and he has to capture all of the clones by using the special extendo-claw device to first grab them, then ferry them back to the clone machine to restore his sister bit by bit. New areas of the massive lab are unlocked according to how many Dee Dees you've nabbed. It's looking quirky and cool but may turn out to be a touch repetitive.

Thwap! Wrestlers in the ring throw shapes, but we're not impressed

We've got a special CVG Game Boy games testing den, with Formica chairs moulded to our asses and halogen lamps angled over our heads for minimum screen glare. Sometimes we jump about, lost in a world of multiplayer Mario Kart joy. Other times we'll sit cross-legged, stroking our beards as we discuss the state of play of the handheld entertainment scene. This month's topic: why do some games companies spend so much time getting the front end of games to look so tasty when the actual gameplay is a load of old tosh?

### WWF OFF!

We've played the debut GBA WWF game and hope the code we received was an early version. Get beyond the flashy entrance sequences and impressive amount of gameplay modes, and you're left with the most average kind of fighting game imaginable. Clunky, unresponsive controls, ropey visuals and the feeling that you're not really in control mar the wrestling experience considerably. We hope it'll be tightened up and tweaked before release, because for £35 you could pick up a copy of the first two SmackDown! games on PSone and have a much better time.

It looks wicked and plays brilliant - joy!

Be afraid - you WILL want to play the new Powerpuff Girls game. Don't believe us? Then check the awesome screens and look at the funky graphics and comedy baddies. Still not sure? Well how about the fact the game plays like classic

shoot 'em-ups Gradius and R-Type, complete with complex power-up systems and mid and end-of-level boss fights?

### FLY, MY PRETTIES!

You cycle through the three flying girls with the L button - each has a different weapon, and baddies and power-ups are colour-coded to each girlie. So if red-dressed Blossom takes out a red demon, she'll score higher points and bigger bonuses than if she busted a green wasp creature. It's cute, but it rocks out loud.

# Dead COOL

From camo to coffin – how would you customise your console?

Why do makers of rubbish games bother including unlockable stuff you'll never see because you couldn't be bothered to play that far? Instead, all publishers should give away free air miles for every hour you spend hammering your joypad. Dan would have enough points clocked up to fly to Uranus and back, paid for by the Erotica Island guys.

But, no matter what game you play, one thing never changes – your console. It looks the same today as it did the trillion hours of playtime ago when you first sat down in front of it. And, no matter how fantastically designed it may be, after a while you may catch yourself wishing it looked sicker, different, more YOU. So, in the great tradition of bored gamers trying to avoid being the one who goes out to get the kebabs in, CVG has come up with how we'd like to see the current generation of uber-consoles customised. Check out what everyone thought up with while Jenny was getting the chilli sauce.

Maybe you're sitting there thinking, "I could do better than that". So do it then. Here's your chance to come up with the king of customisation concepts. Just sketch your idea out on the cool postcards free with this issue and mail it to us at the usual address. We'll print the best and ridicule the rest. Maybe the likes of Sony will love your idea and pay you loads of dosh to use it. Unlikely, but a damn sight more likely than getting any cash out of us. The best entries will have to settle for a cool CVG T-shirt instead. CVG Insider returns next month.
